British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

A WARNING TO BUSINESS HOUSES.

The Canadian Manufacturers' Association has received a number of complaints during the past few weeks about unscrupulous merchants in the British West Indies and South America who have obtained from several Canadian firms goods valued from $200 to $1,000.

The method adopted is to send to Canadian houses for a bill of goods, giving the name of some reputable house in Europe as a reference. In a number of cases where the amount has not been too large, the dealers have written to Europe and then shipped the goods before the replies came. In every case reported the European houses know nothing of the people who named them as reference. It also appears that the Southern merchants have been working the game the other way about, as the Canadian Manufacturers' Association received two letters during the past week stating that they had been given to British firms as references. The matter will probably be taken up with the Dominion Police.

OVER $61,000,000

of Insurance is now held in force by The Great-West Life Assurance Company.

This figure has been reached in less than nineteen years, and is a clear indication of the value of the Great-West Policies.

Low rates of premium are charged, and high profits are paid to Policyholders. The chief reasons for these desirable conditions are:—

1. **The high rate of interest earned on investments (for many years over 7%).**
2. **A very favorable mortality record.**
3. **Low expense rates.**

LONDON, ONTARIO

1910

The past year showed progress in every Department.
We wrote more business than we ever did.
Our Assets amount to nearly a million and a half
Our Reserves for the Security of Policyholders are nearing the million mark.
Our Death rate was small, showing careful selection, and was paid for twice over by our Interest income.

W. M. GOVENLOCK, Secretary. **JOHN MILNE, Managing Director.**

BUSINESS MEN, ETC.

MOOSE JAW

the live-wire city of Saskatchewan—possesses all the requisite factors for the above, and makes a SPECIFIC OFFER of (1) strategic location, (2) unrivalled shipping facilities, (3) desirable warehouse sites, (4) low taxation (5) every modern business facility and (6) unlimited demand.

Population Seventeen Thousand

Assessment	$15,000,000.00
1910 Building Permits	3,000,000.00
1911 Municipal Improvements	700,000.00

MOOSE JAW

as a city, stands entirely upon its merits and the achievements of its citizens, and with all other things equal

LOCATION IS EVERYTHING

If you are contemplating a western location for a factory, a wholesale or distributing house, a flax mill, or western headquarters of whatever description, investigate the present opportunities and future possibilities of this prosperous city. MOOSE JAW is the mirror which reflects the prosperity of the Prairie Provinces.

Correspondence Invited.

INVESTMENT AND LOAN COMPANIES

Investment vs. Speculation.

> "A high return should at once excite suspicion in the mind of the prospective investor."
> —Financial Post.

There are securities which promise a high rate of interest and the chance of an increase in value, but for those dependent upon the income from their investments, or endeavouring to lay up money for their old age, they are too speculative. With such, the Bonds of the Canada Permanent Mortgage Corporation are a favourite investment, because they know that if they invest $1,000 in these Bonds, they will get the $1,000 when it becomes due, and that the interest upon it will be promptly paid in the meantime.

These Bonds may be obtained in any sum from one hundred dollars upwards. They are, therefore, available for the investment of small sums.

HUDSON BAY.

The distance from Churchill to Liverpool is 2,926 miles, and from Port Nelson to Liverpool, 2,966 miles. The Canadian government railway will probably run from The Pas, north of the Manitoba boundary, to Fort Churchill. The Temiskaming and Northern Ontario Railway will probably be extended from Cochrane to James Bay, or more likely to some point on Hudson Bay. These facts give additional interest to any authentic information respecting the Hudson Bay region. Mr. R. W. Brock, the director of the Geological Survey, accompanied Earl Grey in his recent trip to that territory, and made some notes of value. The party left Winnipeg and travelled down the Red River across Lake Winnipeg to Warren Landing at the outlet of the lake, and from there down the Nelson River to Norway House. From that point the canoe route was followed via Hayes to York factory. By small steamer six hundred miles across Hudson Bay to Hudson Straits were then traversed.

Large areas of land suitable for agriculture lie to the north. Mr. Brock says that soil became more noticeable near Oxford House, until later no rock exposures were seen. In place, artificial drainage will be necessary to render the land fit for agricultural uses. At Norway House wheat, barley, vegetables, small fruits, cucumbers and melons have been cultivated. At York, potatoes and some vegetables have been successfully raised. But the area near Hudson Bay, while perhaps suitable for ranching and dairying, is probably outside the limit for ordinary agriculture.

The whole country from Lake Winnipeg to York is timbered. As in other parts of the country, the forest wealth has suffered repeatedly from fires. Where the original forest is preserved, merchantable sizes may be expected in the upper portion of the district and pulpwood for some distance down. It seems unlikely that the timber will prove of great value except for local purposes.

Mr. Brock gives an interesting description of Hudson Bay, which has a length of about 900 miles and a maximum width of 600 miles. The east coast, which is composed of Pre-Cambrian rocks, is rugged, but the west coast from the mouth of Rupert River at the head of James Bay to the mouth of Churchill is low and flat, being underlain by flat-lying Palæozoic rocks. At ebb tide wide, often boulder-strewn, mud flats are exposed. From Churchill north, the Pre-Cambrian rocks obtain and the coast becomes rugged.

York Factory is situated on the narrow point of land which lies between the mouths of Hayes and Nelson

Rivers. Both have funnel-shaped mouths opening northeastward, the Hayes being about three miles across and the Nelson about fifteen, but rapidly narrowing up stream.

The sediment brought down by the rivers, particularly by the Nelson, has silted up the mouths of the rivers and formed a huge bar, that extends for many miles out to sea. As the Nelson is one of the large rivers of the world it may be expected to maintain a well-marked channel through the bar, but the Hayes is rapidly silting up with the material discharged by the Nelson. Fort Churchill is situated at the mouth of Churchill River on a tidal lagoon enclosed by rock ridges, that form a fine, well-protected, though somewhat circumscribed natural harbor. It lies within the barren grounds, but only a short distance beyond the northern limit of the forest. On both sides, a few feet above high tide, are dry sandy flats, parts of an old raised beach. Several other gravel beaches are found on the sides of the hills and up to their summits. These raised beaches are also marked features along Hudson Strait and all the way down the Labrador coast. The rocky ridges that enclose the lagoon rise to heights of from 60 to 100 feet, and are composed of a massive, coarse-grained feldspathic, arkose quartzite. In the quartzite are a few irregular quartz veins up to a foot in width and a few small pegmatite dykes. From the physiography it is impossible to say whether the bottom of the lagoon has a thick mantle of gravel, and thus would be easy to deepen by dredging, or whether it has practically a rock bottom; but it is quite possible that it has the former. On Coats or Mansfield Island the sedimentary rocks of the lower Palæozoic could be seen.

Sagluk Bay, which is on the south side of Hudson Strait between Cape Wolstenholme and Cape Weggs, is a fine harbor about 8 miles long enclosed between hills about 500 to 1,000 feet high. The mouth is about a mile wide. Soundings gave us 10 fathoms of water over the bar at the entrance. The rocks are gneisses and granite with heavy trap dykes. No other rocks than these Laurentian gneisses and granites were seen until the Labrador coast was reached.

No economic minerals were oberved at the points touched at on the Hudson Bay and Hudson Strait, and little is known of the mineral possibilities of this section as, except on the east coast of Hudson Bay where some prospecting has been done on the iron ore formation, the territory is still unprospected. The observations of explorers, however, would indicate that there are opportunities here for prospecting, and if anything is found there are no natural difficulties that would prevent mining. On the west coast of Hudson Bay south of Marble Island, Tyrrell has found promising showings of copper ore (chalcopyrite). Iron ore formation occurs along the east coast of Hudson Bay and on the west shore of Ungava Bay, and as previously remarked, the widespread occurrence of boulders of iron formation makes it probable that it may be found at other localities. Mica is being mined at Lake Harbor on the north side of Hudson Strait. Graphite occurs in extensive bands to the south of Port Burwell. Gold has been found at the head of Wager inlet, and argentiferous galena, and molybdenite have also been noted.

On account of its great size and length of coast-line, a tremendously large territory is tributary to Hudson Bay. At present it is unprospected, but when the railway is built to the bay, access to all this territory will be comparatively easy and prospecting will no doubt be undertaken. Having regard to the results obtained from prospecting similar formations in Northern Ontario, it is only reasonable to suppose that prospecting in the Hudson Bay district will result in some gratifying discoveries.

WESTERN CANADA.

Prospects in Western Canada are excellent. The optimism of the prairie provinces is as pronounced as ever, and supported with substantial business conditions. Conservative prophets agree on a yield in the West of 200,000,000 bushels. Allowances must be made for the vagaries of the weather, but they should not change the figures unfavorably by any more than 50,000,000 bushels, even if that much. The crop outlook is one of the best in recent history. If rain, moisture and sunshine perform their allotted tasks in due proportion at the right time, and hail, rust and frost remain in hiding, the Western farmers will receive a small fortune for their products. This will be circulated throughout the country during the autumn and next spring.

The railway companies are confident of their ability to handle the crop movement. Their mileage is greater. Rolling stock has been increased considerably. Arrangements are perfected for moving the crop with the greatest rapidity and economy. The banks have been preparing for the financial strain upon their resources occasioned by the movement of the wheat and grain from the West to the head of the lakes and to their final destination. The financial institutions are well prepared to finance the movement of the crops without unduly curtailing credit in other directions. The amount of money on call in New York is being greatly reduced to assist the situation. The chief problem appears to be that of harvest labor. The farmers, railway companies and provincial governments are endeavoring to solve this by searching the country from coast to coast for every available harvest hand.

The large amount of money being received in Western Canada from Great Britain and foreign countries helps the financial position. Without this outside capital, the West might possibly have experienced slight financial stringency. The loan companies find a heavy demand for their resources. The increasing value of Western farm lands is creating a problem for solution by these companies. Money is being loaned very freely, some are inclined to think too freely.

Unfortunately, the real estate situation is being seriously endangered by the subdivision craze. Estates throughout the West have been purchased by enterprising promoters, often having no interest in a town's development, anywhere from five to twenty miles beyond the city limits. These are purchased by the acre, subdivided and sold by the foot at a large advance. The prices are unreasonable, and discount the future to an absurd extent. The average subdivision may well be regarded by the investor with suspicion.

Western Canada, generally speaking, is beaming with prosperity and an undoubted future of great value.

SMALL CHANGE.

That there exists a gigantic arson trust, with headquarters in Kansas City, is the charge made by Mr. C. J. Doyle, the Illinois State fire marshal. The business of the combine is to set fire to buildings, enabling the owners to collect large sums of insurance. Two of the gang, which numbers fifteen, have been convicted and are serving a prison term. Mr. Doyle, with three other state fire marshals, are uniting efforts to extinguish this dangerous operation. In Canada we suffer from far too many incendiary fires. The appointment of provincial fire marshals would do much to check that. Fires are one sign of hard times. It is difficult to trace their origin, and even when arson is suspected, to place the guilt.

CAPITAL INVESTMENTS IN CANADA

—XIII.—

CANADIAN BANKS, BRITISH AND FOREIGN CAPITAL

By Fred. W. Field.

A fairly large amount of foreign capital has been placed in Canada by the purchase of Canadian bank shares. The following table gives details as to the approximate amount:—

Germany	$1,096,150
France	284,750
Italy	32,700
Spain	12,350
Sweden	3,300
Japan	2,100
Belgium	1,650
Servia	1,500
Austria	1,250
China	1,200
Russia	800
Turkey	750
Brazil	600
Holland	400
Cuba	100
Mexico	50
Total	$1,439,650

The investment of the Dresdner Bank of Germany in the defunct Sovereign Bank of Canada, amounted to $1,000,000, and is the second largest individual sum placed by a foreign country in Canadian bank stock. It is possible that a small proportion of the amount tabulated above represents bank stocks purchased by Canadians in Canada who later removed to foreign countries.

Purchase of Bank Shares.

Large and numerous purchases have been made in Great Britain of Canadian chartered bank shares. These investments extend over a greater period than five years, in which time the investment was approximately $1,125,000. This sum represents but a small percentage of the total British investment in bank shares. As is known, The Molsons Bank sold $2,000,000 worth of its stock to a London syndicate.

It is highly probable that British capital will play a larger part in Canadian banking. The wheat area of Canada twenty years ago was 623,245 acres. In 1910 it was estimated at 8,377,949 acres, a gain in that period of 1,244 per cent. While the increase in acreage may not prove so remarkable in the next twenty years, it will certainly be large. Before then, one of two things will probably happen—the introduction of European aid in crop financing, as has been the case in the United States, or the increase in the total available bank capital in Canada. The tendency of banking in this country has been to the conservation of banking strength in a comparatively small number of banks. For instance, in 1889, we had 41 chartered banks, which number ten years later had been reduced to 38, and in April, 1911, to 27. On the other hand, the number of bank branches has more than made up for the diminution of the head office total. Two years ago the number of bank branches was 1,608; in April, 1911, it was 2,434, with additional branches in the United States, England, Newfoundland, the West Indies, France and elsewhere.

Canada Offers Best Bank Stock.

While the bank figures show astonishing increases during the past forty years, the paid-up capital figures do not show such large gains proportionately as do other items. The paid-up capital of Canada's chartered banks in June, 1869, was $30,289,048. In March, 1911, it was $97,441,842, a gain in 42 years of 221 per cent.

In view of these considerations, the introduction of British capital by the sale of a large block of Canadian bank stock in England is of unusual interest. In connection with this, the British investor must remember the double liability clause of our Bank Act. Colonial bank shares have complications of their own, the principal one being reserve liability, which in some cases is equal to the amount of a share, and in others double. The fact that there is such a great variety of bank shares known to the London investor causes him to study carefully the exact position of any given share. This is one of the chief reasons why bank shares are so little dealt in on the London Stock Exchange, but comparing those of the various overseas Empires, it is safe to say that the Canadian bank share offers the greatest attractions.

A new development was the purchase by British capital of a block of shares of the Molsons Bank, a public flotation of £100,000 of this block being later made in London. An offer was also made for a block of shares of the Union Bank of Halifax, which institution, however, was absorbed by the Royal Bank of Canada.

French Capital for Banks.

The most important development in banking spheres along this line is the chartering of the International Bank, promoted by Mr. Rodolphe Forget, M.P., of Montreal, and backed with $7,000,000 of French capital. It has been suggested that this new bank will not cater solely to the country's commercial needs. Therefore, one may, perhaps, anticipate that through his new institution he will loan money to stock brokers, underwriters and promoters. In short, the Bank of Canada will be a stockbrokers' money institution. To some extent, Mr. Forget is already doing that business, as several times his willingness to loan any part of one million dollars has been reported. Our chartered banks have always regarded Canada's industrial and commercial needs of primary consideration. For this reason perhaps stock exchange trading has suffered to some extent, the banks loaning money on call to brokers and withdrawing it at the first sign of pressure from commercial spheres. With the exception of times of panic and extreme depression, nearly all complaints regarding money stringency have emanated from brokers and their colleagues. A bank, therefore, inaugurated for the special purpose of catering to that market, and honestly operated, should prove successful.

There are several reasons for supposing that the Forget bank, which will be largely supported by French capital, will not attempt to cater to the financial necessities of captains of industry. The Forget bank is an experiment in Canadian banking. French capital probably understands that fact. Mr. Forget thus has considerable responsibility on his shoulders. If the bank succeeds, the increase in the influx of French capital should be large. If the institution finds that profits from financial banking are not as great as anticipated, it will mean a decided blow to the cause of French investments in the Dominion.

Canadian Enterprise Abroad.

It is Mr. Forget's opinion that periodical money stringencies experienced not only in brokers' spheres, but also in business circles, is caused by Canadian enterprise abroad. The Dominion, he says, is beginning too early in her career to father these enterprises which have, however, met with considerable success in Mexico, South America and in other parts of this hemisphere, although not under the British flag. England and France, each country having a plethora of money to embark in foreign enterprises, can do this well, but Mr. Forget does not think that Canadians should send money out of the country when there are so many places awaiting development all over the Dominion.

In selling exchange in his own business since he had established financial relations with France on a fairly large scale, Mr. Forget said that in many instances he had received replies to the effect that banks were not in the market, so he is of the opinion that another large bank will relieve the situation generally, and the fact of four French directors sitting on the board and keeping in touch with the financial and commercial pulse of the Dominion cannot do otherwise than bring the resources and general development of the country into greater prominence amongst the financiers of England and the Continent, and especially in France. The new bank will have nine directors, five in Montreal and four representing the European interests.

Bank Branches Abroad.

As a side light on this weaving of international banking relations, it is interesting to note that at the end of March, 1911, 29 Canadian chartered banks, besides their 2,420 branches in Canada, had 64 branches elsewhere, as follows:—

Country.	No. of Branches.
England	5
France	1
Mexico	2
United States	14
West Indies	31
Newfoundland	11

There are many German colonies in various parts of the Dominion, and it is not unlikely that one day a German bank, co-operating with a Canadian bank, will cater especially to the financial needs of these colonies. It is thought in this way that a far greater amount of business will result.

Little Help from United States.

Another indication of international banking relations is seen in the following dispatch wired from Winnipeg on April 26th:—

> "Speaking of the financial side of the movement of American settlers into Canada, Canadian moneyed men will do well to cultivate the business of these new-comers. Thousands of these settlers send back to the United States for their financial wants. As reported in the States, the branch banks of Western Canada seem to send their funds to the large financial centres, and farmers find trouble in securing the money necessary to expansion. As a result they turn to the banks and money lenders 'back home,' and thousands of dollars, which under different conditions would remain in Canada, come back to the United States as interest on loans made to Americans in Canada.
>
> "There are many hundreds of thousands of Omaha dollars held in Canada, and only recently a coterie of Omaha moneyed men advanced over $220,000 in cash and over half a million in credits to finance one single enterprise in British Columbia."

While there may be some small basis for this report, undoubtedly it is exaggerated. Considerable money is loaned on mortgages by American financiers and mortgage companies, but it is doubtful whether any banks in the United States, which may be compared with the Canadian chartered institutions, are lending money as indicated in the above dispatch.

Loans of Financial House.

During recent years several Canadian financial institutions have obtained capital in England, as the following table shows:—

Financial:	
1906.	
Trust & Loan Co. of Canada	£500,000
1908.	
North of Scotland Canadian Mortgage Co.	£175,000
Trusts & Loan Co. of Canada	200,000
	£375,000
1909.	
British Columbia Development Association	£61,140
1910.	
British Columbia Development Association	£ 39,500
Dominion of Canada Trust Corporation Ltd.	400,000
Canadian & Empire Investment Trust Co., Ltd.	250,000
Union Life Assurance Co. of Canada	205,761
British Columbia Mines, Land & General Finance Co.	100,000
British Columbia Mines, Land & General Finance Co.	100,000
British Canadian Trust Co.	250,000
Dominion of Canada Investment & Debenture Co.	250,000
The Molsons Bank	100,000
	£1,695,261
1911 (to April).	
Trust and Loan Co. of Canada	£ 300,000
Scottish and Canadian General Investment Co. Ltd.	250,000
Western Canada Investment Co., Ltd.	200,000
Investment Corporation of Canada, Limited	500,000
	£1,250,000

The Trusts and Loan Company of Canada, the head office of which is in London, has obtained £1,000,000 during the past five years, having raised three separate loans. The British Columbia Development Association was twice a visitor to the overseas market, borrowing altogether £100,640. Only one life insurance company and one bank sold its securities in London. In the case of the bank, the stock was purchased by a British syndicate and marketed by them in Great Britain. There will likely be a development along these lines during the next few years, as the tendency is to weave British-Canadian financial company relations.

◆

NEW INCORPORATIONS.

Capital of New Companies Amounts to Over Fourteen Million Dollars—Many Real Estate and Investment Concerns.

Forty-one companies with a total capitalization of $14,697,500 were incorporated during the past week.

International Assets, Limited, with head office in Toronto, Ont., and capital of $4,000,000, is the largest company to be granted a charter. This is a new investment company with wide powers, and the provisional directors named are Messrs. A. C. Macdonald, W. J. Boland and J. F. Boland.. The following companies have capital of $1,000,000 and over: City Realty Investing Company, of Montreal, Montreal, $2,500,000; Canada First Mining Company, Toronto, $1,800,000; Frontenac Breweries, Montreal, $1,000,000; Otard Bay Oil and Coal Company, Vancouver, $1,000,000; Northern Terminus Mines, Victoria, $1,000,000. The majority of the companies incorporated are real estate and investment concerns.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Herbert, Sask.—Herbert Fair Grounds, $2,600.

Moose Jaw, Sask.—MacLeod Company, $200,000.

Forward, Sask.—Forward Townsite Company, $10.000.

Outlook, Sask.—Outlook Townsite Company, $50,000.

Regina, Sask.—Regina Development Syndicate, $10,000.

Rossland, B.C.—Continental Land Company, $100,000.

Weyburn, Sask.—Canadian Investment Company, $500,000.

Muenster, Sask.—St. Peters Colony Supply Company, $100,000.

Swift Current, Sask.—Eagles Hall Association of Swift Current, $50,000.

Peachland, B.C.—Western Okanagan Orchards Company, $200,000.

Oshawa, Ont.—Bricks, .$40,000. J. D. Store, A. G. Storie, S. J. Storie.

Prince Albert, Sask.—North Saskatchewan Cold Storage & Fish Company, $100,000.

Peterborough, Ont.—Peterborough Health Association. W. H. Moore, J. W. Bennet, E. A. Peck.

Ottawa.—Anglo-French Financial Co. of Canada, $50,000; J. L. Biggar, T. A. Burgess, E. H Spearing.

Waterloo, Ont.—Roxton Mill & Chair Manufacturing Company, $50,000. J. H. Poirier, A. Langevin, O. Denault.

Black Lake, Que.—Compagnie de Meubles de Black Lake, $99,900. J. O. Roy, Richardville; D. Wilson, P. Poudrier, Black Lake. H

Vancouver, B.C.—British Columbia Clean Towel Supply, $50,0000. Otard Bay Oil & Coal Company, $1,000,000. Mission Confectionery Company, $50,000. Imperial Club, $5,000.

Port Arthur, Ont.—General Realty Corporation, $500.-000. J. H. Spence, J. R. L. Starr, M. C. Cameron. West Algoma Protestant Orphanage, J. H. Woodside, F. S. Wiley, I. L. Matthews.

Victoria, B.C.—Central British Columbia Publishing Company, $50,000. Park House, $100,000. Northern Terminus Mines, $1,000,000. Island Construction & Development Company, $500,000.

Toronto.—Lost and Found Mining Company, $40,000. G. Cooper, S. W. C. Scott, H. W. Male. Hastings Quarries, $100,000. R. P. Saunders, N. S. Macdonnell, Miss T. Burns. International Assets, $4,000,000. MONTREAL ASSESSORS MAKE REPORT.

Some Population Statistics—Merger of Lake Steamers is Denied—Railway Will Shorten Route to Quebec.

Monetary Times Office,
Montreal, August 2nd.

The Canadian Pacific Railway is making arrangements to shorten its line from Montreal to Quebec. The line at present passes northwestward, from the city of Montreal across the island and over the Ottawa River until it reaches St. Martin's Junction, or Quebec Junction, a distance of about twelve miles from Montreal, when it turns in the direction of the city of Quebec. This makes a considerable detour which it is desirable to avoid. In addition to the extra mileage, as compared with a more direct route, the section of line traversed to the Junction is much travelled. It is used by all the trains going up into the Laurentian Mountains, besides which it is a portion of the Canadian Pacific Railway north shore line to Ottawa, so that the traffic is very heavy and the large number of trains which have to be handled necessitate frequent delays in the interests of safety.

The Canadian Northern line now starts from Montreal in a direct line for the city of Quebec. Thus it crosses the Ottawa at the eastern extremity of the island of Montreal. This is the territory through which it is expected the Canadian Pacific Railway will build its shortened line. It is claimed that the engineers are now taking soundings for a new bridge, which will be built near the present Canadian Northern bridge. It is expected that connection will be made with the present line near L'Epiphanie, about thirty-five miles from Montreal. The company has already made application to the Railway Commissioners for permission to build a line on the island in the direction indicated, and it is said that new shops will be erected along the route, and that a portion of the material being consumed in the different shops of the Canadian Pacific Railway will here be produced. The company will not confirm the report of this intention to build the short line, but allows that it intends building an industrial line from the city towards the eastern extremity of the island.

Merger of Lake Steamships Denied.

The Monetary Times has received a denial of the report that the Richelieu & Ontario merger may be extended to take in other companies, and the capital increased to $20,000,000. The Richelieu & Ontario Company recently absorbed the Northern and the Inland Navigation lines, at the same time increasing it's capital to $10,000,000. The report now is that the Niagara Navigation Company is about to be taken in, as well as the Hamilton Steamship Company and the People's Mutual.

Asked if there was any truth in the report concerning the Niagara Navigation Company, the reply was: "Not at present. The Richelieu & Ontario passenger service would work in excellently with the Niagara Navigation Company if a proper arrangement could be reached. At present there do not seem to be any possibilities of such an outcome."

It has been stated frequently that negotiations were opened up to bring the Niagara Company and the Richelieu & Ontario into closer relationship, but that owing to the extravagant demands of the Niagara Company these negotiations were called off.

Montreal Assessors Make Report.

The civic assessors of the city of Montreal have just issued a special report, in which the value of the taxable property, including exemptions, in Montreal, is now placed at $500,000,000. At the end of 1910 the valuation was nearly $430,000,000, so that the new valuation represents an increase of about $70,000,000. The exemptions amount to about $110,000,000. The increase is largely due to the decision of the city to tax the property in the Harbor of Montreal. The Harbor Commissioners have objected most strongly to the latter proposition whenever it has been mentioned, and it was understood that their objections had prevailed. It would now seem to be the intention of the civic authorities to levy an assessment upon the commissioners' property. The value of this property lying between the revetment wall and the river is placed at $50,000,000. The probabilities are that the commissioners will appeal to the courts to annul the assessment. They claim that such a tax would affect the progress of the harbor. The controllers make the counter-claim that such would not be the case, and that the harbor properties in other cities have to conribute their share of the taxes. Since the end of 1909, the value of assessable property in Montreal has increased $150,000,000, or a little less than 50 per cent. The growth has been due very largely to a number of outlying municipalities which have been taken in during 1910.

Some of the statistics regarding the growth of Montreal, which appear in the advance notice of the Montreal City Directory, are interesting. The population of Montreal and suburbs has now reached the total of 554,000. When the population of Westmount, Maisonneuve, Outremont and Verdun is deducted, the city proper is left with a total population of 488,000, or practically half a million. This population is doubtless based on the directory which contains 158,000 names. The population of Westmount is placed at 17,000, of Maisonneuve at 30,000, of Outremont at 5,000, and of Verdun at 14,000. Last year the directory contained 145,000 names which were estimated to represent the population of 507,000 for the city and outskirts, or 446,000 for the city proper. Hence, there is an increase of population in the city itself of 30,000, and of nearly 50,000 in the city and outskirts. In view of the difficulty that has been experienced in the past in obtaining houses and flats, and even offices, and the high prices demanded as rent, the directory reports as vacant, 3,814 houses, tenements and flats, 391 stores and 264 offices. This includes houses under construction or repair, and which, consequently, are not available for rental purposes.

◆

The largest catch of sockeye salmon ever experienced in the Skeena River is reported from British Columbia for the season begun on June 20th.

General trade in Canada is reported good for this time of the year.

There are 2,544 branches of Canadian banks, 143 of which have been opened during the past six months. Vancouver, B.C., has opened its seventeenth bank.

The quantity of ore despatched from Cobalt during the week ended July 7th was 302 tons.

The Canadian Northern Railway Company has awarded a contract to a firm at St. Paul, Minnesota, for the construction of 550 miles of railway, to cost fifteen million dollars. The line will extend from Port Arthur, Ontario, to Sellwood Junction, north of Sudbury, Ontario.

The total immigration into Canada for the current calendar year will reach four hundred thousand.

The Intercolonial Railway management proposes to spend $500,000 on new rolling stock.

There is an increase in the growth of flax in Canada of 300,000 acres over the area last year. The largest increase is in the province of Saskatchewan.

Canadian building permits show an increase of thirty-nine per cent. for the month of June in twenty-eight cities. Moose Jaw, Saskatchewan, leads with a gain of seven hundred per cent.

Canadian cities again lead in bank clearings for the past week, Edmonton, Alberta, showing the largest proportionate increase.

A sample of the first of the new crop, which has reached market, weighed sixty-two pounds to the bushel, and was exhibited by the Maple Leaf Milling Company. It was grown in Welland, Ontario.

An armoury (barracks) costing thirty thousand dollars, is under construction for Strathcona, Alberta.

PROVINCIAL SECRETARY'S REPORT.

Seven Hundred and Ninety-nine Companies Were Incorporated in Ontario During 1910—Some Interesting Statistics.

Seven hundred and ninety-nine companies were incorporated in Ontario during the year ended October 31st, 1810, according to the annual report of the provincial secretary. Of this number eighty-six companies were capitalized at $1,000,000 and over.

The number of companies whose capital was increased or decreased during the year totalled eighty-four, while fifty-one companies were granted charters without share capital.

The following companies were amalgamated:—

Montreal-Everett Lake Mining Company, Limited, and Silver Country Mines, Limited, under the name of Silver Country Mines Consolidated, Limited, Toronto, March 2, 1910; the Globe Furniture Company, Limited, and the Waterloo School and Office Furniture Company, Limited, under the name of the Globe Furniture Company, Limited, Waterloo.

Thirty Companies Surrendered Charters.

Thirty companies surrendered their charters as follows:—

Caledonia Gypsum Company, Limited, December 29, 1909; American Appraisal Company, Limited, December 11, 1909; the Perfect Skewer Company, Limited, December 28, 1909; the Black Rock Mining Company, Limited, December 23, 1909; Anthes Foundry, Limited, December 14, 1909; the Brandon Shoe Company, Limited, January 20, 1909; Rockliffe Property Company, Limited, December 21, 1909; Wm. Clark & Sons, Limited, February 16, 1910; the Brown Company, Limited, February 21, 1910; the Chesley Rake and Novelty Company, Limited, April 27, 1919; Lockhart Photo Supply Company, Limited, May 11, 1910; the Mutual Natural Gas Company, Limited, May 16, 1910; the Century Christian Company, Limited, May 11, 1910; the Pointe au Baril Hotel Company, Limited, May 25, 1910; Thorten & Douglas, Limited, May 19, 1910; the Watchman-Warder Printing Company, Limited, June 7, 1910; the Toronto Land and Investment Corporation, Limited, June 3, 1910; Evans-Seybert, Limited, June 10, 1910; The Anchor Knitting Company, of Almonte, Limited, July 22, 1910; the Dowswell Manufacturing Company, Limited, July 30, 1910; Thomas Todd & Sons, Limited, August 24, 1910; Magladery Brothers & Company, Limited, September 9, 1910, Bracebridge Brilliant Light Manufacturing Co., Limited, October 8, 1910; the Farmers' Canning Company, Limited, October 3, 1910; North American Sales Agency, Limited, October 3, 1910; the Karn Piano and Organ Company, Limited, May 26, 1910; the Empire Western Townsite Company, Limited, October 26, 1910; the Contractors' Supply Company, Limited, October 21, 1910; Lorsch & Gamey, Limited, October 20, 1910; A. C. Chapman, Limited, October 22, 1910.

The companies to receive supplementary licenses were:—

The Mergenthaler Company, Limited. Change of name to Canadian Linotype, Limited; Mexican Transportation Company, Limited. Change of name to Mexico North-Western Railway Company; Gillies Brothers, Limited; Plymouth Cordage Company. To increase capital; S. F. Bowser & Company, Incorporated. To increase capital; the Lake Erie Excursion Company. To increase capital; Claudius Ash & Sons & Company, Limited. To increase capital; the National Bag and Paper Company, Limited. Change of name to the Continental Bag and Paper Company, Limited, while the following had their capital re-divided:—

The Lea Pickling and Preserving Company, Limited; the Canadian Drawn Steel Company, Limited; the Canadian Autopress Company, Limited; the Harold A. Wilson Company, of Toronto, Limited.

Statement of Fees Received.

Forty-three companies had their powers extended and sixty had their names changed. During the year one hundred and sixty companies were licensed to do business in Ontario, of which 101 were Canadian, 43 American, and 16 British companies.

The following is a statement of the fees received during 1910:—

Letters patent, licences, etc., $183,780.45; companies' returns, $24,058; automobile licences and renewals, $24,394.01; marriage act forms, $4,552.75; commissions under Great and Privy Seal, $1,509; certificates, $173.85; by-laws, copies and searches, $2,803.75; total, $241,271.81.

◆

American capitalists interested in the Long Sault dam project are said to have purchased the Waddington holdings of Mr. W. Ogden of Washington, also that an offer of $12,000 has been refused for Point Iroquois, Ont.

BRITISH COLUMBIA.

Cudahy Packing Company Will Locate in Vancouver—British Capital for the West.

(Staff Correspondence.)

Vancouver, July 29, 1911.

Two men prominent in British Columbia's financial affairs returned this week after extended visits in Europe. Both brought back news of capital coming to western Canada. Mr. John Hendry, ex-president of the Canadian Manufacturers' Association, and interested in many Pacific coast enterprises, says that British capital is looking this way, but the solidity of the opportunities presented must be satisfactorily established to the investors. This same idea is expressed by Mr. Alvo von Alvensleben, who also returned this week. He gives the advice that those who wish to get money in the London market should not go there without having their propositions well prepared. When the British capitalist talks business he talks of things as they are not as they may be.

Mr. von Alvensleben reports the markets of Berlin and Paris keen to get information of Canadian projects, and especially British Columbia. He thinks considerable money will come from Paris during the next few years for investment here, but as there are more small investors in France it is harder to get their confidence. Mr. von Alvensleben sold stock of the Vancouver Timber & Trading Company, amounting to about three and a half million dollars, and raised half a million dollars for investment in Vancouver first mortgages and agreements of sale.

Cudahy Packing Company will locate in Vancouver.

Another visitor was Mr. Patrick Cudahy, president of the Cudahy Bros. Packing Company. He announces his company will establish a branch here. Mr. Cudahy had a little criticism of the railways to express. In his opinion they do not keep pace with the progress of the country, amplifying his remark by stating that they wait until the country develops instead of anticipating growth. It is all right to talk about railroads building up the country," he said, "but it was the other way round."

Mr. J. W. B. Jackson, Canadian trade commissioner in China, who was in the city on his way from the Orient to Ottawa this week, has a suggestion to make in regard to Chinese trade. He says that Canada will never get a footing there unless there is some modification of the $500 head tax on Chinese entering Canada. This restriction is obnoxious to the Chinese, and he thinks the best solution is to grant China a restricted immigration similar to what has been arranged with Japan. Mr. Jackson will deliver lectures in Canada on trade relations with China.

Industrial Interests and Deadman's Island.

Industrial interests have been successful in their fight for Deadman's Island, lying in Coal Harbor, close to Stanley Park. Twelve years ago, Mr. Theodore Ludgate secured a lease of this island, which has a fine commercial situation, but his building a sawmill there was opposed. Since then, litigation has followed, and this week the decision of the privy council was handed down that the city has no power to stop him in his possession. Since the day he got his lease there has been immense development in Vancouver, and now the island is too valuable for a site for a sawmill. It is stated now that two and a half million dollars will be expended in making wharfs and warehouses, etc.

◆

NEW YORK CENTRAL PLANS.

Plans are under way for the merger into a single corporation of the many corporations which now make up the New York Central system. It is by far the most extensive readjustment of railway capitalization ever undertaken.

In connection with the consolidation a new bond issue is proposed in sufficient amount to cover the existing outstanding obligations of the system, besides providing for future capital expenditures. This will mean a mortgage covering bonds to the extent of several hundred million dollars, for the outstanding funded debt of the New York Central & Hudson River Railway itself exceeds $270,000,000. Additions to the funded debt through issues of new bonds will be made only as the necessity for fresh capital expenditures arises. The length of the lines included in the New York Central system exceeds 12,400 miles. These lines earned last year over $260,000,000 gross and more than $63,400,000 net. Exclusive of the securities of subsidiary companies the New York Central is capitalized at close to $500,000,000, of which $222,000,000 is stock and over $270,000,000 bonds.

TRADE OF CANADA ANALYSED

Fifteen Years Commercial Expansion—Trade with the British Empire and the United States—Germany is Making Headway

The trade of Canada has undergone remarkable expansion during the past fifteen years. The total trade in 1897 amounted to 249 million dollars. At the end of March, 1911, the termination of the fiscal year, the total had increased to 759 millions, the largest aggregate amount of trade in the period under review. The increase has continued without interruption, except in 1909, when the returns exhibited a slight decline.

The following table shows the trade of Canada, compiled from the returns of the Department of Trade and Commerce, for the past fifteen years. From 1897 to 1907 the fiscal year terminated on June 30th. Since 1908, the fiscal year has ended on March 31st. This applies to all the tables printed below:—

	Imports for Consumption.	Exports.	Total Trade.
1897	$111,294,021	$137,950,253	$249,244,274
1898	130,698,006	164,152,683	294,850,689
1899 . ..	154,051,593	158,896,905	312,948,498
1900	180,804,316	191,894,723	372,699,039
1901	181,237,988	196,487,632	377,725,620
1902	202,791,595	211,640,286	414,431,881
1903	233,790,516	225,849,724	459,640,240
1904	251,464,332	213,521,235	464,985,567
1905	261,925,554	203,316,872	465,242,426
1906 .. .	290,360,807	256,586,630	546,947,437
1907	354,500,894	258,171,674	612,672,568
1908	358,428,616	280,006,606	638,435,222
1909	298,205,957	261,512,159	559,718,116
1910	375,833,016	301,358,529	677,191,545
1911	461,898,024	297,196,365	759,094,389

Total Imports and Exports.

The total imports for consumption in the fifteen years' period increased from 111 million dollars to 461 millions, a gain of 350 millions or 315 per cent. The total exports changed from 138 millions to 297 millions, a gain of 159 millions, or 115 per cent. Of the imports for consumption 66 millions were dutiable in 1897 and 282 millions in 1911, an increase of 326 per cent. Goods to the value of 45 million dollars came in free of duty 15 years ago and this year 179 millions, the change in the period being 134 millions, or 298 per cent.

Of our exports, 123 millions were Canadian produce in 1897 and 14 millions foreign produce. In March, 1911, the figures had changed to 274 millions and 22 millions, gains of 150 millions and 8 millions, or 121 per cent. and 59 per cent. respectively.

Trade With Three Divisions.

Canada's trade is roughly divided into three classes, trade with the British Empire, the United States and other foreign countries. The following table gives an idea of their comparative importance:—

Trade of Canada with	Imports for Consumption. 1897.	Imports for Consumption. 1911.	Exports. 1897.	Exports. 1911.	Total Trade. 1897.	Total Trade. 1911.
British Empire	$31,671,959	$129,431,348	$82,238,023	$154,335,874	$113,909,982	$283,767,222
United States	61,649,041	284,934,739	49,373,472	119,203,201	111,022,513	404,137,940
Foreign Countries	17,973,021	47,531,937	6,338,758	23,657,290	24,311,779	71,189,227
Total Trade	$111,294,021	$461,898,024	$137,950,253	$297,196,365	$249,244,274	$759,094,389

Gains in Trade.

The gain in Canadian total trade with the British Empire was 169 million dollars in the fifteen years. The gain in trade with the United States was 293 millions and with foreign countries 47 millions. The growth in trade in these three divisions respectively is best seen in the following table complied by The Monetary Times:—

Trade of Canada with	Gain in imports for consumption 1911 over 1897 Mlns. of $	Per cent.	Gain in exports 1911 over 1897 Mlns. of $	Per cent.	Gain in total trade. 1911 over 1897 Mlns. of $	Per cent.
British Empire ..	97	309	72	87	169	149
United States ...	223	362	69	141	293	263
Foreign Countries	29	165	17	283	47	195

The United States shows the biggest percentage gain so far as our import trade is concerned in the fifteen year period. The largest increase in our exports was 283 per cent. in our foreign markets. The greatest gain in total trade applies to the United States with 263 per cent. The British Empire makes a good showing with an import gain of 309 per cent., compared with the neighboring Republic, whose percentage in the Canadian import trade was 362 per cent.

Figures Last Year.

Analysing the trade of Canada for the latest year, it is seen that the total of imports entered for consumption last year was $461,898,000, and the total of the exports of Canadian produce was $274,316,000. The merchandise represented by these figures came from and went to the following countries as follows:—

	Imports from	Exports to
United States	$284,934,000	$103,922,000
United Kingdom	109,883,000	132,350,000
France	11,563,000	2,535,000
Germany	10,047,000	2,028,000
British W. Indies	6,391,000	4,459,000
British Guiana	3,877,000	614,000
Belgium	3,571,000	1,908,000
Japan	2,423,000	615,000
Newfoundland	1,818,000	3,714,000
Italy	962,000	374,000
New Zealand	907,000	999,000
British Africa	704,000	2,330,000
Australia	511.000	3,900,000

As regards imports, it will be seen that the greatest quantity, over 61 per cent. of the total, came from the United States, in face of maximum tariff duties, where duties applied, while less than 25 per cent. came from Great Britain, whose exporters have the advantage of the preferential tariff.

Dutiable and Free.

Despite the British preference, Great Britain's proportion of dutiable exports to Canada has remained high in the past fifteen years. The following table illustrates this point:—

Imports for consumption from	1897. Mlns. of $ Total	Dutiable	Free	1911. Mlns. of $ Total	Dutiable	Free
United Kingdom ...	29	20	9	109	84	25
United States	61	30	31	284	153	131
Foreign Countries.	18	14	.4	48	34	14

In 1897, of Great Britain's total trade of 29 millions, 20 millions or nearly two-thirds was dutiable. In the case of the United States, with total trade of 61 millions, 30 or one-half was dutiable. More than three-fourths of our exports from foreign countries were dutiable in a total trade of 18 million. In the last fiscal year, 84 millions of the United Kingdom's total exports to Canada, amounting to 1909 millions, were dutiable. In the same year our imports from the United States were 284 millions, of which 153 millions were dutiable. Canada's imports from foreign countries in that year totalled 48 millions and 34 millions of that merchandise was dutiable. The benefits of the British preference do not appear to be clearly defined in these figures.

In view of the suggested appointment of a Royal Commission to investigate trade conditions in the various parts of the British Empire, it will be interesting to tabulate the details of trade with the Empire during the period under review:—

Year.	Total Imports.	Total Exports.	Total Trade.
1897	$ 31,671,959	$ 82,238,023	$113,909,982
1898	34,526,353	110,782,055	145,308,408
1899	39,893,887	104,707,000	144,600,887
1900	48,396,003	114,782,267	163,178,270
1901	46,852,904	113,383,157	160,236,061
1902	53,895,821	129,070,620	182,966,441
1903	65,010,271	141,975,986	206,986,257
1904 .. .	72,889,146	128,951,609	201,840,755
1905	72,430,750	113,877,323	186,308,073
1906	83,804,027	144,311,803	228,115,830
1907	103,877,713	138,692,878	242,570,591
1908	111,240,895	147,748,085	258,988,980
1909	87,042,250	147,297,851	234,340,101
1910	111,798,417	165,364,091	277,162,508
1911	129,431,348	154,335,874	283,767,222

amount dutiable changed from 21 millions to 96 millions, a gain of 75 millions, or 150 per cent. Free imports increased from 10 millions to 33 millions, a gain of 23 millions, or 224 per cent. The total Canadian exports to the various parts of the British Empire were valued at 82 millions in 1897 and 154 millions in 1911, a change of 72 millions, or 87 per cent.

Our exports of purely Canadian produce changed from 74 millions to 149 millions, a gain of 75 millions, or 101 per cent. Exports of foreign produce from Canada to the British Empire have fluctuated to a great extent. In 1897 they totalled 8 million dollars; 1899, 14 millions; in 1903, 6 millions; in 1905, 5 millions. In 1910, they had increased to 10 millions, higher than in any year since 1901, but last year they dropped to 5 millions, or nearly half the previous year's figures. The decrease in the fifteen year period was 3 millions, or 56 per cent.

One of the chief causes of these variations is the shipment of grain of United States production to the United Kingdom via Canadian ports. In the difference noted above, this was evidently the case. In the March, 1911, report, statistics are found as follows:—

	1910.	1911.
Export of foreign corn to United Kingdom	$ 107,360	$1,542,787
Export of foreign wheat to United Kingdom	9,271,036	2,430,243
Total	$9,378,396	$3,973,030

The difference between these two totals is $5,405,366. The difference in the total export of foreign produce to the British Empire for the two years was $5,252,282; so that it is more than accounted for in these two items alone. Examining the statement of exports in the March report, considerable variations are found in many other items, some showing increases and some decreases of foreign goods exported. The reason for these variations in exports is practically impossible to account for. In the case of the United States grain exported through Canada, transportation conditions probably play an important part.

British Africa and Guiana.

The total trade of Canada with British Africa increased since 1897 by $2,900,000, or 1,874 per cent. The figures of 1911, however, show a slight decrease from those of the previous year. This is almost entirely accounted by a loss in our imports from that country. Our total exports increased in the period under review by 2 millions, or 1,755 per cent. Our imports from British Africa made a gain of $677,000, or 2,491 per cent. The amount for 1911 was $704,860, compared with $1,041,565 in 1910.

The total trade with British Guiana changed from $376,000 in 1897 to $4,073,000 in 1911, a gain of 1,083 per cent. Our exports to that country increased in the same period from $271,000 to only $622,000, while our imports increased from $104,000 to $3,877,000, of which in the former year practically all was dutiable and in the latter year only $3,657 worth of goods was admitted free.

West Indies and Newfoundland.

Our trade with the West Indies has grown from $2,551,000 to $10,982,000 in the fifteen years, an augmentation of 8 millions or 336 per cent. Our total exports to the British West Indies, including Bermuda, changed from $1,445,000 in 1897, to $4,590,000 in 1911, a gain of $3,145,000, or 217 per cent. Imports for consumption from those islands were $1,106,000 in 1897 and $6,391,000 in 1911, an expansion of $5,285,000, or 477 per cent.

Canada's trade with Newfoundland totalled 2 millions fifteen years ago, while to-day it is more than 5 millions. Our exports to that progressive colony have changed in the same period from $1,692,000 to $3,872,000, a gain of $2,180,000, or 122 per cent. The total imports for consumption from Newfoundland changed from $452,000 to $1,818,000, a gain of $1,366,000, or 302 per cent. Of the total in 1911, $1,784,000 worth came in free of duty.

With Newfoundland, as has been the case for years, there was done in 1910-11, the population of the colony being considered, a large trade, the exports amounting to $3,714,000 and the imports to $1,818,000. The development of the iron ore deposits in connection with the Sydney steel industries has served to increase the import item, which has trebled in ten years.

Commerce With Foreign Countries.

The figures of the Department of Trade and Commerce respecting Canada's trade with foreign countries, include the statistics of the United States, in respect to the following table:—

Year.	Total Imports.	Total Exports.	Total Trade.
1897	$ 79,622,062	$ 55,712,230	$135,334,292
1898	96,171,653	53,370,628	149,542,281
1899	114,157,706	54,189,905	168,347,611
1900	132,408,313	77,112,456	209,520,769
1901	134,385,084	83,104,475	217,489,559
1902	148,895,774	82,569,666	231,465,440
1903	168,780,245	83,873,738	252,653,983
1904	178,575,186	84,569,626	263,144,812
1905	189,494,804	89,439,549	278,934,353
1906	206,556,780	112,274,827	318,831,607
1907	250,623,181	119,478,796	370,101,977
1908	247,187,721	132,258,521	379,446,242
1909	211,163,707	114,214,308	325,378,015
1910	264,034,599	135,994,438	400,029,037
1911	332,466,676	142,860,491	475,327,167

Some Large Gains.

The total trade with foreign countries has increased from 135 millions to 475 millions, a gain of 340 millions, or 251 per cent. Imports show a larger percentage gain than exports. Our imports from foreign countries, including the United States, have changed in the fifteen years from 79 millions to 332 millions, a gain of 252 millions, or 317 per cent. Of these amounts 44 millions were dutiable in 1897 and 186 millions in 1911, an expansion of 141 million, or 316 per cent. Imports for consumption which came in free totalled 34 million fifteen years ago and 145 millions last year, a growth of 111 million, or 320 per cent. Our exports to foreign countries, including United States, were made up of 49 millions of Canadian produce and 6 millions of foreign produce in 1897 and 125 millions of Canadian produce and 17 millions of foreign produce in 1911, gains of 11 millions, or 200 per cent. and 87 millions, or 156 per cent., respectively.

France and Germany.

The two foreign countries making most progress in their trade relations with Canada are France and Germany. In the case of imports last year there came from Germany nearly as great a value of merchandise, $10,047,000, as was sent here from France, $11,563,000. We have a commercial treaty with France, but with Germany were waging a tariff war, following Germany's action respecting British preference in 1899 until March 1st, 1910. Judging by the record for some years back, it would appear that in a few years the imports of German goods will exceed those of France, as they used to do. It is noteworthy also that Canadian exports to the two countries were of about the same value, and, compared with the import items, were comparatively small. If the trade treaty with France affects the situation to any great extent it is on the import side. That this should be the case is reasonable, from a consideration of the conditions in the two countries. France is a country fortunate in the variety of its natural products and Canada as yet exports chiefly natural and food products or products that rank as raw materials.

Comparison of French and German Figures.

The following table gives details of the Canadian imports, exports and total trade of France and Germany for the past fifteen years:—

Year.	Imports from France.	Imports from Germany.	Exports to France.	Exports to Germany.	Total trade France.	Total trade Germany.
1897	$ 2,601,351	$ 6,493,368	$ 690,696	$1,045,432	$ 3,292,047	$ 7,538,800
1898	3,975,351	5,584,014	1,025,262	1,837,448	5,000,613	7,421,462
1899	3,889,295	7,393,456	1,557,722	2,219,569	5,447,017	9,613,025
1900	4,368,502	8,383,498	1,374,770	1,715,903	5,743,272	10,099,401
1901	5,398,021	7,021,405	1,581,331	2,141,552	6,979,352	9,162,957
1902	6,672,194	10,823,169	1,388,848	2,692,578	8,061,042	13,515,747
1903	6,580,029	12,282,637	1,341,618	2,097,699	7,921,647	14,380,336
1904	6,206,525	8,175,604	1,597,928	1,819,223	7,804,453	9,994,827
1905	7,059,139	6,695,414	1,511,298	1,146,654	8,570,437	7,842,068
1906	7,667,987	6,987,314	2,120,091	1,872,557	9,788,078	8,859,871
1907	9,145,885	7,410,920	1,757,786	1,385,347	10,903,671	8,796,267
1908	9,901,909	8,163,047	1,806,732	2,374,607	11,708,641	10,537,654
1909	8,197,435	6,050,365	3,176,096	1,476,552	11,373,531	7,526,917
1910	10,109,544	7,935,230	2,640,648	2,501,191	12,750,192	10,436,421
1911	11,563,773	10,047,340	2,782,092	2,663,017	14,345,865	12,710,357

Our imports from Germany were nearly four million dollars greater in 1897 than those from France, and in 1903 the German imports were nearly six million dollars greater. Last year they were more than a million dollars short of our French imports. Our exports to Germany fifteen years ago were almost double those to France, while to-day they are about equal. Our total trade with France has changed from three millions to 14 millions in the fifteen years, a gain of 11 millions, or 346 per cent. The Dominion's total trade with Germany has increased from seven millions to 12 millions, a growth of five millions, or 69 per cent.

Of our total exports to Germany in 1897, $764,000 represented Canadian produce and $280,000 foreign produce. In 1911, Canadian produce exported to Germany totalled two millions, a gain of $1,300,000, or 185 per cent. in the fifteen years, while our exports of foreign produce to that country made a gain of $354,000, or 126 per cent.. Canada's exports to France consisted of only $6,741 of foreign produce fifteen years ago and $246,788 last year. Canadian produce sent to France in 1897 was valued at $683,000 and last year at $2,535,000, a change of $1,852,000, or 271 per cent.

Of total imports for consumption from Germany fifteen years ago, amounting to $6,493,000, there was dutiable $6,055,000. In 1911, of the total trade of 10 millions, 7½ millions was dutiable. The increases in total, dutiable and free imports in the fifteen year period were 56 per cent., 479 per cent. and 25 per cent., respectively. France sent us goods for consumption in 1897 valued at $2,601,000, which had increased in 1911 to $11,562,000, a gain of $8,962,000, or 344 per cent. Of the total imports from France fifteen years ago, two millions were dutiable, while nine millions were dutiable last year, leaving two millions brought in free of duty.

Trade Per Capita.

Belgium, which is one of the smaller of the European countries, but with highly developed industries, ranks as the fourth of European countries in its business with Canada, sending here last year over three and a half millions worth of goods and taking in return almost two millions' worth of Canadian produce.

The Department of Trade and Commerce estimate is that on March 31, when the fiscal year closed, Canada had a population of 7,901,000. The export trade, therefore, amounts to about $34.75 a head of the population. Though it extends to nearly every country, it is only a small proportion of the total trade of the country, a proof of the value of our home markets.

◆

MR. FUDGER UNITES WITH CANADA NATIONAL FIRE INSURANCE.

Mr. William E. Fudger, general agent at Toronto for the St. Paul's Fire and Marine Insurance Company, has been appointed general agent for Canada of the Canada Natioal Fire Insurance Company, Winnipeg. This company has an authorized capital of $3,000,000 and the directors and advisory board consist entirely of Western men, representative of the various important branches of financial, commercial and industrial professional life in Western Canada.

The entry of this company in the fire insurance field augers well for the West and should command the confidence which is essential to the success of any company which solicits the patronage of the public.

Last evening the friends of Mr. Fudger tendered him an informal farewell at McConkey's palm room, Toronto. A pleasant evening with music and speeches was enjoyed by a large gathering. Mr. Fudger is leaving Toronto at an early date to assume the duties of his new position.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore, in pounds, for the week ended July 28th:—Buffalo, 103,900; McKinley-Darragh, 123,830; Nipissing, 130,470; La Rose, 150,280; Crown Reserve, 69,000; Hudson Bay, 62,500; Trethewey, 46,700; Chambers-Ferland, 64,000; Kerr Lake, 60,000; Temiskaming, 94,620. Millerette, 33,000; total, 938,300 pounds, or 469 tons. The total shipments since January 1st are now 28,186,964 pounds, or 14,093 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

MUNICIPAL BOND SALES FOR JULY.

Eight Provinces on the Market—Manitoba Makes the Largest Sales.

The municipal bond sales for July, as compiled by The Monetary Times, amounted to $1,594,566, compared with $3,983,670 for June, and $1,536,424 for the corresponding period last year.

Eight provinces were on the market and sales amounting to $464,669 were made by the province of Manitoba, St. Boniface, Man., made the largest individual sale, with $421,669 of bonds.

The following municipal flotations were made in London during July:—Burnaby, B.C., £118,300 4½ per cent. at 100; South Vancouver, B.C., £310,239 4 per cent. at 96½; Edmonton, Alta., £302,000 4½ per cent. at 103; New Westminster, B.C., £120,600 4½ per cent. at 101½.

The following are the monthly totals as compared with 1909 and 1910:——

	1909.	1910.	1911.
January	$2,540,862	$ 881,838	$ 420,337
February	4,074,125	1,272,977	1,037,287
March	1,615,368	1,169,730	6,271,925
April	4,033,988	6,805,078	3,910,288
May	5,185,530	5,964,896	3,946,047
June	2,243,569	2,187,588	3,983,670
July	1,989,442	1,536,424	1,594,566
August	3,011,242	1,312,953	....
September	1,503,108	2,841,486	....
October	1,510,132	2,211,461	....
November	2,725,166	2,292,781	....
December	1,100,428	566,113	....
Total	$31,532,960	$29,043,325	$21,164,120

The summary of the sales for July is as follows:—

Alberta	$ 66,200
British Columbia	210,000
Manitoba	464,669
New Brunswick	155,000
Nova Scotia	150,000
Ontario	184,397
Quebec	75,000
Saskatchewan	289,300
Total	$1,594,566

The following are the particulars:—

Alberta.

Small Schools	$ 3,500	...	....
Stettler S.D. No. 1475	10,000	5½	1941
Small Schools	8,800	6	1921
do.	8,000	...	....
do.	2,500	...	....
do.	6,400	6	1921
St. Anthony S.D.	15,000	5	1941
Castor S.D. 2194	8,000	6	1931
Small Schools	4,000	...	....
	$66,200		

British Columbia.

Kamloops	$ 85,000	5	1921-1931-1936
Municipality of Esquimalt	125,000	5	1953
	$210,000		

Manitoba.

St. Boniface	$421,669	5	1918-1931-1941
Rural Municipality of Strathcona	5,000	4	1931
Virden	25,000	5	1941
Harrison S.D.	13,000	5	1931
	$464,669		

Continued on 621.

WESTERN CANADA.

Crop Conditions Are Excellent—Railroads Are Busy—In the Wheat Markets.

Monetary Times Office,
Winnipeg, Aug. 1st.

Harvesting has begun in the more forward sections of the West. The first harvest excursion passed through Winnipeg last week, and preparations are being made everywhere for getting enough hands to harvest the enormous crop that is now assured. Efforts made by the Provincial Governments of Manitoba and Saskatchewan to procure harvest hands in Eastern Canada and the States have met with success, and the rush of thousands to the grain fields of the West is now on. From 50,000 to 60,000 men are needed. From Calgary a report comes of a very bright outlook. The report states that, while more continued hot weather would be desirable to hasten the ripening of the winter wheat, the crop outlook in Alberta is better than it has been for three years at this time, while the acreage is increased immensely.

In Southern Alberta cutting will start within a week, and the safety of the winter wheat is assured. The yield in the south is expected to average thirty bushels. In the north conditions are favorable, but haying has been retarded by frequent rains. Spring wheat is coming along well, and if there is no frost in the next three weeks it should be a bumper yield. From all sections of the province come most cheering reports, and Alberta should contribute thirty millions to the Western wheat yield.

The labor problem is not causing so much anxiety as doubts as to car supply. Farmers in the south will be anxious to ship at once, owing to the failure from drought last year, and consequently need of money. In the Claresholm district the yield is exceptionally heavy, and a number have very large acreage sown.

Railroads Are Busy.

There is probably no more active period in Western Canada for the railroads than during the next three or four months. For some time past preparations have been going on for sufficient equipment to handle the enormous crop that is now assured, and by the time the wheat starts to move the railroads will be ready to handle it.

Outside of arrangements for handling the crop railroad work is going forward rapidly in the West generally, and particularly in Winnipeg. The Canadian Pacific is about to make big additions to its terminals here and will add to its station; will build a subway to connect with a new four-storey building north of the tracks; will build a first-class waiting-room for travellers in the Royal Alexandra Hotel annex, and will nearly double the size of the hotel itself by making it a 700-room house.

The Canadian Northern Railway Company's new station will be completed and opened at Brandon for traffic on August 1st. The outside work of the new Canadian Northern hotel, which is being erected in connection with the Canadian Northern station, is completed, and the work of the interior has commenced. The hotel expects to be opened for business on January 1st.

In the Wheat Markets.

Markets maintain a strong undertone notwithstanding the many influences of a bearish character in the situation. Fluctuations in prices are confined within narrow limits, moderate declines being as promptly followed by advances, so that values have changed little within the past few weeks. In the Winnipeg market there is practically no change in prices after a week's business. The wheat export trade was very brisk locally, and a good quantity was worked, a heavy movement being reported to Great Britain. There was also a fair demand for all grades of cash wheat from No. 2 Northern downwards, but the volume of trading in futures was small. The movement of grain from the country shows little signs of diminution as yet, and, although there is a good demand for all that comes along, the stocks at Fort William continue to increase, being considerably over a million in excess of last year.

Large Increase in Stocks.

The chief factors which incline markets downwards are the large movement of new winter wheat in the United States and the big increase in that country's visible supply, which has brought about a considerable increase in the world's visible stocks. World's shipments also continue heavy, while at the same time the harvest in the south of Europe and the new crops in Australia and Argentina are progressing favorably. Another factor is the prospect of a record crop for Western Canada. On the other hand, the continued cold weather throughout the West is more or less a bull factor, but the overshadowing bullish influences of the week were the flood of pessimistic advices regarding the spring wheat crop and the persistent rumors of black rust in the North-West States. According to latest reports the black rust scare seems to have been overdone, but these influences had the effect of leaving the market firm at the close of the week's trading.

Reciprocity Causes Large Movement of Wheat.

An interesting reason for the large, free movement of new winter wheat to the United States primary centres is given by John Inglis, the well-known American expert. Mr. Inglis avers that the fear of reciprocity is prompting the farmers to sell early, arguing that, if the Canadian North-West raises 200,000,000 bushels, the United States will be used as a dumping ground for Canadian wheat. The farmers, he says, are really opposed to reciprocity, and the continuous discussion of the great Canadian crop, and the possibilities of its coming into direct competition with their own, has induced the American farmers to sell more freely than in former years.

RAILROAD EARNINGS.

Railroad earnings for week ended July 21st:—

	1911.	1910.	Increase or decrease.
C. P. R.	$2,120,000	$1,958,000	+ $162,000
G. T. R.	960,016	660,452	+ 299,564
C. N. R.	337,000	277,800	+ 59,200
T. & N. O.	37,944	22,793	+ 15,151
Halifax Electric .	5,262	5,028	+ 234

The Canadian Pacific Railway Company's statement of gross earnings and net benefits for the fiscal year ending June 30, 1911, shows a substantial increase over the returns of the previous year. Gross earnings total $104,167,802, the greatest in the history of the company. Net profits for the year were $36,699,830, compared with $33,839,955 in 1910, being an increase of $2,859,874.

Forty per cent. advance over the traffic business done last year is noted in the figures for the British Columbia Electric Railway Company's fiscal year ending June 30th last. The total number of passengers carried on Vancouver lines during the twelve months of the fiscal year 1910-1911 reached 34,264,887, being about 40 per cent. more than for the year previous.

The number carried for the month of June was 3,468,984 as against 2,495,479 for the same month of 1910. The June percentage cheque paid to the city was $6,343, which is almost a record. The June percentage figures for last year meant a payment to the city, of $3,915.94. The total percentage paid the city for the first six months of this year reached $23,771.05, compared with $15,955.10 for the same period in 1910.

BANKING NOTES

The Royal Bank of Canada have opened a branch at Craik, Sask.

The Banque Internationale du Canada has called a meeting of shareholders for August 28.

Trenholma & Tymchorak, bankers, is a sign which adorns a window at 828 Main Street, Winnipeg, the first Ruthenian bank in Canada.

The Windsor Hotel, Montreal, has decided to issue $250,000 new stock at par, which will be given the shareholders at the rate of one share in five. This will make the capital $1,500,000 common and $600,000 bonds.

The Marconi Wireless Telegraph Company, of Great Britain, has declared a dividend at the rate of 10 per cent. per annum for the half year. Mr. Marconi stated at the recent meeting in London that the earnings of the Canadian Company were improving.

At the fourth annual meeting of the Western Canada Trust Company, Limited, held in London, England, recently, it was recommended that a final dividend of 20 per cent. for the six months ended May 31st last, making 20 per cent. free of income tax for the year be paid.

Tenders for five automobiles, five fighting machines and two steam pumps will be called for by the Montreal board of control. The efficiency of the brigade will be increased by one automobile truck to haul the aerial ladder, one automobile truck to haul the 1,200 gallon steam engine, one combination engine with a capacity of 1,000 imperial gallons, one automobile hose wagon to carry 1,000 feet of hose, one automobile wagon to carry 2,000 feet of hose, one 1,000 United States gallon steam pump and one 800 United States steam pump.

RECIPROCITY AND THE MOST FAVORED NATIONS.

Proposed Agreement Grants Its Benefits to Twelve Other Countries—Some Facts and Figures.

The first cream separators or centrifugals were imported in 1890-1891, and in the last mentioned year the first Argentine butter, 3,042 pounds, was exported. Previous to that date salted butter in tins had been an article of import. The butter exported, little more than 100 tons in 1892, was 400 tons in 1895, 1,500 tons in 1901, 4,000 tons in 1902, and in 1905 more than 8,000 tons.

It is estimated that there are at present, including large and small, more than 200 creameries using centrifugals at work in the Argentine Republic, for the most part in the provinces of Buenos Ayres, Santa Fe, Cordoba and Eutre Reos, and so great is the demand for this class of machinery that the importing houses find it difficult to execute their orders with sufficient expedition. In the matter of machinery it may be said that the Argentine dairy farmers are well up to date.

Lavish Hand of Nature.

One of the new Argentine industries, phenomenal in the rapid advance as compared with the progress of the same industry in Australia, deals with milk and its products. All, it is true, has been prepared by the lavish hand of nature, the pastures varied and abundant, the stocks multiplied and refined, the mild climate, and, indeed, every element was present but the initiative of capital.

The Argentines were always breeders of cattle and sheep, producers of meat and hides and wool. Only within the last fifteen years did they commence to be agriculturists, and they had never paid attention to those secondary industries based on accessory products in the exploitation of which modern methods obtain such lucrative returns. The dairy industry existed in a primitive condition. The milk for daily consumption was brought to town in the traditional manner, in tins on horseback, and the jolting on the journey churned the butter, but the real business of dairy farming as it is carried on in Europe, Australia and North America was unknown in the country seventeen years ago.

Animals and Animal Products.

The production of wool has increased considerably within the last fifty years, from 17,636,800 pounds in 1850 to 526,899,400 in 1900. During 1907 Argentina exported 341,713,000 pounds, equal to 15 per cent. of the world's production.

The latest returns, according to official statistics for 1907 respecting cattle breeding in the Argentine, gives some significant figures:—

Cattle	25,844,800
Horses	5,462,170
Mules and asses	545,780
Sheep	75,581,000
Pigs	2,841,700
Goats	2,566,800

Nature Favors Argentina.

Agriculture in the Argentine is governed by a combination of favorable forces, which will enable it to place its products on the world's markets at prices which must create keen competition. Geographical situation, favorable climatic conditions, the relative low price of land, the ability to utilize labor all the year round on the land for breeding and fattening live stock, are some of the factors.

Of the 257,000,000 acres of land available for cultivation, less than 37,000,000 acres are now under cultivation, and are apportioned as follows:—

	Acres.
Wheat	14,232,927
Maize	6,877,040
Linseed	3,438,314
Alfalfa	4,323,755
Oats	696,742
Cailey	159,873
Canary seed	101,681
Sugar cane	181,618
Vineyards	96,655
Tobacco	24,079
Various fruits, vegetables, etc.	5,973,046
	36,105,730

The following table gives particulars of Norway's domestic exports of breadstuffs, live stock and dairy products during 1909:—

Norway shipped during 1910 to	Dairy products. Lbs.	Total value of exports.
Sweden	76,191	$ 37,171 60
Denmark	163,707	16,910 80
Germany	1,372,451	126,224 80
Great Britain	15,346,377	1,674,437 20
British South Africa	2,401,742	173,208 40
British India	744,421	48,695 60
West Indies	3,827,851	273,065 20
Belgium	469,028	33,714 40
Cuba	4,748,951	340,601 20
South America	3,420,172	244,737 60
Asiatic countries	1,780,285	126,978 40
	34,551,176	$3,089,745 20

Norway's domestic exports of wheat and grain totalled only 667,531 pounds and its domestic exports of horses and cattle 201. The most surprising feature of its domestic exports is the large quantity of dairy products shipped to various countries of the five continents. The total of these exports in 1909 was 34,551,177 pounds. The largest quantity, 15,346,377 pounds, goes to Great Britain, while almost 8,818,400 pounds are sent to Cuba and South America combined. It will be interesting to analyse further these dairy exports in 1909.

Articles.	Lbs.
Cheese	264,953
Butter	3,446,164
Condensed milk	31,074,895
Sterilized milk and cream	1,195,570
Eggs	6,528
Total	35,988,110

Of the total exports of cheese in 1909, Norway shipped to the United States 215,418 pounds, valued at $28,810. Even Norway, therefore, has an interesting record in its comparatively small exports of agricultural produce.

Japan Would Benefit.

Japan is the only nation in the Orient which will obtain the benefits of the proposed reciprocity agreement. Its biggest trade naturally is done on its own continent, as will be seen by the following table, showing its wheat, grain and potato exports in 1909:—

Japan shipped during 1909 to	Wheat and grain.	Total value of exports.
China	783,171	$ 10,902 22
Corea	148,989	2,732 03
Hong Kong	1,597,747	16,487 29
French Indo-China	732,323	8,212 02
Asiatic Russia	833,147	12,449 00
Philippine Islands	11,869,425	185,086 68
Other countries	20,192	326 68
Kwan Tung Province	173,095	3,874 94
	16,208,089	$240,070 86

Potatoes in the Far East.

Interesting features of Japan's exports are the large shipment to foreign countries of potatoes and the big trade done with the Philippine Islands. Its total exports of potatoes in 1909 amounted to $27,330,076. These were sent to the following countries:—

Country.	
Phillipine Islands	$210,609 33
Hong Kong	28,401 20
French Indo-China	13,019 08
China	11,641 31
Kwan Tung Province	944 09
Corea	1,815 94
Other countries	358 96
Asiatic Russia	6,510 85
Total	$273,300 76

Japan is naturally concerned largely with the development of contiguous markets, although of recent years it has shown a desire to extend its trade relations with Canada. The fact that it is transacting a respectable business with the Philippine Islands is significant.

Austria-Hungary Supplies Europe.

According to data taken from Statistik des Auswartigen Handels of Austria-Hungary, 1909, that country's export trade in breadstuffs, live stock and dairy products is largely confined to Europe, as will be seen by the following table:—

Austria-Hungary shipped during 1909 to	Wheat and grain, lbs.	Dairy products, lbs.	Number of horses and cattle.	Value.
Belgium	7,303,839	1,199,302	3,718	$ 316,365 76
Germany	526,201,865	238,185,866	97,673	41,261,948 99
Great Britain	14,473,419	5,536,853	....	502,237 02
Hamburg (free port)	77,390,058	870,155	....	1,809,927 70
Italy	37,852,762	1,984	93,426	9,680,167 46
Netherlands	15,106,360	2,575,634	....	586,826 31
Roumania	5,342,407	154	6,254	1,039,319 60

Russia	3,482,827	405,426	188	150,848 70
Switzerland .	77,474,274	10,741,913	32,423	4,839,681 18
Spain	603,619	....	65	17,648 21
Trieste (free port)	5,497,170	5,291	....	99,611 49
Bulgaria	....	....	243	30,273 39
France	....	....	7,779	242,946 34
Turkey	....	....	3,331	540,771 70
Servia	....	....	126	19,394 62
Total .	.770,728,600	259,523,968	245,226	$61,137,068 47

Germany, it will be seen, purchased $41,261,049 worth of the total exports, valued in 1909 at $71,137,068. A large number of horses and cattle were exported in that year, 93,426 of a total of 245,226 going to Italy and 97,673 to Germany It will be observed that 77,390,058 pounds of wheat and grain were shipped to Hamburg and 6,597,170 pounds to Trieste, both free ports. The ultimate destination is not known. This obstacle also applies to statistics respecting other countries, for the merchandise is often reshipped from the country first receiving another country's export.

The Hungarian Harvest.

The final results of the Hungarian harvest of 1910 are given by the Hungarian Agricultural Department as follows:—

Crop.	Acres.	Bushels.	Bushels per acre.
Winter wheat	8,332,000	166,003,000	19.92
Spring wheat	252,000	3,699,000	14.67
All wheat	8,584,000	169,702,000	19.76
Winter rye	2,578,000	48,852,000	18.95
Spring rye	57,000	835,000	14.65
All rye	2,635,000	49,687,000	18.86
Maslin	138,000	2,558,000	18.54
Winter barley	139,000	3,138,000	22.58
Spring barley	2,577,000	50,492,000	19.59
All barley	2,716,000	53,630,000	19.74
Oats	2,641,000	66,543,000	25.19
Corn	5,998,000	187,734,000	31.30
Potatoes	1,508,000	176,976,000	117.36

Where Russia Trades.

Dealing with the exports of Russia as shown in the annual report on the foreign commerce of Russia, 1908, we find a possible competitor of no mean strength. The following table shows the countries to which it shipped its principal agricultural products during 1908:—

Russia shipped during 1908 to	Wheat and grain, lbs.	Dairy produce, lbs.	No. of horses and cattle.	Total value of exports.
Belgium . .	273,468,798	2,425,385	246	$ 4,091,385 06
United Kingdom	2,380,507,713	89,954,269	9,600	54,372,790 51
Germany .	3,655,926,532	66,895,396	34,305	61,966,206 47
Netherlands . .	2,478,986,202	3,064,441	2,794	34,438,752 97
Greece . ..	300,979,067	9,282	5,365	5,422,351 05
Denmark .	64,130,116	27,418,036	6,408	6,974,077 99
Spain . ..	138,427,629	......	....	2,485,636 17
Italy	777,776,876	37,016	18	13,716,810 76
Norway .	184,343,936	......	....	2,363,486 41
Roumania .	393,791,826	40,049	1,496	4,714,900 70
France... .	803,802,142	90,644	971	13,718,803 29
Austria-Hungary ..	......	25,427,524	....	6,798,906 40
Total ..	11,452,140,837	215,362,042	61,203	$211,064,107 78

Russia's biggest customer for wheat and grain was Germany, which purchased 3,655,926,531 pounds. The United Kingdom was its largest buyer of dairy products, amounting to 22,699,672 pounds, while Germany also was the best purchaser of horses and cattle, the number being 134,305. Russia's exports according to these statistics are confined to Europe, but undoubtedly many are trans-shipped on arrival in the countries mentioned.

Great Possibilities in Grain.

With Canada, Argentina and Manchuria, Russia is counted as a country with vast possibilities in wheat and grain raising, and consequently in due course she will be a large exporter of these commodities to other countries than Europe.

The following official statistics show the great productive possibilities of that country. This is a calculation of the harvest of the chief cereals in sixty provinces of European Russia, as compared with the average for the quinquennial period of 1903-1907:—

	Average, 1903-07. Cwts.	1909. Cwts.	Increase or decrease in 1909. Cwts.
Rye	391,120,527	433,897,204	+ 42,776,677
Wheat—			
Winter	77,206,417	87,403,285	+ 10,196,868
Spring	159,676,660	214,380,525	+ 54,703,865
Barley	127,210,013	164,648,390	+ 37,438,377
Millet	29,142,058	31,020,678	+ 1,888,620
Peas	12,556,513	14,600,206	+ 2,043,693
Buckwheat	18,412,586	17,603,685	— 808,901
Total..........	815,324,774	963,563,973	+ 148,239,199
Oats	228,904,000	294,259,961	+ 65,355,961
Grand total ...	1,044,228,774	1,257,823,934	+ 213,595,160

Russian Butter in England.

Russia, which commenced shipping butter to England in 1897, had already in 1900 attained an export trade in butter with that country to a value exceeding $4,000,000 gold. The Russian Government, like those of many other countries, does all in its power to assist the industry by free cold storage and cheap transports. In 1871 the first government dairy school was opened in Russia, and since 1895 no less than 32 schools have been established on the Belgian model. In 1900 the province of Finland subsidized with $579,000 the cargo steamers to England on condition of their providing cold storage facilities to carry butter.

Little Denmark's Big Exports.

The distribution of special exports by countries is not given in the official Danish trade statistics, and, therefore, we must take another table showing the total domestic exports of breadstuffs, potatoes, malt, live stock and dairy products during 1907:—

			Value.
Wheat, lbs.		20,394,060	$ 354,832
Rye, lbs.		3,724,338	59,764
Oats, lbs.		5,843,620	83,884
Barley, lbs.		86,046,908	1,391,188
Malt, lbs.		4,777,068	128,372
Corn, lbs.		......	......
Potatoes, M. tons		57,780	50,384
Butter (ordinary packing), lbs...		183,327,799	43,680,784
Butter (hermetical packing), lbs.		5,499,894	1,631,316
Cheese, lbs.		536,265	36,448
Eggs, doz.		20,106,106	7,112,720
Horses	Number.	18,493	3,578,872
Colts	do	1,223	80,400
Oxen and cows	do	97,698	6,153,012
Calves	do	942	35,376
Sheep and lambs	do	756	8,093
Swine	do	55	1,260
			$64,386,705

One lb. equals one-half of a kilo.

Where Danish Products Go.

The principal countries to which Denmark exports breadstuffs, potatoes, live stock and dairy products are Norway, Sweden, Russia, Germany, United Kingdom, Iceland, Holland, United States, West Indies and Belgium. Of the three principal articles of export the following found their way to the British market in 1909:—Butter, 94.2 per cent.; pork, 97.4 per cent.; eggs, 98.6 per cent. Practically all the remainder of the butter and pork at present is shipped to Germany. Nearly the whole of the export of horses and cattle is to Germany, while about three-fifths of the beef exported goes thither. Denmark, comparatively small in extent and in the number of her live stock, but with a perfect dairy system is, as is seen, the principal purveyor of butter to England. Ths is turned out by 1,200 co-operative creameries conducted on the latest scientific principles and under government control. The production of butter in Denmark last year was considerable.

Production in 1909.

Denmark's harvest is an important factor. Its value in 1909 was $147,936,000. The following was the yield of the principal crops:—

Wheat	Bushels	3,820,000
Rye	do	18,336,000
Barley	do	21,060,000
Oats	do	40,874,000
Peas and Betches	do	16,808,000
Potatoes	do	23,648,000
Roots	do	481,320,000
Sugar Beet	Cwt.	8,700,000
Field and Meadow Hay .	Tons	2,000,000
Straw	do	3,800,000

Comparing Denmark's export statistics of 1909 with those in 1908, the aggregate shipments of cattle and meat have increased. Of horses 22,500 were exported in 1909 as against 18,700 in 1908. The demand for pedigree sheep was good. The exports of butter increased slightly. The following table shows the exports of Spain to various countries during 1908.

Spain shipped during 1908 to	Wheat and Grain, lbs.	Dairy Produce, lbs.	Number of Horses and Cattle.	Value.
Germany	291,525	20	....	$ 3,217.36
Algeria	4,722,291	12,066	13	45,973.69
Cuba	305,939	245,327	30	50,442.26
France	32,121,939	7,749	7,312	365,706.24
Gibraltar	879,009	43,708	2,668	53,672.28
Great Britain .	4,854,020	237,729	1	65,537.63
Italy	71,090	....	....	676,82
Morocco	172,741	507	24	2,026.01
Portugal	3,692,831	18,638	193,416	3,578,542.65
Brazil	181,328	....	....	1,687.77
Argentine	122,261	25,172	177	10,423.31
Total	47,414,974	590,916	203,641	4,177,906.02

The distribution of Spain's exports is wide. Portugal is the largest buyer with nearly $4,032,000, France is a considerable purchaser with more than $384,000 pesetas. That country took, in 1908, 32,122,339 lbs. of wheat, potatoes and grain from Spain. Argentine purchased cereals and roots, chiefly potatoes. Indeed potatoes appear to be Spain's leading export in the groups chosen, the total shipments to all countries in 1908 being 46,966,274 lbs.

Sweden's exports of agricultural products were practically all to European countries. A small amount of wheat and a little cheese went to South America. The following table gives the details for 1909:

Sweden shipped during 1909 to	Wheat and Grain, lbs.	Dairy produce, lbs.	Number of Horses and Cattle	Total value of Exports
Norway ..	1,494,362	1,686,314	11,638	$703,045 47
Finland	91,401	1,225	85	5,206 97
Russia ...	217,470	42	39	6,211 44
Denmark .	836,087	22,284,852	5,918	3,033,065 62
Germany .	733,865	717,694	12	185,816 46
Netherlands	107,542	....	2	2,131 94
Belgium	449,042	11,781	......	9,740 99
Great Britain	2,386,733	82	38	8,053,923 40
France ...	13,861,006	100,140,316	....	210,690 88
Austria-Hungary	3,197	....	......	48 51
South America	1,102	86	......	35 11
Total	20,181,807	124,851,392	17,732	12,209,916 79

Great Britain was Sweden's best customer in 1909, purchasing almost three times the merchandise bought by Denmark. Norway was the next largest buyer, dairy products, wheat, grain and potatoes being the largest purchases.

The following table shows Venezuela's exports in the lines under review:

Venezuela.

Venezuela shipped during 1910 to	Wheat and potatoes, lbs.	Dairy produce, lbs.	No. of horses and cattle.	Total value of exports.
Germany	242,503	198	....	$ 21,249 11
Curacao	1,373,845	816	....	18,697 26
United States	15,194	...	....	103 83
Trinidad	371,894	9,365	8,565	121,599 26
British Guiana	....	...	....	13,095 05
France	22,487	...	....	1,181 16
Total	$2,025,923	$10,379	$8,565	$175,925 67

Venezuela is perhaps one of the most unimportant countries in its relation to the proposed reciprocity agreement.

The following table gives details of Switzerland's exports of dairy produce, horses and cattle during 1909:—

Switzerland.

Switzerland shipped during 1909 to	Dairy produce, lbs.	No. of horses and cattle.	Total value of exports.
Germany	39,908,110	6,478	$ 2.809,414 73
Austria-Hungary ..	6,022,747	14,716	1,045,131 09
Italy	10,672,909	5	2,856,617 32
Belgium	2,061,522	2,907	322,881 47
France	17,159,945	......	2,854,350 34
Netherlands	360,011	162	39,915 87
Russia	1,276,022	......	251,081 42
United States	13,664,772	......	2,185,526 60
Argentine	1,926,820	......	277,515 28
Great Britain	36,109,144	952	3,222,718 25
Spain	4,070,573	......	536,633 41
Total	133,232,575	25.697	16,401,785 78

With the exception of the United States and Argentina, all the above shipments, it will be seen, were made to European countries. Switzerland's exports to the United States were divided as follows:—

Article.	Value.
Condensed milk	$ 73
Soft cheese	121
Hard cheese	2,264,599
Total	$2,264,794

It will be concluded from the export statistics relating to the twelve favored nations that should the benefits of the reciprocity agreement be extended to those countries, Canada will be inviting extensive competition, more particularly from certain of the favored nations.—F.W.F.

The Department of Justice at Washington may prosecute the coffee trust, steamship trust and other commercial combinations on charge of making agreements abroad in restrain of trade and of carrying them into effect in the United States. The action may be brought under the anti-trust sections of the Wilson Tariff act of 1894, which contains sections intended to cover such cases.

REVIEW OF THE MONTH

SPECULATIVE AND INVESTMENT OFFERINGS.

The following speculative and investment offerings were among those made in Canada during July:—

Matheson-Porcupine Brick & Tile Company, Limited.—Offering of shares.

International Milling Company of Canada, Limited.—Offering of 6 per cent. collateral trust and refunding mortgage bonds at 98½ and accrued interest.

Campbell Flour Mills Company, Limited.—$300,000 7 per cent. cumulative preference shares with a bonus of 25 per cent. common stock at $100 per preference share.

ANOTHER BRITISH INSURANCE COMPANY COMES TO CANADA.

Another British insurance company is about to enter the Canadian life insurance field. Mr. James H. Scott, general manager and secretary of the Gresham Life Assurance Society, Limited, of London, England, accompanied by Mr. Charles A. Hanson, the chairman, is at present on a visit to this country with a view to making arrangements for the location of a branch. The company will open an office on St. James Street, Montreal, and will transact a life insurance business under the style of the Gresham Life Assurance Society, Limited, and a fire and accident business under the name of the Gresham Fire and Accident Insurance Society, Limited.

Established sixty-three years ago the company has made satisfactory progress. During the year 1910 they issued 6,650 new life policies, representing new premiums of $548,370, and total life insurance of $11,728,655. At December 31st, the assets aggregated $52,330,050, while the net amount of assurance in force was about $122,500,000.

The Gresham Fire and Accident Insurance Society was organized last year for the purpose of carrying on fire, accident, employers liability and other cognate branches of insurance. It is an independent and separate society. The entry of the Gresham Assurance Company into the Canadian insurance field is another indication of the interest which is being taken by British insurance societies in the Dominion.

The Central Railway of Canada issued in London, England, recently at 95, £1,000,000 first mortgage 5 per cents., of which £400,000 were issued in Paris. The vice-president, Senator William Owens, of Montreal, in a statement, said that the net value of the property is more than double the amount of bonds.

The sum of $2,500,000 is being spent in public improvements in Montreal this summer, as follows:—New filtration plant, $760,000; new sidewalks, $500,000; new pavements, $750,000; street macadam, $250,000; additional smaller improvements (estimated), $300,000; total, $2,560,000.

The Dominion Cotton Mills Company, Montreal, recently secured control of the Cornwall and York cotton mills by purchase of stock from individual shareholders. The price is not made public, but it is understood to be quite satisfactory. As far as is known both mills will continue to operate.

JULY FIRE LOSSES.

Forest Fires Responsible for Large Increase—Carelessness the Cause of Many Deaths—Fort William Has Good Fire Protection.

The Monetary Times' estimate of Canada's fire losses during July amounted to $5,384,300, compared with $1,151,150 for June and $6,386674 for the corresponding period last year.

The following is an estimate of the June losses:—

Fires exceeding $10,000	$4,611,000
Small fires	71,000
Fifteen per cent. for unreported fires	702,300
Total	$5,384,300

The following are the monthly totals compared with 1900 and 1910:—

	1909.	1910.	1911.
January	$1,500,000	$1,275,246	$2,250,550
February	1,263,005	750,625	941,045
March	851,690	1,076,253	852,380
April	720,650	1,717,237	1,317,900
May	3,358,276	2,735,536	2,564,500
June	1,300,275	1,500,000	1,151,150
July	1,075,600	6,386,674	5,384,300
August	2,582,915	1,667,270	....
September	1,615,405	894,125	....
October	2,208,718	2,195,781	....
November	935,191	1,943,708	....
December	1,433,813	1,444,860	....
Total	$18,905,538	$23,593,315	$14,461,825

Forest Fires Responsible for Large Increase.

There were 29 fires at which the loss amounted to $10,000 and over. The most unfortunate fire of the month took place in Northern Ontario, when the country from North Bay northward for several hundred miles, and covering a wide section east and west, was fire swept. The towns of Cochrane, South Porcupine, Pottsville and Golden City were destroyed and the total loss is conservatively placed at $1,250,000. The loss of life was appalling and the official estimate of the dead is placed at 100.

At Squamish, B.C., forest fires did damage of $500,000, while lumber yards at Aylmer, Que., Sarnia, Ont., and Victoria, B.C., were entirely destroyed, together with a considerable quantity of timber.

The fires at which damage to the extent of $10,000 and over occurred, were as follows:—

Calumet, Que.	Paper mill	$ 250,000
Northern Ontario	Forest fires	1,250,000
Thorold, Ont.	Furnace building	15,000
Aylmer, Que.	Lumber yards	550,000
Sarnia, Ont.	do.	265,000
Winnipeg, Man.	Grand stand	75,000
Hamilton, Ont.	do.	125,000
Embrun, Ont.	Village	20,000
Montreal, Que.	Factory	12,000
Eganville, Ont.	Town	300,000
Aylmer, Ont.	Business section	23,000
Canso, N.S.	Three stores and residence	14,600
Sault Ste. Marie, Ont.	Business section	15,000
St. Jerome, Que.	do.	150,000
Sudbury, Ont.	Five townships	250,000
Toronto, Ont.	Building	22,000
Montreal, Que.	Coal sheds	18,000
Nanaimo, B.C.	Shingle mill	20,000
Vancouver, B.C.	Two stores	10,000
Maxville, Ont.	Town destroyed	100,000
Squamish, B.C.	Forest fires	500,000
Bryson, Que.	Grist mill, etc.	12,000
Grand Forks, B.C.	Business section	100,000
Barons, Alta.	do.	60,000
Toronto, Ont.	Factory	10,000
Victoria, B.C.	Lumber plant	100,000
Farnham, Que.	Business section	250,000
Montreal, Que.	Twelve residences	20,000
Lythmore, Ont.	Gypsum mill	75,000
		$4,611,000

Presumed Causes and Structures Destroyed.

Of the presumed causes of fire, lightning was responsible for 22; careless with matches, 5; incendiarism, 5; defective chimneys, 2; spontaneous combustion, 2; defective wiring, 2; sparks from engines, 2; also one each of the following: Ashes from range, paper blaze, upset lamp, refuse burner, back fire exhaust, and defective gasoline stove. A large number of the fires which occurred during July were reported as of unknown origin.

The following structures were burned or destroyed:—Residences 44; barns and stables 26; buildings 17; stores 15; business sections 10; planing and sawmills 5; factories 7; machine shops 2; cabins 5; grandstands 2; lumber yards 4; hotels 2; and one each of the following: freight shed, furnace building, cold storage plant, lumber camp, theatre, rowing club, kiln building, launch, storage warehouse, coal shed, shingle mill, bakery, shipyard, grist mill, restaurant, laundry, cannery and wharf. There were also 6 villages and towns, and 5 townships destroyed; also 20,000,000 feet of lumber. Seventy-one animals were destroyed by fire as follows: Hogs 25; cows 20; horses 15; calves 11. A large quantity of farm implements and poultry were also destroyed, together with 50 tons of hay, 250 bushels of grain and 1,000 tons of coal.

Carelessness Cause of Many Deaths.

One of the most distressing features of the monthly fire losses is the increasing death roll. Last month's loss is augmented by 100 deaths, which is the official estimate of the deaths caused by the forest fires in the Porcupine district.

Carelessness is also one of the chief causes. Last month four deaths were caused through playing with matches, and three from clothes catching fire. If care were exercised in prohibiting children from having free access to matches, it would go a long way towards the reduction of deaths.

The particulars of the July fatalities were as follows:—

Toronto, Ont.	Clothes caught fire	1
do.	Lamp upset	1
Medicine Hat, Alta.	Playing with matches	1
Chatham, Ont.	Clothes caught fire	1
Montreal, Que.	do.	1
do.	Playing with matches	1
Victoria, B.C.	do.	1
Montreal, Que.	Lamp upset	1
do.	Upset stove	1
Grande Pointe, Man.	Playing with matches	1
Northern Ontario	Forest fires	100
		110

The following are the monthly totals compared with the two previous years:—

	1909.	1910.	1911.
January	16	27	27
February	8	15	12
March	16	20	18
April	18	37	20
May	21	15	28
June	16	52	13
July	4	15	110
August	17	11	..
September	10	10	..
October	26	16	..
November	34	19	..
December	33	19	..
Total	219	256	228

Fort William Has Good Fire Protection.

As a result of the recent inspection of the Fort William system of fire protection, the city may get a general reduction in insurance tariffs.

An Austrian met a peculiar death recently in Ottawa while attempting to quench a fire. The blaze was a small one, originating through defective wires in a kitchen near where he was working. He took a pailful of water and threw it up against the building, which was an iron-clad structure. He then placed his hand against the wall, and, completing a circuit, was instantly electrocuted. The wires had come in contact with the iron sheathing of the building.

The first undertaking in the rehabilitation of the West Dome mine in Porcupine will be the erection of a steel and concrete building for the machinery, which will also provide a place of shelter in the case of fire. According to Mr. Carlos Winfield, director of the company, who has gone to Porcupine to take charge of the reorganization of the working staff of the company's property, other mines which have discovered showings of sufficient richness to warrant going thoroughly into development will undoubtedly put up buildings of this nature. Fireproof quarters can be put up almost as cheaply as wooden ones, on account of the present scarcity of lumber at the camp.

◆

Messrs. Morris & Company, packers, Chicago, will erect in the fall a $3,000,000 packing plant in Calgary, Alta. The plant will be a duplicate of the concern's branch at Oklahoma city, and will employ 1,600 hands to start and 2,200 after the first year. The daily capacity will be 1,200 cattle, 5,000 hogs and 5,000 calves.

Stanley Mineral Springs Company, Limited

(Incorporated under the Manitoba Joint Stock Companies Act), March, 1911.

HEAD OFFICE - - - WINNIPEG, MANITOBA

Authorized Capital: $200,000.00, divided into shares of $100 each.

OFFICERS AND DIRECTORS: Hugh Sutherland, Esq., President, Executive Agent Canadian Northern Ry.; John Galt, Esq., Vice-President, Director Union Bank; Hon. R. P. Roblin, Premier of Manitoba; Joseph G. Carroll, Esq., Director Wine and Spirit Vaults, Limited; D. E. Sprague, Esq., President Sprague Lumber Co., Ltd.; F. S. Wiley, Esq, Vessel Owner, Port Arthur, Ont.; James Whalen, Esq., Pres. Great Lakes Dredging Co., Port Arthur.

BANKERS: Northern Crown Bank. SOLICITORS: Munson, Allan, Laird & Davis, Winnipeg.

AUDITORS: Marwick, Mitchell & Co., Chartered Accountants of Scotland, 1211 McArthur Building, Winnipeg, Man.

LOCATION OF STANLEY SPRINGS

The Famous Stanley Springs are situated in the rocky hills of Western Ontario on the line of the Canadian Northern Railway, nineteen miles west of Port Arthur and Fort William. The water is forced bubbling through an immense natural filter bed of sand at an elevation fully 200 feet above the level of the Kaministiquia River, which flows past the base of the hill. By scientific analysis it has been proved to be a water of remarkable purity, and by the test of experience it is shown to possess all the delightful and healthful properties of the Ideal Table Water, and to blend perfectly with all Wines and Spirits. It is bottled only at the STANLEY SPRINGS, and with the greatest care under hygienic conditions, the Company's plant being equipped with the most modern bottling machinery, and being considered one of the finest mineral water plants on the continent.

PRODUCT

For five years this water has been tested by the public, and the demand for it and the other products of the Company has grown to such an extent that it has become necessary to increase the facilities for handling the business.

Stanley Ginger Ale.—In the autumn of 1910, after exhaustive experiments, Stanley Ginger Ale was offered to the public, and has been pronounced by connoisseurs to be the peer of any Ginger Ale in any country.

Stanley Water gives a unique quality to the Company's Ginger Ale, and the Company has secured a process in manufacturing which produces a perfect result. In Stanley Ginger Ale the Company has a product for which the demand is growing so rapidly that with present facilities it cannot be fully met, and the excellent quality of this article is certain to make it one of the most profitable products of the Company's works.

MARKET

The growing demand for table waters is one of the distinctive features of the age in which we live, and is being rapidly encouraged by doctors and other men of science. The search for a domestic water of the highest class lasted for years, and the finding of this spring in the rocky precincts of Western Ontario was an event of far-reaching importance. The geographical situation of the Spring is also an important feature from a commercial standpoint, as it enables the water to be profitably sold in Eastern as well as Western markets.

THE COMPANY TAKES OVER THE ESTABLISHED BUSINESS

Stanley Mineral Springs Company, Limited, has entered into an agreement to purchase all the assets of the old Company, including the Mineral Springs property, business and goodwill for the sum of $63,114.86 cash, which price is to be reduced as between the two Companies by the amount of stock subscribed in the new Company by shareholders of the old Company on the basis of the prospectus, equivalent to the cash invested by them in the old Company.

APPLICATION FOR SHARES

I hereby apply for....................................shares of one hundred dollars each, amounting to ....dollars of the capital stock of the STANLEY MINERAL SPRINGS COMPANY, LIMITED, Winnipeg, payable as follows: 10 per cent. with application, 30 per cent. in 30 days, 30 per cent. in 60 days and 30 per cent. in 90 days.

RECENT FIRES.

Monetary Times' Weekly Register of Canadian Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Campbell's Bay, Ont.—July 27th.—Allan sawmill destroyed; loss and origin unknown.

Blair, Ont.—August 1st.—Log cabin on farm of Miss Wilks destroyed; loss and origin unknown.

Wyoming, Ont.—July 28th.—Planing mill of Mr. W. J. Travis destroyed; loss and origin unknown.

Quebec, P.Q.—July 31st.—Rustic theatre, Kenhouse grounds, destroyed; loss and origin unknown.

Stirling, Ont.—August 1st.—Grist mill operated by Mr. John Dawkins destroyed; loss and origin unknown.

Moncton, N.B.—July 27th.—Livery stables conducted by Mr. J. R. Murray destroyed; loss about $5,000; origin unknown.

London, Ont.—July 26th.—Residence of Mr. J. Lenty, 191 Clarence street; loss estimated at $200; origin, defective chimney.

Hamilton, Ont.—August 1st.—Asylum badly damaged; nine persons burned to death; loss estimated at $10,000; origin unknown.

Lythmore, Ont.—July 26th.—Crown Plaster Company's gypsum mill destroyed; loss about $75,000; one man burned to death; origin unknown.

Fernie, B.C.—July 31st.—Lumber camp of Fernie Lumber Company destroyed; also 3,000,000 feet of logs; loss and origin unknown.

Toronto, Ont.—July 31st.—King dry goods store, corner of Queen street and Dovercourt road, damaged; loss about $1,800; origin, defective wiring.

Victoria, B.C.—July 31st.—Plant and stock of Taylor Mill and Lumber Company, Government street, destroyed; loss estimated at $100,000; origin unknown.

Strathcona and Lakeside, Que.—August 2nd.—Summer resorts near Montreal destroyed, and 90 people rendered homeless; loss about $70,000; origin unknown.

Ottawa, Ont.—August 2nd.—Plant and stock of the St Lawrence Pulp and Paper Company destroyed; loss estimated at $30,000; origin, defective drying room.

Earlscourt, Ont.—July 29th.—Residences of Mr. S. Robertson, 58 Auburn avenue, and Mr. Frank Ball, 56 Auburn avenue, destroyed; loss about $2,000; origin unknown.

Montreal, Que.—July 28th.—Twelve residences in Frontenac, between Forsyth and Rachel street, destroyed. The chief losers are Messrs. Joseph Lamey, George Martel, William Foran, Jean Marineau, James Forest, Mrs. Aubert, H. Wilson and A. Gagne. Loss estimated at $20,000; origin unknown.

Winnipeg, Man.—July 29th.—Courier Printing House, 825 Main street, destroyed, also several adjoining premises. The losses were as follows: Courier Printing Company, $1,500, insured in the Colonial for $2,000; Mr. J. Farquinine, $400, insurance $600; Mr. R. Shapah, $150, insurance $300. Mr. Brand did not carry any insurance, and his loss is estimated at $500; origin unknown.

Farnham, Que.—July 31st.—Business section destroyed; estimated loss, $250,000; origin unknown. The chief losses were the Balmoral hotel building, containing barber shop; Messrs. Keast & Brown, jewellery store; E. Rye, watchmaker; Mr. P. A. Galipeau, general store, is a total loss. The Farnham hotel building and the Grand Central hotel building are burned to the ground, also the following: Woodland, Mr. J. A. Decelle's dry goods store; Messrs. Wilson Brothers, shoe store and harness shop; Mr. A. Quellet, private residence; Mr. J. J. Morgan, private residence; Mr. L. Z. Dupond, restaurant and private tenement; fire station, town hall; Mr. P. A. Bessette, barber shop; Messrs. Mady Freres, dry goods store; C. Valiq et buildings; Mr. J. B. Bessette, merchant tailor; Mr. S. Mefeux, notary; Mr. Geo. Laclere, restaurant; Mr. A. Desauiels.

ADDITIONAL FIRE INFORMATION.

Northern Ontario.—The loss sustained by the Union Assurance Society, Montreal, was $22,694.50, and not $4,000 as reported.

Quebec, P.Q.—Mr. A. E. Pfeiffer sustained a loss of $1,000 on stock and about $50,000 on buildings and machinery. Insured in following companies: German American, Manitoba, Queen, Scotch Union, Norwich Union, Royal, New York Underwriters', Home of New York, Hartford, British America, North, British and Mercantile.

STATISTICS AND STATISTICS.

Development of United States Told in Seven Hundred and Fifty Pages of Figures.

Seven hundred and fifty pages of solid figures, unaccompanied by text discussions other than explanatory notes, form a rather uninteresting looking volume issued by the Bureau of Statistics of the Department of Commerce and Labor, entiled, "Statistical Abstract of the United States"; yet this annual volume, the thirty-third issue of which has just made its appearance, is called for by thousands of people in every part of the United States, and in fact in every part of the world. It tells of the area, natural resources and population of the country from the adoption of the Constitution to the present time; agriculture, forestry and fisheries; manufacturing and mining industries; occupations, labor and wages; internal communication and transportation, merchant marine and shipping; foreign commerce, internal commerce and commerce of non-contiguous territories; prices, consumption estimates, money, banking and insurance; wealth and public finance; the Civil Service, army, navy, pensions, Congressional apportionment and the Presidential elections; the statistical records of progress of the United States from 1800 to 1910; and closes with a few pages devoted to commercial, financial and monetary statistics of the principal countries of the world. It is compiled by the Bureau of Statistics, in part from its own data of commerce and transportation, in part from data gathered by other governmental organizations.

This annual publication, originating with the Bureau of Statistics thirty-three years ago, then a small volume of 150 octavo pages, has grown with the growth of the country and the demands of the public for additional information to 750 pages in this the thirty-third number just issued.

Figures on Developed Lands.

The one hundred pages devoted to the general subject of area, natural resources and population show the date of admission of each State and territory and their respective areas, the land area unappropriated and unreserved, amounting in 1910 to 712,000,000 acres, and forming 41 per cent. of the total land area of the country; swamps and overflow lands, 75,000,000 acres; developed waterpowers, 5,333,000 horsepower; estimated coal supply by States and territories, estimated iron ore supply; the number of farms irrigated, 167,000 in 1907, and number of acres, 11,000,000; the various irrigation projects commenced and the respective area to be reclaimed; population from 1790 by decennial years to the present time, and population of States and principal cities at each census; share which persons of foreign birth form of the population at various dates; marriage and divorce statistics; school population, enrollment and attendance of pupils; universities, colleges and technical schools, with students and instructors and temperature and rainfall for various sections of the country.

Number and Acreage of Farms.

The fifty pages devoted to agriculture, forestry and fisheries show the number and acreage of farms by decennial periods extending back to 1880, value of farm property by States and territories amounting to over $20,000,000,000 in 1900, the latest year for which complete statistics are availiable; the production of principal cereal crops and of other farm products, including fruits, butter, wool and chickens; the wealth produced on farms for a term of years, showing a growth from $5,000,000,000 in 1900 to practically $9,000,000,000 in 1910, and numerous other facts relating to the wonderful development of the agriculture of the country for a long term of years.

Labor and Transportation.

The fifty pages devoted to manufacturing and mining industries show the summary of manufactures by principal industries in census years from 1880 to 1905, the gross value of manufactures having grown from $5,333,000,000 in 1880 to $15,000,000,000 in 1905; the production of iron ore, pig iron, steel, tin plates, coal, gold and silver, building operations in principal cities, and numerous other facts regarding the development of the manufacturing industry of the United States.

The twenty-five pages devoted to occupations, labor and wages show the share of the population engaged in gainful occupations, including separate tables specifying number of each sex employed, and data as to strikes, lockouts, wages and hours of labor.

Figures of Foreign Commerce.

The forty pages devoted to internal communication and transportation include data on the postal service, telegraph

THE CANADA NATIONAL FIRE INSURANCE CO. was incorporated by Special Act of Parliament of Canada for the purpose of carrying on the business of Fire Insurance, as outlined in the Insurance Act and the Special Act of Incorporation.

Capital Stock, Authorized by the Board	-	$2,000,000.00
Capital Stock Subscribed to date		$1,650,000.00

The Head Office of the Company is in the City of Winnipeg, and, in addition to this, Branch Offices and Agencies will be established throughout the Dominion.

It must be generally conceded that, owing to the satisfactory conditions at present prevailing throughout not only Western Canada, but the entire Dominion, this Company is being organized at a most favorable and opportune time.

Canada, and particularly the Western portion of the Dominion, is advancing in population and wealth more rapidly than at any other time in its history, and every indication points towards a period of great prosperity and development.

The great influx of settlers into Western Canada is resulting in tremendous activity in every line of business. Railroad construction is proceeding on a scale hitherto unknown in this country, and, as adequate transportation is of vital importance in moving our immense crops with a proper degree of facility, it is highly encouraging to see so much well-directed energy along the lines of railway extension.

Coincident with railway expansion, we find many new districts rapidly filling up with desirable settlers, bringing with them a good supply of cash and effects. With the settlement of the rural districts, new towns and villages are springing up, which will, during the next few years, become, in many instances, important business centres.

With such unprecedented growth in Western as well as Eastern Canada, involving an expenditure of millions of dollars in building operations, it is at once evident that there is a very extensive and profitable field for a new Fire Insurance Company, which will have a thorough organization throughout the length and breadth of the Dominion, and more particularly in the four Western Provinces.

As a great volume of our business will be transacted in the West, it is a matter of the greatest importance that the Head Office of the Company, as well as the Directors, should be located in the West, so that the affairs of the Company may be conducted to the best possible advantage.

DIRECTORS.

The Board of Directors consists entirely of Western men with a very intimate knowledge of Western conditions, and they are, accordingly, well conversant with the financial and general business requirements of the West.—They are thoroughly representative of the various important branches of financial, commercial, industrial and professional life in Western Canada, and, with their wide reputation for business ability and integrity, as well' as financial standing, combined with a long and varied experience, and practical knowledge of business affairs, they are exceptionally well qualified to render excellent service to a large financial institution.

As the Directors have valuable connections with extensive business interests, and are also Directors of other financial corporations, as well as being otherwise identified with large and influential companies, which control a great deal of high-grade fire insurance, they will be instrumental in placing a large portion of this desirable insurance with the new Company, so that we may safely conclude that from the very beginning of operations a large and profitable business will be assured.

Under these favorable conditions, and with a strong, energetic, as well as experienced and conservative management, combined with the fact that each Director has subscribed for eleven thousand five hundred dollars ($11,500) of the Capital Stock, on which all calls have been paid, and takes an active interest in the welfare of the Company, there is only one conclusion to draw, and that is, that the affairs of the Company will be conducted in such a careful, conscientious and intelligent manner that the interests of both policyholders and stockholders will be fully protected.

It is worthy of note that $1,650,000 of Capital Stock has already been subscribed by prominent business and pofessional men throughout the Dominion and elsewhere.

No commission has been paid to anyone for securing stock subscriptions, and no expense has been incurred in the promotion and organization of the Company, except the expense in connection with securing the Charter and other necessary expenses.

THE CANADA NATIONAL FIRE.

The Canada National Fire being organized in the West may be truly called a Western company, and as such should receive the liberal patronage and hearty co-operation of the citizens of Western Canada, as well as the support of people from Eastern Canada, who desire to become associated with a strong and progressive Canadian Company.

When promoting this Company, the Directors were fully convinced that there was a splendid opening in Western Canada for a Company prepared to carry on the business of Fire Insurance on a large and comprehensive scale, and which, at the same time, could offer adequate protection to both policyholders and shareholders. Accordingly, when making application for a Dominion Charter, the Company was incorporated with a capital of $3,000,000.00, of which amount it is the intention of the Directors to immediately offer for sale the large sum of **$2,000,000.00.**

The all-important feature in Fire Insurance is protection; and with the large capital, combined with the high standard of Reserve, which will be maintained through careful selection of risks and profits from judicious investments, the Directors and management feel confident that this Company will be accorded a very hearty reception by Canadian citizens, and will soon rank as one of the leading Fire Companies.

Without a large and substantial capital for the protection of the policyholders, a fire insurance company is seriously handicapped, and does not afford the policyholder that protection to which he is justly entitled, and the Directors of this Company, being fully aware of this most important fact, are adopting a very wise policy in **offering for subscription such a large amount of capital stock**; and when our entire stock is subscribed and paid in full, it will represent the largest amount of subscribed and paid-up capital of any Canadian Fire Insurance Company, and will be a tower of strength, and of very material benefit to the Company in carrying on its extensive operations.

It shall be the policy of the Company to use the **utmost discretion** in the selection of desirable risks, and, at the same time to so widely distribute its business that any danger arising from a possible conflagration at any point may be reduced to a minimum.

The investment of the Company's funds will be given the **greatest of care** and attention by the Board of Directors.

Only **gilt-edge** securities will be considered, such as first mortgages on improved, productive real estate; stocks, bonds and debentures of companies of high repute, as well as Dominion securities, and municipal, county and school debentures of well-established districts.

PROSPECTUS OF THE CANADA NATIONAL FIRE INSURANCE COMPANY---continued.

As a **large percentage** of these securities is readily **negotiable**, the Company will have abundant **liquid assets** to meet any possible contingency that might arise.

Our first mortgage investments will be confined to Western Canada, and, as the rate of interest obtainable on first class productive real estate is **Fully Two Per Cent.** greater in the West than in Eastern Canada, the Company will have a **decided advantage** over Companies operating exclusively in the older portions of the Dominion. A fixed policy of the Company is to loan **not more than fifty per cent.** of a conservative value of the property, and to stipulate for a definite return of principal, together with interest, each year during the term of the loan. With these periodical repayments of principal, and with land values in Western Canada steadily increasing, the Company's first mortgage securities will continue to improve year by year.

With the active development in Western Canada, a great deal of capital will be required for many years to come, and the Company will, therefore, experience a very ready demand for its funds on high-grade securities and at a profitable rate of interest.

The Directors have decided to issue the first allotment of stock at the price of **One Hundred and Fifteen Dollars per Share**, being at a premium of fifteen per cent.

THE TERMS OF SUBSCRIPTION ARE:

On application, $25.00 per share, which shall include the premium of $15.00 per share; and the balance, payable in ten consecutive half-yearly instalments of $9.00 per share; the first of such half-yearly instalments to become due and payable six months from date of allotment of shares.

Shares may be **Paid in Full** at time of subscription, but, if purchased on the **Instalment Plan**, the subscriber shall have the privilege of paying any or all of the instalments prior to due dates.

The following table shows the amount of first call as well as the subsequent payments

No. Shares.	Amount of First Call.	Half-Yearly Payments.
1	$ 25.00	$ 9.00
5	125.00	45.00
10	250.00	90.00
15	375.00	135.00
20	500.00	180.00
25	625.00	225.00
30	750.00	270.00
40	1,000.00	360.00
50	1,250.00	450.00
100	2,500.00	900.00
200	5,000.00	1,800.00

Table showing total purchase price of shares at the price of $115.00 per share:

No. of Shares.	Total Purchase Price.
1	$ 115.00
5	575.00
10	1,150.00
15	1,725.00
20	2,300.00
25	2,875.00
30	3,450.00
40	4,600.00
50	5,750.00
100	11,500.00
200	23,000.00

the **Capital Stock**, and by that means obtain the support of the leading business and professional men throughout the country.

With the rapid development of the West during recent years, involving an outlay of many millions of capital, it has become generally recognized that **Western Canada is very much in need of more large financial institutions**, and especially of Western origin, to properly meet the growing requirements of the West, and to not only improve the present financial situation, but to materially assist in retaining as much as possible desirable business, with its resultant profits, within our own Western borders.

The business of fire insurance has now grown to such large proportions that it has become a very important factor in the financial and commercial world, and, as its scope and influence is so general and widespread, it is only natural to find that the question of **ample protection** to **policyholders, which is the primary function of fire insurance companies**, should be so **generally discussed at the present time.**

This important subject has given rise to a very **strong feeling** in Western Canada **that the time has now arrived** when the Western people should organize a Fire Insurance Company of such strength and proportions that it will soon rank as one of the leading fire companies of America, and command general respect and confidence, which is so **essential** to a company which solicits the support and patronage of all classes of the community.

The Directors have every confidence that they will receive the hearty co-operation of not only Western citizens, but of people from every part of the Dominion, to build up a **great fire insurance company, with ample protection for the people,** and which will be a source of pride and credit to our country.

The following Canadian Government Insurance statistics should prove of **especial interest**:—

In the year 1869 the total amount of fire premiums collected in Canada was $1,785,539.00, whereas in the year 1909, the total premiums charged amounted to the large sum of $22,293,633.25, and of this amount $6,551,644.41 was charged by Canadian Companies; $11,518,267.45 by British Companies, and $4,223,721.39 by American Companies.

During the last forty-one years the aggregate amount of fire insurance premiums collected in Canada

two per cent. of the total Fire Insurance written in Canada covering a period of the last forty-one years. With the extraordinary progress which Canada has been making during recent years, the field for financial institutions has become so widely extended that there is a **constantly increasing demand** for new, large financial corporations.

By further reference to our Government statistics it will be observed that at December 31st, 1909, the total number of Canadian Fire Companies, operating under Dominion Charter, was only twenty-one, and of this number only two had a paid-up capital in excess of $500,000.

In promoting this large Canadian Company, the Directors are fully confident that the new organization will, with characteristic Western energy and enterprise, soon come to be recognized as an important factor in the insurance world, and, as The Canada National will be instrumental in **retaining within the boundaries of Canada** a large amount of money which would otherwise be taken out of the country to build up foreign corporations, the people of this growing Dominion will readily see the advisability of giving this company their **moral and financial support,** in order that we may build up a **strong and vigorous Company**, which will prove a valuable acquisition to our Canadian monetary institutions.

This is the last opportunity to secure, direct from the Company some of this desirable Stock.

It is worthy of especial note that the demand for the Stock has exceeded the Directors' most sanguine expectations; in fact, of the $2,000,000 of stock to be issued, $1,650,000 has already been subscribed, and, from present indications, with the large number of applications for Stock being received daily, the Directors are confident that the balance of the issue, which is now only $350,000, will be subscribed by August 26th, 1911, the date appointed for the closing of Stock subscriptions.

For this reason, the Directors strongly recommend the investing public to mail their applications for Stock at their earliest possible opportunity.

Subscribers are requested to kindly fill in attached application form, stating name in full, number of shares desired, occupation and address, and mail the application along with the first call of Twenty-five Dollars ($25.00) per share on the stock, direct to the Head Office of the Company, Winnipeg, Man.; or, if so desired, application may be made for the Stock at any of the Company's Branch Offices or at any Branch of the Royal

whatsoever, and even the **Directors and Advisory Board, who are very heavy stockholders in the Company, have paid the same price for their shares as the general public. Not one share has been nor will be issued to any person at a price less than $115.00 per share.**

This is a rare opportunity to secure some of the first issue of the Capital Stock of a Western Fire Insurance Company. With a large amount of desirable and profitable business, so readily obtainable by the Company through its valuable and extensive business connections, rapid progress should be made; and, with investments carefully selected and unexcelled in earning power, the Company will be enabled to not only pay substantial dividends, but build up a large reserve, and thereby materially increase the value of the stock.

The Directors firmly believe in the policy that **every shareholder should co-operate with the management of** a Company and take an active interest in its welfare. For that reason it is their intention to **widely distribute**

of premiums collected by **foreign companies**, and **which, therefore**, was taken out of the country to build up foreign companies and enrich foreign shareholders.

Notwithstanding that a considerable portion of the fire premiums collected in Canada by Foreign Companies has been repaid to Canadian policy-holders, through fire losses, it must be evident that the larger the proportion of Canadian fire insurance that is placed with Canadian Companies, the larger is the amount of capital retained in the Dominion and always available for investment purposes, to build up our Canadian financial institutions and thereby add to the general wealth and prosperity of our country.

The above figures are most significant, and clearly demonstrate that, while the **Canadian Fire Companies** have been doing a satisfactory business, **they have secured only a small portion** of the Fire Insurance transacted in Canada; or, to be more exact, **only twenty-**

cations for stock will be considered in the order received and on approval of the same by the Board of Directors, a Certificate for the number of shares subscribed will be issued and mailed the shareholders forthwith. Cheques, Drafts, Money Orders or other remittances on account of Stock subscriptions should be made payable to The Canada National Fire Insurance Company.

McLean; Atwater, $1,500, M. A. Williams; Welwyn, $800, A. Sumner; Landis, $2,500, A. P. Deroche; Kiplin, $7,000, J. Sproat; Brock, $2,000, E. E. Mackay; Neudorf, $1,500, G. E. Vanderburgh; Abernethy, $3,000, H. H. Turner; Springside, $1,500, W. Dinsdale; Sutherland, $6,000, F. F. Bates; Maidstone, $1,000, A. C. Elliott.

◆

CANADA BREAD COMPANY.

The establishment of another large industry for Canada will result from the negotiations recently closed here by Mr. Cawthra Mulock for the organization of Canada Bread Company, Limited. The company will have modern bread manufacturing plants in Montreal, Toronto, and Winnipeg, and it is the intention to arrange in the near future for the erection of plants in all the other larger cities of the Dominion. The company, when immediate plans of extensions and new plants are completed, will have a weekly output of 1,000,000 loaves, giving it an annual production of about 50,000,000 loaves.

Included in the new company are five of among the largest bread manufacturing companies in Canada, among them being the Bredin Bread Company, of Toronto; Stuart's, Limited, Montreal; Geo. Weston, Limited, Toronto, known as the "Model Bakery"; W. J. Boyd, Winnipeg, and H. C. Tomlin, Toronto, known as the Toronto Bakery Company. The businesses taken over have all grown from very small beginnings, and are among the most successful in their respective fields in the country. The services of the men who have made the different businesses pre-eminently successful are being assured to the new company. Mr. Mark Bredin will be general manager, while the board of directors will include Mr. Geo. Weston, president of Geo. Weston, Limited; Mr. H. C. Tomlin, of the Toronto Bakery Company, and Mr. W. J. Boyd, of Boyd's Bakery, Winnipeg. Canada Bread Company, Limited, is at the outset being placed in a very strong financial position by the sum of $1,000,000 being placed in the treasury to provide for the erection of new plants and the extension of the present ones, and, at the same time, supply ample working capital.

◆

DEBENTURES AWARDED.

Diamond City, Alta.—$4,000 6 per cent. 10 years, to Messrs. C. H. Burgess and Company, Toronto.

Aurora, Ont.—$15,000 20 years' debentures, $10,000 5 per cent., $5,000 4½ per cent., to Messrs. Wood Gundy and Company, Toronto.

Holden, S.D., No. 1057, Sask.—$6,500 5½ per cent. 20 years, to Messrs. Nay & James, Regina.

South Alberta and Saskatchewan, S.D.—$7,000 6 per cent. 10 years, to Messrs. Nay & James, Regina.

Town of Kindersley, Sask.—$28,000 6 per cent. 20 35 and 40 years, to Messrs. Nay & James, Regina.

Village of Earl Grey, Sask.—$2,500 6 per cent., 15 years, to Messrs. Nay & James, Regina.

Prairie Flower, S.D., No. 989, Sask.—$3,500. 6 per cent., 20 years, to Messrs. Nay & James, Regina.

St. Catharines, Ont.—**$224,800** 4½ per cent., $180,000. waterworks, in 30 years; $30,000 public school, in 15 years; $12,000, collegiate, in 30 years; $2,800, Yale & Towne, in 20 years; to Messrs. Ontario Securities Company, Limited, Toronto.

East Kildonan, S.D., Man.—$13,000 6 per cent. 20 years, to Messrs. Wood Gundy & Company, Toronto.

◆

◆

STATISTICS AND STATISTICS

Continued from Page 625.

statistics, miles of railways operated, length of track, number of persons and tons of freight carried, showing a growth of railways operated in the United States from 30,500 miles in 1860 to 53,000 in 1870, 93,000 in 1880, 167,000 in 1890, 199,000 in 1900 and 250,000 in 1910. Data regarding express companies; transportation upon the Lakes and principal rivers of the country; freight rates from principal interior points to the coast and to European ports are also shown.

The 170 pages devoted to foreign commerce show values of imports and exports and trade with various countries for a long term of years, the imports having grown from $668,000,000 in 1880 to $789,000,000 in 1890, $850,000,000 in 1900 and $1,557,000,000 in 1910, while the exports show a growth from $835,000,000 in 1880 to $858,000,000 in 1890, $1,394,000,000 in 1900 and to $1,745,000,000 in 1910. The share which crude materials for use in manufacturing formed in the total imports in 1890 was 21.6 per cent., in 1900 32.5 per cent. and in 1910 36.4 per cent. Manufactures ready for consumption formed 29.2 per cent. of total imports in 1890, 23.9 per cent. in 1900 and 23.6 per cent. in 1910. Manufactures exported in condition ready for consumption formed in 1890 15.7 per cent. of the total domestic exports, in 1900 24.2 per cent. and in 1910 29.2 per cent., while manufactures for further use in manufacturing formed in 1890 5.5 per cent., in 1900 11.2 per cent. and in 1910 15.7 per cent; foodstuffs in the meantime showing a material decline.

"Capital Investments in Canada"

BY FRED. W. FIELD

(A new volume to be published in September, 1911)

$2.50 Per Copy.

Three hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion.

A series of articles respecting the investment of British, American and foreign capital in Canada is appearing weekly in The Monetary Times of Canada. In response to many requests, the articles, which are from the pen of Mr. Fred. W. Field, Managing Editor of The Monetary Times, and Imperial Trade Correspondent at Toronto, will be reprinted in book form, at a popular price, together with other articles, early in the autumn. The following are the chapters of the proposed volume:—

1. British investments in Canada.
2. American investments in Canada.
3. Foreign investments in Canada.
4. French investments in Canada.
5. German investments in Canada.
6. Other Countries' investments in Canada.
7. Canadian Government borrowings in London.
8. Municipal borrowings in London.
9. The financing of Canadian railroads.
10. Industrial investments in Canada.
11. Investments in Canadian land and lumber.
12. Investments in Canadian mines.
13. Canadian banks, British and foreign capital.
14. Registered stock or bearer securities?
15. Canada's credit abroad.
16. Canadian securities & the British Trustee List.
17. New capital from immigration.
18. The relation of trade to borrowed money.

APPENDICES

1. Canada's share of British capital.
2. Is Canada over-borrowing?
3. Canada and International finance.
4. Editorial comment respecting British, American and foreign capital investments in Canada.
5. List of Canadian flotations in London, January 1905 to April 1911.

Canada has cultivated the investor abroad. To some extent, he has come of his own accord. Of recent years the invitation has been more emphatic. Demonstration has backed it. No longer should it be possible for the fakir to trade with spurious Canadian goods. When ignorance of Canadian conditions was common, the unscrupulous magnetized British money into dangerous, unremunerative and fraudulent channels. The legitimate Canadian investment is being shown now in its true colors. Canada's heavy borrowing is an important subject, and the maintenance of Canada's credit in London is one of the most vital factors in Canadian finance to-day.

In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new volume, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

Orders for the publication are now being received at the various offices of The Monetary Times as follows:—

WANTED

Advertisements under this heading will be accepted hereafter at the following rates: "Position Wanted" advs., one cent per word each insertion; "Men Wanted" advs., two cents per word each insertion; "Agencies Wanted" advs., two cents per word each insertion. A minimum charge of fifty cents per insertion will be made in every case.

A large and responsible Western Land and Investment Company has sold over a million dollars of First Mortgages to private investors, and has had no defaults either in principal or interest. It would undertake to guarantee to those having money to invest a net return of 6% on the best security the country affords, and the guarantee of company having a capital and surplus of over half a million dollars. Address Box 301, Monetary Times.

WANTED.—Smart, energetic young man to introduce business and supervise the agency department of an established, up-to-date casualty insurance company. Must be experienced and able to show a good record. Apply in confidence, Box 331, Monetary Times.

WANTED.—By up-to-date real estate loan and insurance firm, city agencies or provincial managership of well known board fire insurance company, and exclusive agency for good loan company. Good business guaranteed. Bankers' references. Write S. & C., Box 541, Calgary, Alta.

FIRE INSURANCE.

CHIEF CLERK WANTED FOR LARGE WINNIPEG CITY AGENCY.

Applicants to state experience, references, age and salary expected, and when available. Must have agency office experience. Address—Insurance, P.O. Box 2977, Winnipeg.

A YOUNG bank clerk with seven years' experience, desires suitable office position. Apply, stating nature of duties, salary, etc., to Box 329, Monetary Times.

The Canadian Pacific Land Company has offered to insert in future advertisements, "Not connected with the Canadian Pacific Railway," and the Canadian Pacific Railway, which recently secured an injunction against the company, has accepted the understanding.

The rate of postage on parcels passing between Canada and Newfoundland in both directions, which has heretofore been 15 cents for each pound or fraction of a pound, has been reduced to 12 cents for each pound or fraction of a pound. The new rate dates from August 1st.

Dividend No. 98.

Notice is hereby given that a dividend of two and one half per cent. on the Capital Stock of this institution has been declared for the three months ending the 31st August next, and that the same will be payable at the Bank and its Branches, on and after Friday, the 1st September next, to shareholders of record of Wednesday, 16th August, 1911.

By Order of the Board,
ALEXANDER LAIRD,
General Manager.
Toronto, 25th July, 1911.

UNITED STATES COTTON CROP YIELD

With continued official assurances that the 1910-11 cotton crop of the United States will be the greatest yield in the history of the country, there is much speculation as to its total value. Should the staple this year sell at the same price it did in 1910, the value of the crop would be approximately $1,000,603,000, exceeding the record cotton crop value made last year by more than $180,000,000.

Further estimates from the government's official figures of 89.1 per cent. of a normal for the condition of the growing crop on July 25, indicate that the crop will be 7,046,500,000 pounds, or 14,741,631 bales of 478 pounds net weight. This would surpass the record cotton production year of 1904 by more than one million bales. If the crop this year sells at 11.5 cents a pound, the average price for the last five years, its value would be about $20,000,000 below last year's great value record.

◆

PROJECTED RAILROAD LINES IN THE WEST

An active railway construction program is projected for the Dominion generally and for Saskatchewan particularly, in the present fiscal year. In Saskatchewan over 1,000 miles of new line will be laid. Last year, this province led the others with total new track amounting to 476 miles. According to the plans so far announced by the three principal railroads of Canada, Canadian Northern will construct 330 miles in the province, Grand Trunk Pacific 342 miles and Canadian Pacific about 350 miles, making a total of about 1,120 miles. In addition to this new construction work, about 1,350 miles of new grading will be done.

The announced extensions of the Grand Trunk Pacific projected this year for Saskatchewan are as follows: Melville to Regina, 70 miles; Battleford to Biggar, 50 miles; Regina to boundary line, 90 miles; Regina to Moose Jaw, 40 miles, and Young to Prince Albert, 90 miles.

Concerning the completion of the Grand Trunk Pacific and the Grand Trunk from ocean to ocean, President Hays, who recently completed a six-weeks' tour of inspection of the greater part of the system, says the line will be completed in 1914. This is a year later than the estimate made early in 1910. Mr. Hays explained that in certain sections of the line good construction progress had been made while in other sections, owing to the difficulties presented by the rough country and also by a scarcity of labor, construction has been carried forward very slowly.

Good construction progress has been made on the sections of the road running through the clay belt of Northern Ontario. The main section is completed a considerable distance both east and west of Cochrane, a divisional point, and the present terminus of the Temiskaming Railway. On both sides of the line there is good grazing and farming land

Tenders are invited for the purchase of the following debentures of the Town of Castor, Alberta:

$5,000 for 5 years at 5½ per cent. Building sidewalks.
$3,000 for 20 years at 5½ per cent. Grant to Hospital.

All tenders must be in on or before Monday, August 21st, 1911.

Tenders to be addressed to

L. B. BROWNE,
Castor, Alberta. Town Commissioner.

FINANCES OF UNITED STATES.

Government finances for July show an increase of about $25,000,000 in the public debt. This was caused by the issue of Panama bonds. Although the total issue is $50,000,000, it is but half outstanding, on account of the inability of the government to furnish the unusual number of coupon bonds requested.

The total cash held in the Treasury's vaults touched a new record during the month and reached $1,889,247,000. The steady production of gold in this country is the cause. July shows a deficit of $16,000,000 in ordinary treasury operations, but the general condition of the treasury is now so much stronger than a year ago that a comparison is hardly warranted.

With a general fund of $152,500,000 at working balance of more than $91,000,000 at the close of business to-day, treasury officials feel satisfied that any further financing will be unnecessary for months to come.

The government's receipts from all sources continue to show decreases except internal revenue.

National bank circulation at the beginning of August was $732,800,000.

◆

Mr. W. Schoeherr, a scientific farmer and forestry expert of Dresden, Germany, is in the West studying Canadian farming and stock raising. A party of farmers who are now carrying on agricultural pursuits in Germany, may dispose of their estates and come to Canada.

BANKING IN THE UNITED STATES

During July 21 applications to organize national banks were received at Washington. Of the applications pending 9 were approved and 2 rejected. In the same month 13 banks with total capital of $705,000, were authorized to begin business, of which number 8, with capital of $205,000, had individual capital of less than $50,000, and 5, with capital of $500,000, individual capital of $50,000 or over.

On July 31, 1911, the total number of national banks organized was 10,059, of which 2,751 had discontinued business, leaving in existence 7,308 banks, with authorized capital of $1,030,802,135 and circulation outstanding, secured by bonds, $701,427,086. The total amount of the national bank circulation outstanding was $735,824,016, of which $31,396,930 was covered by lawful money of a like amount deposited with the treasurer of the United States on account of liquidating and insolvent national banks and associations which had reduced their circulation.

◆

SHEAVES OF EMPIRE

The Sheaves of Empire by Mr. Ellis T. Powell, L.L.B., (Lond.), B.Sc., (Lond.), is a collection of essays on the higher aspects of imperialism which originally appeared in the Empire Section of the Financial News, London. The author has made attempt to formulate the creed, to define the aspirations and indicate clearly as possible the destiny of a united British Empire. This task he has ably performed.

In the preface the author states that the essays will not achieve their aim unless their perusal generates a belief in the reader's mind that behind the moving panorama formed by the varied activities of the allied empire there lies an unbroken advance towards a destiny and a fulfilment. If they should persuade him that he has a personal part to play and that it is his duty as an imperial citizen to play it worthily, the aim of the author shall have been achieved. Sheaves of Empire, by Ellis T. Powell, London, The Financial News, 111 Queen Victoria Street, E.C.

◆

Mr. F. A. Haynes, of Australia, a large land owner, accompanied by Mr. E. A. Counsell, Surveyor-General of Tasmania, has been in Calgary, Alta., investigating conditions there and throughout the Province.

The wholesale hat, cap and millinery firms of London, Ont., have petitioned the Dominion railway commission for an order to prevent the railways of Canada charging excess on trunks over 40 inches in length. Recently the railways have sent out an order to the effect that from Jan 1, 1912, all trunks over 40 inches in length will be charged excess baggage at the rate of 10 pounds per inch.

The Grand Trunk Pacific, when completed, will be made up as follows: Moncton to Winnipeg, (National Transcontinental, under construction), 1,805 miles; Winnipeg to Edmonton, construction of which section is completed, 793 miles, and Edmonton to Prince Rupert, partly constructed, 962 miles. By the time the main line is finished to the port of Prince Rupert, the company's branch line, from Montreal to the main line, will have been built and put in condition to handle traffic.

WORKMEN'S RIGHTS

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan. 3

EMPLOYERS' LIABILITY ASSURANCE CORPORATION

BRITISH NATIONAL DEBT.

A graphic history of the British debt for the last 120 years, which shows at a glance both the course of the debt and the price of consols, has been compiled by our contemporary, "The Statist," London. From the diagram we learn that in 1792 the debt of Great Britain was about £260,000,000 and in 1815 was within a few thousand of £895,000,000. The rate at which the debt was repaid was very slow for the next forty years, owing in part to the heaviness of the interest charged. In 1853 the debt was £790,000,000 a reduction of only £105,000,000 in thirty-eight years or an average of less than £2,800,000 a year. In 1856 the debt was raised to £821,000,000 and between 1863 and 1898 the debt was reduced from rather less than £810,000,000 to £635,000,000, a total of £175,000,000 in 35 years, an average of about £5,000,000 a year. The loans raised in connection with the Boer War and for military and naval works then increased the debt by £163,000,000 to £798,000,000. For two or three years after the close of the Boer war very little debt was redeemed, but in six years, from 1905 to 1911, the amount was reduced from £796,736,000 to £733,072,000 or by less than £63,662,000, an average of £10,610,000 a year. If the recent rate of redemption is maintained the British nation will bring back its debt to the figure at which it stood prior to the Boer war in another nine years.

At the foot of the diagram is a short record of the chief events from 1789 to 1911 in chronological order.

The history of the British Debt, published at the Statist office, 51 Cannon Street, London, E.C., England.

◆

CANADA NATIONAL FIRE INSURANCE COMPANY

The demand for stock in the Canada National Fire Insurance Company of Winnipeg has exceeded the expectations of the directors. Of the $2,000,000 worth of stock to be issued $1,650,000 has already been subscribed and with the large number of applications being received daily it would appear as if the balance, $350,000, will be subscribed for by August 26th, the date on which the stock subscriptions close.

The Canada National Fire Insurance Company is a Western concern, managed by Western men thoroughly acquainted with the fire insurance business, who will use the utmost discretion in the selection of desirable risks, at the same time widely distributing its business that any danger arising from a possible conflagration at any point may be reduced to a minimum. The securities of the company will be mostly first mortgage on improved productive real estate, also stocks, bonds and debentures of companies of repute, as well as Dominion securities and municipal and school debentures. The first mortgage investments will be confined to Western Canada.

Branch offices will be located in Vancouver, B.C., Victoria, B.C., Calgary, Alta., Edmonton, Alta., Regina, Sask., and Fort William, Ont. If the principles advocated by the company in its prospectus are realized its success may be assured.

REDUCTION OF THE FIRE WASTE

Editor, Monetary Times.

Sir, Mr. Morissey's letter in the issue of The Monetary Times of July 1st is good so far as it goes, but it does not go far enough.

Taking it for granted that the whole of the manufacturers are honest and that they neither desire nor can afford losses or damages by fire the least consequences of which are interruption to business, and that they as well as all other classes of the community are interested in the decrease of fire losses in Canada, let us consider whether signed applications for fire insurance should or should not be always required.

A properly constructed tariff of rates of premiums takes into account all the dangers and makes allowances for the eradication of defects because of the decrease of liability to loss and damage by fire.

No honest man will ask for and no one should be allowed for improvements not made, or for precautions not maintained; it surely is his duty to act fairly, to describe truthfully, and to exercise due vigilance in the management of his business; but under the loose system, or want of system, whereby policies of fire insurance can be obtained without any responsibility on the part of the insured, what does an adjuster find after a fire which could have been avoided?

He too often finds barrels, supposed to be kept full of water for protective purposes, so situated and encumbered that an hour's work of a man would have been required to enable him to reach any one of them, and when reached, the barrel would be half full of dust and rubbish. He finds division doors which seldom could have been closed; iron shutters whose hinges are rusted for want of use; stand pin to which hose could not be applied because the couplings did not fit; hose worn out and useless anyway because the employees have never been drilled; books which are ill kept because of the cheap help employed in the office; seldom does he find stock lists or inventories or a complete set of invoices or time books or other records whereby the values at risk can be ascertained.

Now, a properly arranged application draws the attention of the applicant for insurance to the defects existing, the improvements possible, the precautions necessary to safety, and the records which will enable him to have any loss or damage which may occur quickly determined and equitably adjusted.

The only explanation for declining to sign an application is an implied intention to obtain insurance by concealment of the facts or by false pretences as to conditions, or by the avoidance of such precautions as would naturally decrease the liability to loss or damage by fire, therefore the insurance agent or the insurance company issuing policies without signed applicatons properly filled should be indicted along with the assured as in conspiracy to increase the fire losses of the Dominion and the consequent loss of life and the cost of insurance to honest, careful people who are unduly assessed in the unnecessary cost of fire insurance.

If the manufacturers have authorized the advice to refrain from signing applications, it may be well for them to remember that they now have many advantages in Canada, and that all history warns those who seek undue privileges that they thereby pave the way for the abrogation of those to which they would otherwise be entitled.

Your, etc.,
HENRY LYE, Adjuster.

Vancouver, B.C.

◆

The Dominion Canners at Aylmer have struck gas and oil in a well they put down at their Bow Park farm. They sent twelve barrels of the oil to the Aylmer branch, which is being used on the roads about the factory.

The first seven months of 1911 show over one million dollars' worth of building less in Montreal than during the corresponding period of 1910. The figures are as follows: 1911, to the end of July, $8,356,816; 1910, until July 31st, $9,612,240.

With a view to relieving the situation as it has developed in the Canadian West, in consequence of the prolonged cessation of operations at the coal mines in Southern British Columbia and Alberta, an order-in-Council was passed by the government at Ottawa, providing that on and after August 7th next, duties should be removed on all coal imported into Canada at the ports on the southern frontier west of Sault Ste. Marie for consumption in British Columbia (east of the 122nd meridian of longitude) and in the provinces of Alberta, Saskatchewan, and Manitoba.

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum,** so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

LUMBER USED BY AGRICULTURAL IMPLEMENT AND VEHICLE MANUFACTURERS IN CANADA DURING 1910.

Statistics of the lumber used have been received from 162 companies, consisting of the agricultural implement and vehicle manufacturers of Canada in six provinces, by the Forrestry Branch of the Department of the Interior. 76,474,000 feet of lumber were used, worth $2,513,265, or an average cost of $32.86 per thousand. Ontario used nearly 90 per cent. of the total for the Dominion; Quebec purchased 6 per cent.; Manitoba 4 per cent. and Nova Scotia, New Brunswick and Prince Edward Island used very small amounts. Woods used in these industries require strength and durability which is shown by the large amount of Maple, Ooak, Ash, Birch and Hickory that were used. Of the native woods, cherry was the most expensive at $104.00 per thousand, and Ironwood the cheapest at $15.00 per thousand. Mahogany at $120.00 per thousand, was the most expensive of impored woods.

The species of woods having the technical qualities required by these industries at present grow only in small quantities in the agricultural and farming districts of Canada. The supply is rapidly becoming diminished so that unless steps are taken to reforest or conserve the production, we must depend for our supply on the United States. The fact that the woods necessary for the proper building of agricultural implements cannot be secured in any quantity tends to increase the cost of manufacturing in Canada.

62 CHURCH STREET : : TORONTO, ONT

The death of Mr. W. Byron Coulthard, manager of the Fredericton, N.B., branch of the Royal Bank of Canada, took place recently.

One hundred and fifty bricks of pure silver valued at $83,000 formed a valuable portion of the cargo of the Allan liner Corsican which sailed from Montreal to Liverpool last week.

Stockholders of the Standard Oil Company, Limited, will receive plans of the reorganization at an early date.

That the existence of high marine insurance rates is detrimental to the port of Montreal was the statement recently made by Mr. Thomas Harling, the well-known shipping agent, who has just returned from an extended trip to Europe. The matter will be brought to the attention of Honorable L. P. Brodeur, Minister of Marine.

FACTORY LOCATIONS

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 26th day of June, 1911, incorporating, James Steller Lovell, accountant, William Bain, book-keeper, Robert Gowans, Henry Chambers, William George Flood and Robert Musgrave Coates, solicitor's clerks, Samuel Goodman Crowell ,and George Hamilton Cassels, solicitors, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of a packing house in all its branches, and to pack, smoke, preserve, can, bottle and prepare for consumption and use, and to buy, sell and deal in all and any products of cattle, sheep, hos, and other animals, and all the by-products thereof; (b) To buy, sell, import, export, improve, prepare, deal and trade in cattle, pigs, poultry, fish, game and live and dead stock of every description, milk, cream, butter, cheese, eggs, sausages, table delicacies, vegetables, fruits, canned and preserved goods and any other commodities, goods or things; (c) To kill cattle, sheep, hogs and other animals, and generally to carry on the business of an abattoir company; (d) To carry on rendering establishments, tallow chandleries and sausage manufactories; (e) To carry on the business of cheese, butter, provision, vegetable, fruit, meat and general supply merchants, butchers, grocers and general provision merchants and dealers; (f) To establish, operate and conduct shops for the sale of all the articles manufactured and dealt in by the company, and any other goods, wares, or merchandise which may be advantageously dealt in, in connection therewith; (g) To carry on the trade or business of wholesale warehousemen, including the furnishing to others of both cold and dry storage facilities; (h) To acquire by purchase or otherwise and hold lands, timber limits or licenses, water lots, water falls, water privileges or concessions and powers and rights an interests therein, and to build upon, develop, cultivate, farm, settle and otherwise improve and utilize the same, and to lease, sell o otherwise deal with or dispose of the same; (i) To purchase o otherwise acquire, hold, pledge, sell or otherwise dispose of share or stock, bonds, debentures or other securities in any other corporation, notwithstanding the provisions of section 44 of the said Act; (j) To purchase or otherwise acquire and undertake and assume all or any part of the assets, business, property, privileges, contracts, rights, obligations, and liabilities of any person, firm or company carrying on any business which this company is authorized to carry on or any business similar thereto, or possessed of property suitable for the purposes of this company' business, and to issue in payment or part payment for any property, rights o privileges acquired by the company, or for any guarantees of th company's bonds, or for services rendered, shares of the company' capital stock, whether subscribed for or not, as fully paid and non assessable, or the company's bonds; (k) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the business or objects of the company and necessary to enable the company to profitably carry on its undertaking; (l) To raise and assist in raising money for and to aid by way of bonus promise, endorsement, guarantee or otherwise, any corporation in the capital stock of which the company holds shares, or with which it may have business relations, and to act as employee, agent or manager of any such corporation, and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (m) To enter into partnership or into any arrangement for sharing profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company now or hereafter carrying on or engaged in any business or transaction which this company is authorized to carry on or engage in; (n) To procure the company to be registered and recognized in any foreign country, and to designate persons therein, according to the laws of such foreign country, to represent this company and to accept services for and on behalf of this company of any process or suit; (o) To amalgamate with any other company having objects similar to those of this company; (p) To lease, sell or otherwise dispose of the property and assets of the company or any part thereof for such consideration as the company may deem fit, including shares, debentures or securities of any companies; (q) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking (r) To do all or any of the above things and as principals, agents or attorneys. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The William Davies Company, Limited," with a capital stock of two million dollars, divided into 20,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 28th day of June, 1911.

THOMAS MULVEY,
Under-Secretary of State.

1-2

Dated at Toronto this 3rd day of July, 1911.

BLAKE, LASH, ANGLIN & CASSELS,
Solicitors for THE WILLIAM DAVIES COMPANY, LIMITED.

MR. MOORE GOES TO NATIONAL FINANCE COMPANY

Mr. Frederick W. Moore, of Toronto, has assumed the management of the bond department of The National Finance Company, Limited, Toronto. This company has heretofore confined its operations to Wesern issues, but it is now intended to extend these to the Eastern market, upon a large scale.

Mr. Moore brings to the National Finance Company, Limited, the benefit of several years' experience in the municipal bond business, acquired latterly in the capacity of secretary of the Ontario Securities Company, Limited, and previously with Messrs. G. A. Stinson & Company.

A Good City
to live and do business in

WINNIPEG offers greater combined advantages to manufacturers and capitalists than any city in Canada. The remarkable development of this great central market is creating an unprecedented demand for home industries.

WINNIPEG WANTS THESE MANUFACTURERS and offers cheap power, cheap sites, low taxation, varied raw materials, the best of labor conditions and unexcelled railway facilities.

Send for Free Illustrated Books and special reports on the manufacturing possibilities of any line of industry to

CHAS. F. ROLAND, Commissioner of Industries, Winnipeg, Canada

HULL ASSESSMENTS.

The assessment roll for the City of Hull, Que., shows that property values have increased considerably over last year's figures. The total valuation for the city is placed at $9,363,375 compared with $7,843,314, last year showing an increase of $1,520,061. The value of property which is subject to taxation is $5,869,938, against $4,464,284 last year, so that the city will derive revenue on $1,405,754 more than last year.

Property exempt from taxation, which includes industries such as the E. B. Eddy Company, Canada Cement Company, etc., is valued at $2,145,912, or $52,672 in advance of last year's valuation.

Non taxable property such as churches, government buildings, etc., are placed at $1,347,525.

The population from the assessment returns is 17,143, showing an increase of 500 persons since the last assessment was made.

◆

Mr. J. B. Corbet, auditor of The Canadian Bank of Commerce, Toronto, has been appointed assistant inspector at Winnipeg, and has left to take up his new position.

The Provincial Insurance Company, Limited, incorporated under a Dominion charter, has secured a license to carry on a fire insurance business in Ontario.

The biggest mining concern ever organized for the Yukon, excepting the Yukon Gold Mining Company, is a new eight million dollar company reported from London by cable as having been formed by the South African Gold Field Company's capital on advices of Mr. John Hays Hammond.

BIG TELEPHONE MERGER

The Mountain States Telephone & Telegraph Company, of Denver, Colo., has been incorporated in Idaho with an authorized capital stock of $50,000,000 to combine subsidiaries of the American Telephone & Telegraph Company. It will operate in Utah, Wyoming, Montana, Idaho, eastern Arizona, New Mexico and Colorado, covering some 660,000 square miles of territory and embracing 160,000 subscribers' stations.

The new company, it is stated, will issue no bonds and of the $50,000,000 stock, less than half will be put out in effecting the merger, making the outstanding capital less than the combined capital stock of the consolidated property. The bonded indebtedness of the latter is about $6,500,000, which it is expected, will be replaced by stock.

Besides the Colorado Telephone Company, the Tri-State Telephone & Telegraph Company and the Rocky Mountain Telephone Company, the merger may include the Utah Independent Telephone Company of Salt Lake City, the Idaho Independent Telephone Company and numerous other independent companies acquired by the Bell system in recent months.

◆

The Underwood House Wool Tariff bill was defeated in the Senate at Washington recently.

The Union Bank of Canada has opened a branch at Nanaimo. The manager is Mr. David T. Ashley, formerly of Winnipeg, but latterly of this city.

The Mecca Amusement Company will locate a factory in Berlin, Ont., and manufacture merry-go-rounds, ferris wheels, and similar amusement devices.

The city council of North Vancouver, B.C., recently decided to take $100,000 stock in the Burrard Tunnel & Bridge Company, and to pay over a proportion as required.

MORE TIME TO SELL STOCKS.

The bill passed the New York Legislature at the instance of the State Insurance Department, extending the time in which the life insurance companies may dispose of stocks and bonds which, under the insurance law, they may not hold, has been signed. Instead of having to sell $75,000,000 of these securities by Dec. 31, they will have until 1916 to do so.

On April 15 last the total holdings of stocks by the insurance companies were said to be $75,818,047, out of total assets amounting to $1,405,000,000 on Jan. 1. At the end of 1906, when the new law went into effect, the companies held of such stocks about $113,500,000 out of total assets amounting to $1,128,000,000, so that during the past five years it appears the companies have sold collectively 35.6 per cent. of the stocks they held.

The companies are still trying to bring about the repeal of the law compelling them to dispose of their stock holdings. But they express general satisfaction over the extension of time. The period originally named in the law, between 1906 and 1912 has been one in which the securities could not have been marketed except at shrunken prices.

◆

ANOTHER AMALGAMATION

The Canadian Fairbanks Company, Limited, with head office in Montreal and branches throughout the Dominion, and the Fairbanks-Morse Canadian Manufacturing Company, Limited, with head office in Toronto, and its subsidiary companies, the Dominion Safe & Vault Company, Limited, of Farnham, Quebec, and the E. and T. Fairbanks Company of Sherbrooke, Quebec, have amalgamated. The new company is to be known as the Canadian Fairbanks-Morse Company, Limited. The president of the new concern will be Mr. H. S. Fuller of Montreal, president of the Canadian Fairbanks Company, and the vice-president Mr. P. C. Brooks of Toronto, president of the Fairbanks-Morse concern.

The capitalization of the new company is to be $2,600,000.

CURRENT NEWS.

Port Arthur, Ont.—This city proposes erecting a building for the exclusive use of the telephone department. Estimated cost, $25,000.

Niagara Falls, Ont.—The committee who are arranging the preliminary details of the 100th anniversary of the Ghent Treaty, are considering the erection of a bridge over the Niagara gorge.

North Vancouver, B.C.—The city council has decided to take $100,000 stock in the Burrard Tunnel and Bridge Co. According to the Mayor's opinion, the city is entitled to have one representative on the board of management.

Red Deer, Alta.—By-laws authorizing expenditure of $54,000, were passed recently by large majorities. The sums asked for were $6,000 for cement sidewalks; $3,000 for plank sidewalks; $27,500 extending waterworks; $17,000 for sewer extensions, and $600 for an isolation hospital.

Port Colborne, Ont.—The east breakwater at this port was damaged in the big blow which visited in this section recently. A large section was torn off the southwest corner of the headblock. The break extends in to the pyramid on which the beacon is located and this is leaning over. The damage is quite serious.

British Columbia.—A new bridge is to be constructed over Churn Creek in the Lillooet district. It will be of suspension type. Also, a large one is to be erected of steel to span the Columbia at the city of Trail, this bridge forming an important link in the inter-provincial highway scheme. Its construction will in all probability involve an expenditure all told of upwards of $100,000.

Winnipeg, Man.—Plans are now being prepared by an American expert for the Manitoba Cold Storage Company, which will more than double the present premises of the concern. When the improvements are complete the building will be eight storeys in height. It will be 367 feet in length and 70 feet in width. The addition will cost between $250,000 and $300,000, and will give two million cubic feet of storage space to that now in existence. When completed it will be the largest storage plant in the Dominion.

Montreal, Que.—The city architects have formulated a scheme for a new city hall of a size worthy of greater Montreal. The projected building will cost roughly $10,000,000, and will take from ten to twenty years to complete. The scheme which is under consideration, is to have the new city hall located in the Square bounded by Mount Royal Avenue, Rachel Street, St. Dennis and St. Lawrence Boulevards.

The Dominion of Canada has secured new and splendidly situated offices in Paris. They are located on the place De Lopera. Up to the present time the Paris office of Canada has been on the Rue De Rivoli in a rather out of the way situation, and the need for better located offices has been generally.

Lord Strathcona, High Commisisoner for Canada, has recently received a further cablegram from the Secretary of State at Ottawa, in connection with the recent forest fires in Ontario, stating that the Porcupine Relief Committee reports that the fatalities now number sixty-three known to be dead, and may reach a hundred. The fire swept through five hundred miles of country, and burnt two towns.

July was a record month for fires in Toronto, there being 195 alarms in all. Not one was really of a serious nature, and some were extinguished before the firemen reached the scene. Last year there were 1260 calls, or an average of 105 per month. This year so far there has been an average of 135 per month. During February there were just one hundred still and box calls.

At a recent meeting of the directors of the City Dairy Company, Limited, Toronto, a number of changes were made in the positions of officers of the company. The title of general manager was superseded by that of managing director, and Mr. Charles E. Potter will hereafter be known as managing director. Mr. W. J. Northgraves was appointed manager of the company and Mr. C. C. Mowry, secretary.

is the best known and most popular kind of security in which to invest money. Selected under proper conditions, it affords the safest kind of investment.

Saskatchewan Mortgages
are the most popular mortgage security in Canada to-day. We sell these mortgages to yield a very attractive rate of interest. We guarantee payments, and make collections and remittances without cost to the investor.

MINERAL PRODUCTION OF CANADA

An increase of 7.3 per cent. in the mineral production of Canada over the previous year is shown in the annual report of the mines branch of the department of mines on the mineral industry of the Dominion just issued. The total value of production was $91,831,411, as compared with a value of $85,557,101, in the year before. The production metals show an increase of $2,382,474, structural materials and clay products $5,193,394, and other non-metallic products a decrease of $1,001,533.

The metal mining industries of Ontario were particularly active there being a very important increase in the production of nickel and copper at Sudbury and in the silver production of the Cobalt district.

A very large portion of Canada's mineral production is exported; refined ore and semi-refined products of a similar class are re-imported for domestic consumption.

Ontario leads the provinces with 40 per cent. of the whole mineral production.

◆

The city of Revelstoke has bought back $9,000 worth of its debentures from the Financial Corporation of Vancouver, at par.

The National Finance Company has established itself in handsome and commodious new quarters in the Oddfellows' Building, corner Pender and Hamilton streets, Vancouver.

Application has been made to the London Stock Exchange to list Canada Cement £226,000 6's; Canadian Northern Railway £700,000 4's, and Western Canada Land £50,000 shares.

Mr. J. Muir, cashier of the Bank of British North America at Kaslo, has been moved to the Victoria office. He has been succeeded by Mr. H. Reekie, who came out from London.

Mr. F. R. Glover, who has been assistant manager of the British Columbia Electric Railway, has been created western executive assistant, a position nominated while the directors were in Vancouver from Great Britain.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value.

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

Good Men for a Good Company in Good Territory

Apply to: Fred Halstead, Superintendent, Waterloo, Ont.

A MONTREAL MANUFACTURER

writes to the Great-West Life:

> "I have just received Dividend Cheque from your office, and being profit on my Life Policy, $10,000.
>
> "The amount, $396.00, has afforded me a pleasant surprise. I had no idea that the return would be as good in this five year divisional plan, and it is very much better than with my other Policies drawn on similar lines. I desire to congratulate you upon the management of your business, which must surely account for this very satisfactory return to the Policyholders."

Ask for personal information.

INVESTMENT AND LOAN COMPANIES

EXPERIENCE IN INVESTMENT

Those who can least afford to lose their money frequently are those who have had the least opportunity for acquiring the knowledge necessary to enable them to invest it safely.

Their first consideration should be the safety of their investment. Trustees and Executors are hedged about by legal limitations in the investment of Trust Funds. They are, however, expressly authorized by law to invest these moneys in the Bonds of the Canada Permanent Mortgage Corporation. These Bonds are, therefore, a most satisfactory security for those who should invest only where their money will be absolutely safe.

These Bonds are available for the smallest as well as the largest investments, as they are issued for one hundred dollars and upwards.

CANADA PERMANENT
MORTGAGE CORPORATION
Toronto Street . . . . Toronto
ESTABLISHED 1855

THE
Huron & Erie Loan & Savings Co.

Incorporated 1864

Directors:

T. G. Meredith, K.C., President. F. R. Eccles, M.D.
Robert Fox, Vice-President. H. E. Gates.
F. E. Leonard, Vice-President. John Labatt.
George T. Brown. Wm. Saunders, C.M.G.
Hume Cronyn.

Main Offices: 442 Richmond Street, LONDON

Branches:

Market Square, LONDON
REGINA, Sask.
366 Talbot St., ST. THOMAS

The Hamilton Provident and Loan Society

Capital Subscribed, $1,500,000. Capital Paid-Up, $1,100,000
Reserve and Surplus Funds $695,946.97
TOTAL ASSETS - $4,418,040.11

DEBENTURES issued for one or more years with interest at four per cent. per annum, payable half-yearly. The Debentures of this Society are a legal investment for Trust Funds. Correspondence invited.

Head Office, King Street, HAMILTON, ONT.

A. TURNER, President C. FERRIE, Treasurer

LONDON & CANADIAN LOAN & AGENCY CO., Ltd.

51 Yonge Street, Toronto
Established 1873

Paid-up Capital, $1,000,000. Reserve, $340,000. Assets, $4,391,000.

Debentures

Issued, one hundred dollars and upwards, one to five years

4 Per Cent.

Interest payable half-yearly. These Debentures are an Authorized Trustee Investment. Mortgage Loans made in Ontario, Manitoba and Saskatchewan.

W. WEDD Jr., Secretary. V. B. WADSWORTH, Manager

THE TORONTO MORTGAGE COMPANY

Office, No. 13 Toronto Street

Capital Paid-up	$724,550 00
Reserve Fund	385,000 00
Total Assets	$2,875,069 07

President
HON. SIR WM. MORTIMER CLARK, LL.D., W.S., K.C.
Vice-Pres., WELLINGTON FRANCIS, K.C.

Debentures issued to pay 4%, a Legal Investment for Trust Funds. Deposits received at 3½% interest, withdrawable by cheque. Loans made on improved Real Estate, on favourable terms.

WALTER GILLESPIE, Manager

The Standard Loan Company

We offer for sale debentures bearing interest at FIVE per cent. per annum, payable half-yearly. These debentures offer an absolutely safe and profitable investment, as the purchasers have for security the entire assets of the company.

Capital and Surplus Assets, $1,350,000.00
Total Assets, $2,700,000.00

President
J. A. KAMMERER

Vice-Presidents

ONLY THE BEGINNING.

That the proposed reciprocity treaty is to be considered as the first definite step in a programme of international trade expansion on the part of the United States is the opinion of Mr. H. E. Miles. The McKinley tariff, he says, was in many respects the highest ever known in the neighboring republic. "The controlling idea in the preparation of the McKinley bill," said Col. George Tichenor, general appraiser and right hand man of McKinley in framing the McKinley bill, "was to dispose of, and prevent the accumulation of, surplus revenue. It was with that view that duties upon certain articles were made prohibitive, upon others higher than they would otherwise have been."

The actual rates in the bill support this statement. Notwithstanding the fact that the McKinley rates were excessive, the Dingley rates were made much higher. Mr. John Ball Osborne, head of the treaty-making division of the State Department, has said that the Dingley rates were made just 20 per cent. higher than the McKinley rates for the purpose of trading them off in treaties of reciprocity.

With these Dingley rates unnecessarily high, President McKinley entered eagerly upon a programme of trade expansion. He declared that he expected that these trade treaties and the consequent enormous increase of our foreign trade would be the chief accomplishment of his administration. He was greatly grieved and disappointed when the Senate refused to confirm the several treaties which he submitted, known as the Kasson treaties. The over-protected interests having gotten the 20 per cent. increase were unwilling to return any part of it to the people for any consideration. The Dingley law limited to two years from the time of its enactment the period within which these treaties could be made. The interests had, therefore, only to prevent their ratification in the Senate for these two years in order to benefit by the unintended increase from that time to this. The Payne law is, in substance, the Dingley law re-enacted. The changes, whether "upward" or "downward," are mostly immaterial, like the reduction on sugar, from 72 per cent. to 71 per cent. The United States is substantially on the Dingley basis of fifteen years ago, with the 20 per cent. still in, though manufacturing efficiency is greater, the need of high rates less, and the need of foreign outlets more pressing.

FIRE INSURANCE RATES.

Fire insurance rates on this continent are high because, comparatively speaking, the people of Canada and the United States are indifferent builders, do not bear the responsibilities which rest upon them in connection with the care of their property and are careless in the use of fire in every way, particularly with matches. In the Dominion we are burning property at the rate of almost $25,000,000 per annum and human lives to the number of 200 every year. Mr. C. F. Carter, in a recent article, cites certain facts respecting the experience of the United States in this direction. The idea has gone abroad that fire insurance is in the control of a trust, and this is possibly one of the reasons why hard-up legislators are so ready to impose taxes on the companies which make fire insurance their business. Mr. Carter shows the result in the statement that, of $1,255,486,000 collected as fire premiums in the United States in the five years ending with 1909, not less than $33,476,000 went to the various municipal and state authorities in taxes.

This was equal to 2.67 per cent. of the gross amount of premiums collected. It amounted to 6.45 per cent. of the premiums remaining after the fire losses of $736,911,000 were paid. Where these taxes were paid on buildings, etc., occupied by the companies and their agencies, there was no fault to find. Where, however, as is usually the case in the United States as in Canada, the amounts included special levies on insurance companies because they were insurance companies, they were nothing but a special charge on a necessary service, and in one way or another involved an increase of the premium taken from the insurer. Mr. Carter's conclusions from figures available in the case of the State of New York is that in 1909 the sum exacted from fire insurance companies was $1,965,000, and, after deducting the cost of State regulation, he thinks $1,739,000 of the amount might have been left to reduce premiums, and the reduction would have been notable.

Another cause of the high cost of insurance is the high rate of expenses of the companies, which runs from 36 to over 40 per cent. of the premium receipts, a high rate, it will be thought, but one that, perhaps because of the high cost of living among other things, it does not seem practical to reduce. These, however, are minor matters. The overshadowing cause is the waste from fire losses which the companies have to pay. In 1907, a normal year, Mr. Carter says, recorded fire losses in the United States were $215,084,000, while protection against fire cost $241,401,000. The sum of these two items, he says, was equal to half the value of the new buildings erected in the year.

Just half of the great outlay on new construction, therefore, meant an actual addition to the value of buildings in the country. That such loss is unnecessary is indicated by a comparison of the experience of the United States with that of other countries. In the five years ending with 1907 it is stated the fire losses in the United States averaged $3.02 a head of the population a year. In six European countries, including Germany and France, in the same period the losses averaged only 33 cents a head a year. Moreover, in the United States conditions are growing worse. The rate of increase in fire losses is greater than the rate of increase in population.

So it is easy to accept the statement, based on the records of the New York Insurance Department, that, with taxes, high rates of expense and high rates of loss, from 1891 to 1908 only 3.06 per cent. of the premiums taken in the State remained with the companies in the shape of yearly profits. It is a mild trust that is content with such remuneration for such risk,' and the need of regulating it is not outstandingly necessary. The remedy for the state of affairs is to be looked for in connection with the education of the people rather than in the regulation of the underwriters by law.

HIGH PRICES AND VALUE OF GOLD.

With good prospects of a new productive gold camp at Porcupine, Northern Ontario, the question of gold value is again made prominent. There is no check to the general rise of prices in the cost of living. The American consul at Buenos Ayres records 298 strikes during 1910, attributed to "the high cost of the first necessities of life." In ten years the price of bread has advanced 70 per cent. and other commodities in proportion. The American consul at Bahia (Brazil) furnishes a table of local prices that would cause consternation in New York. The London Economist notes a general advance of prices in Great Britain since 1902 of about 25 per cent. The United States consul at Dunfermline (Scotland) says that the cost of living in his locality exceeds that of similar districts in Canada or the United States. From Dresden one is informed that many women have abandoned housekeeping for more lucrative occupations, in order to assist their husbands to meet the enhanced cost of supporting their families. Similar accounts come from Paris and other parts of France.

The wave of high prices is beginning to be felt at the edge of civilization. In Batavia (Java) rents, wages, provisions and clothing appear to have risen to the level of the great commercial centres. Here is the most recent price list of household expenses (sums in American gold):—

House rents, per month	$70-$150.00	Meats: Roasts, steaks, ., pound	22-.32
Chinese cook, per month	14-20.00	Milk, quart	.40
Chaffeur, with keep, per mo...	50.00	Flour, pound	06
Bread, pound ...	08	Sugar, pound	.12
Butter, pound....	45	Vegetables, pound.....	02-.08
Cheese, pound...	40	Fowls pound	.10

Enhanced prices, says the Wall Street Journal, have induced the Chinese government to demonetize its copper "cash" and sell it for old metal; while the same cause has impelled the British government to substitute nickel and silver coins for the cowry-shell money hitherto employed in its protectorate of Northern Nigeria.

No cause, general or universal enough in its influence to affect these and the numerous other localities from which similar official reports have been published, has been suggested, except the vast supplies of gold which have of late years been poured out of South Africa, Russia, Alaska, and the mining States west of the Mississippi valley. Should the advance of prices continue, it will scarcely fail to awaken some distrust in the future purchasing power of the metal in which now all our obligations are couched.

SMALL CHANGE.

T. W. Lawson, Boston, was in Vancouver last week. What is going to happen?

• • • •

The banking position in Canada is strong. While the chartered banks express their ability to handle the crop movement during the coming fall, they have some fear as to circulation. Several are very near their circulation limit, and one exceeded that limit a short time ago. The bankers desire greater circulation facilities during the crop movement period. Conservative bankers consider that capitalization, on which the note circulation rests, has been increased to the limit of prudence already; the next alternative, therefore, may be attempted, and the Government will, in all probability, shortly be asked to lengthen the period in which the banks are allowed to increase their note circulation by fifteen per cent. to include the months of September and March as well as October, November, December, January and February.

CAPITAL INVESTMENTS IN CANADA

—XIV.—

CANADA'S CREDIT.

By Fred. W. Field.

The heavy borrowing of Canada, during the past six years especially, causes one to examine the position as to the maintenance of Canadian credit. During the summer of 1909 many prominent English houses interested in Canadian enterprises agreed not to undertake any new Canadian flotations for a period of several months. The effect was to stop the flow of British capital to Canada through its principal channel during the time of this inaction. The cause of the financiers' decision was undoubtedly the unusually heavy borrowing by Canada, its tendency to exceed due bounds, and the attempt to market a few worthless securities among the large number of good ones. It was a well-timed hint and rebuke. It is improbable that the lesson will have to be learned here again for many years, although heavy borrowing in the spring months of 1911 almost brought about a similar deadlock.

With a comparatively small population, large areas of undeveloped agricultural land, constant additions to a network of railroads, general business, commercial and industrial expansion, obviously a need exists for a continual inflow of capital. Up to the present, little fault can be found with the methods adopted by Canadian financiers in catering to our monetary requirements. Few complaints have been heard from those who have purchased our securities. The Dominion has created an excellent market abroad for its substantial stocks and bonds. The records of its borrowing during the past twenty years have been marred by few unpleasant incidents. An enviable standard of credit has been made and maintained. That this should continue now that our borrowing is rapidly expanding is important.

Borrowing and the Crops.

Bankers and economists are undoubtedly watching the situation, which is one that might easily become almost uncontrollable. The country is paying a very large sum annually in the shape of interest on its loans. Suppose for a moment that the welcome stream of British and other capital ceased to flow. Canada would be thrown upon its primary support, the wheat crops. Could we feed ourselves and pay our interest charges in such an event? Possibly we could, but it is a wise policy which will not allow too wide a margin to grow between our borrowing records and our agricultural production.

It is comparatively easy for Canada to maintain its credit abroad in good times. Then, one of the chief necessities is to squelch the undesirable promoter and his promotions. In a period of depression, the matter is more difficult; it becomes a question of running the economic machinery with considerably less monetary oil than usual. At this point, the strength of the banking system and the foresight of bank managers are tested. If, prior to depression, credit was extended too freely, when dull times arrive, unwisely granted credit is likely to bring a crash, and consequently a severe blow to Canadian credit abroad would be sustained.

Escaped the Panic.

In 1907, when the United States was suffering from industrial depression and stock market panic, Canada escaped a similar fate. But mistakes had been made in this country, foolish speculation had been allowed to go beyond bounds, with the result that the Dominion learned an important economic lesson with the minimum of economic suffering. The growth and development of Canada is a pleasing task. No necessity exists for forcing that growth. If we borrow too heavily, absorb new population too rapidly, and assume generally a fast gait, trouble will follow. Fortunately, the men at the helm are steering a good course and appear to have thoroughly studied the chart.

In 1910, the unpleasant incidents in connection with the affairs of the Atlantic, Quebec and Western Railway, the Western Canada Cement Company and the Quebec and Lake St. John Railway (the last named has now been settled satisfactorily to the English bondholders) created some misgivings in England and in Scotland. The advice of Mr. F. W. Taylor, London manager of the Bank of Montreal, that Canadian promoters who have the interests of their country at heart, should exercise restraint, is good. Otherwise they will kill the goose which lays the golden egg. It is only within the last four or five years that the investing public in Great Britain have shown an inclination to purchase securities of Canadian public utility and industrial companies; the former, now extremely well regarded, were previously looked upon askance as being ultra-speculative in character. It is only fair to Canada to add that a good many of the Canadian schemes recently seeking capital overseas, which invited criticism, were hatched in London. Mr. Taylor has said that there is little to fear from the competition of the securities of other British colonies and overseas dependencies, so long as Canadian securities already placed on the market meet their interest obligations without question and avoid criticism.

Terms of Offerings.

An important phase of our borrowing has been referred to by Mr. H. V. R. Jones, the London manager of the Canadian Bank of Commerce. This is the terms upon which Canadian government and municipal securities are offered in the London market. "It is the natural tendency," he says, "on the part of all borrowers to endeavor to secure the very highest rate obtainable for their issues, regardless of the consequences which this attitude may eventually have upon their future borrowings; and, while this is a spirit which will always exist, it is difficult to say that it has been overdone, except in a few instances. In regard to high-grade issues, such as those under discussion, the value of money governs the price which the market is willing to pay, and those who ask too much for their securities usually end in having to witness them depreciate in value and become unpopular with the investing public, but such matters tend to right themselves in the long run, especially so if a government's or municipality's securities are supported by the active operations of a good sinking fund."

Do Not Overdo It.

Canada, as we have seen, holds a prominent position upon the British market, and during brief periods of reaction its securities of various kinds have suffered less than almost any other. The advice is still given to those anxious to secure capital there to go slowly. It is the duty of those interested in such matters in Canada to see that only first-class propositions are taken overseas, and, as far as industrials are concerned, that they will bear the fullest and strictest investigation.

The railroads of Canada should continue to be a popular, and, indeed, an improving form of investment. The near future must see the lines of the Grand Trunk Pacific and the Canadian Northern Railways progressing yearly towards completion, and the ever-increasing grain areas of the West must of necessity largely increase the earnings of the Canadian Pacific and other roads under favorable circumstances.

The trade between Canada and the Motherland is expanding, and doubtless will continue to do so. British manufacturers and producers have, perhaps, been slow to use the advantages offered them by Canadian preference, but a better knowledge of the country and its resources is resulting in a deeper interest being taken.

There seems no doubt that Canadian propositions, properly verified and supported, will continue to receive the same sympathetic consideration in the future as in the past, when financial conditions are suitable. The basis of the whole business is the maintenance of the reputation and confidence which Canada has been fortunate enough to inspire among British investors. But discretion must be shown in selection of propositions that are suitable for the market, and, above all, care must be taken to see that the thing is not overdone.

Not Much Locally.

The proportion of capital available from local sources in Canada is slowly increasing from year to year, while the general wealth of the country is making rapid gain. Comparatively little permanent capital needed, however, is as yet supplied by Canadian investors. This factor will not have any important bearing upon Canadian borrowing in Britain for many years. Neither does Canada obtain many funds from the United States aside from industrial investments. The Americans are still large borrowers abroad, and consequently give little patronage to Canadian bonds.

On Mr. E. R. Wood's conservative optimism we can base a hope for the maintenance of good Canadian credit in Great Britain. "Nothing has occurred," he says, "to check the steady advance of settlement, the extension of the area of cultivation, or the proportionate development in transportation, and in general industry and commerce. Our waiting prairies and other farming areas still attract the industrious as our enterprises attract investors. Both have an assurance of adequate returns in the extent and character of our natural resources, the substantial nature of our general development, and the stability of our governmental institutions."

◆

BITTEN BY UNLICENSED INSURANCE.

Interesting Story of Canadians Who Patronized Insurance, Cheap, Nasty and Unlicensed.

The troubles of Northern Ontario's people will undoubtedly be increased when those who carried insurance in unlicensed companies endeavor to obtain their money. A large amount of bad insurance was carried in the North, and the folly of this policy will be clearly defined during the next few months.

In February, The Monetary Times learned from one of its correspondents that a Mr. Frank W. Anthony, of New York, was busy writing policies in Canada. The Monetary Times warned its correspondent of the danger of unlicensed companies, and endeavored without success to commit Mr. Anthony to tell in writing something of his policies.

It appears that a Mr. E. M. Carroll, of Toronto, has proved a Canadian victim of Anthony's bucket shop fire mutual company. The story is told in part by the United States Review:—

Cash Premium Plunder.

"Edward M. Carroll, manager of the Insurance Brokerage and Contracting Company, Limited, of Toronto, Canada, came to Philadelphia last week on a drifting chance of collecting a loss from two of the bucket shop fire insurance mutuals of Philadelphia that traffic in gold brick policies for cash premiums under the immunity of charters granted by the State of Pennsylvania. The fact is so notorious throughout the country that crews of small swindlers carry on a cash premium plunder under authority of Pennsylvania charters, with Philadelphia as the base of operations, that Mr. Carroll had a fairly clear idea of the case when he came here, but when he left, after spending a few hours of wasted time, he said the thing that most surprised him was that reputable fire insurance agencies would occupy offices in a building in which concerns of this type were rented space to carry on their schemes.

"Mr. Carroll brought with him two policies which had previously been sent to Philadelphia through the Girard National Bank with drafts attached and returned on May 8th, marked 'Payment refused.' On the back of one of the drafts was written the vague memorandum, 'Will wire.' Up to the time of his leaving Toronto Mr. Carroll had heard nothing of the 'wire.' A judgment against the company and pending litigation was given as the explanation of the refusal to pay the other draft.

"The two policies were issued on June 15th, 1910, to Hugh A. McNeill, and subsequently assigned to Anna M. McNeill, on an opera house at Elk Lake, Ontario, and were the product of noisy circulars with which Frank Anthony, of 44 Court Street, Brooklyn, flooded the upper part of Canada a year ago, as well as some remote parts of the United States, offering 25 per cent. brokerage to any fire insurance agents for business which they had difficulty in placing on account of tariff rates or for any other reason.

"At the time these circulars were sent out a Toronto agent of reliable standing offered the Brooklyn man a fictitious risk that no map gave any trace of, to see what would happen. With breathless haste policies covering the phantom risk for $10,000 were hurried back for delivery through the Traders Bank of Toronto, with sight drafts attached for the premium of $650, the agent being notified by letter that it was necessary to make a C.O.D. collection on account of the cash needed for reinsurance, and authorizing him to retain one-fourth of the amount as commission. It is needless to say that the commission was not availed of.

Caught by an Anthony Circular.

"The policies represented by Mr. Carroll were fruits of the circularizing campaign of Anthony, of Brooklyn, and were placed by Anthony through H. C. Harvey, an agent of Elk Lake, Ontario, on the McNeill Opera House, a bona-fide risk, which burned last February with a total loss. One of the policies was in the Integrity Mutual Fire Insurance Company of Philadelphia for $1,500 on building, and the other was in the Columbia Mutual Fire Insurance Company of Philadelphia for $1,650 on contents.

"To this queer underwriting outfit in Philadelphia, assuming fire risks in remote parts of the United States and Canada under authority of charters granted by the State of Pennsylvania, notice of the fire loss under the McNeill policies at Elk Lake, Ontario, was duly sent, together with the fact that the firm of Stimson, Ring & Company, adjusters, of Toronto, represented the assured, and inquiring whether the companies were willing for them to act on their behalf. Word was sent back for the adjusters to go ahead, and in due time proofs of loss were forwarded."

No Sympathy for These.

Little sympathy can be offered Mr. Carroll for his patronage of such doubtful underwriting agencies. It would be interesting also to hear from the Toronto agents of the much discussed Frank Anthony.

Finally there comes news that the state insurance department of Pennsylvania has descended upon the Manhattan Life Insurance Building at Fourth and Walnut Streets, New York, where Anthony and his colleagues were housed. Anthony himself is under $4,000 bail for trial.

The Bucket Shop Mutuals.

The concerns which were brought to light as frauds have the following titles: The Integrity Mutual Fire Insurance Company, the Columbia Mutual Fire Insurance Company, the Loyal Mutual Fire Insurance Company, the Fairmount Mutual Fire Insurance Company, the Colonial Mutual Fire Insurance Company, the Imperial Mutual Fire Insurance Company, the Metropolitan Mutual Fire Insurance Company, the Mercantile Mutual Fire Insurance Company, the Peoples Mutual Fire Insurance Company, the George Washington Mutual Fire Insurance Company, the Northern Underwriters Insurance Company, the Merchants Fire Underwriters Insurance Company, the Royal Fire Underwriters Insurance Company, and the Ætna Fire and Marine Insurance Company of Delaware.

While the State insurance officials in the neighboring country are weeding out these pests in the underwriting field, Canada permits unlicensed insurance to flourish from coast to coast.

◆

Every province in the Dominion will have a composite exhibit of its resources at the Canadian National Exhibition, Toronto, this year.

A proud record is that of the Sun Fire office of London, which is more than two hundred years in business. Besides its consistently honorable and liberal character in dealing with policy-holders, the Sun has always been an exemplar of care and conservatism in fire underwriting, and has built up a vast business.

In the year 1910 the fire premiums amounted to $7,355,985, and the surplus on the year's business is the highest in the company's history. Losses were low, amounting to only $3,273,555, equal to 44.5 per cent. of the premiums. Expenses of management and commissions absorbed $2,708,040 or 36.8 per cent., both ratios being lower than the year 1909. These disbursements and the allowance of 40 per cent. reserve for unexpired risks leave a trading surplus for the year of $1,387,860. With interest receipts of $339,595, a total of $1,727,455 is transferred to the profit and loss account from the fire account.

SASKATCHEWAN'S LARGE WHEAT ACREAGE.

Increase of Twenty Per Cent. Over Last Year's Figures—Gain in Land Values.

The increase in the wheat acreage in Saskatchewan this year is 933,401 or 20 per cent. over that of 1910, the total acreage being 5,598,235. The acreage under oats is placed . Provincial Department of Agriculture at 2,291,832, a gain of 209,216 or more than 10 per cent. over the acreage of the previous year. The acreage under both crops was more than trebled in the past five years. The following are some ting details respecting this progressive province:

Wheat.

District.	1911 Estimated Acreage.	1910 Acreage.	Inc. Per C.
1. South Eastern	1,694,694	1,639,762	3.35
2. South Central	774,827	620,358	24.90
3. South Western	280,197	170,644	64.20
4. East Central	349,876	303,924	15.12
5. Central	1,601,575	1,348,922	18.73
6. West Central	534,591	318,531	67.83
7. North Eastern	31,526	20,841	51.27
8. North Central	149,895	114.968	30.38
9. North Western	181,054	126,835	42.77
The Province	5,598,235	4,664,834	20.01

Increase—993,401 acres.

Oats.

District.	1911 Estimated Acreage.	1910 Acreage.	Inc. Per C.
1. South Eastern	591,556	595,786	.71
2. South Central	305,602	256,313	19.23
3. South Western	92,366	71,380	29.40
4. East Central	484,442	427,801	13.24
5. Central	441,575	422,560	4.50
6. West Central	157,198	116,022	35.49
7. North Eastern	51,890	43,242	20.
8. North Central	91,366	82.178	11.18
9. North Western	75,828	67325	12.68
The Province	2,291,823	2,082,607	10.05

Increase—209,216 acres.

The largest increases have taken place in the south-central district within the bounds of which lies the large pre-emption area south and west of Moose Jaw, the west-central, which includes the Goose Lake country, the south-western, including all that country tributary to the western Saskatchewan portion of the main line of the C.P.R, the north-eastern, which includes the fertile Carrot River Valley and the north-western, within the limits of which is located the Battleford district whither the large areas of free government land recently thrown open have drawn many homesteaders. The east central gained in oats what it lost in the wheat acreage.

Result of New Settlers.

The market increases are almost wholly attributable to the work of the new settlers. The American settlers who came in during the year have also left the imprint of their toil on the prairies. These for the most part are wealthy farmers who sold out their holdings in the States and came well equipped for undertaking the cultivation of large areas. This will be particularly noticeable in the large increase in flax. The department, however, is not yet in a position to give official figures of the acreages under barley and flax, as a large percentage of these crops was not sown at the time the correspondents sent in their returns on which the wheat and oats acreages are based. The increase in settlement, the consequent increase in the amount of new land broken and the better condition of the seed-bed this year, are some of the causes which contributed to the marked increase in the wheat acreage. Wheat seeding was not general until the 22nd of April, being from two to three weeks later than last year, although at one point in the north, seeding was started as early as March 16th. The more than usually favorable fall and spring conditions have, however, more than made up for the delay in starting, and the crops are now further ahead than they were at this time last year. The first oats sown was on April 2nd and the oats seeding was general by May 4th.

There is a slight increase in the ruling average wages of male farm help, while that for domestic help remains much the same as last year. For hired men the wages run from $259 to $333 per year, or $29.95 to $39.40 per month, and for servant girls from $12 to $18.70 per month. As was the case last year, the need seems to be for more experienced male farm help, while in every district except adjoining foreign settlements where the native supply can be drawn from there is a scarcity of female help.

Big Increase in Land Values.

Land values have gone up fully 25 per cent. The average price of improved land runs from $20 to $27 and for unimproved from $15 to $23 per acre.

LAND VALUES.

District	Improved Lands		Unimproved Lands	
1. South Eastern	$22.60	$29.45	$14.60	$20.45
2. South Central	28.75	37.45	22.40	35.35
3. South Western	18.00	24.80	12.80	27.15
4. East Central	17.35	27.15	15.20	27.35
5. Central	21.60	28.80	15.20	20.60
6. West Central	21.40	29.65	15.90	20.80
7. North Eastern	17.20	22.70	13.45	24.40
8. North Central	16.60	21.10	11.60	15.25
9. North Western	16.70	22.25	14.10	17.45
Province	$20.00	$27.05	$15.00	$23.20

Stock Conditions are Good.

The health condition of stock is well up to the standard, although last winter was more prolonged and severe than that of 1909, and more trying on the health of animals generally. Abortion was the chief trouble among mares, while horses were subjected to colds, In some parts horses came through the winter poor in flesh, having suffered from colic and indigestion brought about by too much straw feeding. A number suffering from glanders were destroyed. Swamp fever was rarely mentioned. Distemper and pneumonia caused some loss. Swine, which were practically free from disease last year, suffered most this season. Many succumbed to a disease which attacked them suddenly, causing paralysis. The farmers were at a loss to correctly determine the nature of the complaint. The Provincial representative of the Dominion Health of Animals Branch who diagnosed a number of cases in the Elbow district, where it was most prevalent, puts the trouble down to a dietetic disarrangement, and states there is no trace of cholera. There has been no disease amongst sheep, while cattle have have also been practically immune, only isolated cases of infection by ringworm, warble, and lice being reported.

* * *

CANADIAN BUILDING STATISTICS.

A gain of thirty per cent. over the same period of 1910 is shown by the statistics of building operations in twenty-six Canadian cities and towns for the first six months of the year:—

Town or city.	1st 6 mos. 1910.	1st 6 mos. 1911.	Approx. Inc. % 6 mos.
Toronto	$9,820,648	$11,939,953	22
Vancouver	6,885,880	9,188,406	33
Winnipeg,	9,906,100	8,581,550	13
Calgary	2,394,942	8,212,248	242
Montreal	7,126,880	7,305,816	2
Regina	1,342,003	2,936,930	111
Saskatoon	1,657,131	2,575,441	55
Hamilton	1,232,725	2,246,657	82
Edmonton	1,054,476	1,620,431	54
Victoria	1,202,835	1,432,585	19
Ottawa	1,690,025	1,393,370	12*
Moose Jaw	513,210	1,295,575	154
Brandon	401,700	803,574	101
Sherbrooke	300,000	675,000	125

Halifax	175,450	211,150	20
Strathcona	234,500	214,183	0*
St. John, N.B.	222,000	211,700	5*
St. Thomas	112,850	136,150	21
Kingston	100,143	136,462	36
Stratford	190,000	62,500	67*
	$49,240,411	$64,068,029	30

*Decrease.

* * *

In thirty-seven years, ended with 1910, the number of persons convicted of arson by the efforts of fire underwriters was 304, and the average sentence of those convicted exceeded fifteen months, excepting two, who went to jail for life.

AMERICAN ARGUMENTS FOR RECIPROCITY

Are Excellent Reasons for Canada's Rejection of the Pact.

The Monetary Times believes that the consummation of the proposed reciprocity agreement would be injurious to the interests of Canada as a nation. The treaty can and should be examined outside the sphere of political bias.

Many of the chief arguments advanced by the Americans for the passing of the treaty are in reality telling arguments against reciprocity, so far as Canada is concerned. That reciprocity is intended to prevent a home market in Western Canada is frankly stated by The Northwestern Miller, the chief organ of the American milling trade, which says:—

"The disposition of Canada's surplus is a question upon the answer to which depends the future, not only of the milling interests of the (American) Northwest, but indeed of the United States. Should this surplus be shipped abroad, it must inevitably mean the destruction of the American export trade, the shifting of the American milling centre, the gradual decline of the American milling interest to a comparatively unimportant place in the list of large American industries.

"The miller who is able to grind this enormous (Canadian) crop will be the miller of the future, and where he is, there will be the great mills of the world.

Flowing to American Elevators.

"The future of the American milling with free Canadian wheat secured is a grand one. With this enormous crop flowing into the mills and elevators of the States, a splendid tide of prosperity would follow in its wake. The mills of America would go forward on their developing course, new mills would be built, and capacities enlarged. New markets abroad would be conquered.

"New railways would be extended into the wheat-growing territory. American railroads carrying flour from the mills would secure additional freights; American banks would obtain increased deposits, and greatly enlarged exchange accounts; American mill operatives would be in demand, and payrolls would be increased; mill machinery, bags, barrels and other mill supplies would be required in larger quantities; more money would be in circulation, and the benefit would be felt in every artery of industrial life touched by milling.

"There would be an increase in grain firms, in elevators and in every branch of the grain-handling and flour-making interests. This would be felt in the added value of real estate and in the solid and substantial development of every undertaking and enterprise that makes a community prosperous."

The Honorable P. C. Knox, one of the American fathers of the agreement, says:—

"The free admission of grain from Canada meets the present situation and provides against future contingencies when the Canadian surplus becomes greater by replacing the control in the hands of our own grain growers."

North and South Trade.

Mr. J. J. Hill, the railroad magnate who desires north and south trade on his American lines says:—

"The future union of all parts of the British Empire in a commercial federation is almost certain. When that shall have been concluded, under a system of preferential advantages securing the English market to a colonial producer of raw materials and food products, and the colonial market to the English manufacturer, it will strike the United States a double blow. Our best customer, Great Britain, and our third best, Canada, will trade less and less with us and more and more with each other. And it will then be permanently impossible to repair our error. Political and economic weather signals indicate that should the present measure fail, no other can succeed it for many years, if ever."

Some Well Grounded Fears.

The Minneapolis Journal fears that Canada would supply English needs, taking away American trade if reciprocity failed to pass. That journal says:—

"To-day England is our best customer, and Canada is our third best customer. But our foreign trade wanes, and that of Canada grows. If we push Canada into England's arms, the trade arrangements between the two will tend more and more to shut us out.

"How long will our trade with these two customers last if reciprocity fails? Our Canadian trade must fall off, as the east and west channels of her commerce are scoured by use. And Canada will more and more supply English needs in our stead.

"Markets of Ninety Millions for Canada"

This alleged ninety-million market is the most delusive fallacy of defenders of the reciprocity agreement. The market is not there for the farmer. Nobody has yet claimed it to be there for the manufacturer.

Consider the facts. The total population of the United States is about ninety millions. According to the last complete census returns of the United States, 35.1 per cent. of all the families of the Republic were "farm families," which means that of a population of ninety millions, thirty-one million, five hundred and ninety thousand people were living on farms, who would certainly not buy the products of Canadian farms. There are probably in the country towns and villages contiguous to the farms about twenty million people who would certainly buy their supplies from the contiguous farms and not from Canada.

It is inconceivable that the Southern and Southwestern States would provide a market worth considering for any kind of Canadian farm produce. The population of these States was, by the census of 1910, over thirty-six millions. Deduct from the ninety millions the farming community and those in the Southern and Western States who are not farmers, and those in the country towns and villages referred to, and how many are left who could in any way be relied on as consumers of Canadian farm produce in competition with the farmers of the United States?

The ninety million market, reduced to facts by common sense, means a chance only, and that an intermittent one, of selling at a profit some of our farm products to some of the people of the cities and towns not far from the international boundary line.

To create and encourage a community of interest between the whole of Canada and the United States because of temptation at a few points along the border, is to reverse the whole policy on which Canadian nationality has been nourished. But is it likely that the chance of selling at higher prices in these cities and towns will be realized?

So far as trade in eatables is concerned, the desire of the American people is to use reciprocity with Canada as a means to reduce prices. If prices are high in Detroit and Buffalo because the tariff makes it difficult to obtain Canadian produce, the removal of the tariff must instantly reduce prices in those cities. Reciprocity with the United States will not give to the Canadian farmer a better market than his market at home, but it will reduce costs to the American consumer.

CROPS IN EUROPE

A cablegram received from the International Agricultural Institute at Rome gives preliminary estimates of 1911 wheat harvest as follows:—

Belgium 14,054,000 bushels compared with 12,449,000 last year. Hungary 173,886,000 compared with 198,484,000; Italy 196,579,000 compared with 153,339,000 last year; Spain 154,437,000 compared with 137,449,000; Roumania 121,710,000 compared with 110,828,000; Great Britain 61,351,000 compared with 58,235,000 in Great Britain and Ireland last year. Conditions in Russia satisfactory.

FRANCE—The latest reports are very optimistic, and point to a yield of about 320,000,000 bushels, against 253,000,000 bushels in 1910. Harvest has commenced in many districts, and the quality promises to be very good.

GERMANY—The latest official report indicates an outturn of about 136,000,000 bushels against 142,000,000 in 1910. The weather has recently been very favorable and the quality promises to be better than last year.

RUSSIA—The weather continues very hot in the Volga districts, very great damage has been done, and the yield is expected to be very small. In most other parts of the empire fairly good results are expected, and if there has been no particular decrease in the area sown, compared with last year, a relatively large yield of wheat may still be gathered, even if some 15 per cent. smaller than last year.

TURKEY—The area sown is reported to be much larger than last year; conditions generally have been favorable, and the yield promises to be an excellent one.

ROUMANIA—The overflowing of the Moldau in its upper reaches has done immense damage, especially to the timber industry. The crops are in danger.

The harvest in progress on the north coast of Africa is said to promise well in Algeria, where the yield of wheat is usually upward of 35,000,000 and of barley over 45,000,000 bushels; in the much less important producers, Tunis and Morocco, only a moderate outcome is expected. According to the June official report, the yield on the 1,250,000 acres of wheat in Egypt was likely to be "good" in upper Egypt, but in lower Egypt not quite up to that standard.

CANADIAN ECHOES OF ENGLISH BANK SMASH.

Proprietor of Defunct Charing Cross Bank of London Tells Court of his Enterprises in the Dominion.

Some interesting evidence concerning the proposed Atlantic, Quebec and Western Railway was given the other day when A. W. Carpenter, the proprietor of the defunct Charing Cross Bank, was charged on remand in London, England, with obtaining money and credit by false pretenses in connection with that institution. Carpenter stated that all his depositors would have had their money because when his railway was completed he could have paid 20 shillings in the pound. Asked if he took expert advice as to whether the railway was likely to pay, he replied he was advised it was likely to pay from the start.

Has Optimistic Views.

"I consulted men who were thoroughly conversant with Canadian affairs," he said, "and who had no interest in misleading me. Fishing is the main industry at present, but the railway will alter that. It is no use putting up factories unless you can get your goods away. There is an immensely rich territory on the other side of the St. Lawrence, and we shall have business from there. Gaspe is likely to be largely used as a health resort. Perce is only twenty miles distant from Gaspe, and that is called the Scarborough of Quebec. It is a lovely place."

Mr. Oddie: How is the traffic dealt with at present?—By coach and steamer. There are several steamers, and one or two of them are subsidized by the Government. We shall get the whole of that traffic.

Mr. Bodkin remarked that Mr. Oddie was getting wide of the mark.

Mr. Oddie said Mr. Bodkin had suggested, in his opening statement, that the railway was practically worthless, and he thought he was entitled to show the prisoner's opinion of it.

Financing of the Road.

Mr. Bodkin replied that he did not say that the railway was worthless. It was not so much a question of whether there was any potential value in the railway as whether the prisoner must not have known that the financing of it with borrowed capital at the rate of interest he was paying, was an impossible task. He must have known that such a thing was impossible, and that, together with the false statements in the advertisements, would be the case against him.

Mr. Oddie: He considers the railway worth 2½ millions. You do not seem to take any notice of that.

Mr. Bodkin: No, because he once said it was worth five millions, and afterwards four millions.

The prisoner said the Canadian Government was constructing deep water quays, wharves and landing-stages at Gaspe.

Mr. Oddie: With what object?—To assist the railway and to show their confidence in the scheme.

Will these wharves and landing-stages be available for the Transatlantic traffic?—Yes, they are being built for the largest steamers afloat.

Money Lenders and Ice Breakers.

You hope to get European traffic to Gaspe?—Certainly, I am sure we shall get some of it. It is the opinion of the directors that the railway will revolutionize the traffic between Canada and Europe. The harbor at Gaspe would be open ten months out of the year at the least—three months after Quebec harbor is closed.

Should there be any difficulty with ice you will know how to deal with it?—Yes, with an ice breaker.

Mr. Bodkin: What does a money-lender in Bedford street know about ice in Canada?

The prisoner said that some of the depositors knew what he was doing with their money, and had every confidence in his judgment. He told some of them about his railway, as he was proud of it. In his opinion there was no finer security in the world than a railway in a fine country like Canada. He was guided to a great extent as to the value of the oilfields he purchased by reports which were now put in.

Mr. Graham Campbell: I notice that one of the reports is dated 1863.

Mr. Oddie: The oil is still there.

The prisoner said he consulted Sir Boverton Redwood as to the oilfields, and relied upon his advice as to the Petroleum Oil Trust. Specimens were taken and examined. Although his liabilities to depositors increased, his assets increased in proportion. The railway was 104 miles long, and, for every mile which was built, he was entitled to 4,000 acres of freehold land, and £1,300 in cash subsidies from the Government. Sometimes there were 5,000 or 6,000 men at work on the line. [illegible]sted all the money as fast as it came in. Sometimes he bought Russian bonds and Brighton Railway stock.

FOREIGN TRADE OF INTERNATIONAL HARVESTER

Corporation is the Chief Feature of Its Business and Big Expansion is Anticipated.

The chief feature of the business of the International Harvester Company is its foreign trade. Shipments from the United States and output of plants in foreign lands have established an unprecedented record. If the present rate of foreign sales can be maintained, which so far has been 25 per cent. above last year's business, Harvester's foreign trade will this year reach the enormous sum of $40,000,000.

Large Cross Sales.

What gross sales of $40,000,000 will mean to the International Harvester Company can be readily seen when it is said that this branch of trade contributed only $17,000,000 in 1905. Since then there has been a rapid expansion, due to the aggressive policy of the management and its foresight to see the great possibilities abroad. For the past six or seven years Harvester has spared no time or money in creating foreign markets. The sales department has been so successful as to force the company to construct new plants for the manufacture of harvesting machines in all large foreign agricultural centres.

Assuming foreign sales reach $40,000,000 this year, they will compare with previous years as follows:—

Year.	Foreign sales.	% Foreign sales to total sales.
1911	$40,000,000	38.0
1910	34,200,000	33.8
1909	28,134,375	32.6
1908	24,804,793	34.4
1907	24,478,544	31.2
1906	20,199,313	29.9
1905	16,914,913	30.9

It is not expected that domestic sales will retain their yearly percentage gains this season, due largely to the falling off in the demand for certain machines. If such be the case, then percentage foreign sales will be considerably larger than given in the above tabulation. Those in authority state that the company's foreign trade is still in its infancy.

Plants in Canada.

The International Harvester Company of Canada, Limited, is the Canadian branch of this giant corporation. It has works at Hamilton, Chatham and Paris, Ont. The construction of the Hamilton plant was commenced in 1902, and the manufacture of the Canadian requirements of harvesting machinery and tillage implements was begun in 1904. The total land area of the company in Canada is 151 acres; the annual capacity, 174,000 machines; and the number of employees, 2,525. The company has 15 plants in the United States and a plant in France Sweden, Germany, and Russia. There are also several affiliated and subsidiary companies.

NORTHERN CROWN BANK

A statement of the result of the business of the Northern Crown Bank for the half year ended June 30th, 1911, shows a balance at credit of profit and loss account at the beginning of the half year of $170,649. The net profits for the period after deducting the usual expenses of management, tax payments, etc., total $116,909. This gave a sum of $287,559 for distribution. Dividends at the rate of 5 per cent. per annum accounted for $55,185, thus leaving a balance to be carried forward to the credit of profit and loss account of $232,373.

The profits are equal to about 10.6 per cent. upon the capital and are slightly less than those of the corresponding period last year. The latter half of the current year is likely to be the better one from the standpoint of earning power. It is not at all unlikely, therefore, that the year's results will show an increase over the figures of the previous twelve months.

The liquid assets of the bank have increased in the course of twelve months from $2,171,352 at the end of June, 1910, to $3,426,860, June 30, 1911. The general asset increase has been from $15,099,345 to $17,150,451. At the end of June the bank circulation touched at $1,816,112, as compared with $1,657,208 a year ago. Deposits not bearing interest increased from $3,021,038 to $3,741,594. and deposits bearing interest increased from $7,428,459 to $8,920,259. The Northern Crown Bank is making rapid strides especially in Western Canada. Much credit is due to the energetic policy pursued by Mr. R. Campbell, the general manager of the bank.

MOUNT ROYAL HOTEL BONDS

All Taken by One Subscriber—Financing of the Company—Story of Paper Mills Merger.

(Staff Correspondence.)

Monetary Times Office,
Montreal, Aug. 9th.

Messrs. H. Markland Molson, William Wainwright. William Lyall, William Morrice, John Carson, and W. I. Gear, have been elected a board of directors for the new Mount Royal hotel which is to be erected at the corner of St. Catherine and Peel streets in Montreal. A further director will be elected shortly. The financing of the hotel has now been completed. The company will have the following capital:—

Common stock	$1,600,000
Preferred 7 per cent. cumulative	1,100,000
	$2,700,000
Bonds, 5 per cent.	$1,800,000

The securities have all been issued. One subscriber has taken all the bonds. The preferred stock was sold at 85. it included a bonus of 40 per cent. common stock and the list of shareholders is said to be a good one.

Low Cost of Steel.

Owing to the present low cost of steel, the purchase of the structural material has been advantageously made and the work will be proceeded with as quickly as the engineers have completed plans. Altogether $200,000 worth of structural steel will be used. It is hoped that the material will be ready for assembling next May, when the work of construction will begin on the site. It is expected that within a year thereafter the hotel will be open for guests. It will have nearly four hundred rooms.

Illustrating the feeling in financial circles concerning the value of the site as well as the value of the undertaking itself as a business proposition it may be interesting to state that one of the principal banks in the city has already offered $5 per square foot per year for space on the ground floor. offering in addition thereto to subscribe to $25.000 worth of stock.

Rumors of Paper Mills Merger.

The Monetary Times to-day interviewed the Hon. Mr. Rolland at the Banque de Hochelaga concerning the truth of a report that certain paper mills were going into a merger. The Hon. Mr. Rolland is not only president of the Banque de Hochelaga, but of the Rolland Paper Company, which was mentioned as going into the merger. A complete list of the companies mentioned is as follows: The Montrose Paper Company, of Thorold; The Canada Paper Company, of Sherbrooke, P.Q.; The Kinleith Paper Company, St. Catharines; The Barber Bros. Company, Georgetown; The Toronto Paper Company, Cornwall; The St. Lawrence Paper Company, Mille Roches; The Rolland Paper Company, Montreal, and the Northern Paper Company, Quebec. According to the report all the coated paper factories were to be included in the merger and the capital was to be $5,000,000.

Mr. Rolland said: "The report about a coated paper mill merger does not interest us, as our mills manufacture writing paper, not coated. nor are the other mills coated paper mills."

Asked if he had heard of the merger, he said: "Yes. I have heard of it, but so far as I am concerned there is nothing in it. No proposition has been placed before me. There is talk of some sort of a merger being in progress. but we know nothing about it."

Concerning the condition of the paper trade, he said: "There is a good demand for all the lines we manufacture and we have nothing to complain of."

General Outlook is Good.

Speaking of the Banque de Hochelaga, he said: "We are making excellent progress and the outlook for the future is encouraging There is every indication that the crops of the country will be up to the average in practically all places and sometimes above the average. Here and there the continued drought will have an injurious effect, but on the whole, the outlook is that the farmers will reap an excellent harvest. This will be reflected in the bank earnings sooner or later. so that the situation both in industrial and financial circles is all that we can ask for."

Montreal & Southern Counties Railway.

The Montreal & Southern Counties Railway, an electric line, which has now been operating over a year from the lower end of McGill street across Victoria Bridge, to St. Lambert and the South Shore, is desirous of extending its service in the city itself. It may be recalled that the railway had a long up-hill fight in order to gain admission to the city at all. The management now finds that, while the station at the foot of McGill street is fairly convenient, the company would be in a very much better position were it able to deliver its passengers, without transfer, to other parts of the city, or to collect them from other parts. Accordingly it has made application to build along McGill street as far as St. Paul, and westward to Inspector. From here the line would go along Lagauchetiere, up Metcalfe, along Burnside Place, down Stanley street and along Osborne to Mountain, Albert, Chaboillez, returning by Inspector street.

What chance the new electric line stands to get a foothold in the city itself is difficult to say, but Mr. Barlow, the city surveyor, has been instructed to look over the different streets mentioned to see if they are suitable for the purpose mentioned. It is just possible that owing to the large amount of agitation which has gone on during the past year concerning the service given by the Montreal Street Railway, the proposal of the Montreal & Southern Counties would be more favorably received than it would have been heretofore.

◆

EXECUTIVE OF TORONTO ELECTRIC LIGHT COMPANY

Is Reconstructed—Many New Directors Appointed—Mackenzie-Mann Interests Dominate.

Some important changes are made in the executive of the Toronto Electric Light Company at the twenty-eighth annual general meeting of the shareholders this week. Sir Henry Pellatt continues as president of the company, although it is understood that Mr. D. B. Hanna will work in close touch with Sir Henry. Mr. Hanna becomes the new vice-president of the company. Mr. H. H. Macrae, who recently took charge of the British and Colonial Land and Investment Company, Sir Henry Pellatt's new loan corporation, is second vice-president of the Toronto Electric Light Company.

Mr. Pack is General Manager.

Mr. R. F. Pack, previously secretary of the Toronto Electric Light Company, takes office as Mr. Macrae's successor in the office of general manager. Mr. Pack has been connected with the company for 21 years. In the board of directors elected four new names appear as representative of the new control, namely, Sir William Mackenzie, president of the Toronto Railway and the Toronto Power Company; Mr. Robert J. Fleming, general manager of the same companies; Mr. D. B. Hanna, practical man of the Canadian Northern interests; and Mr. Z. A. Lash, their general counsel. Sir Henry Pellatt, Hon. George A. Cox, and Mr. Frederic Nicholls are the three former directors who remain; while Messrs. E. R. Wood and H. H. Macrae, as new members, strengthen the forces, respectively, of Senator Cox and Sir Henry. The other two new directors are Messrs. R. C. Brown and G. A. Morrow.

Of the former board of eleven directors seven were dropped, and one, Mr. S. F. McKinnon, died last week. Those who go out include three who were representative of the Canadian General Electric Company, and the former control of the Toronto Power Company:—Messrs. W. D. Matthews (who was vice-president last year), H. P. Dwight and W. R. Brock. The others who leave the Toronto Electric Light Board are Messrs. Thomas Walmsley, L. Goldman, Samuel Trees and Hugh Blain.

◆

NATIONAL FINANCE COMPANY.

A meeting of the directors of the National Finance Company, Limited, Vancouver, B.C., at which the half-yearly report was read, has been held. The directors expressed themselves as being pleased with the manner in which the company has been handled, during the first six months of this year, the net profit being over $60,000. The assets now stand at $2,029,682, as against $1,779,682 on December 31st, 1910. The company has been making rapid progress and great advances have been made in the trust department, including the securing of many new estates, handling of properties, trusteeships and guarantees.

The company has just moved into its new office at the corner of Pender and Hamilton Streets. These offices are well equipped in every detail. The company's facilities in the investment department are of the best. Its collection and trust departments have lately been inaugurated and already a large volume of business has been received. So far the results from the brokerage department have been satisfactory. The dividend earnings of the company have been encouraging.

MUNICIPAL FIRE INSURANCE

In Relation to Fire Underwriters' Profits—Some Figures of Interest.

An article designed to make it appear that fire insurance is a money-making business finds place in the August issue of The Canadian Municipal Journal. After a rose-colored statement of English insurance companies' profits and the wonders of profits achieved by a single Canadian company quite lately, a paragraph of the article concludes: "Municipal Insurance has paid in England—why should it not pay here?"

One cogent reason why any sort of fire underwriting enterprise which may pay in England does not pay here is the marked difference in conditions in the two countries. In Great Britain, solid stone and brick construction, conservative building laws, municipal regulations and careful habits of the populace with respect to combustible substances, keep the annual fire loss down to something like 40 cents per annum per head of the population. The average percentage in Germany, France, Denmark and Italy is only 33 cents. In Canada, lax building laws, houses built largely of wood, forest fires, a variable climate, and careless habits with respect to fire, have caused the fire loss of Canada to mount to $2.70 per head in 1909, and to $3.14 per head in 1910. Here is one answer to the editor's "Why?"

While it is quite true that British fire underwriting companies of the first class make good profits, they do not make them out of Canadian risks, but out of the enormous business they do in other parts of the world. The result of five years' fire underwriting in Canada in 1868 to 1874 by all companies was a loss of 1.23 per cent. instead of a profit. Taking the years 1875 to 1908, inclusive, the Dominion Insurance Report shows that the Canadian, British and American companies doing business in Canada took $251,260,021 in premiums. They paid for losses in those 33 years $163,242,836; for expenses $78,391,456; and they carried a liability for reserve on unexpired premiums of $9,453,479. Adding these items together we have $251,087,171 showing a profit of only $172,850, equal to a mere fraction of one per cent., all told, on the Canadian business.

In some of these years the companies showed a good profit the favorable margin being, for example, in 1874, 1880, 1889, 1896, 1902 and 1906, nine, seventeen, thirteen, six, twenty-five, and twenty per cent., respectively. But the conflagration of 1877 in St. John swept away millions; for ten years, between 1891 and 1901, the outgo was always over 100 per cent. of the income; big fires in Quebec, Hull and Ottawa in 1901 and a bigger one in Toronto in 1904 carried the expenditure in the one case to $105 and in the other to 142 per cent. of the premiums. As we have already stated forty years' underwriting in Canada was a loss. Thus, unfailingly, does the Fire Fiend at longer or shorter intervals pull to pieces the reserves which insurance companies laboriously accumulate in favorable years. If a company here and there manages by selection of risks and by great economy to make good profits for five or even ten years and build up good reserve, this cannot efface the facts of past experience, nor can it remove the conflagration hazard.

It might be well for The Canadian Municipal Journal, which has built up an alluring fabric of possible money-making out of the success of one Canadian company and the large dividends of a dozen or two prominent British and American to look further into the record of fire underwriting in Canada. It will find the list of unsuccessful companies a long one. In the thirty-six years, ended with 1906, twenty-seven United States companies either went out of business or retired from Canada, the best-remembered being the New England, of Hartford, the Andes, of Cincinnati, and the Agricultural, Watertown. In the same period eighteen British companies gave up the struggle, notable among them being the State, the Monarch, the Albion and the United. The Canadian companies which were removed from the list numbered twenty-two, making a total of 67 of all nationalities. A list of some of these Canadian organizations may be of service to the readers of The Canadian Municipal Journal, and an enlightenment, at least, to its editor.

This is a convincing list.

MONTREAL'S WATER SUPPLY

Some slight apprehension, it is claimed, is felt in insurance circles concerning the fire insurance position in the vicinity of Montreal just now. The drouth has been long and severe, thus leaving everything inflammable in the most favorable condition to carry fire. For instance, the grass in the vicinity of the city is exceedingly dry and several fires caused by children playing with matches, it is thought, called for the attention of the fire brigade. Because of the water shortage these grass fires in the north part of the city had to be fought with sand and earth and by a chemical engine. Although in no case was any property in danger from these fires, the incidents were not reassuring, when all the circumstances are taken into consideration. The aldermen in the different outlying wards of Montreal are complaining that they are not getting proper fire protection from the city. This protection was promised them when these outlying wards were taken into the city, and although the installation of a fire-fighting apparatus was to be made immediately, no action has yet been taken in the matter.

The controllers in reply state that it is impossible for the city to lay water systems in several wards in a year's time even if it had the money, which it has not. They will install the water mains as quickly as possible. In the city of Montreal itself there is some shortage of water so that in case of fire the protection is not so good as would otherwise be the case. The lower level reservoir is being repaired and the water is down to a depth of 17 feet, which is 6 feet under normal, while the contents are at present but 20,000,000 gallons or about 45 per cent. of what it should contain. There is not much danger from any of these sources at the present time, it is thought.

The contract has been given for the new 12-inch pump at the water works, which will have a daily capacity of 12,000,000 gallons. This will increase the city's total pumping capacity to 55,000,000 gallons a day.

The average daily consumption of water during the present year has been 42,000,000 gallons a day; but the hot spell caused these figures to mount. On August 6th there were 47,000,000 gallons used; on August 5th, a total of 48,000,000 gallons flowed through the city taps, and the day previous, August 4th, saw a consumption of 46,500,000 gallons.

Mr. H. J. Fuller has just been appointed a director of the Eastern Townships Bank thus filling the vacancy on the Board which was occasioned by the death of the late Mr. S. H. C. Miner. In Montreal financial circles it is considered that the directors of the bank have made a wise choice. Mr. Fuller has made an excellent success of his business, the Canadian Fairbanks, Limited, and is now taking a prominent position in the financial world. Mr. Fuller is also a director of the Canadian Rand and of the Dominion Safe & Vault Company, which company was organized a year or so ago, with factories at Farnham, Quebec. This company was recently merged with the Canadian Fairbanks Company, with head offices in Montreal, and the Fairbanks-Morse Canadian Manufacturing Company, with head offices in Toronto, and the E. & P. Fairbanks Company, of Sherbrooke, P.Q. The new company is called the Canadian Fairbanks-Morse Company and its capitalization is $2,600,000. Mr. Fuller will be president of this concern while Mr. P. C. Brooks, of Toronto, will be vice-president.

◆

RAILROAD EARNINGS.

Railroad earnings for week ended July 31st:—

	1911.	1910.	Increase.
C. P. R.	$2,905,000	$2,752,000	+ $153,000
C. N. R.	427,700	360,600	+ 67,100
T. & N. O.	48,893	30,378	+ 18,515
Halifax Electric ..	7,591	7,172	+ 419

The returns of the Guelph Junction Railway Company for the quarter ending June 3rd last show the earnings of the road for the city for the three months to be $8,897.37, as against $8,066.09 for the same period of 1910.

◆

The Bank of Montreal has obtained a five year lease on a portion of the People's Trust building, now nearing completion in Kamloops, and will open therein for business. The manager will be Mr. McClintock.

The Merchants Bank of Canada has purchased a property at the corner of Albert and Wallace Streets, Nanaimo.

The Dominion Bank has opened a branch at 905 Granville Street, Vancouver. This bank lately established a main uptown branch at the corner of Granville and Pender, at No. 501.

NEW BRUNSWICK.

British Capital for Lumber Mill—West India Steamship Service—Prices of Logs at Auction Sale.

(Staff Correspondence.)

St. John, New Brunswick, Aug. 8, 1911.

Timely rains during the past week have started millions of feet of logs that were on the St. John River, between Fredericton and Woodstock, and which will be needed to keep the mills busy for the balance of the season. They will be got into the booms without difficulty. While this is a quiet season, trade generally is reported to be in a healthy condition.

Sir Thomas Tait, who is summering at St. Andrews, visited the Queen's County coal fields last week, and expressed the view that with sufficient capital there could be a great development. Sir Thomas made a remark which is worth noting. He expressed surprise that so much valuable soil as he saw in his journey from Fredericton through Queen's County and on to St. John should be neglected, while this province imports grain, beef, butter and cheese from the upper provinces.

There will be a fruit fair in St. John in the autumn, surpassing that of last year. In order to encourage the development of the fruit lands of the province, the St. John Board of Trade has offered a cup, and several merchants have offered cash prizes for the best display of fruits of different kinds at this fair.

West India Steamship Service.

There appears to be a deadlock in the matter of the West India Steamship service. Messrs. Pickford and Black refuse to increase the number of calls of their steamers at St. John without an increase in subsidy, which the St. John Board of Trade regards as entirely too high. The president of the board states that unless an agreement is reached, the board may either appeal to the Federal government for a revision of the contract, or take steps to secure an independent steamship service for this port.

Premier Hazen, while in Great Britain, took steps to develop the oil shales in Albert County, and practically succeeded in negotiations with a strong company to take over the charter from an existing company. If the arrangement can be concluded there will be established in Albert County one of the greatest industries in Canada. These oil shales have been shown by government test to be superior in quality to the Scottish shales.

A group of newspaper men from Bristol, Scotland and Ireland will tour New Brunswick in August. The St. John Board of Trade and the newspapers of the city will unite to welcome the visitors, and see to it that they are fully informed concerning the resources of the province.

The Canadian Pacific Railway may erect a large building for their general offices in St. John. The building occupied by Messrs. Scovil Bros. & Company, at the corner of King and Germain Streets, has been purchased by a lawyer, the name of whose client is not stated. The rumor says it is the Canadian Pacific Railway but this is not confirmed.

British Capital for Lumber Mill.

Messrs. Farnworth & Jardine of Liverpool have bought the lumber property and mills of the Messrs. Alex. Gibson Company, in New Brunswick, for $1,000,000. A company to be known as the Nashwaak Lumber Company, with $5,000,000 capital, is being organized, and it is assumed, since a member of the Liverpool firm is one of the directors, that they will overtake the operation of the mills.

There was a report last week that Messrs. T. S. Simms & Company would remove their brush and broom factory from St. John to Fredericton. A member of the firm was in that city asking what concessions could be secured. Since then arrangements are shown to be possible by which the company will get in St. John all the space they require for the further enlarging of their plant, which has already been several times enlarged during the past two years. It is stated that Messrs. Ganong Brothers, Limited, who are now manufacturing confectionery in St. John as well as St. Stephen, are looking over the present Simms factory with a view to its purchase for the enlargement of their operations.

A new industry has been established at Plaster Rock through the efforts of the Canadian Pacific Railway. The Stinson Reeb Builders' Supply Company of Montreal, has taken over a property there, and are producing crushed gypsum, for which they have already received an order from the Canada Cement Company for 15,000 tons.

The Canadian Pacific Railway has had a small steamer built to run between St. Andrews and Maine ports for the benefit of the sardine business. Captain Walsh, the shore captain for the Canadian Pacific Railway in winter at this port, states that he anticipates a large export trade through this port next winter.

An indication of the price of logs was given at the annual auction sale of unmarked logs in the St. John River drives last week. The spruce brought $14.50 per M.; the pine $10.25, and the cedar $9.40; hemlock sold at $7.50.

Before winter sets in the channel entering St. John Harbor will have an average depth of 34 feet at the lowest tide, and it is expected the dredge W. S. Fielding will be at work on the channel entering Courtenay Bay, where the drydock and ship repair plant will be located and the wharves for the Grand Trunk Pacific.

The ownership of the St. John Cotton Mills is passing to the Dominion Colored Cotton Mills Company. Negotiations for the purchase of stock have been proceeding for a considerable time, but the price offered was not considered satisfactory. The offer has been enlarged to a point, which has led to a transfer of much of the stock, and there is practically a new ownership. So far as is now known here there will be no change in the conduct of the mills. It is an interesting fact, that one of the two mills here was the first cotton factory operated in Canada.—W. E. A.

◆

HAMILTON FIRE INQUIRY.

Low Pressure at the Asylum Waterworks—Loss of Time in Giving Alarm.

The inquiry into the death of eight victims at the fire in Hamilton Asylum was commenced last week and resumed on Thursday. It was disclosed that there was low pressure at the asylum waterworks and loss of time in notifying the city fire department of the conflagration. Dr. English, superintendent of the asylum, stated that the waterworks system and the fire fighting apparatus at the institution afforded adequate protection to all parts of every building.

Chief Engineer Ironsides also testified that everything was in first-class shape on the night of the fire. James Rodgers, night fireman, said that as soon as he heard the alarm, he put extra pressure on his pumps.

City Department Asked Questions.

Bursar Bidwell Way testified to having telephoned to the Bell Telephone Company's offices in the city to notify the city fire department. The city department afterwards called up the asylum and asked if it would be necessary to come up. Mr. Way told them it would. This was about four minutes after he had telephoned. He said the asylum had no direct line to the Hamilton fire department. He then telephoned to the engineer on the Queen street pumping plant, which forces the water up on the mountain. He admitted that the engineer there might have already received word of the fire from another source, as one of the jurors alleged.

Pressure Was Low.

Fred J. Bassett, night watchman on halls C and B, testified that at one o'clock he passed within a yard of the spot where the blaze started and there was no sign of fire.

No electric lights were burning in either hall on the night of the fire, both being dark.

William Griffin, ward supervisor, contradicted Bassett by saying that the hose was not connected when he got up after being awakened by Bassett. He helped Bassett get the hose out, and turned the water on himself. He unlocked all doors of patients' rooms on hall D, and opened two fire extinguishers. There was no water in the hose, he said. He could easily unlock doors in the dark, in which condition the corridor was when he unlocked them. He was positive the lights were turned off. The clothes in the storeroom where the fire started were fresh from the laundry. This was in answer to a question put with the apparent intention of suggesting that the clothing might have contained matches. The witness said the attendants smoked in their own rooms.

◆

INCENDIARY FIRES

A charge of arson has been preferred against Joseph Peavoy, of Elora. Peavoy, who has been in the cells for a few days, was originally arrested on a charge of attempting to steal, was allowed out on his own recognizance for $3,000 and two sureties to $1,500 each.

The Crown will attempt to prove that Peavoy set fire to a livery barn, which was burned to the ground on July 12th. The accused owned the barn, which he had insured for $400, renting it to his employer, Mr. A. Bornhann.

A recent fire at Gloverdale, New Westminster, burned over a large acreage of timber. Only strenuous efforts prevented the fire from spreading to the Dominion standing timber, where the loss might easily have reached over $1,000,000. Two unknown men are suspected of incendiarism.

OUTLOOK IN BRITISH COLUMBIA.

Latest Advices Show That Things Are Not as Bad on the Pacific Coast as Some Would Have Believed.

(Staff Correspondence.)

Vancouver, August 8th.

Just a few figures to help refute the story of Vancouver's 'busted boom," so widely exploited by some Ontario papers. In July, during the building trades strike, and after it had existed a month, the bank clearings were $42,239,102, compared with $22,973,715 in the same month last year. Building permits were nearly double, namely, $1,108,378 last month and $6[illegible]9,530 in July last year. The strike could not help but have effect, but to-day Vancouver is more prosperous than ever. The quieting of real estate activity was not an unmixed evil, but that does not mean a decrease in values. So great is the demand for land and houses that at Kerrisdale, four miles from the waterfront, houses rent for $25 and $30 a month. High rents indicate strong conditions, but they need to come lower than that to give workers a chance. Shipping returns for three years show a doubling, 575,496 tons in 1909 and 1,996,963 in 1911.

Unusual liquidation in Maricopa oil stock has been a feature of the stock exchanges this week, and nearly 200,000 shares have changed hands at falling prices. Local interest is centred in Portland Canal, for shipments are ready and the large number concerned are awaiting returns, which will show the value of the camp.

Conditions in Lumber Industry.

Conditions in the lumber industry are very satisfactory this month. Local demand is in large volume, domestic trade is better with prospects of the best, and shingle shipments are equal to the output. Foreign trade is not up to standard, particularly in the Orient, owing to the slashing of American Pacific coast mills in their effort to clear surplus stock. Millmen in British Columbia have enough business in their own immediate territory not to feel the foreign situation keenly. Logs are a little in excess of the demand, being quoted at from $8 to $9. Shingles are firm at $2.10.

Different financiers returning from the Old Country have advised that only the fullest and clearest information be given regarding issues on the London market, pointing out that the many flotations of lumber companies have been closely criticized. The Canadian Pacific Lumber Company, Limited, has offered for subscription an issue at £93 per cent. of £350,000 six per cent. first mortgage bonds. The issue was made through the London branch of the Royal Bank of Canada, and advices here is that the issue was successful. The new company comprises the interests of five other companies in which the same people are interested. These are: Canadian Pacific Lumber Company, Ltd., Port Moody; Anglo-American Lumber Company, Ltd., Vancouver; Gibbons Lumber Company, Ltd., Arrow Lake; Barclay Sound Cedar Company, Ltd., Alberni, and the Rivers Inlet Timber Syndicate, Owekano Lake.

A London Criticism.

The London World says: "After an interval, too short in all respects, another Canadian lumber issue is being made to the overloaded British investor. The properties are in British Columbia and the profits for the past three years are certified at £30,882. The bonds now offered require £21,000 per annum, so there is not much margin. In these profits nothing has apparently been allowed for depreciation, and as a timber property must naturally depreciate at a quick rate, this is a very bad point. The security for the bonds is stated to be £1,205,467. But this includes timber valued at £660,932. As the timber will be reduced in proportion to the profits earned the real security is only £334,534, or less than the amount of the bonds, which is £350,000. This sum of £334,534 is made up of buildings valued at £117,589, land valued at £131,295, and stock in hand set down at £85,650. The buildings are only nominally of this value, as they would be worth but little to realize; the land is of doubtful value, when once the timber is cut. Altogether the security does not bear investigation, and the bonds are therefore not a good investment. That the issuers do not themselves disagree with this view is indicated by the price at which the six per cent. bonds are offered." It can thus be seen the examination to which these issues are subjected, and the points which appeal to those who consider bond issues in the Old Country for investment should be carefully looked after.

Not only on the mainland but on Vancouver is to be found activity that is attracting attention. Conditions were never better than they are in Victoria, which means that the whole of Vancouver Island is good. Real estate is fairly active, values are increasing, and civic statistics show considerable gains. Prices of real estate in the capital are jumping like they did in Vancouver five years ago. For instance, a firm paid $17,000 for a piece of land on Pandora avenue nine months ago and sold it this week for $54,000.

Mineral Development Progresses.

British Columbia has faith in its lands and minerals for future prosperity. Its arable lands are not vast in extent, but what there are are fertile and located where the climate is unsurpassed in Canada. Advances are being made to settlers and these are coming. With the sudden growth of cities, attention of outside investors and speculators has been directed to real estate and building propositions. Now that the amount of money required for these is much larger than what it was a year or two ago, mining is attracting more attention. Some fine properties are located in British Columbia. The Granby Company's success in the Boundary district and its latest acquisition on the coast shows what is obtainable. One of the latest prospective investors in mines to arrive here is M. Edmond Bloch, of the firm of Paul Bloch, of Paris, which is interested in mining in several countries. M. Bloch has an engineer with him and says that several propositions which have been favorably reported on will be examined.

The close of the coal miners' strike in the Crow's Nest will be welcomed by residents of the interior. It has meant less activity in the mining industry in the Boundary and Kootenay, and besides has seriously threatened the fuel supply for the coming winter. With many smaller coal areas being opened up at various points in the interior and western Alberta, the mines will shortly not be entirely dependent on one source of local supply for its coke.

MORE LANGUAGE FROM LAWSON.

Mr. Thomas W. Lawson, of Boston, the author of "Frenzied Finance" and other valuable volumes, millionaire broker, yachtsman, "trust buster," dictionary improver and language expert, has visited Vancouver. He has spilled a little ink in order to pay a tribute to our Pacific Coast. Here it is:—

"A wonderful country, a remarkable city and a people—well, a people such as one would expect to discover and appreciate the one and build the other.

"Ever since I came into this Pacific Northwest Utopia I have used 'wonderful,' 'extraordinary,' 'marvellous,' etc., until my vocabulary is as shredded as a hobo's trousers, so what's the use trying to say what I think of your beautiful city and the sturdy people who have built it and who will, unless my judgment tricks me, place it in the front rank of the world's greatest cities.

"As I told the people of Oregon, of Oregon's greatest city, the thing which struck me hardest was that your people are homebuilders first and dollar hunters afterwards. My experience has shown me it's the homebuilders, not the dollar chasers, who build best. When I am in a new country I first look to see whether they are planting roses, churches and schools, or saloons, theatres and stock exchanges. I have found there is more money, quicker money and better money in the locality which starts off with the first rather than the second.

"It does not take a visitor to your city long to read in the contented, happy faces, in the leisurely measured stride of your men, women and children the magic words 'success,"—'permanent success.' In my first hour in Vancouver I knew that I would find roses, churches and schools aplenty and I did, and can best tell you what I think of your city and your people by saying I should like to stay here, but as that is impossible I intend to let some of my dollars stay here. Yes, that tells it better than long words, for after all we still live in an age when dollars talk."

ANOTHER WHEAT CROP ESTIMATE

That the Western wheat crop will total about 183,000,000 bushels is the estimate of the Winnipeg Commercial. This result is arrived at by reckoning on a general average of 18½ bushels per acre over the three provinces. This average is considerably better than it has been for several years, and when the extensiveness of the territory concerned is considered, it is a magnificent average. The acreage under wheat is 17½ per cent. higher than last year, and from the circumstances attending the preparation of the soil for this season's crop, there are likely few who will disagree with the estimate.

In a previous issue the Commercial referred to the fact that there has been but little criticism of the estimate of 200,000,000 bushels that has been spoken of all season, seemingly to the satisfaction of nearly all parties interested. If the crops were nearly all uniform throughout the country, the amount of 200,000,000 bushels would, without doubt, be realized. The territory under cultivation has expanded so enormously that every year most likely some part or other will experience backwardness in comparison with the more fortunate localities.

THREE NEW MINING COMPANIES

Account for Eight Millions of Authorized Capital—Large Number of Incorporations.

Fifty-three new companies, with aggregate capital of $14,541,000, have been incorporated. Three Ontario gold mining companies account for $8,000,000 of that sum and the American Canadian Coal Company for another $2,500,000. The Gaspe Fish Company is an interesting incorporation in view of the prominence in which the Atlantic, Quebec and Western Railway has found itself in connection with the English Charing Cross Bank smash. The railway proposes to have its port at Gaspe Harbor. The Mad Dan Mining Company of Toronto claims the most picturesque name this week with the modest capital of $40,000. The Consolidated Swastika Mines, capitalized at $2,000,000, looks like an amalgamation of interests in the Northern Ontario gold fields. Still another automobile manufacturing company thinks the market has further scope and a new concern is therefore to start at Woodstock. Moose Jaw is the headquarters of the Banana Growers Syndicate, with capital of $25,000, and the Acme Trust Company is to operate at Calgary, a point where fruit is somewhat dear and in good demand. Fraternal activity is reflected in the incorporation of the Westminster Masonic Holding Company, capitalized at $40,000.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Macleod, Alta.—Macleod Hotel Company, $20,000.

Lethbridge, Alta.—Concrete Constructions, $50.000.

Moose Jaw, Sask.—Banana Growers Syndicate, $25,000.

Indian Head, Sask.—Boldnan Manufacturing Company, $75,000.

Chilliwack, B.C. — Chilliwack Implement and Produce Company, $50,000.

New Liskeard, Ont.—McCrea & Sharp, $40,000. J. R McCrea. W. C. Sharp, F. L. Smiley.

Haileybury, Ont.—Pike Lake Gold Mines, $3,000,000· J. M. Hall. E. A. Wright, D. W. Lang.

Jonquieres, Que.—Compagnie de Meubles de Jonquieres, $99,000; H. Moisan, A. Masson, T. Leclerc.

Edmonton, Alta.—Walsh & Chambers, $10,000. Ottawa Oil Company, $10,000. St. Leonard's, $75,000.

Port Arthur, Ont.—Whalen Land Corporation, $250,000 W. F. Langworthy, A. J. McComber, P. D. Munroe.

Ottawa, Ont.—Roche Porcupine Gold Mining Company $3,000.000; G. R. Lyon, N. P. Wheeler, T. A. Roche.

Lachine, Que.—Compagnie de Manufacture de Moteurs Robert, $20,000; E. S. Bournet, O. R. A. J. Blanchard, A. Laplante.

New Westminster, B.C.—Westminster Masonic Holding Company, $40,000, Westminster Thoroughbred Association, $200,000.

Petit Rocher, N.B.—Gaspe Fish Company, $50,000; J. H. Corbett, Petit Rocher; A. Landry, Bathurst; H. J. Currie, Campbellton.

Regina, Sask. — Wascana Building Company, $25,000. Freeland Brothers. $20,000. Saskatchewan Pavers, $20,000. Garage, Limited, $100,000.

Niagara Falls, Ont.—Niagara Falls Contracting Company, $40.000· E. D Lowrey. F. A. Goring, Niagara Township; T. E. Ferris, Niagara Falls.

Calgary, Alta. — Parker-Chase Electric Construction Company. $10.000. Langdon Farm Company. $100.000. Acme Fruit Company, $50,000. Moose Jaw Development Company, $32,000.

Winnipeg, Man.—Winnipeg News Company, $20,000; J R. Tanguay, W. H. Lunney. W. J. Walsh. Grain Exchange Billiard Club, $20,000: C. M. Vanderlip, J. H. Carleton, W. Irwin. J. C. Orr & Company, $20,000; J. C. Orr, G. A. Elliott, B. J. Deacon.

Woodstock, Ont.—Woodstock Dairymen's Exchange; T Ballantyne, Stratford; R. Johnston, Woodstock; J. McLevin. East Zorra Township. Woodstock Automobile manufacturing Company, $50,000; A. C. Applebaum, H. H. Thorpe, H. F. Green, Detroit.

Vancouver, B.C. — American Canadian Coal Company, $2,500,000. Central Motor and Machine Shop, $50,000. Parsons Haddock Company. $50,000. British Columbia Wine Company, $100,000. Siwash Creek Mines, $500,000. National Homebuilders, $100,000. Telegram Company, $25,000. Jones & Rant, $50,000. Globe Investment Company, $500,000.

Montreal, Que.—Kennedy Construction Company, $250,000; J. Kennedy, La Tuque; C. D. French, Foster; St. G. Harvey, West Shefford. Brown, Rochette, $45,000; L. Tanguay, C. Lachance, E. Thivierge. Porteous & Company, $50,000; G. Porteous, F. G. Bush, G. R. Drennan. Economic Realty, $100,000; J. W. Domville, C. Dessaulles, L. Garneau. Mackay Realty, $350,000; F. S. Mackay, Montreal; E. Mackay, Papineauville; F. Mackay, Montreal. Sapho Manufacturing Company, $40,000; O. Letourneau, D. Corbeil, J. B. Berard.

Toronto.—Davison & Oakley, $50,000; H. H. Davison, H. Oakley, H. J. Macdonald. Mad Dan Mining Company, $40,000; G. Cooper, S. W. C. Scott, H. W. Male. Canadian Blake Shoes, $100,000; T. Jones, J. K. Lindsay, R. Cummings. Pugh Specialty Company, $40,000; E. J. Luttrell, D. A. Bemis, T. J. Pugh. Timmins Townsite Company, $40,000; J. B. Holden, G. A. Grover, D. W. O'Sullivan Consolidated Swastika Mines, $2,000,000; L. Davis, A. T. Struthers, T. P. Galt. Snead & Company Iron Works. $40,000; G. B. Strathy, M. L. Gordon, J. F. MacGregor.

◆

MONTREAL HARBOR REPORT.

Large Floating Dock to be One of the Latest Acquisitions—Policy of Development.

An extensive report of the Harbor Commissioners of Montreal has been published for the year 1910. The development of Montreal's harbor, which was planned and devised by their chief engineer, Mr. F. W. Cowie, was accepted and approved of by Parliament, and work on the same was commenced during the year under review. This scheme has its objective in a twelve years' continuous policy of development, but while the report naturally deals almost solely with the work accomplished during 1910, it also outlines in some measure the lines upon which this progress is to be continued in the future.

Floating Dry Dock.

Referring to the floating dry dock, which Messrs. Vickers, Sons & Maxim are building and will operate, the commissioners state that the dredging of the site at Molson's Creek has been carried on continuously, and it is expected that the dock will be installed and ready for work in the spring of next year. The plans, which have been approved for this work, call for the reclamation of some 30 acres of land, which will be sufficient to provide sites for all the workshops and other buildings that may be found necessary.

Reverting to the shipping itself, the commissioners draw attention to the fact that during the past year two new lines of vessels have been operating in the port. The chief of these is, of course, the Royal line, owned and operated by the Canadian Northern, and plying between Bristol and Montreal. The second new enterprise in this direction which saw its birth in 1910 was the service between this port and Australia, which was undertaken by the vessels of the New Zealand Shipping Company's fleet, under the direction and management of the Canadian Pacific Railway. Mention is also made of the enterprise shown by the Donaldson line in building and putting on the St. Lawrence route a new steamer in the Saturnia, which has helped in no slight degree to increase the trade between this port and Glasgow.

As regards the grain business in 1910 the commissioners find that their elevator No. 1 handled over fourteen million bushels of grain of all kinds, but some disappointment is expressed at the comparative failure of the floating elevators which the commissioners purchased at considerable cost from the Montreal Grain Elevating Company. This failure is expected to be amply redeemed during the present season. The demand for more shed space became so imperative that it was decided that the two new steel and concrete sheds should be built on the Tarte pier, and work on these has already been commenced.

Want Better Insurance Rates.

The matter of insurance rates is touched upon in a general way, and the commissioners state that they are endeavoring to get a betterment in the rates quoted by Lloyds for the St. Lawrence route, and would seem to have every hope of success.

The revenue of the port for 1910 exceeded that of 1909 by no less than $107,055. The disbursements charged to capital account for the year were $812.669. of which sum $435,812 was for interest charges, and the loans on capital account amounted to $1,300,000.

Number and Tonnage of Vessels.

Dealing with the number and tonnage of all vessels arriving in the port for the year, the commissioners furnish some interesting tables. It would seem that while the number of ships entering the port was 30 in excess of that recorded for 1909, the tonnage of ships had increased over the previous year to no less an extent than 220,000 tons, thus showing that the work that has been done and the money that has been spent in the improvement of the ship channel is commencing to bear fruit. The revenue accruing from the vessels showed an increase of more than $100,000 over the figures for 1909.

* 1909

At a meeting of the directorate of the Federal Life Assurance Company the appointment of Mr. Alfred N. Mitchell as assistant general manager was confirmed to take effect from September 1st. Mr. Mitchell has been connected with the management of the Manufacturers' Life Insurance Company for some time past and has had considerable experience in life insurance work. The appointment was made necessary owing to the large increase in the company's business and Mr. Mitchell should prove a capable executive officer and an able assistant to the general manager. At the same meeting Mr. W. H. Davis, who has been connected with the company for several years, was appointed secretary.

The name of the Canadian Fairbanks Company, Limited, has been changed to the Canadian Fairbanks-Morse Company, Limited, and the capital stock of the company increased from $900,000 to $2,600,000.

The Springfield Fire and Marine Insurance Company has been licensed to transact sprinkler leakage insurance in Canada in addition to fire and tornado insurance for which it is already licensed.

Mr. Myers, of the Great West Permanent Loan Company, Winnipeg, was a caller at The Monetary Times, Toronto office, on his way to Edinburgh, Scotland, where he will represent the Great West.

UNDEVELOPED FIELD IN LIFE INSURANCE.

Mortality Rate and the Importance of Good Sanitary Conditions—Cost of Insurance.

The success or failure of a life insurance company, assuming honest and intelligent management, depends upon three things—the expense rate, interest rate and mortality rate; and in a thoroughly established, well conducted company these factors are of approximately equal importance. This is the conclusion of Mr. Hiram J. Messenger, F.A.S., actuary of the Travelers Insurance Company, who recently submitted a report on the undeveloped field in the life insurance business. As a rule, he continues, companies have paid great attention to the expense rate and the interest rate in all its bearings upon the business, but in the matter of mortality rate in all the wonderful development of life insurance in this country the past sixty years the efforts to secure a favorable mortality have been practically confined to the benefits resulting from a careful initial selection of risks, while the question of what can be done to lower the mortality rate and to keep down the claims by efforts to postpone or to prevent the death of the insured while the policy is in force has hardly been given serious consideration.

Here is a field of work which it is possible to make of really great importance. Life insurance executives have the reputation of being shrewd, practical, level headed business men who know their own interests. Here is an opportunity for them to do a great work for humanity and at the same time directly benefit their own companies and policy-holders. Here is a wholly neglected field of activity having a direct bearing upon the financial success of the business which they are conducting. There is no question of decided improvement in the mortality rate of the country during the past fifty years as the result of progress in sanitary science and its practical application, and while this improvement has been greatest at the younger ages it has been very considerable at the insurable ages under forty. and about three-fourths of the insured take out policies under forty.

Policy-Holders Have Gained.

There is no doubt that policy-holders have gained millions of dollars as the result of this improvement. There is no doubt that the possibilities of improvement in the future are fully equal to the improvement which has taken place in the past. It would be a great mistake, however, to attribute all of this gain from favorable mortality to the benefit resulting from initial selection of risks by the medical examiners. A very large part of this gain is due to a lower mortality resulting from improved sanitary conditions, for which improvement life insurance companies and their officials have very little right to take credit. Mortality statistics for the general population, mortality statistics on certain classes of uninsured lives where the question of medical selection does not enter, show a very decided improvement in recent years for ages under forty.

In order to appreciate this phase of the subject, and especially its important bearing upon life insurance, it will be well to consider for a moment the immense gains resulting from a comparatively slight improvement in the mortality rate. The regular life insurance companies in the United States, not including the industrial business, are paying about $150,000,000 a year for death claims. This is about $12.00 per thousand dollars of insurance in force. If the rate of loss was reduced from $12.00 to $11.00 per thousand of insurance the companies would gain in reduced claims about $12,500,000 every year.

For Medical Examinations.

To secure a favorable mortality these companies are paying about $6,000,000 a year for medical examinations and inspection reports before the risk is accepted—and practically nothing for this purpose after the policy is issued. If they were to expend half as much in a combined general effort to lower the mortality rate probably the results in dollars and cents would be fully as great as results obtained from the money already expended on initial medical examinations. The average policy is for about $2,500, and the average premium about $100. If a company postpones the death of one of its policy-holders for one year it means an advantage to the life prolonged which can scarcely be measured in dollars and cents. To other policy-holders who in the last analysis pay the death claims it means that they receive one more premium ($100) and have another year's use of the amount of the claim ($100) —making a total of $200 additional receipts as the result of postponing the insured's death for one year. If this could be brought about by the expenditure of $5.00 or $10.00 or $25.00 it does not require any unusual acuteness to see that the investment is a good one for policy-holders.

These considerations, together with the results of the investigation made of sanitary conditions throughout the country, lead to the conclusion that what is wanted is an organization in each city throughout the whole country of a number of intelligent, substantial and influential men with practical common sense, interested in all work to improve the sanitary condition of all our cities and having enough technical knowledge of modern sanitary science to know the relative importance of things, what ought to be done and how to do it. It is possible to form such an organization in every city in the country (a sort of a league of municipal sanitary clubs) and if they could only have the backing and general direction of some really powerful and influential body there would be no doubt of the results.

In every city of fifty thousand inhabitants in this country it is possible to find among the managers, the leading agents, the medical examiners and the legal financial representatives of the insurance companies fifteen to twenty men of standing, of influence and of a high average standard of intelligence. From these men, together with two or three of the leading health officials and a few other men of prominence interested in such questions, could be formed an organization, which if directed and given to understand that they would be thoroughly supported by the organized life insurance companies of the country, could exert an influence in bringing about better sanitary conditions—which would mean the saving of millions of dollars to the life insurance policy-holders of the country.

Saving in Cost of Life Insurance.

With such an organization in a city of fifty thousand inhabitants, working intelligently and earnestly, knowing that they have the powerful support of the great life insurance interests of the whole country, it would not be long before every city in the country would have proper authority to compel residents living on streets having sewers and city water to connect their houses with the sewers, and the power would be used. It would not be long before there would be a very great decrease in the number of instances where there is a vault unconnected with the sewer and a well giving surface water on the same premises, and drainage from the former to the latter. The unsanitary public markets with their swarms of flies would be rapidly done away with and in time completely abolished. The ordinances for screening of meats and perishable provisions would be more thoroughly enforced. The unsanitary dumping grounds for city garbage within the city limits would be done away with and incineration or some other sanitary method of disposing of city waste would come into general use. Each city of over fifty thousand inhabitants would have a well equipped department of bacteriology with an expert in charge, and the practical results would soon be seen in a great decrease in the death rate from infectious and contagious diseases. It would mean a blessing to humanity and millions of dollars saved in the cost of insurance. There is no doubt as to the result if a movement of this kind is undertaken and properly pushed.

There is just one really great difficulty, and that is in getting the life insurance officials to appreciate the importance and value of the work and in getting them to work together—earnestly, unitedly and harmoniously—sinking their own individual company interests in an effort to work for the common good. The proposition is not theoretical—it is eminently practical. Unfortunately it is difficult to get most people really interested in such a proposition. The trouble is that the fearful results of unsanitary conditions are with us all the time and have been with us for years. We become accustomed to them, and consequently it is hard for us to wake up to the situation and the possibilities.

◆

DIAMOND VALE COMPANY

The shareholders of the Diamond Vale Coal & Iron Mines representing eighty per cent., and the bondholders of the Diamond Vale Collieries, representing ninety per cent., met at Ottawa recently to consider the position of the two companies.

Mr. John I. McCracken, an Ottawa lawyer, presided. Mr. T. J. Smith, managing director, who has just returned from England, was present and explained the present standing of the companies.

After some discussion a resolution was unanimously adopted on the motion of Mr. Orme, seconded by Mr. P. Aitchison, two principal shareholders, stating that having heard Mr. Smith's statement, and report on the properties of John Morrison, a mining engineer of Newcastle-on-Tyne, the meeting recorded its satisfaction with the explanations that Mr. Smith had been working for the good of the companies and its confidence in his integrity. It will be recalled that some of the shareholders have asked for an investigation into the conduct of the companies, affairs.

FIRE PROTECTION

(Canada's Fire Waste in Two Years — $42.000,000)

BURNING RUBBISH HEAPS.

Several convictions have recently been made in Victoria, B.C., for lighting fires for the purpose of disposing of rubbish heaps. The following is the civic by-law in regard to this matter. "No person shall kindle or cause to be kindled or used any fire upon any street or highway, or anywhere in the open air in the city of Victoria without a permit to do so, signed by the fire marshal or other officer in charge of the fire department. This section shall not include fire in furnaces necessarily used in laying roofs or pavements, nor the fires used in the furnaces of engines necessarily used in blasting and hoisting, nor to the fires in the open air upon private property necessarily used in setting tires upon the wheels of vehicles or in heating tar or pitch, but no such fires shall be allowed within the fire limits unless all reasonable safeguards are provided."

◆

PROTECTION OF SUMMER RESORTS.

The necessity for providing fire protection for the summer resorts along the northern shore of Lake St. Louis from Dorval to Pointe Claire, Montreal, and above, was the subject of discussion at a meeting of the residents of the district called by Mayor McBride of Pointe Claire at the Chateau St. Louis, Valois. Mr. McBride suggested that the residents of the lake-shore contribute to the purchase of $1,500 fire engine, or purchase a $6,000 motor-driven chemical engine of the type likely to be purchased by the city of Westmount. The first would cost about $35 a year in interest, and the second about $350. He considered that the expenditure would be justified by the safety obtained. With the steam fire engine, the horses now owned by Pointe Claire might be used or the engine might be hauled by a motor car. Although more expensive, the motor-driven chemical fire engine would be the more suitable fire-fighting apparatus for the lake-shore, it would be able to reach any point in its district within three minutes and carry with it eighty gallons of chemical, several hundred feet of hose and a dozen men. With such a piece of apparatus no fire would be able to get outside the house or perhaps the room in which it started. The district needs a water supply.

◆

MUST HAVE FIREPROOF MATERIALS.

An important by-law has been adopted by the Montreal city council by which such buildings as theatres, orphanages, schools with dormitories, hotels, asylums, hospitals and departmental stores must in future be constructed of fireproof materials. The present building by-law was accordingly amended to the folowing effect:—

"Sec. 1.—Paragraph (j) of sec. 97 of by-law No. 260, as added by sec. 8 of by-law No. 337, is repealed, and the following substituted therefor:

"(j.) All theatres, orphanages, boarding schools, schools having more than one storey above the basement, schools with dormitories, hotels, asylums, houses of refuge, hospitals, departmental stores, apartment houses containing more than seven lodgings, apartment houses having more than three storeys above the basement, and all buildings over sixty feet high and having more than four storeys above the basement, hereafter erected or altered, shall be built or altered with fireproof materials, as provided in sec. 97 of said by-law No. 260."

"Sec. 2.—This by-law shall be considered as forming part of said by-law No. 260, which it amends, as to gards the penal clause and to all other intents and purposes."

As a concession to those who have already started building, a clause was added permitting the building inspector to allow the erection of special brick buildings of mill construction to a greater height than 60 feet, in any case where the contracts have been let at least thirty days before the passing of this by-law.

CARE WITH ELECTRIC LIGHTS.

A wiring expert of the Ottawa municipal electrical department has given a timely warning to householders in connection with the tendency to meddle with lights and fuses. A large number of fires put down to defective wiring, he says, are simply due to the insertion, by the residents of houses themselves, of any metallic substance such as a piece of copper wire or even a hairpin, so as to prevent the fuse from blowing out. People who have had their fuse blow out and cut off their lights one or two times, do this to avoid a further inconvenience. They court danger and death. A fuse is inserted in every house's lighting system, so as to give entry to enough electricity to supply all the lights in that house and not enough to fuse the wires inside and start a fire. If lightning strikes the wires outside the house or if something goes wrong with a transformer the fuse simply blows out and thus protects the house wires.

Some people do not seem to think anything under about 400 volts is dangerous whereas in reality if one were standing on damp ground or otherwise non-insulated, less than 200 volts might readily result in death. The great thing is to have one's wiring done by a competent person and then not to meddle with it.

In about 90 per cent. of the cases where persons are shocked, their lives might be saved if artificial respiration as in drowning were started immediately after the accident occurs. The shock stops the heart and the thing to do is to get it started again by forcing the air into the lungs.

◆

FIRE WASTE.

The chief officer of the London, England, fire brigade has submitted to the fire brigade committee of the London County Council figures of the rough estimates of the monetary losses caused by fires in London from 1898 to 1911. These estimates do not extend to the expenses incurred by insurance companies and others arising out of claims for damage resulting from fires nor do they take account of any consequential losses which owners of property may sustain. In 1910 the losses were estimated as follows:—Not exceeding £50 each fire, £15,125; not exceeding £100, £8,905; not exceeding £500, £43,600; not exceeding £1,000, £27,420; not exceeding £6,000, £128,100; losses estimated to exceed £5,000, £378,950; total for the year, £602,100.

The totals from 1898 onwards are as follows:—1898, £569,445; 1899, £464,228; 1900, £515,349; 1901, £656,854; 1902, £812,040; 1903, £400,874; 1904, £394,425; 1905, £449,191; 1906, £521,056; 1907, £493,389; 1908, £446,853; 1909, £699,329.

The total estimated loss for the 13 years amounts to £7,025,133. This is equal to approximately $35,000,000. The fire losses in Canada for the two years, 1909, and 1910, were $42,000,000, and for this year to date, $14,000,000.

Fire losses in the United States and Canada during the first half of this year were almost $30,000,000 in excess of the losses for the same period in 1910, and nearly equalled those of the first half of 1909, the amounts for the three years being respectively, $103,802,000, $99,228,900 and $129,691,750. Forest fires, raging throughout the Northwest, attacked exposed villages and detached buildings.

◆

A list of factories in Montreal which are alleged to lack proper fire protection has been submitted to the civic board of control. Fire Chief Tremblay and Building Inspector Chausse will report on the matter.

STOP!

Canada's fire waste from January 1st to July 31st, 1911, was $14,461,825. In other words, we have thrown away forty dollars every minute since New Year's Day. Stop the fire waste.

"Capital Investments in Canada"

BY FRED. W. FIELD

(A new volume to be published in September, 1911)

$2.50 Per Copy.

Three hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion.

A series of articles respecting the investment of British, American and foreign capital in Canada is appearing weekly in The Monetary Times of Canada. In response to many requests, the articles, which are from the pen of Mr. Fred. W. Field, Managing Editor of The Monetary Times, and Imperial Trade Correspondent at Toronto, will be reprinted in book form, at a popular price, together with other articles early in the autumn. The following are the chapters of the proposed volume:—

1. British investments in Canada.
2. American investments in Canada.
3. Foreign investments in Canada.
4. French investments in Canada.
5. German investments in Canada.
6. Other Countries' investments in Canada.
7. Canadian Government borrowings in London.
8. Municipal borrowings in London.
9. The financing of Canadian railroads.
10. Industrial investments in Canada.
11. Investments in Canadian land and lumber.
12. Investments in Canadian mines.
13. Canadian banks, British and foreign capital.
14. Registered stock or bearer securities?
15. Canada's credit abroad.
16. Canadian securities & the British Trustee List.
17. New capital from immigration.
18. The relation of trade to borrowed money.

APPENDICES

1. Canada's share of British capital.
2. Is Canada over-borrowing?
3. Canada and International finance.
4. Editorial comment respecting British, American and foreign capital investments in Canada.
5. List of Canadian flotations in London, January 1905 to April 1911.

Canada has cultivated the investor abroad. To some extent, he has come of his own accord. Of recent years the invitation has been more emphatic. Demonstration has backed it. No longer should it be possible for the fakir to trade with spurious Canadian goods. When ignorance of Canadian conditions was common, the unscrupulous magnetized British money into dangerous, unremunerative and fraudulent channels. The legitimate Canadian investment is being shown now in its true colors. Canada's heavy borrowing is an important subject, and the maintenance of Canada's credit in London is one of the most vital factors in Canadian finance to-day.

In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new volume, "Captali Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

Orders for the publication are now being received at the various offices of The Monetary Times as follows:—

Toronto, Ont.: 62 Church Street

Montreal, Que.: B. 33 Board of Trade Building

Winnipeg, Man.: Room 404, Builders Exchange Building

London, Eng.: Grand Trunk Building, Cockspur Street

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

The past week's fire losses have showed little diminution and property continues to be sacrificed to the flames at an alarming rate. Forest fires near Truro, N.S., are thought to have caused considerable damage. Horses and cattle in large numbers have been burned in several fires. Smoking in bed and overboiling of tar were two of the fire causes this week.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Caledonia, Ont.—Caledonia Alabastine Plaster Company. Loss heavy.

Haileybury, Ont.—August 5th.—L. Goldenberg's store damaged. Cause, incendiary.

Medicine Hat, Alta.—August 3rd.—Rosery building damaged. Loss, $3,500. Owner, Mr. Ueberrhein.

Winnipeg, Man.—August 2nd.—McLaughlin Company's garage slightly damaged. Fire started from auto lamp.

Truro, N.S.—August 6th.—Forest fires reported in districts of Tatamagouche, New Annan and Onslow Mountain.

Guelph, Ont.—August 5th.—Barn and contents of John McDonald, Eramosa, destroyed; covered by insurance. Cause, lightning.

Frankford, Ont.—August 8th.—Barn owned by Mrs. W. Kelly, rented by Mrs. P. Grass, completely destroyed. Cause, lightning.

North Toronto.—August 7th.—Barn filled with hay and two hay stacks, owned by W. H. Darling, destroyed. Loss, $500. Cause, careless boys.

Liverpool, N.S.—August 6th.—Unused buildings known as Tannery of A. Cowie & Sons, destroyed. Owner, E. A. Cowie. Cause, incendiarism.

Galt, Ont.—August 9th.—Store of Wm. Davies Company, Main Street, slightly damaged. Cause, gas plate left burning while standing on wooden floor.

South Vancouver, B.C.—August 2nd.—Six horses, stable and warehouse, Gibson road and Taylor street, destroyed. Total damage, $10,000; $2,000 insurance on building.

Hamilton, Ont.—August 8th.—Daniel Sullivan's livery stables, 21 Charles street, damaged and 24 horses burned. Loss, $10,000. Supposed cause, spontaneous combustion.

Chatham, Ont.—August 5th.—Barn in rear of Princess Theatre, King street, owned by Zakoor Bros., gutted. Loss, $500. Fire spread to roof of stage of theatre; small damage.

Point St. Charles, Montreal.—Bush fire along the bank of the tail race, near Butler and Wellington streets. Small damage. Cause, children playing in the fields with bonfires.

Rosemount, Montreal.—August 8th.—Field at Moison Park, and two small bush fires north and north-east of the Angus shops. Cause, children lighting bonfires. Small damage.

Toronto.—August 7th.—Toronto Hat Manufacturing Co., 257 Adelaide street W. Damage to stock, $2,000; to building, $500. Origin unknown. Factory and contents of Anchor Bed Co., 146 Niagara street, destroyed. Loss, $15,000 Cause unknown.

London, Ont.—Houses occupied by W. H. Blythe and W. H. A. Constable, 379 and 381 Adelaide street, damaged to extent of $400. Owner of houses, Isaac Sargent, King street; fully insured. Supposed cause, rats and matches.

Ottawa, Ont.—July 31st.—Plants of Union Construction Co. and Ottawa Stone and Brick Co., Catharine street, damaged. Loss, $30,000. Cause, asphalt boiling over. August 7th.—Residence of B. Brill, 272 Rideau street, damaged. Cause smoking in bed. August 8th.—Shed and residence of B. March, 701 Gladstone avenue, damaged. Loss $1,000; insured. Cause not known.

Montreal, Que.—August 7th.—Four houses in Longue Pointe ward, occupied by J. Richard, J. Toupin, S. Migeron and A. Hoguestein, destroyed. Loss, $3,000. Fire started in J. Richard's house. Building of Montreal Funeral Expense Society, 523 Papineau avenue, destroyed, also six horses, five hearses and several carriages; loss, $14,000, covered by insurance. Houses of George Smith and J. Tucker destroyed; no insurance. Mr. Leduc's toboggan factory, Berri Lane, damaged, and 320 toboggans destroyed; loss $2,000. August 8th.—Planing mill, sash, door and moulding factory of J. A. Brien & Co., Craig street and Delorimier avenue, destroyed. Loss to Mr. Brien, $35,000, and the loss in lumber to the McLarin Lumber Company, whose offices and yards are nearby, is $1,800, while the sash and door factory of Messrs. Fevreau and Corveau, in the rear and at 12 Erie street, damaged by smoke and water to extent of $15,000. Losses to Mr. Joseph Brousseau, through having wood there to be planed, $150. Mr. Brien is insured in the Atlas, Lumber Underwriters, Mount Royal, Dominion and Ontario companies.

WESTERN CANADA.

Hot Weather Needed to Ripen Wheat—Winnipeg Electric Negotiations—In the Wheat Markets.

The Monetary Times Office,
Winnipeg, August 8th.

Weather in the West continues to be generally moist and cool. The most recent crop report, gathered from all parts of the prairie provinces, indicates a generally good crop, but a lack of hot weather. Heat is the marked characteristic of the West, as a rule, but one that has been little in evidence this year. About Winnipeg, all crops are in splendid condition, market gardens and the hay crop being especially fine.

The weather during the past week has been unfavorable to the ripening of the crop. Fields which were clean of rust on August 4th, now show the spores, which indicates the rapidity with which it may be developed under certain conditions of weather. The Canadian Northern crop report shows that before the week is out harvesting will have begun in many parts of the West. The complaints of cold and rain come mostly from Southern Manitoba and from the other points further west there is general satisfaction with the prospects for the harvest during the next three weeks. There is no mention of the black rust scare.

In 1904, the West suffered considerable damage by rust. In the middle of July of that year the West stood to reap a harvest of 75,000,000 bushels. The rust struck the country about the last week of July and the beginning of August, and, owing to weather conditions, spread rapidly. At that time practically nothing was known about rust. One or two American experts came up, went through the fields, and wired to the Chicago papers most alarming accounts of the crop. The then editor of an American paper went so far as to say that the crop would be cut down to between 30,000,000 and 35,000,000 bushels. The West, that year, actually reaped a crop close to 55,000,000 bushels, or, to be exact, fifty-four million five hundred and some odd thousand, so that the loss while serious, was only 20,000,000 at the most.

Purchase of the street railway by the city is still a prominent question with civic officials and the people generally. Nothing has been decided, but it is expected that Sir William Mackenzie's visit to Winnipeg will bring the matter to a head.

Mayor Evans and the committee with him have evidently given serious thought to this proposition. The London money market has been sounded with a view to ascertaining if the money necessary for the purchase could be raised without impairing the general credit of the city. Information also has been gathered that would shed light on the merits of the offer. A conclusion appears to have been reached by the mayor, after giving this matter close study for some months, that if the price asked would enable the city to show earnings of seven per cent. on the price paid for the stock, $15,000,000, after making provision for maintenance and sinking funds for retiring the company bonds and debentures, it would be a reasonable price.

Since the opening of the month markets have developed a stronger tone, and values continue to soar upward. Bullish sentiment has dominated the week. Reduced estimates of the United States spring wheat crop, and persistent reports that black rust had made its appearance in the Canadian west, were the overshadowing factors in the situation. There has undoubtedly been considerable damage to spring wheat in Minnesota and the Dakotas, but reports are believed to be exaggerated. The greatest anxiety, however, was the uncertainty about rust damage to the western Canadian crop. Rumors were freely circulated on the American exchanges during the week that our crop was affected notwithstanding positive denials from Winnipeg to the contrary. Reliable reports from many points in the western provinces showed that there was then no indication of rust, although later advices go to show that the blight has actually appeared in a number of the wheat fields of Manitoba, but that the infection was not general throughout the province. The crop is now at a stage more or less critical, and may become subject to depreciation from a number of causes but with two weeks of warm, bright weather the great bulk of the crop will be fairly well assured.

Our Winnipeg market was generally active and firm throughout the week. The sharp advances in Minneapolis were reflected in our local exchange, though not to the same extent. There was a good demand for the lower grades of cash wheat for export. No. 1 Northern is being left to our home millers, but although flour trade is good with at least the large mills, they are not anxious to stock up freely with old wheat in face of the forthcoming large crop. Trading in futures is extremely quiet.

BREAD INDUSTRY REVOLUTIONIZED BY ORGANIZATION HERE OF CANADA BREAD COMPANY, LTD.

Company With Its Plants in All the Larger Cities of Canada Will Make Bread Industry One of the Largest and Most Uniform in the Country—Ample Capital to Gradually Secure an Annual Production of 100,000,000 Loaves.

That the bread industry is now destined to be one of the most important in the country is indicated by the organization of the Canada Bread Company, Limited, the new big company, which will at the outset take in five of the larger bread manufacturing businesses in Canada and will gradually establish plants in all the larger cities. The business taken over include those of the Bredin Bread Company of Toronto; Stuart's, Limited, Montreal; George Weston, Limited, of Toronto, known as the "Model Bakery;" W. J. Boyd, Winnipeg, and H. C. Tomlin, Toronto Bakery Company. The benefits that would accrue from a consolidation of this kind have been for a long time apparent to the practical interests in the industry, but quite naturally the large amount of capital required for its operation prevented its being consummated till the assistance was secured of Mr. Cawthra Mulock, the Toronto financier. The capital, which includes $1,000,000 of cash, to go into the treasury will be sufficient to supply the new company with ample working capital to carry out even the extensive programme of its directors. This programme is to erect new modern bread manufacturing plants in all the larger cities of Canada, install the latest type of machinery, institute systems which will insure the manufacture of bread under the most cleanly and sanitary conditions, and deliver a bread of uniform high-grade quality to consumers at the minimum cost.

Manufacturing bread in a modern bake-shop is a scientific process. The systematic work begins at the beginning and continues to the end. The moment the flour comes into the establishment it is subjected to a chemical analysis in order to establish its fitness for the end in view. Samples are taken from each of a large number of bags, and a test is made of them in order to ascertain the quantity of gluten and other constituents they contain. Occasionally these analyses are supplemented by more practical tests; but in all cases the carefulness observed throughout the processes will very shortly cause to be revealed any defects in the flour itself.

MODERN SCIENTIFIC PROCESS.

Instead of throwing the flour haphazard into the troughs, in the condition in which it arrives, and adding the yeast and water in order to get it into the condition of dough as rapidly as possible, these various steps are only taken in the most systematic manner in the modern bake-shop. After the quality of the flour has been determined, the flour is subjected to a process of sifting and cleaning. It passes through a number of screens and brushes, which hold back a variety of foreign matter, a very considerable portion of which is eventually weighed out as bread in the small, carelessly-conducted establishment.

Having been analyzed and sifted, the flour is weighed and emptied into the mixer. By an automatic process, the requisite weight of water, as well as the yeast, is added. It may be of interest to state that not only is the temperature of the water, but also of flour, the yeast, and even of the atmosphere controlled in such a manner as to produce the best results. Generally speaking, the effort is to maintain the temperature of the ingredients, as well as of the interior of the buildings, at an average of from seventy-five to eighty degrees Fahrenheit. The mixing is a mechanical process and is carried on by a slowly revolving arrangement which kneads the dough in a much more certain and uniform, not to say cleanly, manner than could possibly be done by hand.

MOST UP-TO-DATE PLANTS.

The aim of modern bakeries, such as those which will be established by the Canada Bread Company, Limited, is to eliminate all objectionable and uncleanly features in connection with the manufacture of bread. When, added to this, is the very practical consideration that bread manufactured under the proposed conditions costs no more than when manufactured in an objectionable manner—nor will it cost as much—it can easily be seen what a boon the Canada Bread Company may become to the consuming public.

After the dough has been mechanically mixed in the mixer for about ten minutes, it is emptied into troughs and wheeled into the dough-room, where it is allowed to remain for a sufficient length of time to permit the necessary chemical changes involved in the "rising." It is then passed on to the weighing machine or divider. This is a contrivance whereby the operator may control the exact size or weight of the loaf required. A slight turn of the handle moves the gauge in such a manner that the loaf may be increased or diminished the fraction of an ounce. As a further precaution, the operator selects loaves at random every little while and tests them on the weighing-scale.

After leaving the divider, the loaves are passed on to the moulding machine—all this, remember, without a hand being laid upon them or their ingredients since the flour entered the shop. Aeration and proving now takes place. The loaves are placed in pans and piled in galvanized iron racks and wheeled into a chamber where they remain until the rising process reaches the proper stage. They are then wheeled out and placed in the oven, from which they duly emerge, uniformly baked and ready for the consumer.

ADVANTAGE OF MODERN OVENS.

Even in the nature of the oven, the modern process is far superior to the ancient. Formerly, the fire was lighted within the oven, in the same space to be occupied later by the bread itself. After the oven had been brought to the proper temperature, the fires would be drawn and the loaves placed within. Thus, not only would the loaves be apt to absorb any gases which might remain in the oven, but would also be liable to fouling from ashes or cinders, to say nothing of the loss of time necessitated by the fact that between each batch of bread it would be necessary to repeat the process of heating the oven.

In the modern oven the fire is kept continuously going. A wall separates it entirely from the oven which contains the bread. The advantages in the matter of cleanliness over the old oven need hardly be described. In addition to this, the oven can be kept at a uniform temperature and one batch of bread may follow the other without loss of time necessitated by re-firing as with the old-style oven. Nevertheless, it is quite probable that the majority of the ovens still in use are of the old type. They do good work, but cannot continue in competition with the modern article.

SAVING IN DISTRIBUTION.

Advantageous as are the processes which it is the intention of the Canada Bread Company to adopt in all its establishments in order to produce the choicest quality of bread, the commercial advantage or saving will be due more to economies in the matter of delivery than in the process of manufacturing, considerable as the latter may be. In an effort made recently to determine what saving might be effected in the matter of delivery, a number of inquiries were made. The smaller bakeries, it would seem, look upon two thousand loaves per week as a very fair average for one waggon. Some of them considered eighteen hundred as pretty fair. Mark Bredin, in his modern plant, delivers as high as four thousand, and expressed the view that the Canada Bread Company, taking advantage of the geographical location of the different bake-shops and the distribution of routes, ought to reach an average of not less than four thousand five hundred loaves per waggon per week.

The cost of delivery is one of the principal items in the cost of the loaf to the consumer, and it has even frequently been stated that it is the principal item. The Canada Bread Company, therefore, in this principal item, will be able to effect a saving of from fifty to sixty per cent. over the average small baker. In addition to this, the shareholders of the company will derive very considerable advantages from the lower price at which contracts may be made with the mills for the purchase of flour. As for the consumer, he will be supplied with bread manufactured in a clean, light, airy, wholesome building, and by modern up-to-date machinery, the whole process being performed in a cleanly manner and without being handled by any of the employees until it is ready for delivery to the waggons.

Goderich, Ont.—$28,500 5 per cent. 30-year sewer and drainage debentures to the Ontario Securities Company, Toronto.

Claresholm, Alta.—$6,500 5 per cent. 20-year waterworks extension debentures to Ontario Securities Company, Toronto.

Halton County, Ont.—$90,000 4 per cent. 20-year road debentures to Messrs. Aemilius Jarvis & Company, Toronto.

Morris Township, Ont.—$10,000 5 per cent. 15-year debentures to Wood, Gundy & Company, Toronto.

Rouleau, Sask.—$60,000 5½ per cent. 40-year debentures to National Finance Company, Regina Branch.

Kamsack S.D., Sask.—$8,000 5½ per cent. 20-year debentures to National Finance Company, Regina branch.

Grandview, Man.—$4,900 5 per cent. 15-year debentures to National Finance Company, Regina branch.

Gretna S.D., Man.—$7,000 5 per cent. 20-year debentures to National Finance Company, Regina branch.

To Warehousemen, Wholesalers and Investors.

A Rare Chance in Winnipeg Realty.

The undersigned, as Trustees, offer for sale for two weeks only, a valuable and substantially-built stone and brick five-storey warehouse, together with large frame warehouses adjoining, and situated on a most eligibly-situated lot, 132 x 264, fronting east and west on two streets with a lane on the south and the tracks of the C.P.R. on the north, from which all shipping is done.

Price, including land, only $125,000, payable on easy terms.

If Investor does not desire possession for his individual requirements, so satisfied are we of the possibilities of the property, that arrangements could be made to contine in occupation as at present, and net Investor on said purchase price six per cent. on the investment for a term of five years.

For further particulars apply to

The Standard Trusts Company
WINNIPEG.

Northern Crown Bank Statement

Shareholders in the Northern Crown Bank, the only one, excepting the Security bank at Weyburn, with head offices in the prairie provinces, will be interested in the half-yearly statement just issued to them. Below is given the figures for the half year ending June 30 last, as compared with those for the half year ending June 30, 1910, which disclose a distinct improvement and one which should be gratifying to the shareholders :

Edmonton and Strathcona, after negotiations extending over three months, have practically agreed to amalgamate, and as soon as the agreement is ratified by each of the city councils it will be placed before the people for ratification.

Mr. J. C. Fanning, managing director of J. F. Campbell and Company, Limited, Edinburgh, Scotland, is a visitor to Canada. His firm are large manufacturers of furniture, and Mr. Fanning is looking over the ground in Canada with a view to establishing a factory.

RAILWAY BONDS WITH A HISTORY

Are Offered in London and Paris While Some Have Been Taken in Canada—Central Railway Can Tell a Long Story.

At last the Central Railway of Canada has made a bid for favor in the London market. This road has a long history and it will be interesting to learn exactly what proportion of the flotation has been left with the underwriters. The list for the sale of £600,000 first mortgage 5 per cent. bonds due July 1st, 1960, was opened in London last month on the 26th and closed on the 28th. Of £1,000,000 issue, £400,000 was taken firm in Paris and in Canada, of which £240,000 is in payment for railways and other properties purchased, while £60,000 was taken by the directors and their friends. The remaining £600,000 was offered for the consideration of the British investor.

Back Four Years.

In 1907, the pulse of the market was felt and it was decided apparently that the time was unfavorable for the issue. Again in October last year, underwriting and banking firms in London were approached with a view of making the issue. As noted by The Monetary Times at that time, the first considerations for the investor are whether there is room for another railway in the territory which the Central Railway proposes to serve; whether the company has good prospects of paying the interest upon its bonds and whether the past history of the company, with at least one prior proposal to market securities and no real effort to begin business, justify the public taking up the proposed issue of £1,000,000, if unwisely, we think, such an offer is made.

The Central Railway Company of Canada was originally the Ottawa River Railway Company, which was incorporated on October 24th, 1903. The capital stock was $500,000. The names mentioned in connection with the incorporation were E. McMullen, Boston, Mass.; T. A. Richardson, C. M. Thompson and J. D. Wells, New York; H. W. Raphael and F. D. Monk, Montreal; T. Christie, Lachute; J. A. C. Ethier, Ste. Scholastique; J. E. Leonard, Ste. Rose; T. Gauthier, Montreal; Honorable F. X. Mathieu, J. D. Leduc, Ste. Scholastique; Honorable W. A Weir, Montreal; H. Champagne, St. Eustache; Honorable J. Domville, Rothesay, N.B.

Bonded Twenty Thousand Dollars Per Mile.

The head office of the company was to be in Montreal. It proposed to operate a railway with a gauge of 4 ft. 8½ inches from Grenville to Montreal and possibly branch lines from St. Andrews to St. Come and to connect with the Canada Atlantic Railway near Hawkesbury. The company bad authority to issue bonds, debentures or other securities to the extent of $20,000 per mile of the railway and branches. These securities were to be issued only in proportion to the length of railway constructed or under contract to be constructed or purchased. The company also had authority to enter into agreement with several other lines. They had power too, to acquire and operate water powers, electrical works, hotels, telegraph and telephone lines, docks, elevators and vessels. Authority to issue bonds upon such property and upon its terminal property in Montreal and vicinity was given, the bonds to be a first lien and charge on the properties specified in the bonds.

More Legislation Enacted.

Clause 14 of the Incorporation Act stated that if the construction of the railway was not commenced within six months after the passing of the Act, the powers granted by the legislation should cease and be null and void. Evidently construction was not commenced, but on July 18th, 1904, another Act respecting the Ottawa River Railway Company was assented to. This legislation gave the company power to extend its railway from Grenville to Ottawa, and to issue bonds to the extent of $30,000 per mile instead of $20,000. Section 14 of the previous Act was repealed and instead it was required that the railway should be commenced on or before October 1st, 1904. Still construction of the railway did not begin and on June 7th, 1905, another Act was assented to, changing the company's name to the Central Railway Company of Canada, and also giving power for the road to be built from Ottawa to some point on the Georgian Bay, passing through various counties and the districts of Muskoka and Parry Sound. Twenty-five thousand dollars was to be deposited with the government within six months from the passing of the Act, as a guarantee for the commencement of the construction of the line. At present we have not troubled to search for further legislation in connection with the road, but evidently the company's charter has been kept alive from year to year by the passing of new Acts.

Early in 1907, somebody then interested in the road evidently thought that the English market was ripe for a flotation of securities, and it was proposed to issue £1,000,000 5 per cent. first mortgage sterling bonds of the Central Railway Company of Canada at 95. A private prospectus was printed and draft agreements between the company and underwriting houses were prepared. For some reason or other the flotation was never made. Now after nearly four years, the pulse of London banking houses is being felt with a view to learning whether the British investor will take all, or a proportion of a million pounds of this company's securities. It was stated in the private prospectus that the contract for the construction of the line had been let to a company at Montreal, who had undertaken to complete the main line from the port of Midland, on the eastern shore of Georgian Bay on the Great Lakes, to Montreal, a distance of about 344 miles, by June 30th, 1910. We are not aware that this main line has been completed or even commenced .

Good Things Are Not in Pigeon-holes.

While, as the private prospectus stated, "the railway mainly traverses a well settled populous district," it is scarcely true that the district "is in great need of railway facilities." Midland is already served by the Grand Trunk and the Canadian Pacific line will shortly be there. Montreal, Toronto, Ottawa, Stratford, St. Thomas and London are also well served with railway facilities. If the proposed Central Railway of Canada is ever built we fear that it will be a long time before it is able to pay the interest on its bond issue. If the proposed railway was such a good thing as the private prospectus would almost lead one to believe, it would not have remained in pigeon-holes for so many years.

A London critic thinks that formidable competition may be offered to the proposed line by the construction of the Georgian Bay Canal or by the improvement of other water communication. The same authority complains that the prospectus does not contain information as to the stock capital of the company or to what extent or on what ground it has been issued.

A note of the bond issue in Paris appears elsewhere.

A LONDON ISSUE WITH CANADIAN INTEREST.

Subscriptions have been invited in London at par for 250,000 five per cent. cumulative preference shares of £1 each in the General Accident Fire and Life Assurance Corporation, Limited, which has a capital of £1,250,000, there being in addition to the present issue. 199,996 ordinary shares of £5 each, having £1 5s. per share paid up, the whole of which are already subscribed, and four six per cent. cumulative preference shares of £5 each, on which 10s. per share has been paid up (also already subscribed). The shares offered rank both as regards capital and dividend in priority to all other shares of the company (except the four preference shares above mentioned), but confer no other right of participation in profits or assets. No issue of debentures can be made except with the authority and approval of an extra-ordinary resolution of the preference shareholders in separate meeting. It is proposed to utilize the amount realized from this issue partly for the purpose of acquiring controlling interests in one or more sound insurance concerns established in the United States or Great Britain. and partly for the general purposes of the company. A contract with Mr. John Ainsworth Kelly, 55 John street, New York, dated 1st May. 1911, for the purchase of certain shares of an American fire insurance company at a total price of £59,711, payable in cash, has been entered into. The purchase price of these shares will be paid out of the proceeds of the present issue.

The General, as is well known, has a branch in Canada in charge of Mr. C. Norie-Miller, while Mr. T. H. Hall is the manager of the fire department in Canada. Mr. W. G. Falconer, who was formerly associated with the company at Toronto is now manager of the branch at Sydney, Australia.

CANADA BREAD COMPANY'S BOND OFFERING.

An offering of first mortgage sinking fund 30-year gold bonds of the Canada Bread Company, Limited, is made this week. The bonds carry with them a bonus of 25 per cent. of common stock. It is intended to increase the present plants and erect new plants in order to give a larger output of the company. The sum of $1,000,000 is being placed in the treasury to provide for those purposes and to supply working capital. The prospectus gives full information by which the investor has every opportunity to judge of the merit of this new offering. With the company properly managed, the bonds should prove a profitable investment.

BOND MARKET NOTES.

Montreal to Float Big Loan—Paris is Offered Canadian Debentures.

The Montreal City Council have decided to advertise for tenders for a loan of $7,000,000, for forty years, at 4 per cent. Tenders will be opened September 18. Ald. Brodeur wanted the time extended two weeks, but the council was of opinion that the date fixed would suffice for financiers interested. This money is needed to convert various temporary loans into one permanent loan. The money has been raised for permanent works of various descriptions.

Canadian Offering in Paris.

The Banque Alsacienne de Paris and Rodolphe Forget of Paris offer, at 490 francs (par 510 francs), 20,000 first mortgage 5 per cent. bonds of the Central Railway of Canada, part of a block of 50,000, of which 30,000 have been underwritten in Canada. Comment on this enterprise appears elsewhere in these columns.

A proposal to issue $250,000 school bonds of Dallas, Texas, has been vetoed by the Attorney-General's department, for the reason that such bonds would exceed the city's debt limit.

In the financial statement issued recently the Acting Federal Treasurer of Australia stated that the initiation of the Commonwealth currency has led to £8,031,217 in Australian notes being accepted by the banks to date. Against this issue there is now held in the Treasury £3,352,281, or near 42 per cent. of the issue. Loans have been effected with the States on a basis of 3¾ per cent. for long periods, and 3 per cent. for short periods, when placed with the States or on fixed deposit with the banks. The amounts are:—

New South Wales	£2,000,000
Victoria	686,000
Queensland	Nil.
South Australia	Nil.
West Australia	650,000
Tasmania	200,000
With banks	1,106,500
Total	£4,642,500

This arrangement has been of considerable convenience to the States who were desirous of getting accommodation. Absolute safety for the issue was also provided,

That part of the public, says Lawrence Chamberlain, in Moody's Magazine, which does not buy bonds has a very meagre idea of the importance and value to the community of the bond business. It is not necessary to resort to many figures. It is only necessary to realize that bonds are the chief resource of our government in times of war, of our states and municipalities in furtherance of public works and buildings, of our railroads, of almost all public service corporations and many industrial corporations. In round numbers, $1,500,000,000 of American bonds are marketed every year and almost all of them pass through the hands of American bond houses. Even those issues of which the ultimate nominal market is the New York Stock Exchange are first offered and sponsored by dealers in bonds. In volume and number the transactions on the Exchange are only a mere fraction of those in direct merchandising. Of this $1,500,000,000 of bonds one-third is absorbed by insurance companies, savings banks, trust companies and other banks (in approximately equal amounts) and the remaining two-thirds by corporations (for reserves, etc.) and by private investors in the United States and abroad.

HAMILTON FIRE INQUIRY CONCLUDED.

The inquest into the death of the nine victims of the fire at the Hamilton Hospital for the Insane has been concluded before Coroner McNichol, and the following verdict was returned: "We, the jury, are impressed that the inmates in the fire on August 1st, came to their deaths from suffocation, but we are unable to determine the origin of the fire. We would make the following suggestions:

"That the fire whistle be connected by a cord with the engine-room; that all windows be provided with electric buttons, connecting with a gong in the engine-room; also that the water pressure in the stand pipes in all the corridors be kept up at all times; that said electric buttons and all valves and steampipes be protected by wire guards to which all the attendants should have a key. We would further recommend that all institutions of this description be of fireproof construction and that no building be more than two storeys in height.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Didsbury, Alta.—Until September 1st for $20,000 debentures. J. M. Reed, town clerk.

Cardston, Alta.—Ratepayers have voted to expend $40,000 on a gravity system.

Kildonan, Man.—A by-law, to issue $13,000 school debentures has been passed by the ratepayers.

Hull, Que.—Until September 4th for $227,500 30-year 4½ and 5 per cent. debentures. J. F. Boult, city clerk.

Collingwood, Ont.—Until August 15th for $96,900 4½ per cent. 20 and 30-year debentures. A. D. Knight, town treasurer.

Ottawa, Ont.—Until September 14th for $85,000 40-year, $343,500 30-year, and $160,500 20-year debentures. C. Hopewell, Mayor.

Wilkie, Sask.—Until August 18th for $10,000 electric light and $25,000 waterworks debentures. T. A. Dinsley, secretary-treasurer.

East Wawanosh Township.—$18,000 5 per cent. 20-year debentures until August 19th. F. Anderson, treasurer, Belgrave P.O., Ont.

North Vancouver, B.C.—A $635,525 local improvement consolidation by-law was introduced and read at a recent meeting of the city council.

Lauder S.D., No. 779, Man.—On August 19th, the ratepayers will vote on a by-law to raise $5,000. T. B. Woodhull, secretary-treasurer, Hartney, Man.

Castor, Alta.—Until August 21st for $5,000 5-year 5½ per cent. sidewalk and $3,000 20-year 5½ per cent. hospital debentures. L. B. Browne, town commissioner.

Lavallee S.D., No. 1538, Man.—On August 14th, the ratepayers will vote on a by-law to issue $6,000 debentures. E. A. Poulain, secretary-treasurer, St. Vital.

Enderby, B.C.—Until August 15th for $15,000 6 per cent. 20-year local improvement, and $2,000 6 per cent. waterworks debentures. G. Rossman, city clerk.

Prince Albert, Sask.—On August 26th the ratepayers will vote on by-laws to raise $274,962 and $500,000 for the construction of a power station at LaColle Falls.

Tavistock, Ont.—Until September 1st for $20,000 30-year 4 per cent. debentures. J. G. Field, village clerk. (Official advertisement appears on another page.)

Port Stanley, Ont.—A by-law has been passed to raise $12,750 to purchase Walter Mitchell's electric light plant and install Hydro-Electric light and power distribution plant.

Rural Municipality of Laurier, Sask.—The municipality has been authorized to borrow $15,000 for permanent improvements. C. B. Bergerson, Radville, is secretary-treasurer.

Wetaskiwin, Alta.—Until September 4th for $6,000 electric light and $6,500 fire hall debentures, with 5 per cent interest and maturing in 20 years. E. Roberts, secretary-treasurer. (Official advertisement appears on another page.)

Calgary, Alta.—Ratepayers will on August 17th be asked to vote on a $12,000 by-law for the purposes of purchasing and repairing the bridge across the Bow River at Centre Street, and to raise $26,500 for concrete sidewalks and pavements.

Saskatoon, S.D., Sask.—The school district was empowered some time ago to borrow $210,000, which debentures have not yet been issued. The board are asking the ratepayers for another $100,000, and the whole, $310,000, probably 5 per cent. 40-year instalment bonds will be issued in August. W. P. Bate, Box 1406, Saskatoon, is the secretary.

Saskatoon, Sask.—On August 24th the following by-laws will be voted on:—$10,000 for road improvements; $60,000 for subway; $25,000 for city stables and store-house; $15,000 for machinery, plant and equipment for Board of Works and Board of Health; $753,000 for waterworks extension; $75,000 for electric light and power system extension; $75,000 for water filtration plant.

Many American farmers are passing through Winnipeg on their way to land which they have purchased in Manitoba, Saskatchewan, or Alberta. A party of 200 went through one day last week, with two other smaller parties following them closely. One manager of a land company has brought 400 farmers from the States this year.

Mr. D. C. Cameron, one of the best known business and financial men in Western Canada, was inducted into the office of Lieutenant-Governor of Manitoba last week. Mr. Cameron is well known throughout Canada, as one of Winnipeg's leading citizens. He succeeds Sir Daniel McMillan, and is a worthy successor of an excellent official.

HEAD OFFICE: TORONTO PLANTS AT: Montreal, Toronto, Winnipeg

PURPOSES OF COMPANY

Montreal, and W. J. Boyd, of Winnipeg. In the case of Boyd, the real properties are excluded, but a parcel of vacant land in the city of Winnipeg, about two acres in extent, is substituted. The first three companies have been in operation for about thirty years, and the last two for close on twenty years. They have all grown from small erection or acquisition of new plants, to forthwith increase the output of the company to one million loaves per week. Modern plants will later be added in the other large cities. The sum of $1,000,000 cash is being placed in the treasury to provide for the erection of the proposed new plants and to supply ample working capital.

POSITION OF BONDS

For full particulars reference may be made to our prospectus, which is accompanied by a letter from Mr. Mark Bredin, the Vice-President and General Manager of the Company. We draw attention to the following points:

1. The present $1,250,000 of 6% First Mortgage Sinking Fund Thirty Year Gold Bonds are secured by Trust Deeds to Guardian Trust Company, Limited, Toronto, constituting a first mortgage on all the property, real, personal, or mixed, now owned or hereafter acquired by the company, as more fully described in said Trust Deeds. In the Trust Deeds it is specially stipulated that of the $1,000,000 cash being placed in the treasury, the sum of $500,000 shall be held by the Trustee to be used only in the redemption of bonds or in investment in additional plants and real estate, thus increasing the fixed assets under the mortgage. A Sinking Fund of 1% is operative from August 1st, 1911.

2. The assets of the companies already taken over stand in excess of all liabilities and without any allowance for good will, trademarks, etc. at $841,428.70. There has also been placed in the treasury $1,006,221.08 of cash which, besides furnishing funds for the purchasing or construction of additional plants, will provide ample working capital.

3. The earnings of the present plants, as per Certificate of Messrs. Price, Waterhouse & Co., after allowing for depreciation, amounted from April 30th, 1910, to April 30th, 1911, to $107,016.14, to which may be added $35,000, being interest at the rate of 3½% on $1,000,000 cash in the treasury pending its employment on extensions. It is estimated that, with the economies to be effected, the earnings on these plants will shortly amount to $180,000 a year, or nearly two and one half times the bond interest.

4. With the extensions that it is proposed to effect forthwith, the company by the end of its first fiscal year should be in a position to show earnings of $260,000 a year, equal to three and one-half times the interest requirements on the bond issue, and with all the additional plants that will be provided with the cash now in the treasury, the earnings should steadily gain to over $530,000 a year, or more than seven times the bond interest requirements.

5. The company, with its plants situated in the larger cities of the different Provinces of Canada, will be in an exceptionally favorable position to benefit by the marked economies that will be possible in manufacturing and, more especially, in distribution, and all the time will be turning out a more uniform product under the most sanitary conditions.

6. The practical men who have made the different companies particularly successful will be identified with the management and direction of the new company. Mr. Mark Bredin, who is probably one of the most successful bread manufacturers in Canada, will occupy the position of Vice-President and General Manager, while the services of the heads of four of the different companies taken over and of an efficient representative of the fifth have been assured to the company.

SUBSCRIPTIONS

Subscriptions should be made on the form accompanying the prospectus, and are payable as follows:

10% on par value on application, and
88½% on par value on allotment.
98½%

Or

In instalments as follows, in which case interest at the rate of 6% will be charged from date of allotment:
10% on par value on application.
13½% on par value on allotment.
24% on par value on 1st September, 1911.

Toronto, 25th July, 1911.

ADDITIONAL FIRE INFORMATION.

Fort George, B.C.—Northern Hotel totally destroyed. Loss, $17,300. Insured in North Empire Insurance Co.

Cochrane, Ont.—Revillon Bros., Limited, building and contents general store, $2,500; Aubin St. Pierre, building frame dwelling, $1,000; the Bank of Ottawa, building and contents bank offices, $3,000; Egan & Quinn, stock men's furnishings, $2,500. D. Rothschild, building, general store, $500.

Strathmore and Lakeside, Que.—At Strathmore the following houses were burned: Mr. A. W. McKinnon, Mrs. Broadhead, Mr. W. R. Maxwell, Mr. George D. Smith, Mr. C. J. Flanagan, Dr. Monette, Mr. J. S. Noriss, and one vacant house. This fire originated in Mr. McKinnon's house, starting from a gasoline stove in the kitchen. The fire at Lakeside destroyed the following houses, those of Mr. N. F. Shaver, Mr. George Smith, Mr. Andre Leroux and Mr. C. D. Deslauriers. This fire started in the kitchen of Mr. Leroux's house.

The greater part of the contents of the houses were destroyed. Owners of the destroyed houses are as follows:—At Strathmore, Mr. McKinnon's and Mrs. Broadhead's, Ald. James Robinson; Mr. Maxwell's, Mr. George D. Smith; Mr. Noriss's, Mr. W. J. Wilson, Lincoln avenue, Montreal; at Lakeside, Mr. George Smith, Dr. Davidson, Tupper street, Montreal. Others were owned by occupiers.

The insurance concerned by the two fires is about $50,000.

Porcupine, Ont.—The following appears as the complete list of insurance on the property of the Dome Mines Company. General form on rock house building and contents and stamp mill and contents, etc., $204,000. Loss, 74 per cent.: Home of N.Y., 20 p.c., $40,800; Globe & Rutgers of N.Y., 14 p.c., $28,500; Continental of N.Y., 10 p.c., $20,400; Fidelity-Phœnix, 10 p.c., $20,400; North River of N.Y., 10 p.c., $20,400; Stuyvesant of N.Y., 8 p.c., $16,320; American of Philadelphia, 6 p.c., $12,240; Insurance Underwriters, 5 p.c., $10,200; Pacific of New York, 4 p.c., $8,160; Hamilton of New York, 4 p.c., $8,160; Greenwich of New York, 3 p.c., $6,120; National of New Jersey, 3 p.c., $6,120; Stuyvesant Underwriters, 3 p.c., $6,120. Total, $204,000.

General form on log buildings and contents and supplies, boiler houses, machinery, boilers, etc., total $190,750. Loss about 70 per cent.: Home of New York, 20 p.c., $38,150; North River of New York, 20 p.c., $38,150; Globe & Rutgers of New York, 14 p.c., $26,705; Continental of New York, 10 p.c., $19,075; Fidelity-Phœnix, 10 p.c., $19,075; Stuyvesant of New York, 8 p.c., $15.260; American of Philadelphia, 6 p.c., $11.445; Insurance Underwriters, 4 p.c., $9,537; Pacific of New York, 4 p.c. $7,361; Greenwich of New York, 3 p.c., $5,722. Total, $190.750.

The loss of the Ottawa Assurance Company in the Porcupine district was as follows:—Gross loss, $5,650, net loss, $2,028, and not as given last week.

TORONTO - - ONT.

$589,000.00.

City of Ottawa, Ontario.

Debentures for Sale.

Tenders by registered letter only, addressed to "The Chairman Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa, until 3 p.m. on Thursday, 14th September, 1911, for the purchase of $85,000.00 forty-year debentures, $343,500.00 thirty-years and $160,500.00 twenty years.

They are all a liability of the City at large, and bear four per cent. interest, payable 1st January and 1st July.

Two separate tenders will be received, one for $73,500.00 thirty year debentures, and the other for the remainder of the debentures, $515,500.00.

All tenders must be on the official form.

The tender for the $73,500.00 must be accompanied with a marked cheque for $1,000.00, and the tender for the $515,500.00 with a marked cheque for $5,000.00.

Accrued interest from 1st July, 1911, must be paid in addition to the price tendered.

The $73,500.00 debentures are in $1,000.00 denominations, principal and interest payable in Ottawa.

The remainder of the debentures will be made in Ottawa, New York, or London, at the option of the purchaser, and in denominations to suit.

Delivery of the $73,500.00 can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions and official forms of tender, can be obtained on application to the City Treasurer, Ottawa.

CHAS. HOPEWELL,
Ottawa, 1st July, 1911. Mayor.

GENERAL MANAGER OF NEW BANK.

FIDELITY GUARANTEE BONDS

Personal Accidents Policies, including 10 per cent. Bonus accumulations.

Sickness Policies—covering any and every sickness.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

DOMINION STEEL CORPORATION

Four furnaces are at present working at the plant of the Dominion Steel Corporation. Mr. M. J. Butler, the company's vice-president and general manager, says that two additional are under construction, one of which will be completed about December. After December we will have four and a half working steadily, which will mean a production of pig iron sufficient to keep ten open hearth furnaces going practically full blast, or at the rate of 30,000 tons of steel a month. The two new open hearth mixers, which are among the largest of their kind in the world with a capacity of 500 tons each, will eliminate the necessity of purchasing any expensive ores.

To Have Another Bessemer.

These mixers are used to advance the conversion of iron into steel a stage. A third Bessemer will be at work early this autumn so as to assure a sufficient supply of Bessemerized metal being fed to the open hearth furnaces. This will mean a quicker and larger output of steel per furnace. The new 120 coke ovens are now in full blast resulting in a larger output than has ever hitherto been possible. As a matter of fact, we are getting 720 tons of coke per day more than ever before.

New Construction Work.

In addition to the two blast furnaces, there is the merchant bar and rail mill for the rolling of all sizes of merchant bar, rivet steel, bolt and bar material, etc., of all sizes from a quarter-inch to seven-eighths in diameter. For the twelve months ended March, 1910, the imports into Canada of this class of goods amounted to $1,573,871, most of which came from the United States, and we hope to cut that off very largely and supply the Canadian market ourselves. Our wire and nail mill, which will cover approximately three and a half acres and be devoted to the drawing of wire fencing and nail-making, is under way.

As to Rod Bounty.

As far as the rod bounty is concerned, all that the company wants is a reasonable extension, say for a year and a half so as to allow the transition stage, while the extensions are being completed, being tided over.

Mr. J. H. Plummer, president of the Dominion Steel Corporation, who is now in Europe, will return this month.

HOW THE PARTIES STOOD AT DISSOLUTION.

The standing of parties in the House of Commons just dissolved was as follows:—

	Govt.	Opp'n.
Ontario	35	51
Quebec	53	12
New Brunswick	11	2
Nova Scotia	12	6
Prince Edward Island	3	1
Manitoba	2	8
Saskatchewan	9	1
Alberta	4	3
British Columbia	2	5
Yukon	1	0
	132	89

To put the Government in a minority would necessitate, therefore, a change in the political complexion of twenty-two constituencies, although a much smaller change would, of course, make it impossible for the administration to be carried.

The political complexion of the electoral vote polled at the last general election was as follows:—

	Government	Opposition
Ontario	224,821	236,919
Quebec	158,393	129,634
Nova Scotia	56,588	54,500
New Brunswick	40,716	34,045
Prince Edward Island	14,496	14,286
Manitoba	30,915	37,140
British Columbia	13,412	23,056
Alberta	23,777	22,185
Saskatchewan	33,415	25,997
	596,533	579,571

JOHN W. GATES DEAD

Mr. John W. Gates, the famous American financier and a frequent visitor to Canada, died in Paris this week. Mr. Gates began his business career as proprietor of a hardware store at Turner Junction, Ill., near the farm where he was born in 1855. His parents were Asel A. and Mary Gates. At St. Charles, Ill., in 1874, he married Deilora R. Baker, who with their son Charles G. Gates, survives.

The family had maintained a home in New York City for some years.

From a hardware merchant Mr. Gates became interested in barbed wire, first as a salesman, and after as a manufacturer at St. Louis. Following the Southern Wire Company, he organized the Braddock (Pa.) Wire Company, which, in 1892, he combined with other wire concerns as the Consolidated Steel and Wire Company. Six years later this was sold to the Federal Steel Company. In 1897, he organized the American Steel and Wire Company, which is now a subsidiary company of the United States Steel Corporation.

Primarily interested in steel and later in oil, the financier was also identified with many large operations of railway and industrial stocks. He was known as a shrewd speculator on Wall Street through many ventures, notably the coup by which he obtained control of the Louisville & Nashville Railway. He was a director of the Baltimore & Ohio Railway, the Western Maryland Railway, the Tennessee Coal, Iron and Railway Company, the American Salt Company, the Republic Iron & Steel Company of New Jersey and other concerns.

The Wall Street house of Chas. W. Gates & Company, of which the son was the ostensible head, did a great business for some time preceding the banking troubles of 1907. In common with many other financiers Mr. Gates suffered some reverses and the firm was dissolved.

Mr. Gates was interested in the big Moose Mountain iron ore plant of Messrs. Mackenzie and Mann and visited Toronto and Northern Ontario several times in the past few years in connection therewith.

◆

Canada's immigration figures for June last announced show an influx of 40,009, as against 34,482 for June of last year, a sixteen per cent. increase. Of this number 27,974 came in at ocean ports, while people from the United States moved across the boundary to the number of 12,095.

MANITOBA LIFE UNDERWRITERS.

On the invitation of Ex-President William McBride, of the Life Underwriters of Canada, the officers and members of the different committees, who arranged the entertainment of the recent convention held in Winnipeg, were gathered in an informal luncheon at the Carlton Club recently. Letters were read from Mr. C. Jerome Edwards of New York; Mr. H. C. Cox, of Toronto; Mr. J. E. Hughes, of Brandon, and others congratulating the association in Winnipeg on the most successful convention of the underwriters that had ever been held. The different committees made their reports which were commended and approved. Mr. H. Baker of the Sun Life thanked the Association on behalf of the ladies for the different features of the entertainment which they enjoyed so well.

A small surplus remains in the hands of the treasurer of the fund. After all bills have been paid, this amount will be turned into the local association treasury.

Those present were:—William McBride, M.A.; T. F. Conrod, superintendent of agencies of the Great West; G. H. Miner, managing director; F. D. Macorquodale, actuary of the Prudential of Winnipeg; J. W. W. Stewart, managing director; J. A. Macfarlane, actuary of the Monarch Life; H. B. Andrews, president; D. J. Scott, vice-president; J. A. Wilson, secretary of the Manitoba Association; H. J. Duncan, Mutual of Canada; J. St. Clair Clark, and H. Walker, Sun Life; H. A. Kenty, Continental Life; J. G. Stephenson, London Life; R. S. Rowland, Federal Life; D. J. Johnston, Imperial Life; J. Wilson Glenwright, of the Prudential of Winnipeg, Calgary.

◆

The ranks of trades unionism are to be augmented by the industrial insurance agents of Toronto. Under the auspices of the District Labor Council a largely attended meeting was held in the Labor Temple, Toronto, the district council being represented by the majority of its officers, who pointed out the advantages of organization to the Industrial Insurance Agents. The necessities of forming an association were fully discussed.

Head Office - WINNIPEG, Man.

Branches: Vancouver, Victoria, Calgary, Edmonton, Regina, Fort William

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520,000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum**, so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

BOARD OF DIRECTORS: W. T. Alexander, Esq., Managing Director The Canada National Fire Insurance Company, President and Manager; E. S. Popham, Esq., M.D., Director Standard Trusts Company, Vice-President; Nicholas Bawlf, Esq., President Bawlf Grain Company, Director Bank of Toronto, Director Standard Trusts Company, Second Vice-President; Sir Gilbert Parker, M.P., London, England; E. PRUDENTIAL LIFE'S CONVENTION

The Prudential Life Insurance Company of Winnipeg have held their fourth annual convention at the home office in Winnipeg. The managing director reported a successful half year which was much in excess of the most sanguine expectations of the directors. In the Prudential shield contest, the Manitoba agency had the largest write for the six months and the shield was awarded to them until the end of the year at which time the second competition winds up, and the winner of that holds possession for the following period.

Four prizes were awarded for the largest amount of cash collected individually, as follows:—J. A. Wilson, solid gold watch and chain; A. Hoffer, gold watch and chain; M. W. Regan, lady's open faced watch; W. S. Ashe, casket of silver and gold headed walking cane.

In the A.B.C. competition prizes were awarded as follows:—Class A—Messrs. J. A. Wilson, George Margolius, H. M. Ramsay, M. W. Regan. Class B—Messrs. W. S. Ashe, A. Hoffer. Class C—Messrs. L. N. Carrier, H. K. Stopford, W. L. German, Ben Margolius. These gentlemen were all awarded solid gold souvenirs for their good work. The convention was arranged so that all those participating might also be present at the different features of the Underwriters' convention, which was being held at the same time.

◆

Mr. H. B. F. Bingham, life superintendent for Canada of the Phoenix Assurance Company, Limited, has sailed for England.

Mr. John Adair, manager of the Home Bank branch in Fernie, has been promoted to the position of assistant manager of the Bank at Winnipeg and Supervisor of its Western branches. Mr. Adair has been connected with the Home Bank for five years, having been manager at Cannington, Walkerville and Fernie successively. His appointment to Winnipeg returns Mr. Adair to a field of past experience gained in a connection extending over twelve years with the Bank of Commerce. Before coming to the Home Bank Mr. Adair filled an important official post in the Winnipeg office of the Bank of Commerce.

For thirty-nine years Mr. Archibald Hewat, F.F.A., F.I.A. has been manager and actuary of the Edinburgh Life Assurance Company. On the advice of his physician, Mr. Hewat has resigned the position to the great regret of the directors. Mr. Thomas MacLeod Gardner, who has been secretary for years, has been appointed manager.

The capital stock of the Abenakis Mineral Spring Company Limited, has been subdivided into shares of $1 each, instead of shares of $100 each, so that the company's capital stock, which is $350,000, will be divided into 350,000 shares of $1 each.

The Yorkshire Insurance Company, Limited, has been authorized to transact in Canada accident, sickness and plate glass insurance, in addition to fire and live stock insurance for which it is already licensed. The chief agency in Canada is established at Montreal.

Like most of the governors of the Bank of England, the new governor, Mr. A. C. Cole, is more of a merchant than banker. He was educated for the bar, to which he was called in 1880, but in the same year entered his father's firm of W. H. Cole & Co. He has been prominent in insurance, and in 1886 was appointed to a seat on the court of the London Assurance Corporation. Although not a banker, in the strict sense of the term, Mr. Cole has a thorough and practical knowledge of banking and finance, and has had a very wide business experience. He becomes Governor of the Bank of England at the comparatively early age of fifty-six years.

THE
WATEROUS ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

The customs returns for July show receipts of $6,697,485, as compared with $5,724,714 in July of last year, or an increase of $972,770.93. The first four months of the fiscal year show an increase in customs collections of $3,305,942 as compared with the same period last year, the total collections being $25,917,749. The total collections for the month in Ottawa were $87,336.91, which is a large increase over the amount for the same period last year.

The Sovereign Fire of Canada has been licensed in California.

The business of the Pioneers Fire Insurance Company of Brandon was reinsured in the Ontario Fire Insurance Company on May 11th.

The British Crown Assurance Corporation of Glasgow has been licensed to transact business in Ontario.

The number of old age pensions in force in Australia on June 30, 1911, was 76,089 and 7,319 invalid pensions were payable at that date. These represent approximately an annual liability of £2,085,000. It is anticipated that the amount required may exceed £2,100,000 during the current year.

FACTORY LOCATIONS

WINNIPEG

The Supply City of Western Canada

Offers greater combined advantages to manufacturers and capitalists than any city in Canada. The remarkable development of this great central market is creating an unprecedented demand for home industries.

Winnipeg Wants these Manufacturers

and offers cheap power, cheap sites, low taxation, varied raw materials, the best of labor conditions, unexcelled railway facilities, and the earnest support of a community that recognizes the importance of its industries. Over a billion dollars produced by the farms of Western Canada in the past five years, and this with only eight per cent. of the available land under cultivation. Consider what this development makes possible for the Western manufacturer.

YOUR OPPORTUNITY.

Get Close to this Market.

Special openings for manufacturing farm and agricultural implements, including gas and steam tractors; paper and strawboard mills, men's clothing, ladies' ready-to-wear goods, food stuffs, starch factory, boots and shoes, felt wear, metal goods, wire nail factory, hardware specialties, flax and jute works, beet sugar factory, elevator machinery, electrical fixtures and appliances of all kinds; automobiles and commercial motor carriages, home and office furniture, leather goods, cereal foods, dairy supplies, building materials, stoves, ranges, furnaces and heating plants, and twenty-five other smaller lines.

Special reports prepared and mailed free of charge on the manufacturing possibilities of any of these lines of industries, by addressing

CHAS. F. ROLAND, Commissioner of Industries,
WINNIPEG, CANADA.

"Capital Investments in Canada."

By FRED. W. FIELD.

(A new volume to be published next month.)

$2.50 PER COPY.

Three hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion.

A series of articles respecting the investment of British, American and foreign capital in Canada is appearing weekly in The Monetary Times of Canada. In response to many requests, the articles, which are from the pen of Mr. Fred. W. Field, Managing Editor of The Monetary Times, and Imperial Trade Correspondent at Toronto, will be reprinted in book form, at a popular price, together with other articles, early in the autumn.

In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new volume, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's ibrary shelve

Orders for the publication are now being received at the arious offices ot The Monetary Times as follows :—

TORONTO, ONT.: 62 Church Street.
MONTREAL, QUE.: B. 33 Board of Trade Building.
WINNIPEG, MAN.: Room 404 Builders Exchange Building.
LONDON, ENG.: Grand Trunk Building, Cockspur Street.

SALE OF LE ROI PROPERTY

The terms of sale of the Le Roi Mining Company's Rossland property to the Consolidated Mining & Smelting Company, made by the liquidator and ratified by the shareholders in London on July 14, provide for the payment of $250,000 by July 14, 1912. The first payment, $25,000, was made on cabled advice of the ratification of the sale, a further $100,000 is payable upon the acceptance of title by the purchaser, and the balance of $125,000 within one year, interest at the rate of 5 per cent. to be paid on the latter sum. The purchaser is given option of making final payment at any time after acceptance of title, and only interest accrued to date on such payment is to be payable as well as the balance of principal. All mining stores and supplies on hand at date of transfer of property are to be paid for by purchaser upon a valuation.

The property included in the transaction consists of the Le Roi mine and mineral claims adjacent thereto owned by the Le Roi Company, also the machinery, plant, ore dumps, water rights and real estate, comprising the remaining Canadian assets of the company. Cash on hand and accounts receivable as at May 31, 1911, remain the property of the Le Roi Company, as do, too, the smelter at Northport, Washington, and assets connected therewith until sold to some other purchaser.

The Consolidated Company is now in possession of the property at Rossland.

The Le Roi group adjoins the Consolidated Company's Centre Star group, and underground connection between the two mines already exists. There is known to be a large tonnage of low grade ore in the Le Roi, but explorations with the diamond drill during the last year or two did not result in the finding of new sheets of ore of sufficiently high grade to leave a margin of profit after payment of all management as well as mining and smelting expenses. As management charges will now be distributed over several properties instead of only one, it is to be expected that costs will be low enough to leave the Consolidated Company a margin of profit that was not practicable while the Le Roi was worked as a separate concern.

There is a floating story of a claimant for compensation whose tale was that he could only raise his arm a little way since his accident. On request, he raised it, and surely enough the movement was very limited. "Now show the jury how high you could raise it before you were hurt," suggested the company's counsel. Innocently, and unthinkingly the claimant complied, and in so doing he "showed" the jury!

The model of the Titanic, the largest ship afloat, will be on exhibition at the Canadian National, Toronto, this year.

The Art Loan Exhibit at the Canadian National Exhibition, Toronto, will be made up of pictures of the year from European galleries and a selection from the private collections of Canadian and American millionaires.

◆

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week ended August 4th:—

Coniagas, 177,580; Nipissing, 126,200; McKinley-Darragh, 124,100; Beaver, 122,470; Hudson Bay, 59,700; Buffalo, 50,600; O'Brien, 62,950; Right of Way, 60,220; La Rose, 86,650; Kerr Lake, 60,330. Total 930,800 pounds or 465 tons. The total shipments since January 1st are now 29,117,764. pounds or 14,558 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

◆

Mr. Rodolphe Forget, the well-known financier, will be a candidate for the Dominion parliament.

The town of Cartlaine, Nfld., on the northern side of Trinity Bay, with a population of 1,500, was recently threatened with destruction by a forest fire which has made considerable inroads upon the outlying homes.

The officers of the Guelph Life Underwriters' Association for 1911-12 are: Honorary president, Mr. H. C. Cox; honorary vice-presidents, Messrs. J. F. Weston, J. Asory; president, Mr. Joseph Lawson; vice-president, Mr. B. Hilliard; secretary-treasurer, Mr. G. P. Hamill. Executive: Messrs. A. A. Black, W. W. Hamill, W. J. Bell, T. G. Goodchild.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

Mr. L. B. de Laitte, a French inventor, has started the erection of a plant in Vancouver to manufacture a gas machine which he claims to have perfected.

The run of sockeye salmon in the Fraser River has improved during the past week or two. The general pack will not be above the average of the lean years.

Mr. Arthur W. Smithers, chairman of the Grand Trunk Railway, states that when the Grand Trunk Pacific is completed the company will inaugurate an Atlantic steamship service.

The marble quarry in the Lardeau district of British Columbia, owned by Mr. James Carruthers, of Montreal, under the name of the Canadian Marble Works, has been re-opened, and will shortly be operating on a large scale. A plant costing a quarter of a million was erected in 1909, but it has been idle for a year.

The Grand Trunk Pacific Railway has awarded to Messrs. Foley, Welch & Stewart a contract for the construction of the uncompleted gap in British Columbia extending from Tete Jaune Cache, fifty miles west of Yellowhead Pass to Aldermere in Bulkeley Valley, a distance of approximately 415 miles.

CROWN LIFE POLICIES
Most Liberal Available to Canadian Insurers.

Total Disability,
Automatic Non-forfeiture,
Extended Insurance,
No Restrictions,
Large Loan, Cash Surrender, and Paid-up Guarantees,
Low Premium Rates.

Agents wanted, who can write acceptable and paid-for life insurance. Lucrative contracts available for producers—none others need apply.

Head Office, Crown Life Building, TORONTO.

WILLIAM WALLACE, General Manager.

THE EXCELSIOR LIFE INSURANCE COMPANY
Established 1889. Head Office, TORONTO, CANADA

Dec. 31st, 1910—Insurance in force - -	$14,000,000.00
Available Assets - - -	2,552,863.49

1910 WAS A BANNER YEAR

Yet for the first five months of 1911 insurance applied for increased $350,000. Expense Ratio decreased 15%. Death Claims decreased 35%.

Excellent Opening for First-Class Field Man.

Agents Wanted: To give either entire or spare time to the business.

E. MARSHALL, General Manager. D. FASKEN, President.

The Dominion Life
wants a few
Good Men for a Good Company in Good Territory

Apply to: Fred Halstead, Superintendent, Waterloo, Ont.

So far, 1911 is considerably the best of the nineteen consistently successful years experienced by The Great-West Life Assurance Company.

Almost $62,000,000 of Insurance is now held in force—held by over 30,000 well-satisfied Policyholders.

Ask for rates and specimen Policies.

Investment Inquiries Department

One of the chief duties of this department is to personally investigate every security purchased by us. Take Municipal Debentures for instance. Before making purchases we enquire carefully into the circumstances of the municipality issuing the debentures, carefully examine the resources, the assessed valuation, the financial condition, indebtedness, industrial and commercial conditions, railway facilities, and the agricultural resources of the surrounding country, in order to assure ourselves of the permanent stability and prosperity of the municipality.

The same department also analyzes every industrial issue, and reports exhaustively on the value and desirability of the securities. The services of this department are freely offered to all investors.

INVESTMENT AND LOAN COMPANIES

EXPERIENCE IN INVESTMENT

Those who can least afford to lose their money frequently are those who have had the least opportunity for acquiring the knowledge necessary to enable them to invest it safely.

Their first consideration should be the safety of their investment. Trustees and Executors are hedged about by legal limitations in the investment of Trust Funds. They are, however, expressly authorized by law to invest these moneys in the Bonds of the Canada Permanent Mortgage Corporation. These Bonds are, therefore, a most satisfactory security for those who should invest only where their money will be absolutely safe.

These Bonds are available for the smallest as well as the largest investments, as they are issued for one hundred dollars and upwards.

CANADA PERMANENT
MORTGAGE CORPORATION

OFFICIAL REPORT ON PORCUPINE.

The report issued by the Ontario Bureau of Mines on the Porcupine gold area will not be quoted widely by those who are interested only in gold stocks, their sale and manipulation. Mr. A. G. Burrows, the author of the report, has evidently made a very careful examination of the mineralized region, and deals with the character of the gold-bearing deposits, the distribution of veins and of the valuable metal. The unwelcome facts which had to be chronicled are stated plainly, and must be heeded by the investor, large and small, in Northern Ontario's gold enterprises.

The publication of the report is welcome. First, it will check considerable wild talk as to Porcupine becoming a second Rand. Not much more than $50,000 worth of gold has come from the Canadian camp. Last month $15,000,000 was the value of the output of the Rand mines. During the past twelve months the output there was valued at about $167,000,000. It is, therefore, somewhat premature to begin to compare the two camps. The report will also cause incoming capital to be cautious, a necessary situation in relation to the Dominion's general credit. It should, in addition, prove a warning to the small investor, who has practically no business in Porcupine.

Mr. Burrows tells us that the distribution of the gold is generally irregular, occurring along one or both walls, while other portions of the vein may be very low grade. Much has been made of the spectacular showings which occur on many properties, but the writer notes that these showings are limited to portions of the veins. In view of the irregular character of certain veins and the quantity of country rock which will need to be mined, says Mr. Burrows, the ore must be considered low grade. In other words, while there is probably considerable gold in this Northern Ontario region, much rock will have to be crushed in proportion to the gold recovered.

Only a few months ago prospectors were asking fabulous prices for mere prospects, figures which mining authorities thought were high enough to purchase a working property. To-day we are told by a conservative government expert that the determination of the value of properties is a matter requiring considerable development accompanied by extended sampling and mill tests. The Monetary Times has faith in the future of Porcupine, but is pleased to see the timely appearance of a report which should do much to check wild speculation in gold shares and to instil the spirit of caution in the investor.

NEED FOR SALVAGE CORPS.

A warehouse fire in Ottawa, where several thousand dollars' worth of valuable dry goods and smallwares were ruined, to a large extent by water, has raised the question of a salvage corps for the city's fire department. Fire chiefs, underwriters and merchants know that considerable damage is effected by water, played sometimes without much science, at big and small fires. In this particular case, it is said that a trained corps of five or six men, whose business would have been the salvage of the goods, would have cut the owners' losses in half.

Fire Chief Graham, of Ottawa, estimates that $4,500 a year would pay the wages of five men and a driver, and that the amount saved to the insurance companies would more than repay them for the expenditure. "My men," he says, "have not time to look after saving goods when a fire has gained a start. Their object is to get it under control as quickly as possible. In the Sparks and Code fire, if we had had a salvage crew, the damage would have been exceedingly slight. My men did what they could to cover up the goods, but it was a bad fire to fight, and they had to give their whole attention to it for a time.

"If a salvage crew were connected with the department," continued the chief, "I would want them to act altogether independently of myself or men at a fire. Their work would be to save goods and to do nothing else. In this fire a salvage corps would have been of great assistance, as, when we arrived at the fire the building was full of dense smoke, making it difficult for the men to enter. The salvage crew could have helped a lot by attending to the ventilation, covering up goods, and, as they would not have to fight the fire, could assist in innumerable other ways."

While the insurance companies may well consider this question, there is no good reason why a modern city fire department should not be the possessor of its own salvage corps.

NEXT?

One, Victor K. Brook, prospector, has found a gold field equal to anything in Porcupine district. So he says. In consequence he is able and willing to give the investor a claim for $100 which can be sold at once for $10,000. Here is his announcement in a Toronto evening paper:—

"A week ago I found a new gold field equal to anything in Porcupine district. It is situated about nineteen miles from Porcupine City. When I was on the ground I could have taken up three claims, but decided instead to come out and get money enough to take up ten times that many. I have secured most of the money necessary for this purpose from friends in Toronto during the last three days, but we want a few more to join us, putting up one hundred dollars each. Everyone putting up $100 will receive from the Ontario Government a license entitling them to take up three gold claims of forty acres each. I expect to get back ahead of the rush, and to get the very pick of these claims for my people. Out of every three claims one (selected by lot) will belong to the person putting up the hundred dollars and the other two claims will belong to me. I think these claims should sell at once for ten thousand dollars each. If you want to join us, send one hundred dollars at once to the acting treasurer, Mr. J. G. Dignam, coal merchant, 31 West Queen Street, Toronto. The Ontario Government only allows each applicant to take up three claims. I am going back north to-night to get on the ground and begin staking claims at once. Victor K. Brook, prospector."

Supposing ten persons are attracted by this alluring offer, Victor K. Brook will receive $1,000 cash, and of the thirty claims, the enterprising prospector will get twenty. These, according to Brook's modern mining finance, will net him $200,000. The ten speculators would get $100,000 between them. With a sale at $10,000 guaranteed by Mr. Brook this proposal might have some merit, but no sane man would imagine a prospector giving away a $10,000 claim for $100. Mr. Dignam, the acting treasurer of the scheme, might be better engaged in selling coal and Mr. Brook in looking up a few good things for his personal benefit. The present day philanthropy becomes embarrassing.

WAITING YEARS FOR FAVOR.

No word has arrived yet as to what proportion of the £600,000 first mortgage 5 per cent. bonds of the Central Railway of Canada has been left with the underwriters. If the issue has been subscribed, considerable financial hustling must have been utilized. The total issue was £1,000,000, of which £400,000 had been previously issued (£240,000 in payment for properties). The bonds are secured by a first mortgage on about 164 miles of railway, comprising 110 miles from Montreal to Ottawa, and 54 miles of branches (partly constructed) and their equipment, and on a land grant of about 1,300,000 acres of land in the valley of the Ottawa River, to which the company will be entitled as the construction of the railway proceeds. The bonds mature on July 1st, 1960, but may be redeemed after July 1st, 1913, at 105. The proceeds will be applied in payment of the balance of about £40,000 due on the purchase of the Ottawa River Navigation Company and of the Carillon and Grenville Railway, owned by it; the cash payments under the construction contract; the purchase of rolling stock (about £100,000 will be set aside for this purpose) for the 110 miles of main line between Montreal and Ottawa, and the branch lines already referred to; legal, engineering, and other expenses; and the balance in connection with the extension of the line from Ottawa to Midland, and for the general purposes of the company.

The Monetary Times remembers seeing a private prospectus issued in 1907 in connection with this scheme. Several underwriters were approached in that year with a view to becoming sponsors for the issue. Again in October last year another unsuccessful appeal was made to financial interests in London. This week we learn that the enterprise came before a large European syndicate, whose Canadian representative advised them to leave it alone. At last some one has apparently thought the bonds marketable. In addition to the London issue, some of the securities were marketed in Paris. We are inclined to think that a really good Canadian railway enterprise could be financed overseas successfully in a single attempt, and to agree with a London critic that the bonds are speculative.

SMALL CHANGE.

The Hudson's Bay Company are said to be planning excursions to the Arctic circle next year. At 104 in the shade last month, Toronto would have chartered an entire fleet.

* * * *

The refilling of a methylated spirit lamp while it was alight will probably cause two deaths in Montreal. This is only one of a thousand incidents which increase our fire waste, both of property and of human life.

CAPITAL INVESTMENTS IN CANADA

—XV.—

NEW CAPITAL FROM IMMIGRATION

By Fred. W. Field.

The stream of immigration to Canada from Europe and America has not only helped to solve the labor question, but a large amount of new capital has also been brought in in this way. Before discussing the amount, it will be interesting to note the countries which are best supplying our population needs. The following table shows the total immigration to Canada by nationalities from July 1st, 1900, to March 31st, 1911—

Nationality.	Totals.
English and Welsh	505,157
Scotch	138,909
Irish	41,001
Total British	685,067
South African	437
Australian	1,649
Austro-Hungarian	121,001
Belgian	8,583
Bulgarian	4,484
Brazilian	28
Chinese	11,324
Dutch	4,895
French	16,236
German	21,145
West Indian	1,534
Greek	3,997
Hebrew	48,675
Italian	63,817
Japanese	13,128
Newfoundland	13,496
New Zealand	534
Portuguese	28
Polish	9,391
Persian	124
Roumanian	4,888
Russian, N.E.S.	38,950
Finnish	13,498
Doukhobors	281
Mennonites	101
Spanish	410
Swiss	1,487
Servian	270
Danish	3,493
Icelandic	3,589
Swedish	19,349
Norwegian	13,798
Turkish	2,456
Armenian	1,473
Egyptian	53
Syrian	5,229
Arabian	441
Maltese	2
Malay	5
Negro	383
Hindoo	5,200
United States citizens (via ocean ports)	846
Total continental, etc.	460,708
From U.S.A. (direct)	618,700
Total immigration	1,764,475

N.E.S. = Not elsewhere specified

By far the largest immigration movement in the past decade has, therefore, arisen in Great Britain, and next in the United States. Among the countries of Europe, Italy contributed more than 63,817. The Italians are largely employed on railroad construction work, as also the Galicians. Our Hebrew population was increased by more than 48,675, while almost 38,950 Russians and 13,128 Japanese also listed themselves as newcomers.

What new capital did these 1,764,475 individuals bring into Canada during the past ten years? An approximately accurate estimate can be made. Mr. Bruce Walker, the Commissioner of Immigration at Winnipeg, has stated that settlers from the United States would probably bring into Canada during 1909 new capital to the extent of $70,000,000. In one instance, a prospective Canadian settler brought with him $25,000, an exceptionally heavy amount. In most cases the sum is considerably smaller. United States cattle has also been changing our prairie census figures. A fair estimate of the value of these particular possessions is perhaps $350 per head and a cash allowance to each new citizen from the United States of $500.

From 1897 to 1909, 43 per cent. of the arrivals from the United States made homestead entry in the Western provinces. They brought with them during the fiscal year 1907-8 alone, more than $52,000,000 in cash and settlers' effects.

Here are a few names taken from the monthly reports of one of the Dominion Government's agents, Mr. E. T. Holmes, St. Paul, Minnesota, showing the State from which each immigrant came, and the amount of cash and effects in his possession:—

1909	(October),	L. B. L., Illinois	$10,000
“	“	J. H., Iowa	20,000
“	“	C. H. S., Iowa	40,000
“	“	H. G. H., Illinois	10,000
“	“	J. P. H., Illinois	45,000
“	“	J. M., Iowa	50,000
“	“	J. J. B., Kansas	20,000
“	“	J. D., Nebraska	25,000
“	“	J. F. B., Illinois	30,000
“	“	H. S., Illinois	10,000
“	“	J. V., Illinois	50,000
“	“	G. B., Illinois	12,000
“	“	M. M., Illinois	50,000
“	“	F. B., Illinois	50,000

The above shows an average of about $30,000 for each head of a family.

Mr. B. Davis, State agent for Montana, reported for the month of September, 1909, 93 settlers collectively, $212,697, an average for each man, woman, and child of about $2,287, and for March, 1910, 194 souls with $344,460 in money and goods, an average of $1,775 each.

The cash and value of settlers' effects' entering Canada from the United States appears to be growing larger year by year. The following are the comparative immigration figures for the months of March, 1910 and 1911, at North Portal, Saskatchewan. While there was a slight decrease in the number of persons, the money and effects in 1911 had a greater value than in the previous year. North Portal is taken just as one example:—

	March, '10.	March, '11.	Inc. or dec.
Total immigration	5,672	4,409	— 1,218
Cash value	$5,810,000	$6,288,000	+ $478,000
Value of effects	1,059,000	1,585,000	+ 526,000
Settlers' cars	450	599	+ 149

As to British immigration, neither the cash assets nor the effects are as large perhaps as those of United States immigrants. The farmers, with life-long savings, leaving the States for new Canadian lands, contribute largely to Canada's revenue. Our money from Britain comes chiefly through other channels, in hundreds of millions. A fair estimate, perhaps, is that every British immigrant brings into Canada with him $100 and settlers' effects to the value of $50 per head. From Europe the amount is smaller, but it would be at least $10 per head, with few settlers' effects of value. The effects might be estimated at the small sum of $5 per capita. Therefore, the estimate of cash and settlers' effects entering Canada during the past five years may be summarized as follows:—

685,067 British—cash, $100 per head	$68,506,700
685,067 British—settlers' effects, $50 per head	34,253,350
619,546 United States—cash, $500 per head	216,841,100
619,546 United States—settlers' effects, $350 per head	309,773,000
459,862 Continental—cash, $10 per head	4,598,620
459,862 Continental—settlers' effects, $5 per head	2,299,310
	$636,272,080

The flow of immigration from the United States to Canada is not always regarded favorably in the former country. The American land loses good farmers; the American manufacturer, purchasers; the American bank, customers. At the same time, Canada gains what the United States loses. This phase has beeen ably treated by Mr. H. M. P. Eckardt, the well-known Canadian financial author. He thus explains the cash transfers through immigration and their effect upon the finances of the Republic and of the Dominion:—

"In the first place it is to be noticed that when the United States farmer sells out and goes to Saskatchewan or Alberta his place is taken by another farmer, who may have nearly as much of this world's goods as he had himself. Although the lure of the cheap lands is drawing American farmers northward by tens of thousands, the immigrants are arriving from Europe at the Atlantic ports at a rate of about 30,000 per week in the height of the immigration season. These, however, come mostly from Southern European ports, and they show a strong disposition to congregate in the cities and in the great industrial cenres. Man for man, they are not equal in value to the farmers who are leaving.

"So far as the cash movement is concerned, it does not appear that it is of a nature to embarrass New York or the other United States financial centres materially. Indeed, it is just possible that the whole movement of immigrants into Canada has not served to decrease the aggregate of capital of which New York has the use. As soon as the settler from the Western States gets located on his new farm he deposits his United States currency and his draft on New York in the branch bank in his neighborhood which is most conveniently located. The draft goes to New York and operates to swell the balances and loans owned by the Canadian banks there.

"The fund or deposit represented by the draft is in fact transferred on the books of the New York banking institutions from the account of the Western United States bank which issues it to that of the Canadian bank which cashes it. Later the moneys, or a part thereof, may be put out at call on Wall Street. The United States currency is sent by express to St. Paul, Minneapolis, or another American centre, for credit of the Canadian bank. This also finds its way to New York and is carried there as a deposit or as a call loan. No doubt the constant repetition of transactions of this kind in the past couple of years helped to bring about the heavy increase in balances and loans carried in New York by the Canadian banking institutions.

"Then there are the cash receipts from the British immigrants to take account of. These will usually consist of letters of credit or drafts issued by a bank in the United Kingdom, gold sovereigns and half sovereigns, and Bank of England notes. The letters of credit and drafts operate, of course, to give the Canadian banks credits in London. Also the Bank of England notes are usually sent to London for credit of account or sold in New York. The credits thus acquired in London are commonly utilized through selling sterling bills in New York, and the proceeds of the bills may lie on deposit with New York banks or they may be lent at call to New York Stock Exchange houses.

"The British gold coins are sometimes paid into the Dominion Treasury in exchange for large legal tender notes, and sometimes added to the gold reserve carried by the banks in their own vaults. A certain amount goes back to Europe each year in the pockets of Canadian tourists or of Englishmen who have been visiting the Dominion. Thus it can be seen that New York often gains funds from Canada as a result of the British immigration movement, and it also retains the custody of a considerable part of the funds moving to Canada with the Western farmers. Of course, the ownership of the funds is transferred to Montreal and Toronto, and the prospect is that they will be gradually drawn upon in one shape and another as the occasion for their use in the Dominion presents itself. But it is also probable that a continuation of the immigration movement will result in a constant replenishing of the balances and loans carried in New York."

From the continent of Europe we have drawn the largest proportion of our population in recent years. A French statistician recently summarized the changes in population in Europe during the past half century. The following figures show the changes among the leading powers since 1883:—

	1883.	1908.	Inc. %
England	35,753,000	45,057,000	26
France	37,900,000	39,278,000	4
Germany	46,201,000	63,379,000	37
Russia	86,121,000	129,798,000	51
Austria-Hungary	38,834,000	50,583,000	30
Italy	29,011,000	33,910,000	17
Spain	16,429,000	19,713,000	20

The most striking facts in comparison with 25 or 50 years ago are the growth of Germany and Russia and the relative decline in France. In 1858, France and Germany were almost equally balanced. England then lagged behind both and has since failed to keep pace with Germany, but her population now surpasses France by about 5,750,000. Germany falls short by only about a quarter of the populations of France and England combined. Austria-Hungary, which was only 3,500,000 behind Germany in 1858 has now fallen behind nearly 13,000,000, but France, which formerly was slightly ahead of Austria, is now weaker by more than 11,000,000. It will be observed from the Canadian immigration list at the beginning of this article that a comparatively small number of French and Germans are coming to Canada.

One of the dominating facts in the balance of population in Europe is the growth of Russia, which country sent us in the five years period under review 19,471 immigrants. Her population has substantially doubled in Europe within fifty years, surpassing even Germany. She now possesses a population substantially twice that of Germany, nearly three times that of England, more than two and one-half times that of Austria-Hungary, and more than three times that of France. When it is considered that to this may be added tens of millions in Asia, the offspring of nomadic and military tribes, her potentialities as a military power loom large.

Canada is finding little difficulty, by means of immigration, in increasing its population at a rapid rate. The economic difference between new and old countries is sharply marked when making a comparison with France, where in 1909 a series of measures designed to stimulate the birth rate was introduced in Parliament. They include the imposition of additional military service upon bachelors over twenty-nine years of age; making obligatory the marriage by State employees who have reached the age of twenty-five years, with supplementary salaries and pension allowance for those with more than three children, and the repeal of the law requiring the equal distribution of estates among the children.

[This article concludes the series in The Monetary Times. The fifteen chapters, together with three others and five appendices, will be published by The Monetary Times in book form next month, cloth bound, at $2.50 per copy. Orders will be filled in rotation. Book Department, Monetary Times.]

◆

Application will be made to the Dominion Parliament at the next session to incorporate the Vancouver Life Insurance Company of Vancouver, B.C., with power to carry on the business of a life insurance company in all its branches, including the sale or purchase of life annuities and endowments. Messrs. Lewis & Smellie, Ottawa, are solicitors for the applicants.

BANK CAPITAL AND THE CROPS

Suggested Enlargement of Emergency Circulation—A Wall Street Criticism—Comments of Bankers—New Capital of the Past Ten Years

The question of the adequacy of Canadian banking capital especially in connection with the movement of the Western crops is becoming a prominent topic. Already there is some fear that the banks may find their circulation too limited if a large harvest should be garnered in the coming fall. This has given rise to an agitation for enlarging the term during which the extra issues are legal. Before considering the position, it is interesting to note the following criticism of the Wall Street Journal:—

"Canada's system of banking seems likely to be subjected this autumn to a severe test of its ability to meet the currency requirements of the country. Already there is serious talk of the issue of excess circulation under the law of 1908; and importations of gold have been made from New York to the amount of $2,500,000 within a few days. The importation of gold is not, of course, an indication of weakness, but rather a wise precaution for meeting demands.

Termed Extravagant Eulogies.

"Hardly the same thing can be said of the issue of emergency notes, because the previous banking law of Canada gave considerable margin for elasticity, and the emergency circulation authorized in 1908 was largely a consequence of the crisis of 1907. The movement of the crops in the autumn of 1907 developed such a stringency in the supply of currency that an issue of notes was made without legal authority, but with the sanction of the Government and under the guarantee of the Bank of Montreal. Future issues of this character were authorized by the act of July 20, 1908, up to the amount of 15 per cent. of paid-up capital and reserve funds, in excess of the existing limit of issue up to par of capital.

"Rather extravagant eulogies of the Canadian system were heard in this country a few years ago. from those who advocated a general power to issue credit notes on the part of the national banks. These apparently call for some qualification in view of the events of the past few years. An interesting argument recently made by Andrew J. Frame, president of the Waukesha National Bank, lays emphasis on the fact that the chief merit of the Canadian system of branch banking is the prevention of cash suspension by banks, but that the comparison is less favorable as to bank failures and losses, and that the system has not contributed to the upbuilding of the nation to the same extent as has the national banking system in this country.

Open to Criticism.

"It is upon the latter point that the Canadian system is perhaps most open to criticism—that the increase in banking capital has not kept pace with the growth of the country. To this fact rather than to the lack of efficiency among the existing banks is apparently due the inadequacy of the facilities for circulation which confront the enormous increase in the productive capacity of the north-western provinces. Those provinces are practically without banks of their own, and they have not been adequately served by the extension of the branches of the old and conservative banks of the eastern provinces, because the latter institutions have not made sufficient increases of capital.

"Canada differs from the United States in not being a financial centre. From its geographical and economic position it must necessarily lean to a large extent upon the finances of the United States. Hence in times of panic its isolation preserves it from some of the most serious difficulties of the American system. The extent of country and the volume of business with which it has to deal are not such as to apply such severe tests as in this country. It scarcely affords striking proof of its adaptability to rapid agricultural and industrial expansion that there should already be talk of employing the ultimate resources of note issue enacted only to meet conditions of the most severe stress."

While Canada leans to some extent upon the finances of the United States, the writer in our contemporary overlooks the fact that British and foreign capital is supporting us to a considerable degree. Consequently in times of panic in the United States that feature also preserves the Dominion from some of the most serious difficulties of the American system.

Emergency Circulation.

The emergency circulation of Canada gives no great advantage to our banks except that it facilitates the handling of the crops. The amendment of the Bank Act in 1907 conferred on the banks during the months of September, October, November and December every year the right to issue notes, in addition to the existing right, equal to 15 per cent. of the combined capital and reserve. At the end of June the paid-up capital of the banks amounted to $101,065,306 and the reserve to $86,943,135. Together these amount to $188,008,441. Of this total 15 per cent. would be $28,201,266, which added to the amount of the paid-up capital makes a possible maximum of circulation of approximately $130,000,000 as compared with a high circulation mark during June of $90,202,838.

Cost to the Banks.

This extra circulation has to be covered like the normal with the mutual guarantee; and the 5 per cent. redemption fund will also apply to it. But while the ordinary issue is free the emergency is subject to a tax of 4 per cent. to be paid to the government. This tax will take practically the whole of the profits from its issue.

In a recent interview Mr. D. R. Wilkie, president of the Imperial Bank, said that in view of the fact that the increase in circulation last year between the end of June and the end of October, which was the highest point, was only about $17,000,000, he apprehended that no difficulty would be found in providing the circulation to move the crops. But all the same, he added, there is a warning for the chartered banks that they must do their duty to the country and provide additional capital, so as to enable them to make use of additional currency, as the requirements of the country increase from year to year.

Growing Wheat Area.

"The West is not going to stand still at even 200,000,000 bushels of wheat. There will be 400,000,000 in a few years, and still further increases. But this condition should not encourage so much the establishment of new banks as the extension and expansion of those now in existence."

Mr. E. L. Pease, general manager of the Royal Bank, stated that the Canadian banks had been placing themselves in a position to meet the larger demands which will undoubtedly fall upon them this year in connection with the movement of the expected unprecedented crop. "The banks are taking advantage of the emergency circulation privilege, and I think we will be able to meet the extra demand which will be made upon us without difficulty."

In the opinion of Mr. Joseph Henderson, vice-president of the Bank of Toronto, while there is no danger of any trouble this fall, the autumn situation will be one of the most important that the banks have had to face.

Power of Excess Issue.

In this connection, it is interesting to examine the bank statement as on June 30th with regard to the power of excess issue, use of which cannot be made by our finnancial institutions until October 1st. By that date further additions will have been made to the paid-up capital of the banks and those increases will enlarge the issue power. The position has been very well summarized by the Chronicle of Montreal, which has printed the following table:—

BANK	Total Capital and Rest, June 30, 1911	15 p.c. of Same or Excess Issue Authorized	Ordinary Issue Authorized	Total Issue Authorized 1st October to 31st January	Actual Circulation June 30, 1911	Margin of Ordinary Issue	Margin of Issue available from September 30 to January 31	Expansion of Circulation June 30 to October 31, 1910	Expansion of Circulation June 30 to September 30, 1910

*In the case of the Bank of British North America, the Bank Act provides that it may issue its notes up to 75 p.c. of its paid-up capital without special security. Also it may issue up to its paid-up capital at any time in the year by depositing cash or Dominion Government bonds equal to the excess over 75 p.c. in the Canadian Treasury. And between September 30th and the 31st of the following January it may issue a further excess equal to 10 p.c. of its combined capital and rest. These restrictions are due to the fact that the Bank of British North America shareholders are not subject to the double liability clause of the Act. In calculating its authorized issue it has been assumed that the Bank would, if necessary, deposit security and issue up to the full amount authorized.

The total margin of issue available after September 30th is $36,849,734 based on the paid capital as at June 30th. Despite the 5 per cent. tax which the banks must pay for the use of the emergency circulation, the situation will apparently enforce most of the institutions to resort to that course. There is also the question as to whether the margin of ordinary issue will be enough to serve the banks from now until October 1st. That leads to the desire for an extension of the emergency circulation period.

Actual Capital Power.

Coming to the question of the actual capital power of our banks, the following figures show the position as on June 30th:—

	Capital Authorized.	Capital Subscribed.	Capital Paid up.	Rest or Reserve Fund.
Montreal	$14,400,000	$14,400,000	$14,400,000	$12,000,000
New Brunswick	1,000,000	891,500	891,500	1,592,586
Quebec	5,000,000	2,500,000	2,500,000	1,250,000
Nova Scotia	5,000,000	3,908,900	3,504,920	6,498,265
B.N.A.	4,866,666	4,866,666	4,866,666	2,652,333
Toronto	10,000,000	4,000,000	4,000,000	4,750,000
The Molsons	5,000,000	4,000,000	4,000,000	4,400,000
Eastern Tps.	3,000,000	3,000,000	3,000,000	2,250,000
Nationale	2,000,000	2,000,000	2,000,000	1,300,000
Merchants	10,000,000	6,000,000	6,000,000	4,900,000
Provinciale	2,000,000	1,000,000	1,000,000	425,000
Union	8,000,000	4,703,200	4,672,280	2,736,140
Commerce	15,000,000	10,819,050	10,000,000	8,000,000
Royal	10,000,000	6,200,000	6,200,000	7,000,000
Dominion	10,000,000	4,000,000	4,000,000	5,000,000
Hamilton	3,000,000	2,745,900	2,742,420	3,063,697
Standard	5,000,000	2,000,000	2,000,000	2,500,000
Hochelaga	4,000,000	2,500,000	2,500,000	2,500,000
Ottawa	5,000,000	3,500,000	3,500,000	3,900,000
Imperial	10,000,000	5,915,900	5,818,498	5,818,498
Traders	5,000,000	4,367,500	4,354,500	2,300,000
Sovereign	3,000,000	3,000,000	3,000,000	Nil.
Metropolitan	2,000,000	1,000,000	1,000,000	1,250,000
Home	2,000,000	1,356,400	1,268,977	425,000
Northern Crown	6,000,000	2,207,500	2,207,435	150,000
Sterling	3,000,000	973,500	944,840	281,616
Vancouver	2,000,000	822,900	391,970	Nil.
Weyburn Security	1,000,000	602,600	301,300	Nil.
Total	$156,266,666	$103,281,516	$101,065,306	$86,943,135

It will be noticed that omitting the Sovereign Bank, of $153,000,000 capital authorized, $100,000,000 has been subscribed. That leaves a margin authorized and not subscribed of $53,000,000.

New Capital in Ten Years.

The Monetary Times has gathered statistics showing the actual increase of bank capital during the past ten years. The following is a summary and on the next page appear the details collected:—

Bank.	Capital issued since 1900.
Commerce	$4,000,000
Dominion	2,500,000
Eastern Townships	1,500,000
Home	1,500,000
The Molsons	1,500,000
Montreal	2,400,000
Nova Scotia	2,140,000
Ottawa	1,500,000
Royal	4,700,000
Standard	1,000,000
Toronto	3,000,000
Traders	4,000,000
Union	3,600,000
Hamilton	1,000,000
Northern Crown	2,207,500
Imperial	3,500,000
New Brunswick	726,700
Nationale	800,000
Hochelaga	1,250,000
Provinciale	1,000,000
Total	$43,824,200

Bank and Date of Issue	No. of Shares	Par Value	Amount $	Issue Price	Rate of Allotment
Bank of Commerce—					
[1]1903	14,000	50	700,000		
1905	26,000	50	1,300,000	140	1 to $6\frac{69}{100}$
1911	40,000	50	2,000,000	180	1 to 5
Dominion Bank—					
1902	10,000	50	500,000	At 100 premium	1 to 5

---

[1] Issued for the purchase of the Halifax Banking Company.

[2] This was the Home Bank's first issue, when it commenced business in 1906.

[3] This issue was made when the Bank of Montreal took over the Peoples Bank of Halifax. The new stock was given to the shareholders of that Bank in payment for their capital stock, they taking the Bank of Montreal's Stock at 253, the Bank of Montreal allowing 115 for Peoples Bank Stock.

[4] Sold privately.

[5] Sold privately.

[6] Issued to shareholders of the Union Bank of Halifax at 250 per share in exchange for their Stock at 200. Five $50 shares of Union Bank stock were exchanged for two $100 shares of Royal Bank.

[7] Northern Bank Issue.

[8] Do do

[9] Crown Bank Issues:—1904, 7,550 shares; 1905, 363 shares; 1906, 1,599 shares; 1907, 63 shares.

1907	5,000	100	500,000	130	1 to 4

[10] In December, 1908, when $200,000 new capital was issued, the old 60,000 shares of $30 each were converted into 20,000 shares of $100 each. The shareholders were entitled to subscribe $\frac{1}{9}$ of their old amount, at 120%, but were authorized, when necessary, to subscribe an additional amount sufficient to make full shares of $100; fractions left were refunded at the same rate, 120%. At the last annual meeting, on May 17, 1911, an increase of capital from $2,000,000 to $5,000,000 was authorized by the shareholders and steps are being taken to get this authorization confirmed by the Treasury Board.

[11] Sold privately.

[12] Later, on June 25, 1903, these shares were subdivided, each shareholder getting two $100 shares for each $200 share held.

Twenty banks have, therefore, issued new capital totalling $43,824,200, during the past ten years. There has been only one issue of the Sterling Bank to date, that institution having started business in 1906. In April, 1911, authority was obtained from the Treasury Board to increase the capital stock of the Quebec Bank to $5,000,000, but no allotment has yet been made. The capital stock of the Metropolitan Bank has not been increased since the organization of that institution in 1902, when 10,000 shares, having a par value of $100 per share were allotted to subscribers at a premium of 100 per cent.

La Banque Provinciale commenced business in July, 1900, with a paid-up capital of $436,333. Its actual paid-up capital is $1,000,000, and this sum is, therefore, included in the above total.

While there has been no increase in the capital stock of the Merchants Bank of Canada during the past ten years, it has authority to increase from $6,000,000 to $10,000,000 whenever deemed expedient. The Bank of British North America has not issued any new stock during the past decade.

An examination of the table above would indicate that the reserve funds of many of the banks have been large gainers from premiums at which their capital stock was sold, the amount applied from surplus earnings being less than generally supposed.

The Bank of Vancouver, the Weyburn Security Bank and the International Bank all commenced business either this year or last year. These three institutions represent a combined authorized capital of $13,000,000, the last-named accounting for $10,000,000.

◆

COURSE OF WHOLESALE PRICES

In Canada Last Year—Many Important Items Showed Increases Last Year.

Considerable credit is due to Mr. R. H. Coates, B.A., editor of the Labor Gazette, for his excellent reports on wholesale prices in Canada. Another interesting volume, dealing with the course of prices last year has just been issued. These reports constitute notable additions to the Dominion's economic literature.

With regard to the general effect of the prices movement during 1910, says Mr. Coates, relatively to preceding years, it will be remembered that in 1909 prices were during the first half downward, in continuance of the recession first set in motion by the financial stringency of the autumn of 1907. This recession was followed by a somewhat rapid recovery during the closing months of 1909. The net result was that average prices in 1909 stood slightly higher than in 1908, the index number being 121.2 in 1909, as compared with 120.8 in 1908. During 1910, this upward movement of prices as a whole was considerably more pronounced than in 1909, the index number for 1910 being 125.1, a gain of about four points.

Significance of Advance.

As a result of the movement of the past year, prices have recovered the greater portion of the decline which followed the panic of 1907, and that they are now but little below the exceptionally high point reached in 1907, which was, in turn, approximately 37 per cent. above the level of prices ten years previously.

Prices in Canada followed a downward course from 1890 to 1897. This was succeeded during the ensuing decade by a more rapid upward movement which culminated in 1907. Prices fell in 1908, but were upward again in 1909.

Comparing the more important points in this progress with the average level of prices during the decade 1890-1899, it will be seen that in 1890 prices were somewhat over 10 per cent. above that average. In 1897, after three years of panic depression and political unrest in the United States and Canada, they had fallen to a point nearly 8 per cent. below. Within six years thereafter, however, they regained this loss. Continuing to mount with extreme rapidity, in 1907 they reached a point over 26 per cent. above the average of the base decade. The recession of 1908 amounted to nearly five points. During 1909 this recession was checked and a gain in the opposite direction registered.

Comparing the high year 1907 with the low year 1897 the advance amounted to approximately 37 per cent. Comparing the year 1909 with the low year 1897 the increase shown is approximately 31.5 per cent.

The advances of the past year occurred chiefly under the headings of animals and meats, dairy produce, fish, textiles, lumber, paints and oils, and furs, a decrease being shown under the headings of grains and fodder. The other groups were fairly stationary, though with an upward tendency.

Articles Showing an Increase or Decrease.

An indication less specific than the above of the general level of prices during 1910 may be obtained by noting the number of articles which show an increase or decrease in average price for the year compared with the average price during the base period (1890-1899) and at the more important turning points in the course of prices since 1890.

The following table enables a comparison to be made on this basis, of prices in 1910 with, (1) average prices during the base decade, 1890-1899; (2), prices during the year 1890; (3), prices during the low year, 1897; (4), prices during the high year, 1907; and (5), prices during the immediately preceding year, 1909:—

Number of Articles Showing an Increase or Decrease in Price During 1910.

Compared with 1890-1899			Compared with 1890			Compared with 1897			Compared with 1907			Compared with 1909		
Inc.	Dec.	No change	Inc.	Dec.	No change	Inc.	Dec.	No change	Inc.	Dec.	No change	Inc.	Dec.	No change
168	49	2	132	77	5	175	36	2	104	99	21	112	75	48

The above table shows that, comparing average prices in 1910 with average prices in 1909, approximately 50 per cent. of the articles advanced and 34 per cent. declined, while the rest remained unchanged. Comparing 1910 prices with those of 1907, about 10 per cent. of the articles show no change, while the number of advances and recessions is very nearly the same. When the basis of comparison is with the low year, 1897, there are very nearly five times as many increases as decreases. Comparing average prices in 1910 with those of the closing decade of the last century, the proportion of increases is roughly as 4 to 1; when the comparison is with 1890 the proportion of increases to decreases is only as 2 to 1.

Comparative Level of Prices in 1910.

The general level of prices in the several groups in 1910 expressed in percentages of the increase or decrease as compared (1) with 1890, (2) with the decade 1890-1899, (3) with the low year in the respective groups, and (4) with 1909, is shown in the following table:—

Percentage of Increase Shown by Prices in 1910.

Group.	Compared with 1890	Compared with decade 1890-1899	Compared with the low year	Compared with 1909
I. Grains and fodder	17.3	37.0	70.0—1897	*8.4

BANK CLEARING HOUSE FOR FORT WILLIAM.

Bankers Are Considering Formation of Canada's Twentieth Clearing House at the Head of the Lakes.

A bank clearing house will be established at Fort William in the near future. Figures of the clearings at the local banks presented for consideration at recent meetings of the bankers amounted to a sum which compared favorably with other cities.

The following ten chartered banks have branches in Fort William:—Canadian Bank of Commerce, Dominion Bank, Bank of Hamilton, Imperial Bank, Merchants Bank, Bank of Montreal, Bank of Ottawa, Royal Bank, Traders Bank, and Union Bank of Canada. Messrs. Roy Street & Company, private bankers, also have branches in Fort William

Six in Two Years.

Three bank clearing houses were established last year, one each at Brandon, Lethbridge and Saskatoon. Two, Moose Jaw and Brantford, were established early this year. There are now nineteen clearing houses in Canada, ten of which are in Western Canada and nine in the East. Fort William, at the head of the lakes, will be the twentieth. The following is a list:—

Clearing House.	Commenced Business.
Halifax	1886, 1 July.
Montreal	1889, 7 January.
Hamilton	1891 15 June.
Toronto	1891, 21 July.
Winnipeg	1893 4 December.
Vancouver	1898, October.
Victoria	1898 2 November.
Quebec	1901, 1 May.
Ottawa	1901, 9 September.
London	1902, 1 June.
St. John	1896, 1 May.
Calgary	1906, 18 April.
Edmonton	1906, 11 July.
Regina	1909 1 October.
Brandon	1910, 1 April.
Lethbridge	1910, 1 September.
Saskatoon	1910, 15 October.
Moose Jaw	1911, 9 February.
Brantford	1911, 1 January.
Fort William (probably)	1911, August.

Figures of the Provinces.

The following are the Canadian clearing house figures by provinces for the past three years:—

	1908.	1909.	1910.
Ontario	$1,450,474,915	$1,757,779,723	$1,956,049,935
Quebec	1,579,127,582	1,985,452,773	2,212,268,621
Manitoba	614,111,801	770,649,322	973,694,051
British Columbia.	238,439,459	358,235,823	546,555,892
Alberta	103,411,732	139,315,401	231,690,244
New Brunswick	66,435,636	72,404,500	77,843,546
Nova Scotia	90,232,245	95,278,463	95,855,316
Saskatchewan	....	*14,153,244	59,743,982
Total	$4,142,233,379	$5,203,269,249	$6,153,701,587

---

* Regina started 1st October, 1909.

The clearing house figures for the current week appear elsewhere in this issue.

MUCH TO LEARN IN PORCUPINE YET.

Report of Ontario Bureau of Mines Says Spectacular Showings Are Limited—Ore is Low Grade—Determination of Value of Properties Requires Considerable Development, Sampling and Mill Tests.

The latest report on the Porcupine gold area is from Mr. A. G. Burrows, of the Ontario Bureau of Mines. He deals with the situation of the camp, its topography, and gives some details of the early examination of the area and early prospecting. A long chapter is devoted to the geology of the camp and something is said of the relation of quartz veins to granite. Information is given respecting the Dome, West Dome, Preston East Dome, Hollinger, Rea, Armstrong McGibbon, Scottish Ontario, Vipond and Foley-O'Brian mines and the Powell claims. A short summary is given of the waterpowers in the Porcupine region.

Gold Bearing Deposits.

Dealing with the character of the gold bearing deposits, Mr. Burrows states that the occurrence of gold at Porcupine is associated with the quartz solutions which circulated through the fissures in the Keewatin and Huronian series. "The irregular fissuring has produced a great variety of quartz structures, varying from the tabular, though often irregular or lenticular, vein which may be traced several hundred feet, to mere veinlets, often only a fraction of an inch in width and a few feet in length, which ramify through a rock that has been subjected to small irregular fissuring. This latter variety is well illustrated in the fissuring of ankerite bands, so characteristic of many of the gold deposits of Porcupine. Irregular and lenticular bodies of quartz often occur which may have a width of ten or twenty feet, but which die away in a distance of fifty feet. Again there are dome-like masses of quartz which are elliptical or oval in surface outline, but whose underground extension has not been examined closely.

A Direction of Weakness.

"In some parts at least these masses can be seen in contact with underlying rocks at a low angle, which would suggest that they are broad lenticular masses which have filled lateral fissures in the country rock. The most conspicuous dome masses are those of the Dome property where the two largest are about 125 feet by 100 feet. A fissure may be vertical and regular at some points. At others it may incline at a lower angle to the horizontal or take on a more or less lenticular form.

"The relationship of the strike of the veins to that of the enclosing rock is often difficult to determine, since generally along the veins there has been shearing of the country rock which may conform to the general direction of the strike of the veins. However, by determining numerous strikes in the schist away from the veins, it is seen that the majority of them are inclined to the direction of strike of the enclosing rocks. In dip the veins vary from vertical to nearly horizontal. In No. 1 shaft of the Hollinger the vein is practically vertical, while a series of narrow quartz veins, 6 to 18 inches wide on the Lindburg claim, have a dip at the surface of only 20°. The prevailing dip of the schist in the Porcupine area is to the north at a high angle, and frequently the veins dip distinctly to the south across the cleavage of the schist. While it is apparent that most of the deformation of the country antedates the vein formation, nevertheless there is a decided tendency in many cases for the fissuring to be influenced by the direction of schistosity, which is also a direction of weakness; hence we find veins having a more or less lenticular structure the strike of which closely corresponds to that of the country rock.

Distribution of Veins.

"While gold-bearing veins occur over a wide area and are often isolated, it is seen, from a number of those already discovered, that they occur in groups along certain lines. For instance, in Tisdale township there are at least three distinct areas where the fissuring has been most pronounced. One such area extends from the southeast end of Miller lake, on lot 11 in the first concession, in a northeasterly direction for three miles, and includes such veins as the Miller-Middleton, Hollinger, McIntyre and Connell or Rea, and in addition many others with visible gold. The average strike of the veins here is northeast-southwest. Another series, including the Davidson, Crown-Chartered, Armstrong-McGibbon, and Bannerman (in Whitney), occurs in the northeast part of the township in the fifth concession. The general direction of the veins is east and west. Again in the southeast part of the township is a group including the Foster, Dome and Dome Extension, with general strike somewhat south of west. Similar groupings could be mentioned in other parts of the area.

"In these disturbed zones the country rock is generally schistose in character. At the Dome mine the disturbed area has a width of about 600 feet, in which there are numerous narrow quartz veins in addition to large irregular quartz masses.

Where Gold Occurs.

"Well defined, disturbed zones occur in the fifth concession of Tisdale. In this locality the main rock is a light greenish, fine-grained, rather massive greenstone. This greenish rock is itself not much fissured, but here and there through it are bands of rusty-weathering carbonate, which is generally schistose, striking east and west. I think that much of the carbonate associated with this greenstone is of secondary origin. It is possible that the shattering and fissuring of the greenstone in an east and west direction may have caused a deposition of migrating carbonate solutions, partly filling fissures and partly replacing the greenstone. These carbonate bands were later fissured, and gold-bearing quartz solutions deposited in them. The fissuring of the carbonate is generally irregular, and hence we find veins with steep or low dip striking with the schist and across it. This irregular series of veins is seen at the Crown-Chartered and Armstrong-McGibbon properties. Where the veins are small, it becomes necessary to mine both the carbonate and the intersecting quartz veins. Gold often occurs in the carbonate near the contact with the quartz veins, as well as in the quartz.

Distribution of the Gold.

"While the quartz is considered to carry the gold, it was noted at many properties that the metal occurs in greatest quantity along certain lines which give a streaky character to the ore. On the surface these streaks are rusty due to the oxidation of pyrites, while at depth they are dark gray or greenish in color.

"Thin sections of quartz from the main Hollinger vein show grains of quartz with irregular outline, which often contain liquid and gas inclusions. There has also been much secondary pressure, indicated by strain shadows or wavy extinction, and along lines of slip or fracture planes there has been much crushing of the quartz to finer grains. In these crushed areas are secondary minerals like calcite, sericite, etc., while iron pyrites is also present in cubical form and has evidently crystallized, subsequent to the crushing.

"Some thin sections from the Rea mine main vein also show much secondary crushing along lines. Calcite and sericite are present in the crushed quartz generally in linear arrangements, and in addition there are several rough crystal outlines of free gold which were formed subsequent to the crushing.

Is Generally Irregular.

"These fine dark streaks may have resulted from a solidification and shrinkage of the quartz forming filmy cracks which may have become slip or crushing planes along which the richer gold-bearing solutions were deposited at a later period.

"These minute dark streaks in the quartz are frequently slickensided, and this character may often be seen in hand specimens, as from the Rea or Vipond mines.

"It should be noted that where cracks or fracture planes have been produced in a quartz vein and subsequently filled by minerals from solution, secondary quartz can be distinguished with difficulty, if at all, from the original quartz. Hence it is not always possible to say whether visible gold in such a vein occurs in the original or in secondary quartz.

"Carbonates of lime, magnesia and iron occur with the quartz in practically all the veins in the area. This material may have been absorbed from the wall rock, which is frequently dolomite or rock impregnated with dolomite or calcite. Fragments of country rock are often included in the veins. Veinlets of clear calcite occasionally cut the quartz veins.

"The distribution of the gold is generally irregular, occurring along one or both walls, while other portions of the vein may be very low grade. Most spectacular showings occur on many properties, but these are limited to portions of the veins. Considering the irregular character of certain veins and the quantity of country rock which will need to be mined, the ore must be considered low grade.

Largely Free Milling.

"Iron pyrites occurs in massive and crystallized forms, somewhat sparingly in most of the veins. Cubes of pyrites are frequently abundant in the enclosing rocks, especially where sericitic or dolmitic schist occur. A sample of cube pyrites was separated from the schist, obtained from a shaft of a principal property, and an assay gave a gold content of $10.40 per ton.

"Copper pyrites, galena, zincblende and pyrrhotite are found in some veins in very minor quantity. Sulphide of silver, argentite, occurs in association with the gold on the Powell property in Deloro township.

"It will be seen from an examination of the ore from most of the properties that it is largely free milling, while the concentrates should be amenable to cyanide treatment.

"Little is said in this report as to actual values of properties, since their sampling is the prerogative of their owners. Many samples were taken for assay, rather for the determination of the distribution of the gold, which was found to be irregular and to be associated with the secondary fracturing of the quartz (and schist) in many cases. The determination of the value of properties is a matter requiring considerable development accompanied by extended sampling and mill tests."

TWO LOAN COMPANIES WILL AMALGAMATE

This Month if Shareholders Say Yes—Ontario Loan and Agricultural Savings Corporations Have Drafted Agreement.

An amalgamation agreement has been prepared between the Ontario Loan and Debenture Company and the Agricultural Savings and Loan Company. This will be submitted to the shareholders of both companies on August 31st. If the stockholders vote favorably upon the agreement, these two concerns, both with headquarters in London, Ontario, will become one. The net assets of each company has been agreed upon for the purpose of the agreement as follows:

The Ontario Loan and Debenture Co., $2,129,142.85.
Agricultural Savings & Loan Co., $1,002,322.47.

Any surplus that may be shown by the actual net assets of either party beyond the above respective amounts will become the property of the amalgamated company.

Ten Directors Will be Elected.

By the terms of the proposed agreement the two corporations will unite under the name of the Ontario Loan and Debenture Company. The number of directors of the new company will be ten, the first directors to be Messrs. John McClary, A. S. Emery, W. M. Gartshore, J. N. Dillon, A. M. Smart, W. J. Reid, T. Beattie, T. H. Smallman, M. Masuret, and T. P. McCormick, of whom five to be determined by lot will retire at the annual meeting of the amalgamated company to be held in February, 1912. These five directors will be eligible for re-election and the remaining five will retire similarly in February, 1913. Mr. A. M. Smart will be the first manager of the amalgamated company, the head office of which will be in London, Ontario.

The authorized capital stock of the new company will be $5,000,000 in shares of par value of $50. Of the capital stock $2,500,000 and such greater sum not exceeding $67,150 as is requisite to carry out the terms of the agreement shall be considered subscribed, composed of 20,000 shares of par value $50 on which 20 per cent. has been paid. The balance shall be fully paid shares, par value $50, the total amount paid on the stock being $1,700,000, or such greater sum not exceeding $67,150 additional.

Shareholders of Two Companies

The following clauses of the agreement relate to the position of the shareholders of the two companies:

"In the case of the Ontario Loan and Debenture Company, the party hereto of the first part, each shareholder therein of record on the books thereof at the date of the said assent hereto of the Lieutenant-Governor of Ontario in Council shall receive the same number and description both of the fully paid and of the partially paid stock of the said amalgamated company as he at the said last mentioned date holds in the stock of the said party of the first part in lieu of and in substitution for the last mentioned stock and in respect of partially paid shares of the said amalgamated company, the holder shall be liable to the said amalgamated company for the amount including the premium of twenty per cent. remaining unpaid thereon, but shall not be entitled to make any further payments on the said stock except in so far as and at such time or times as the same may hereafter be required by formal call by the amalgamated company, its successors or assigns.

Nine Shares for Ten.

"In the case of the Agricultural Savings and Loan Company, each shareholder therein of record on the books of the said last mentioned company on the said date of assent shall subject to the provisions hereinafter made as to adjustment and as to fractions of shares receive shares of stock fully paid of the said amalgamated company in the proportion of nine shares of fully paid stock of the amalgamated company for every ten shares of the fully paid stock of the party of the second part, held by him in lieu of and in substitution for the last mentioned stock of the said party of the second part so held by him.

"Fully paid shares of the par value of $50 each (up to but not exceeding the number of 11,343 shares) shall if required be issued by the amalgamated company in substitution for the shares of the Agricultural Savings and Loan Company to be surrendered.

Stock and Bonus.

"For the purposes of the said amalgamation subject to adjustment as herein provided, each fully paid share of the capital stock of the said party of the first part shall be treated as of the value of $88.70, and the shareholders of the said party of the second part on record at the date of the assent of the Lieutenant-Governor of Ontario in Council hereto shall, in lieu of and in exchange for the 12,604 shares of the fully paid up stock of the Agricultural Savings and Loan Company held by them, receive 11,343 shares and the value of three-fifths of a share computed at $88.70, of the fully paid stock of the said amalgamated company, or such lesser number of shares to which they may be found entitled under this agreement with the bonus (if any) arising under the terms of the award of the adjusters appointed as hereinafter provided, the said stock and bonus so to be received by the shareholders of the said Agricultural Savings and Loan Company, to be divided and apportioned among them pro rata in proportion to the stock of the said last mentioned corporation held by them at the date of the said assent."

The two companies are to have eight weeks from the date of the ratification of the agreement by the shareholders to investigate and verify the financial statement of each.

HUDSON'S BAY STORES POLICY

London Director Got a Shock When He Examined Some of the Stock Being Carried at the Trading Posts—Stores to be Modernized.

At a recent annual meeting of the Hudson's Bay Company in London, Richard Burbidge, director of retail stores, was asked to make a statement in regard to the company's stores, many shareholders expressing disappointment at the smallness of the dividend by reason of £400,000 being held back to be invested in sites for stores.

Mr. Burbride made it clear that the company intends to pursue a very vigorous policy in connection with its stores department. In the course of his reply he said:

Ever New Stock.

"I feel it a great privilege to be called upon to say anything in connection with the trading department of the Hudson's Bay Company. When I went to Canada first, two or three years ago, to be followed up by another visit last year, I was anything but pleased with what I saw as far as the company's sale-shops in that country were concerned, having regard to the style of business I was accustomed to at home. I quite understood that it was impossible to bring them up to the same high pitch that we have in our premises in London and the other different trading communities here. But what I felt sure was that there was a good deal of stock there which it was unnecessary to carry in a country like Canada. It might have been good value at one time, but it was out of date, and it was necessary that the stock should be realized before we put in a fresh and ever-new stock which would be the means of drawing customers to the stores.

Must Spend Money.

"The slaughter was brought about at the commencement of the last financial year. But it was not all done even then. There will be some this year, and we must ask you to bear with us until we get that on a solid foundation, and if there is anything to be realized it is in the best interests of you, as shareholders, and of ourselves, as directors, that it should be done with as little delay and loss as possible. I feel sure that the trading of the Hudson's Bay Company in future has its high-water mark to attain to.

"I have not the slightest doubt, providing you are prepared to find the capital and to carry on the business that the trading of the shops will be as profitable as any other portions of the business. It requires time and patience, and we must have the money to do it with. I will add that I have nothing to do with the big carry-forward other than as one of your directors, but I quite concur that it is the right thing to do for the future of the company."

AMERICAN FARMERS ARE NOT TROUBLED

About Canadian Farmers' Competition Under Reciprocity—"Only a Small Part of Canada's Agricultural Products Will Come Into the American Market," Says One Authority.

The Canadian farmer may gather from the following frank confession of an American paper the comparatively small benefits he is likely to gain compared to what our enterprising neighbors in the United States anticipate obtaining. The Moline Daily Despatch points out that careful consideration "will absolutely convince anyone that the proposed reciprocity agreement will be of no harm to the American farmer and of much positive benefit both direct and indirect." Here are our American contemporary's arguments, which make excellent reasons for Canada voting against the pact next month.

Want to Regain Export Trade

"Not only is it certain," says the Moline paper, "that free wheat will not cost our farmers a cent, but it will directly benefit them. It is notorious that we are not raising so much high-grade spring wheat as formerly. Our millers are having a hard time to get enough hard wheat to take care of the domestic trade, and have, on account of its scarcity and the competition of the Canadian mills with their abundance of hard wheat, practically lost their once enormous export trade. If our mills had more hard wheat available, they could regain their lost export trade, increase their output greatly and thus create a strong demand for the softer wheats on this side of the line, needed for blending with hard wheat, with result that our lower grades and inferior qualities would be in keener demand and bring better prices than they do to-day. Then again, when the United States has wheat to export, it competes with Canadian wheat in the world's markets. Liverpool plays one against the other to the injury of both. The tariff wall keeps the wheat of the two countries apart and, you might say, hostile. Remove the duty on Canadian wheat and the whole crop of the two countries will become one. Europe will get our wheat—Canadian and American—when we are ready to sell; not as now, when the Canadian forced by the exigencies of an imperfect marketing, storage and transportation system, has to sell. That will mean a better hold by the American wheat grower on the markets of the world than he now has. It means better prices in Liverpool, and that, of course, means better prices in Minneapolis and Chicago and on the farms.

Abundance of Feedstuffs

"Again the more wheat the United States mills grind, the greater the volume of their by-products suitable for stock feeding. In other words, free wheat means free feedstuffs and probably with increasing supply lower prices for the farmer to pay.

"Western Canada is largely a one-crop country. Diversified farming will not make much progress there for a long time. The average western Canada farmer, for instance, does not raise enough potatoes for his own consumption, to say nothing of supplying the markets. The same is true of other vegetables, hay, and fruits. Even now western Canada imports immense quantities of these products, notwithstanding the tariff. The reciprocity agreement puts them on the free list and the demand for them will greatly increase.

As to Farm Produce

"Last year our farmers shipped 7,680 tons of hay to Canada and somebody paid a duty of $15,360 on that hay. Last year Canada bought 215,000 bushels of potatoes from us, and a duty of $43,000 was paid thereon. Of other fresh vegetables, Canada bought from us last year $625,000 worth, and had to pay on them tariff taxes of $195,000. Of apples alone Canada bought last year from us 59,071 bushels, and the duty thereon was $24,000. These are only a few of the items of agricultural produce that Canada takes from us in the natural state. With the entire remission of the duty, it is reasonable to expect that our market in Canada for these products will be vastly increased.

"Canada does not produce enough meat for home consumption. Outside of the pork products of eastern Canada, its export meat trade is insignificant. The Winnipeg abattoirs will draw cattle, sheep, and hogs from Montana, Minnesota, and Dakota, thus creating a competition of markets. While live animals are free under the agreement, Canada will continue to levy a small duty on animal products, thus giving the American farmer some advantage over the American packer.

"Canada bought from us last year several thousand head of cattle, 121,000 horses, 104,000 sheep, and 24,000 other live animals and a vast quantity of poultry, the total duties levied on which amounted to $175,000. All these now go on the free list, the Canadian market for them is to be as untrammeled as the market in any part of the United States.

"While meats are not placed in the free list, the reductions offered by Canada are so sweeping that there must inevitably be an immense increase in our exports of such products to Canada. Fresh, dried, smoked, and salted meats and lard are reduced by Canada to a nominal duty of 1¼ cents per pound. What this means to our market for meats can be inferred from the fact that last year the imports of these articles from the United States into Canada were so enormous that the total duty collected by the Canadian Government amounted to more than $600,000. The amount of the duty Canada remits on these products—based on last year's figures—will be almost $400,000.

Dairy Products and Poultry

"There will be a big market in western Canada for Minnesota, Dakota, and other State dairy products. Ontario now largely supplies western Canada with these products, but they can be more advantageously obtained from the United States. Last year Canada imported 61,000 pounds of butter from the United States and paid a duty of 4 cents a pound. Of cheese, Canada bought 215,000 pounds and paid a duty of 3 cents a pound.

"The same is true of poultry and eggs, for which there is a tremendous market in a new and prosperous country like western Canada. Last year Canada imported 750,000 dozen of eggs from the United States and paid a duty of $23,000 thereon. There are scores of other agricultural products raised in this country finding a ready market in Canada, which are now to go on the Canadian free list, or to be the beneficiaries of greatly reduced rates.

"The great activities of western Canada in opening up new farms, building thousands of miles of railways and founding hundreds of new settlements, demands thousands of draft horses, which must come from the United States.

Agricultural Imports from Canada

"At present our imports of agricultural products from Canada are so comparatively small as to be lost in the immense volume of domestic products. The case will not be greatly altered if the present agreement be enacted into law. The entire export trade of Canada, including manufactured products, in 1910, amounted to $279,000,000. The United States had $104,000,000 of that, leaving $175,000,000 for all other countries. Now if, as the impossible result of the reciprocity treaty, Canada were to cease to export to all other countries and turn that trade to the United States, our increased consumption of Canadian exports, of which agricultural products would only be a part, would only amount to $2 per capita of our population.

"Outside of wheat, Canada, a country of only 7,000,000, as yet is such a small producer even of agricultural products that she has not an available surplus to export to the United States that will amount to enough to trouble our farmers in the least. Canada has a large, remunerative export trade in agricultural products with Great Britain. Such portion of those exports as may be diverted to the United States under free trade will come on the payment by our importers of a price that will divert shipments from the British markets. So at the most only a small part of Canada's agricultural products will come into the American market."

◆

Mr. R. R. Bevis, the managing director of Cammell Laird and Co.'s shipyard, stated recently at Sheffield that he had strong hopes that the construction of a fleet of Canadian warships would be entrusted to a firm to be established in Canada, and which will be assisted, organized and developed by Cammell Laird and Co. If the present negotiations are carried through a shipyard will be constructed at St. John, New Brunswick. Mr. Bevis has just returned to England from Canada, where he has been negotiating with the Canadian Government.

Mr. R. H. Duke, late general manager of the British Columbia Permanent Loan Company, is dead. Mr. Duke was born at Mono Mills, Ont., in 1871, and went to Vancouver ten years ago. At that time Mr. Duke took a position with the British Columbia Permanent Loan Company. Mr. Duke's advancement was rapid until he became general manager of the Pacific Coast Fire Insurance Company, which position he held until January of this year when he became general manager of the British Columbia Permanent Loan Company. Mr. Duke was also connected with various other financial interests to which he was able to give much valuable advice on account of experience gained throughout British Columbia.

TENDENCY TO INTERLOCK FINANCIAL SYSTEMS

Of Canada and the United States is Revealed in Proposed Reciprocity Agreement—Objections to the Pact.

The objections to the proposed reciprocity agreement have been summarized by Mr. R. L. Borden as follows:—

"It tends to segregate and separate the provinces of Canada, which Confederation aimed to unite, and it thus destroys the very meaning of our Confederation.

"It shatters the ideal and the hope of reciprocity within the Empire. The President of the United States has avowed that the main purpose with which he sought the treaty was to prevent consolidation of the British Empire.

Way to Washington.

"It brings Canada to the parting of the ways, turns her from the path of Canadian unity, and British connection, and leads her along the way to Washington.

"It reverses the policy of Canadian nationhood, which sought to bring intercourse and commerce over east and west lines of transportation, and it stultifies the unexampled sacrifices of half a century which the Canadian people have cheerfully made for that high purpose.

"It is a direct and serious menace to our internal lines of water communication and to our ocean shipping as well as to our Canadian Atlantic ports that have been constructed and equipped at such enormous cost to the country.

Interlocks Our Financial System.

"It makes Canada a commercial appendage of the United States and virtually surrenders the control of her destinies.

"It interlocks our financial system with that of the United States, and fetters the power of Parliament to alter our tariff according to the just requirements of our people.

"Its duration is nominally within the control of either country, but actually within that of the United States alone. The conditions of its abrogation would involve so many delicate and difficult international considerations that the stronger party would eventually dictate the terms.

"Its tendency and aim are complete commercial union between the two countries to the exclusion of the rest of the Empire.

"It opens to the United States our home market, which consumes eighty per cent. of our animal and agricultural products. It also has the effect of opening the same market to twelve foreign countries, and to all the British possessions with which we obtain no reciprocal or compensating advantage. Sir Wilfrid Laurier is sending to these foreign nations a polite invitation to forego and renounce this right to enter our markets. The suggestion that they are likely to be thus considerate and unselfish is so foolish that it requires no answer.

"It abandons the policy of improved trade relations with the British people, our best customers, and centres our hopes on the American people, our strongest competitors in the markets of the world.

Will Destroy Distinctive Character.

"It makes an absurd pretence of bringing relief to the farmer by exposing him to the competition of the world in everything that he sells, and by continuing the existing burden of taxation on everything that he buys.

"It threatens the existence of our fishing bounties, and takes away our power to give such encouragement to any industry affected by the agreement.

"It will destroy the distinctive character and reputation of our staple products, which will henceforth be merged in those of the United States, and will be known as American rather than Canadian products.

"It exposes our natural resources to the depredations of the gigantic trusts which have already secured control of those of the United States. It will assist those trusts to exercise an undue influence and pressure on our Provincial Governments for the purpose of forcing them to abandon the wise policy of conserving our natural resources, and of converting them into finished commodities by the labor of our own people. It will give to American trusts a power, an influence and a control in this country equal to that which has been exercised so remorselessly and unsparingly in the United States.

"It will for the most part reduce the prices which our producers will receive for their output, while the control of the trusts will prevent any reduction to the consumer. It will discourage the higher and more progressive methods of agriculture by which the product of the farm is turned out in finished form and the fertility of the soil maintained and preserved. It will encourage the export of our raw material and unfinished products for manufacture abroad instead of at home.

"It will establish conditions and relations from which it will be extremely difficult and even impossible to retreat, except with the consent of the United States or under terms dictated by her.

"And, finally, it is at the best a rash and perilous experiment, inconsiderately and unwarrantably undertaken in a period of unequalled development and prosperity, after Canada had long since outgrown the conditions which under such a policy was once thought desirable."

CROP REPORTS ARE SATISFACTORY.

Black Rust Only Trifling—Real Estate Active—In the Wheat Markets.

Monetary Times Office,
Winnipeg, Aug. 15th.

Harvesting operations in Western Canada are in full swing. The indications are that the estimate made by Sir William Whyte and others of 200,000,000 bushels of wheat will be surpassed.

The past week has been warm with plenty of sunshine. There has been too much rain, and warm weather for the next two weeks is urgently needed.

It appears that the black rust scare arising in some Manitoba points, was more of a scare than anything else. Black rust was present, but the crop was sufficiently far advanced to make the depreciation comparatively small.

A few reports in regard to the crop from some of the older districts are worthy of note. Wheat will run in some cases as high as forty bushels to the acre; oats 50 to 60 bushels, and barley 40 to 45, and the general average for wheat will be from 25 to 28 bushels per acre.

In the Moose Jaw district wheat is supreme, and on this crop the farmer seems to depend. The average yield in that district will be about 28 bushels. The oat crop is also good. It should average 50 bushels.

In Elkhorn, Man., in thirty fields inspected black rust was found to exist in only three, and in no case was it in an advanced stage. The acreage to wheat and oats is estimated at 10 to 12 per cent. in advance of last year. Tributary to Elkhorn there are 20,000 acres under wheat, 8,000 under oats, and only 1,500 under barley. Wheat will average about 22 bushels, oats 45, and barley 30. Two hundred and fifty thousand bushels of wheat were shipped from this centre in 1910.

The fields look magnificent in the Indian Head district, with no black rust or damage from any other source. There are 50,000 acres of wheat tributary to this point. Wheat should average 28 to 30 bushels to the acre, and oats 60 bushels.

Crops are considerably above the average in the Napinka, Man., district. The cutting of wheat has begun. The estimate of the wheat yield in this district should be around 20 bushels to the acre.

The real estate in Winnipeg is buoyant, that is, when a number of the far distant and outlying subdivisions are omitted. A number of prominent real estate men told The Monetary Times last week that this fall will be the busiest season in real estate in Winnipeg's history. The summer season, as usual, has been a little dull, but even then most dealers found it better than previous summers.

The dealers base their forecast of an exceptionally busy season on the number of enquiries they have been receiving from prospective purchasers. "It would be conservative to say," said one dealer, "that the number of enquiries has increased 1,000 per cent. in the last year."

The Great West Permanent Loan Company has completed the purchase for $160,000 of a Main street office site at Winnipeg, and next spring will erect a home structure six storeys in height.

The property acquired is situated on the west side of Main street, seven doors south of Portage avenue, and comprises a frontage of fifty feet, by a depth of 120 feet to a lane. At the present time the premises are occupied by Gowans, Kent Company, and the Whaley, Royce Music Company, which are next door south to the new Alloway & Champion building. The leases for these stores expire February 28th next, and immediately after that date they will be torn down to make room for a modern office building.

The vendor of the property was Robert Wyatt, the well-known hardware merchant, and the frontage at $3,200 a foot yields him a handsome profit on his investment.

A strong tone prevailed in the markets during the week, and although trading was erratic and nervous, a substantial advance was recorded in values. The controlling factor is

(Continued on Page 844).

LUNACY STATISTICS.

Interesting Figures of the British Commissioners—Unemployment as a Cause of Insanity.

Some figures of interest to life insurance are contained in the sixty-fifth report of the British Commissioners on Lunacy. Their returns show that alcohol is responsible for about 16 per cent of the cases reported, while 20 per cent. were traced to unemployment. One of the commissioners thinks that lunacy will be largely lessened directly some method is found of increasing the general prosperity of Great Britain.

Mental Stress a Cause.

It is pointed out in the commissioners' report that in 9.6 per cent. of the cases has mental stress alone been the assignable cause of attack, though it is also explained that prolonged mental strain has been associated with nearly every other assignable factor in the category of causes. In confirmation of the assertion that insanity is an hereditary disease, the report states that:—

"Our statistics show—and since their introduction, upwards of fifty years ago, have shown—that there is a family history of insanity in persons admitted to asylum care amounting, on an average, in the case of males, to 19 per cent., and of females to 23 per cent. of the total yearly admissions. This is probably an under-estimate, for there is always a considerable residuum concerning whom it is impossible to obtain positive information on this point."

But the report states that to ignore the factor of inheritance because three times the number of insane apparently come of sane stock would be unwarrantable It is gratifying to note, further, that:—

At marriageable ages—twenty-five and upwards— the proportion of the unmarried of both sexes is considerably higher amongst the insane than it is in the general population, and to a slighter extent also in the widowed. Considerably more single than married or widowed persons were admitted to care.

It also appears from the report that the proportions of the sexes certified yearly as insane are exactly the same, so far as relation to the number of persons in the country is concerned. There are, it is well known, more females than males in the country, and the estimated proportion per 1,000 in the general population for the middle of 1910 are—males, 482.8; females, 517.2.

Males and Females.

The proportions amongst the insane annually admitted to care are practically identical—males, 484.0; females, 516.0. Concerning readmissions to care, it is stated that they form from 17 to 18 per cent. of the total admissions, and may be considered to consist mainly of those who, in previous years, have been discharged as "relieved" or "not improved," and also of patients who, having left an asylum "recovered," are admitted with a recurrent attack. So far as asylum statistics go, the proportion of such occurrences is about one-fourth of those originally discharged as "recovered."

◆

BANK ASSETS FOR SALE.

The following assets of the defunct Bank of St. Hyacinthe will be sold on Tuesday:—(1) The amount of an obligation and mortgage in favor of the bank by the Eastern Townships Corset Company, Limited, aggregating a capital and interest of $14,650. This amount is secured by a mortgage on the factory and land owned by the company in St. Hyacinthe. (2) A list of judgments pronounced in favor of the bank against several of its debtors representing in capital and costs $68,505. (3) A list of claims, promissory notes, overdrawn accounts, etc., amounting to $15,314. (4) A list of arrears of payments called for on several shareholders against whom judgments have been announced amounting to $21,409.

Mr. L. F. Plinie is the liquidator and will sell these assets for cash at public auction.

◆

Three tenders from British firms have been received at the Department of Public Works, Ottawa, for harbor works at Courtenay Bay, St. John, N.B. The contract includes dredging, the docks for the Grand Trunk Pacific, a drydock and a ship repair plant. The amount to be expended is four or five million dollars. The three tenders received are all from British firms—Sir John Jackson, Norton Griffiths & Company, and Sir Weatman Pearson. Each was accompanied by a deposit for half a million dollars. The engineers of the department will report on the merits of the three tenders before the contract is awarded.

SPEED CRAZE AND MORTALITY.

Significant Figures of an Insurance Medical Director—Circulatory Diseases.

A sidelight on the relation between the speed craze of to-day and disease is given in an address by Dr. E. W. Dwight, medical director of the New England Mutual Life Insurance Company, in reviewing recent causes of mortality. Medical progress, sanitation, etc., have not only lengthened the span of life, but have curtailed the sway of many dread diseases. Simultaneously, however, those afflictions that besiege the channels of life show an alarming advance in their power to kill. The comparison of changes from 1900 to 1909 per 100,000 of population, as between "preventable and infectious diseases" and "circulatory diseases," speaks for itself:—

Preventable, infectious:	Dec.
Pneumonia	44.5
Tuberculosis	27.3
Diphtheria and croup	21.0
Typhoid fever	10.6
Diarrhœa and eneritis	7.3
Dysentery	4.8
Puerperal septicemia	4.2
Measles	2.3
Scarlet fever	*2.2
Tetanus	1.8
Smallpox	1.7
Circulatory:	Inc.
Heart disease	22.1
Diseases of arteries	11.6
Bright's disease	5.6
Apoplexy	4.6
Acute nephritis	2.8
Endocarditis	1.4
Pericarditis	†1.3
Angina pectoris	0.3
Embolism and thrombosis	0.2

* Increase. † Decrease.

Reinforced by Insurance Data.

These census figures are strikingly reinforced by insurance data. In sixty years of New England Mutual active business nearly 40 per cent. of all deaths have been proved due to circulatory diseases. The increase in ratio is an ominous signal.

About 10 per cent. of all insurance applicants are rejected. During 1910, of the New England Mutual declinations, 49.4 per cent. were due to circulatory diseases. The inference is that 5 per cent. of all insurable and generally prosperous classes, believing themselves physically well, are suffering serious impairment of the circulatory apparatus. Here again, New York City-New Jersey, with 69 per cent. of declinations last year due to circulatory disease, and Boston and Massachusetts with 68 per cent., show an unenviable lead over the 43 per cent. and 45 per cent. indicated for Southern and Western cities.

Due to Speed Habit.

Something may be due to climate; but far more must be blamed upon habit. Is brain feeding upon heart?

◆

The Grand Trunk has awarded a contract to the American Locomotive Company for the construction of ten Richmond compound consolidation locomotives for use on their United States lines. These are freight engines, cylinders 22 in. and 35 in. by 32 in., with driving wheels 63 in. diameter. The boiler, of extended waggon top type, with wide firebox, contains 353 tubes, 2 in. diameter by 15 ft. long, having firebox heating surface of 168.2 square feet, and tubes 2,757.1, and grate surface 50.62 square feet, with working pressure of 210 lbs. square inch. The tender is of water bottom type, with a capacity of 7,000 United States gallons and about 14 tons of coal. This type of engine has a tractive power of 36,000 lbs.

The Robb Engineering Company, Amherst, Nova Scotia, and South Framingham, Mass., have recently received an order from the Sturgeon Lake Development Company of Toronto, for two Robb-Mumford boilers and one stack 48 in. in diameter and 80 ft. high, with smoke connection.

By the end of the year the Canadian Northern Railway will have the first railway laid into the Peace River country, as nearly 100 miles will be placed on the road north-west from Edmonton. The location of this new line has been completed as far as the Athabaska, 140 miles from Edmonton, and parties are now in the field making the final survey from the Athabasca River to the Peace River.

FIRE PROTECTION

Canada's Fire Waste in Two Years — $42.000,000

PROPER FIRE PROTECTION.

Speculative Builders Do Not Help to Mitigate the Waste—Some Plain Words from a Western Fire Chief.

BY FIRE CHIEF BUCHANAN, WINNIPEG

The subject of proper fire protection is now recognized as a legitimate and most important division of engineering, requiring the services of not only the architect, but in addition those thoroughly conversant with engineering designs and principles.

No longer is the aesthetic treatment of the interior and exterior of buildings considered of primary importance, but the construction, designs, the bone and sinew of the building, is the essential feature to be considered.

Fireproof construction is no longer exclusively to endeavor to protect human life but is greatly increasing its scope, demanding very careful thought from the economical standpoint. That the question of fire waste is being seriously considered in all its aspects, and by all classes of society, is shown by the increasing facilities for the use of fireproof construction.

The realization of low prices in the building market has seemed to overcome prejudices in regard to fireproof construction and the economy of such design as opposed to the "fire trap" method so long in vogue, and this fact is now being daily emphasized by achitects, engineers and the press.

It is self-evident that the liability of a building to burn depends upon the material of which it is constructed. The material with which our cities have been built as compared with the building materials used for many years in England and European countries, make striking answer as to why the fire risks are so much greater in our cities—showing great need for fireproof buildings.

With the exception of but comparatively few recently constructed buildings of steel and concrete, our cities have been built of the most inflammable of materials suitable and useful for building purposes. Not only has wood entered into the construction of our cities, but the most inflammable of wood, such as pine; and when other woods less susceptible to fire have been used, they have been rendered more inflammable by the use of varnishes, oils and paints.

It has recently been asserted that a fire in Vienna is never known to extend beyond the building in which it originates, and that there is rarely an instance where it burns beyond the floor of its origin; all of which is due to the material and manner of construction. Wooden buildings have been prohibited since its great fire of 1666, except in certain isolated locations, and then under strictest of conditions.

Strict Building Laws.

Looking over enormous losses by fire yearly in this country is it any wonder we should demand more fireproof buildings and strict building laws, and see that they are properly enforced; then, and then only, will our fire loss be curtailed.

A common, but not generally known, material for use in reducing the inflammable nature of wood, is whitewash. All outside and inside rough work of buildings not intended to be ornamental, such as warehouses and fences, should be kept coated with whitewash. The use of wire-glass should be required in the construction of all large buildings. There were buildings in San Francisco which were saved from burning because all of the windows were made of this character of glass. Such windows will resist more heat than metal shutters, and will endure a greater water force. With wire-glass a fire in a building can be seen in its incipiency and readily located, while metal shutters prevents its discovery until smoke and flames are pouring forth.

Materials and Methods.

In addition to the material and method used in the erection of buildings, fire risks can be reduced by a mere general use of Automatic Sprinklers, Automatic Fire Alarms, Stand Pipes and Chemical Fire Extinguishers.

As an illustration. Take for example the Singer Building, wich is equipped througout with Dahlstrom Metallic doors and trimmings. A fire occurred on the 26th storey of the building in the offices of the United States & Mexican Trust Company, on September 26th, last year, and, while the height of the building only intensified the fire, because of its really fireproof construction the danger was confined to the suite in which it started, and would have been kept down to one room had the doors between been kept closed.

Concrete construction is the best form for the elimina tion of fires. A building so constructed keeps the fire in plain sight, once it is started; one of the greatest obstacles in fighting fire in wooden constructions is the difficulty of locating a fire after it is known to exist.

As to Apartment Blocks.

Take our apartment blocks, as they are now constructed, with the amount of burning material they are composed of—added to that paint and varnish which are highly combustible—and the amount of people living in the buildings, the possible loss of life should fire occur should set all right thinking people to form of fireproofing all our apartments, while fireproof partitions and hallways will usually prevent a fire spreading laterally. There is always great danger of its travelling upwards by way of the windows, dumbwaiter and air-shaft.

Do we ever stop to think what such a conflagration would mean in a city with its enormously congested population and financial values? The result would be appalling if such a conflagration were to sweep some sections of our city the money loss would be staggering. The credit of the city might be ruined and even the financial system of the country shaken. It is high time we began to limit this hazard by insisting that all high buildings be fireproof in fact as well as in name; and that all buildings over two storeys high shall have fireproof floors, partitions and hallways.

The Speculative Builder

I fear this will never be accomplished by appealing to the public spirit of the speculative builder. He is building to sell, and the cheapest, flimsiest construction that the law will allow is the one he will adopt. Building laws must be enacted which will prohibit the erection of inflammable structures within our congested areas, and then we must insist upon a strict enforcement of the same. Such laws will not be enacted until citizens appreciate their necessity, and demand that their representatives decree them.

The lessons from all fires point to these conclusions: No structure of the future should be built of wood; No structure of the future should contain any wood. It has taken costly lessons to teach us this, but if we have at last learned the lesson—the price we have paid is cheap.

◆

TO INSTRUCT FIRE BRIGADE

The consulting engineer of the Quebec Waterworks, Mr. Forester, who was for a number of years hydraulic engineer to the Montreal Fire Underwriters, has been asked to reorganize and discipline the Quebec fire brigade and to give them instruction as to their duties in connection with the operation of the valves and the water power. Deputy Chief Hamell has been appointed fire chief at Quebec.

◆

DEFECTIVE WIRING

As noted in The Monetary Times last week, the jury investigating the death of eight victims of the Hamilton Asylum fire were unable to determine the cause of the fire. Inspector Rogers of Toronto stated that defective wiring was, in his opinion, the cause, although he did not give reasons for that conclusion. The coroner expressed the conviction that all asylums should be absolutely fireproof.

◆

WANT CITY TO PAY

Thirty-three claims for losses varying from $50 to $4,000 each have been presented by the fire sufferers of the recent Longue Pointe fire to the City of Montreal. It is alleged that the water pressure was weak, and that delay was experienced before the fire apparatus got to the conflagration. Among those who are looking to the city for compensation is Mr. F. P. Tremblay, whose house was destroyed by the recent fire in Tetreaultville. He has sent in an account for $2 000, claiming that the neglect of the city to supply water service in the district was responsible for his loss.

WANT LOWER RATES

Members of the civic board of control at Montreal will request the underwriters to reduce the fire insurance rates in that city. The municipality have expended $2,500,000 in purchasing fire apparatus, laying water mains and increasing the efficiency of the fire department.

Mr. Alfred Hadrill, secretary of the Canadian Fire Underwriters' Association at Montreal, stated that the Underwriters considered that they had met all the improvements referred to by the taking off last year, in two instalments, of the 50 cent surcharge, which had been put on to cover deficient water supply, etc., and that there was no particular call to reduce rates at present.

"But what have the Controllers done in regard to the districts supplied by the Montreal Water and Power Company? **Is the pressure now all right?**" asked Mr. Hadrill. "They have disclaimed responsibility in the recent cases where the company's water failed at fires. We are not criticising the Controllers in any way, for we consider that they have done some splendid work since they have come into existence but we shall like to know what they have done about the Water and Power Company's pressure."

FABLE FOR BUILDERS

Last Summer a Good Citizen of a certain town not over a hundred miles from almost Everywhere, built a Wooden house for a Woman and her Children. He built the Chimney of Brick because he had to. The Chimney was able to stand alone, so he did not have to prop it with Wood. But the Floors of the House would not stay up without props. The Good Citizen saved a dollar by using the Chimney as a support to the floors. He nestled the ends of the Floor Joists nicely in the brick of the Chimney. He covered up the job and got his money.

The Rains fell and the Winds blew and Winter came after its fashion. The Chimney settled a little; and there was a tiny Crack.

One morning the Woman woke up with fire all about her. She tried to get to her children. If she got to them no one ever knew it. The Good Citizen who built the house was not arrested for manslaughter. He is building other houses of the same kind for other women and children.

He is making his Living by it.—Franklin H. Wentworth.

RAILROAD AND COMPANY EARNINGS.

Comments on Grand Trunk's Surplus—Steel and Coal Shipments.

The following are the railway earnings for the week ended August 7th:—

	1910.	1911.	Increase.
C.P.R.	$2,065,000	$2,272,000	$207,000
C.N.R.	248,200	332,550	84,350
Halifax Electric Ry. ..	5,071	5,641	570
T. & N.O. Railway ..	23,986	35,802	11,816

The total earnings of the Calgary Street Railway for July were $39,147, an increase over last year of $16,000. Total operating expenses were $15,187, and after the addition of the interest and sinking fund and the contingent account, there was still a profit of $16,739. The proportion of operating expenses to revenue is decreasing, as the cost this year was 38 per cent., while last year it was 40 per cent. The number of passengers carried was 919,325.

The Grand Trunk Railway's surplus is £263,000. The directors promise a full dividend on the first and second preferred stocks, carrying forward about £11,700. The Great Western deficit is £31,462, owing to the strike in July and August, 1910. It has been decided to carry the balance forward to next year.

To Cover Fixed Charges.

The London Financial News, anent the Grand Trunk western's deficiency, comments: "As the deficiency is due solely to the strike of July and August last year it has been decided to carry the debit forward. This seems a natural thing to do, but we suppose that there was an alternative in calling on the Grand Trunk to furnish the balance necessary to cover fixed charges under its guarantee. If the Grand Trunk Western can comfortably hold the deficiency in suspense, it was certainly much wiser to make it do so than to draw on the already narrow revenue surplus of the parent company for an advance in addition to those already made for the general purposes of a subsidiary."

Apropos the guaranteed dividend, the journal says to carry dividend distributions no further than was done a year ago at the expense of a small reduction in the forward balance, is a poor ending to a half year of which high hopes were entertained.

The same paper admitting that the growth of the Grand Trunk expenses have been persistent in the last year or two, suggests that it is permissible to wonder whether at the same time part of the growth in operating costs is not due to a preconceived determination on the part of the board to "gang warily" in view of the liabilities of the parent company, than to loom ahead in connection with the guarantees given to the Grand Trunk Pacific. If this be to any extent the correct idea one can only say the board is pursuing a policy for which no prudent person will blame it.

While they may have good reasons for hoping that the earnings will continue to progress and enable them to pay dividends on the third preference, we would temper them with the reminder about the necessity imposed upon the board for maintaining the most conservative policy.

Last year Russell Motor Company, as the Canada Cycle & Motor Company, showed earnings of 18 per cent. on its $800,000 stock. At the time the new preferred stock issue was made there was a prediction of 22 per cent. earnings made in the prospectus. As things have turned out it appears that the actual earnings for the year just closed on June 30th will be in excess of that ratio.

The Cuba Railroad Company's gross for twelve months was $3,059,650, compared with $2,559,325 in 1910. Net was $1,374,071, compared with $1,107,299 in 1910. Net income or surplus after fixed charges was $797,316, compared with $672,089 in 1910.

Coal and Steel Shipments.

Dominion Coal Company shipments are 311,049 tons ahead of last year, while the coal shipments of the Nova Scotia Steel Company are some 73,600 tons behind.

Dominion Coal.

Shipments, July, 1911	375,147
Shipments, July, 1910	322,186
Increase, July, 1911	52,961
Shipments, 7 months, 1911	1,929,360
Shipments, 7 months, 1910	1,618,311
Increase, 7 months, 1911	311,049

Nova Scotia Steel & Coal.

Shipments, July, 1911	71,750
Shipments, July, 1910	83,549
Decrease, July, 1911	11,799
Shipments, 7 months, 1911	340,451
Shipments, 7 months, 1910	414,051
Decrease, 7 months, 1911	73,600

Canada North-West Land Company sales for July totalled 4,365.78 acres for $61,17.80, which compares with 4,956.20 acres for $62,012 in July last year. From January 1st to date sales were 25,431.70 acres for $344,742.98, which compares with 40,149.06 for $482,462.29 in the corresponding period last year.

The Consolidated Mining & Smelting Company's fiscal year ended June 30th, and although the detailed annual statement will not be issued until the annual meeting in September, the preliminary reports show that receipts during the year were much below those of the previous year. The gross value of metals received was $4,438,000, as compared with $5,911,767 for the fiscal year ending June, 1910. Custom ore receipts were about 58,000 tons, as compared with 82,000 tons in the previous year.

The Ontario Power Company and Ontario Transmission Company, Limited, report for the three months ended June 30th, compared as follows:—

	1910.	1911.	Increase.
Sale of power	$182,600	$216,993	$34,393
Governmental rental	12,225	14,097	1,872
Gross earnings	170,374	202,895	32,521
Operating expenses	33,192	37,610	4,418
Net earnings	137,182	165,285	28,103
Other receipts	14,734	21,444	6,710
Total income	151,916	186,729	34,813
Interest	137,747	167,536	29,789
Surplus	14,168	19,192	5,024

The net income of Granby Consolidated for the fiscal year ended June 30th was approximately $282,000, assuming a copper cost of 10¾ cents per pound and selling price of 12.33. Production was 17,795,215 pounds of copper, the smallest since 1906, when slightly over 16,000,000 pounds were produced.

Subscription List is now open, and will close on or before 3 p.m. Monday, August 21st.

Cawthra Mulock & Co. own and offer at 98½

$1,250,000 of 6% First Mortgage Sinking Fund Thirty-Year Gold Bonds of

Canada Bread Company, Limited

(Incorporated Under the Laws of the Province of Ontario.)

The same to carry with them a bonus of 25% of Common Stock

Dated August 1st, 1911. Due August 1st, 1941. Principal and semi-annual interest February 1st and August 1st, payable at any branch of the Union Bank of Canada or Metropolitan Bank.

DENOMINATIONS: $100, $500 and $1,000

Bonds issued in coupon form, with privilege of registration of Principal.

TRUSTEE—Guardian Trust Co., Limited, Toronto.

CAPITAL ISSUED AND FULLY PAID UP:

6% First Mortgage Thirty-year Sinking Fund Gold Bonds	$1,250,000
7% Non-cumulative Preferred Stock, issued and fully paid up	1,250,000
Common Stock, issued and fully paid up	2,500,000

PURPOSES OF COMPANY

Canada Bread Company, Limited, has acquired as going concerns the plants and the business of the Bredin Bread Company, Limited, of Toronto; Geo. Weston (The Model Bakery) of Toronto; H. C. Tomlin (Toronto Bakery) of Toronto; Stuarts, Limited, of Montreal, and W. J. Boyd of Winnipeg. In the case of Boyd the real property is excluded, but a parcel of land in the City of Winnipeg, about two acres in extent, is substituted. The first three companies have been in operation for almost thirty years and the last two for close to twenty years. They have all grown from small beginnings till they are now among the largest in their respective fields in Canada. The combined output of the companies at present is, approximately, 600,000 loaves of bread per week. It is intended, by extensions to the present plants and the erection or acquisition of new plants, to forthwith increase the output of the Company to one million loaves per week, with other extensions to follow in the other large cities at a later date.

POSITION OF BONDS

For full particulars reference may be made to our prospectus, which is accompanied by a letter from Mr. Mark Bredin, the Vice-President and General Manager of the Company. We draw attention to the following points:—

1. The present $1,250,000 of 6% First Mortgage Sinking Fund thirty-year gold bonds are secured by trust deeds to Guardian Trust Company, Limited, Toronto, constituting a first mortgage on all the Property, real, personal or mixed. now owned or hereafter acquired by the Company, as more fully described in said trust deeds. In the trust deeds it is specially stipulated that of the $1,000,000 cash being placed in the treasury, the sum of $500,000 shall be held by the Trustee, to be used only in the redemption of bonds or in investment in additional plants and real estate, thus increasing the fixed assets under the mortgage. A Sinking Fund of 1% is operative from August 1, 1911.

2. The assets of the companies already taken over stand in excess of all liabilities, and without any allowance for good will, trade-marks, etc., at $841,428.70. There has also been placed in the treasury $1,066,221.08 of cash which, besides furnishing funds for the purchasing or construction of additional plants, will provide ample working capital.

3. The earnings of the present plants, as per certificate of Messrs. Price, Waterhouse & Co., after allowing for depreciation, amounted from April 30th, 1910, to April 30th, 1911, to $107,016.14, to which may be added $35,000, being interest at the rate of 3½% on $1,000,000 cash in the treasury pending its employment on extensions. It is estimated that, with the economies to be effected, the earnings on these plants will shortly amount to $180,000 a year, or nearly two and one-half times the bond interest.

4. With the extension that it is proposed to effect forthwith, the company by the end of its first fiscal year should be in a position to show earnings of $260,000 a year, equal to three and one-half times the interest requirements on the bond issue, and with all the additional plants that will be provided with the cash now in the treasury the earnings should steadily gain to over $530,000 a year, or more than seven times the bond interest requirements.

5. The company, with its plants situated in the larger cities of the different Provinces of Canada, will be in an exceptionally favorable position to benefit by the marked economies that will be possible in manufacturing, and more especially in distribution, and all the time will be turning out a more uniform product under the most sanitary conditions.

6. The practical men who have made the different companies particularly successful will be identified with the management and direction of the new company. Mr. Mark Bredin, who is probably one of the most successful bread manufacturers in Canada, will occupy the position of Vice-President and General Manager, while the services of the heads of four of the different companies taken over and of an efficient representative of the fifth have been assured to the company.

Prospectus and application forms may be obtained from and subscriptions should be forwarded to Guardian Trust Co., Limited, Toronto, any branch of Union Bank of Canada and the Metropolitan Bank or to

12 KING STREET EAST - - - - TORONTO

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Delaware, Ont.—August 12th.—Cottage of Mrs. Dawson destroyed. Partly insured.

Trenton, Ont.—August 11th.—House and barn of Robert Bell, Marmora Township, destroyed.

Calgary, Alta.—August 8th.—$75 damage to central fire station. Cause, fusing of electric wires.

Fort William, Ont.—August 11th.—I. Bottam's grocery store, McLeod Street. Damage, $1,500.

Salmon River, N.S.—Church of St. Vincent de Paul and glebe house destroyed. Loss, $30,000; insurance, $6,000.

Fruitland, Ont.—August 14th.—Barns of Homer Carpenter. Loss, $5,000. Cause, spark from threshing machine.

Peterborough, Ont.—August 10th.—Barn of D. J. White destroyed, including 75 tons of hay and farm machinery. Insured for $800.

Montreal, Que.—August 14th.—Roof of varnish factory of Holland Varnish Company, Park and Atlantic Avenues. Cause, electric wires.

Belmont, Ont.—August 16th.—Barn and outbuildings of John Black, two miles west of town. Loss, $3,000, partially insured. Cause, lightning.

Prince Rupert, B.C.—August 3rd.—Clifton Rooms boarding house, owned by Mr. Anderson. Damage, $500; insured. Cause, spontaneous combustion.

Charlottetown, P.E.I. — August 12th.—Condensed milk factory and contents destroyed. Loss, $50,000; insured. Fire originated in engine room.

Hamilton, Ont.—August 9th.— Shed in rear of J. C. Cooper's residence, 124 Ferguson Avenue North, owned by Shedden Cartage Company. Damage, $50.

Rosemount, Montreal.—August 13th.—Small bush fire north of Angus shops. House of M. F. Moisan, 2,057 De Fleurimont Street, destroyed. Loss, $1,000.

St. John, N.B.—August 12th.—Shed owned by G. S. Crosman & Company, 238 Paradise Row. Loss, $400, covered by insurance. Cause, spark from engine.

Grimsby, Ont. — August 11th. — Robertson & Werner's planing mills. Slight damage. Dr. Williamson's frame cottage. Value of cottage and contents, $200. Cause, unknown.

Toronto.—August 12th.—Gem Moving Picture Theatre, Northcote Avenue and Queen Street. Damage, $1,000; covered by insurance. Cause, film coming into contact with electric wire.

Tupperville, Ont. — August 13th. — Redpath Hotel conducted by John Armstrong, and owned by Thomas Redpath of Los Angeles, completely destroyed. Loss, $30,000, with $1,500 insurance.

New Toronto.—August 11th.—Five wooden houses destroyed and one pressed brick residence on Fourth Avenue West, gutted. Total damage, $12,000; insurance, $5,000. Cause, oil stove upset.

Roseway, N.S.—August 14th.—Methodist Church, Schoolhouse, Oddfellows' Hall, residences of Mrs. J. MacKeeney, James Hamilton, Mrs. Lavers and Thomas MacKeeney, destroyed by forest fires.

Harriston, Ont.—August [illegible]th.—Barn owned by Mr. Aitchison, also two horses, colt, cows and pigs destroyed. Loss. $1,500 on building and $1,500 on contents. Building insured in London, Liverpool & Globe for $700; and contents in [illegible] for $800.

Halifax, N.S.—August 10th.—George Briter's motor boat burned. Loss, $700. August 14th.—Forest fires on southwestern shores of Nova Scotia, from Port Clyde, Shelburne, to within eight miles of Liverpool.

London, Ont.—August 12th.—Vacant house on Colborne Street. Damage, $100. August 15th.—Retail store on Dundas Street damaged. Cause, lightning. Barn and several hay stacks destroyed on outskirts of city. Cause, lightning.

Wallaceburg, Ont.—August 12th.—Frank Robert's meat shop destroyed, and upper portion of McNall & Harper's pool room, and Y. A. Z. Beck's fruit store, gutted. Owners of buildings, Harry Marlin and T. G. McGuire. Partially insured.

Stratford, Ont.—August 14th.—Barn owned by John C. Monteith, Erie Street, destroyed. Loss, $250; insured. August 15th.—Barn and house of A. B. Runciman, 332 Britannia Street, destroyed. Loss, heavy. Cause, children playing with matches.

CANADIAN PACIFIC RAILWAY'S EARNINGS

Have Given a Surplus Above All Charges of a Million Dollars a Month.

Monetary Times Office,
Montreal, August 16th.

While the meeting of the Directors of the Canadian Pacific Railway last Monday was not productive of news in the direction of increased dividends, new capital stock issues or action of a similar character which the market "bulls" have been predicting for a considerable time, a definite statement regarding the earnings was made after the meeting.

The most essential items concerning the earnings for the fiscal year ended June 30th are that after payment of all dividends, nearly $12,000,000 is carried forward as a surplus from railway and steamship earnings, besides which there is the sum of $6,500,000 special income from land sales and other assets, making a net surplus of $18,896,615 carried forward, or over $1,500,000 per month.

The net earnings for the first time exceeded $100,000,000.

In this year's report appeared an item "Special income from interest on land sales and from extraneous assets not included in the above, $6,602,205." No corresponding item appears in the report for the year ended June 30th, 1910, but a list given in the report which would seem to correspond thereto amounted to a total of $2,426,477. This item was accordingly used in the above table although the large increase in the corresponding figures for last year would require more explanation than appears on the surface The net result is the essential item after all. After paying all dividends and making allowance for depreciation and various special charges the surplus carried forward is $18,475,447, or $4,578,832 more than the previous year being an increase, as compared with the previous year of 33 per cent.

This is a splendid showing, more especially in view of the fact that last year's crop was considerably smaller than was at first hoped, and also in view of the fact that many of the American railroads showed a considerable shrinkage in earnings as compared with the previous year. After paying all charges and dividends and after making allowance for depreciation, etc., the company has been able to carry forward a surplus, over and above all charges, of one and a half million dollars per month. The fact that the Western crop this season is fully 75 per cent. greater than a year ago will exercise its influence on the earnings of the company for the current year and the company will be able to show still greater earnings than those mentioned above.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Didsbury, Alta.—Until September 1st for $20,000 debentures. J. M. Reed, town clerk.

Hull, Que.—Until September [illegible] and 5 per cent. debentures. J. F. Boult, city clerk.

Ottawa, Ont.—Until September 14th for $85,000 40-year, $343,500 30-year, and $160,500 20-year debentures. C. Hopewell, Mayor.

East Wawanosh Township.—$18,000 5 per cent. 20-year debentures until August 19th. F. Anderson, treasurer, Belgrave P.O., Ont.

Tavistock, Ont.—Until September 1st for $20,000 30-year 4 per cent. debentures. J. G. Field, village clerk. (Official advertisement appears on another page.)

Wetaskiwin, Alta.—Until September 4th for $6,000 electric light and $6,500 fire hall debentures, with 5 per cent interest and maturing in 20 years. E. Roberts, secretary-treasurer. (Official advertisement appears on another page.)

Castor, Alta.—Until August 21st for $5,000 5-year 5½ per cent. sidewalk and $3,000 20-year 5½ per cent. hospital debentures. L. B. Browne, town commissioner.

Springfield S.D., No. 1569, Man.—Until August 22nd for $10,000 6 per cent. 20-year debentures. H. Fuller, secretary-treasurer, Transcona P.O., East Winnipeg, Man.

Trail, B.C.—The $25,000 6 per cent. 20-year school debentures, for which tenders were called until July 17th, have not yet been sold. W. E. B. Monypenny is city clerk.

Dresden, Ont.—Until August 25th for $16,000 4½ per cent. 30-year waterworks debentures. J. T. Bridgewater, town clerk.

Copperfield S.D., No. 480, Man.—On September 2nd the ratepayers will vote on a by-law to raise $2,500. W. Cranston, clerk, Crystal City.

Fernie, B.C.—A by-law will be submitted to raise $5,000 for fire hall addition. S. F. Wallace, Chairman, Finance Committee.

York Township, Ont.—On September 9th the electors will vote on a by-law to issue $25,000 debentures for the purpose of opening a road through Mount Pleasant Cemetery.

Report of the Annual Meeting of the

WESTERN TRUST COMPANY

The fifth annual meeting of the Western Trust Company was held at the Company's Offices on Wednesday, the ninth of August, 1911.

The president, Mr. A. J. Adamson, in the chair.

The financial statement and the report of the directors were read as follows:—

Financial Statement as on the 30th of June, 1911

LIABILITIES.

Capital Account.			
Subscribed $1,005,000			
Paid thereon	$ 580,600.00		
Reserve Account	58,060.00		
Profit and Loss, balance at Credit	5,586.94		
	$ 644,246.94

Directors' Report

August 9, 1911.

TO THE SHAREHOLDERS OF THE WESTERN TRUST COMPANY.

The Directors of the Western Trust Company have pleasure in submitting their Fifth Annual Report, showing the results of the Company's operations for the year ending June 30th, 1911, accompanied by the Balance Sheet, duly audited.

The net profits for the year show a substantial increase, amounting, after providing for all costs of management, salaries, advertising, etc., to $54,026.76, the comparative figures for previous years being as follows:—

Year ending June 30, 1907...............	$ 4,076.20
Year ending June 30, 1908..............	17,851.62
Year ending June 30, 1909..............	25,340.71
Year ending June 30, 1910	33,496.48
Year ending June 30, 1911..............	54,026.76

From the current year's earnings, the Directors have provided two half yearly dividends of three per cent. (being at the rate of six per cent. per annum), have placed the sum of $19,555 in reserve, carrying forward a balance of $5,586.94 to next account.

The Paid-Up Capital of the Company has been increased during the year by $195,550, making in all $580,600 of Paid-Up Capital, as on this date, and the Reserve fund now stands at $58,060.

The Trust Guaranteed and Agency Funds and the total assets of the Company have increased proportionately during the past year, the total assets now standing at $3,479,558.35.

During the past year, your Directors decided to open a branch office of the Company in Regina, and it is gratifying to be able to report that the Company's operations there are meeting with success, and that the prospects for business at this branch could not be better.

The Directors also decided that it would be in the interest of the Company to have an office building in Regina and consequently they purchased a site for the same, last year, and there is now in course of erection, a five-storey building, which will be an ornament to the city and a credit to the Company.

The securities held by the Company have all been carefully examined by the Auditors, who have kept up a continuous audit of the Company's books throughout the year, and have also examined and certified to the accounts that appear in their report, which is annexed to the statement.

Auditors' Report

Winnipeg, Man., July 29, 1911.

To the President and Directors of the Western Trust Company.

Gentlemen:—

We beg to report to the shareholders of the Western Trust Company, Ltd., that we have audited the books and accounts of the Company for the year ended 30th June, 1911, verifying the cash receipts and payments during the year with the several bank accounts, the amounts due at 30th June from borrowers, and the bank balances at that date. We have examined the mortgage securities taken during the year and have found them in order and duly certified as valid by the Company's solicitors; and have inspected all those held by the Company at the end of the year, finding them likewise in good order and according to the mortgage ledger accounts. We have found the books and accounts, including those at Regina, to be correct and sufficiently vouched and we certify that the accompanying Profit and Loss account and Balance Sheet exhibit a true and correct view of the state of the Company's affairs for the year and as at 30th June, 1911. (Signed) CLARKSON, CROSS & MENZIES, Auditors.

President's Remarks

The adoption of the report was moved by Mr. Hay, and the President in his address pointed out that the Company continued to make satisfactory progress, the past year being the best on record. It was gratifying to note the continued expansion of the Company's business, the Loans on Mortgages showing an increase of 36 per cent. over the previous year, and the collections of Interest have been exceedingly good.

During the past year the Company established its Head Office for Saskatchewan, at Regina, and so far the results have amply proved the wisdom of this step, the business acquired being of a very satisfactory character, and has justified the erection of substantial premises, centrally located to meet the requirements of the Company's business.

Mr. D. H. McDonald seconded the motion for the adoption of the report, which was carried unanimously.

The election of Directors for the ensuing year was then proceeded with and the following gentlemen were returned duly elected:—

BOARD OF DIRECTORS.

ALAN J. ADAMSON, ESQ.
President The Western Trust Company.
HON. R. P. ROBLIN,
Premier of Manitoba and Minister of Agriculture; Director of Northern Crown Bank, Winnipeg, Man.
JAMES JOHNSTON, ESQ.
Broker, Winnipeg, Man.
F. E. KENASTON, ESQ.
President The Minneapolis Threshing Machine Co.; Director The Union Bank of Canada, Hopkins, Minn.
MICHAEL LONG, ESQ.
Banker, Gretna, Man.
K. MACKENZIE, ESQ.
Wholesale Merchant, Winnipeg, Man.

J. D. McARTHUR, ESQ.
Railway Contractor, Winnipeg, Man.
G. E. McCRANEY, ESQ., M.P.
Barrister, Rosthern, Sask.
D. H. McDONALD, ESQ.
Banker, Ft. Qu'Appelle, Sask.
J. W. de C. O'GRADY, ESQ.
Broker, Winnipeg, Man.
HON. J. H. ROSS, ESQ.
Senator, Moose Jaw, Sask.
JOHN A. THOMPSON, ESQ.
Manager The Moose Mountain Lumber and Hardware Co., Winnipeg, Man.
J. G. TURIFF, ESQ., M.P.
Late Commissioner Dominion Lands, Ottawa, Ont.
G. R. WHITMORE,
Merchant, Regina.
A. B. COOK,
Sheriff, Regina.

At a later meeting of the Directors Mr. Alan J. Adamson was elected president and the Hon. R. P. Roblin, vice-president of the Company for the ensuing year.

SIR WILFRID DEFENDS RECIPROCITY

As to British Preference—He Fears Nothing from the Twelve Favored Nations.

Sir Wilfrid Laurier's opening address in the election campaign was given this week at Simcoe. "The apostles of the policy of restriction to-day tell us that we cannot go into this agreement," said Sir Wilfrid, "because they say if we do we make it impossible to have a mutual preferential treaty with Great Britain. It seems to me that there should not be so much concern exhibited by the Conservative party for preferential trade with Great Britain, when at every step we took in that direction they opposed it. In 1897, in the first tariff which was introduced by my friend, Mr. Fielding, he made a cardinal feature of a preference to Great Britain. He stated, and it was enacted, that upon all goods which came from Great Britain there should be an abatement of 12½ per cent. This was seriously opposed by the Conservative party. They said it would ruin our Canadian industries. We went on, all the same, and two years afterwards we increased it to 25 per cent., and later to 33⅓ per cent., and it has remained there ever since.

Ready to Deal With Britain.

"The Conservative party took the ground that we should not give a preference to the motherland unless the motherland were prepared to give us a preference in their own markets. We stated that we would not bargain with the motherland. If the people of the United Kingdom said they would give us a preference we would accept it and do more than we have been doing, but we have refused steadily to bargain with them. But there are people who imagine that Great Britain would be ready to give us a preference. The question has been submitted three times in elections, and they have refused it. We go on with our policy, and we say, if at any time it suits the British people to change their fiscal policy and they decide to give us a preference we are ready to give them one, and I say more, that the present arrangement is no interference with it, is not fatal against it.

As to British Exports.

"We have made an agreement with the United States that we shall give them an abatement of our tariff upon natural products, and they do the same to us. Is there anything in this agreement which would prevent the British people from giving us a preference if they wished to do so? Nothing of the kind, I say. But, then, if the British people were to give us a preference which we are to accept, upon what goods would they expect a preference? Would they expect it upon natural products, upon wheat, upon cattle, upon peaches or apples—all these articles which I have mentioned? Nothing of the kind. They do not export natural articles, they buy them, and we can give them a preference upon things not mentioned in this agreement, manufactured products. We could give them a preference on manufactured products, and there is nothing in this agreement which is hostile to it."

Twelve Favored Nations.

Sir Wilfrid made light of possible competition from the twelve most favored nations. "It is not apprehended," he continued, "that there is any competition now from these countries, but it is possible that in the course of time we may come into competition with them. This question came before the Imperial Conference in May and June last. I drew attention to those old treaties, and showed that they might be an obstacle some day to us, and then expressed the hope that the Imperial Government would exempt us from the operation of these treaties. I moved this resolution:—'That his Majesty's Government be requested to open negotiations with the several foreign governments having treaties which apply to the self-governing dominions, with a view to securing liberty for those dominions which desire to withdraw from the operation of those treaties without interfering with the rest of the governments.'

"This was approved by all the members of the Conference, and passed unanimously. If we have to complain at any time of undue competition, the British Government, upon our complaint, is ready to enter into negotiations in order to remove us from the operations of these treaties.

Mr. W. Bloomfield, a London financier, has completed a [illegible] throughout the Dominion. He has praise for every part of the country but has been especially impressed with Northern Ontario, which he considers the finest farming region in the world.

FEWER NEW INCORPORATIONS

Incorporated This Week—Montreal Cotton and Molsons Brewery Companies Reorganized.

The midsummer weather is having its effect on company promoting. This week only twenty-five new companies have been formed in Canada with an aggregate capital of $18,347,000, whereas last week there were 53 corporations with a total capital of $14,541,000. The larger capital figures this week are chiefly accounted for by two companies the aggregate capital of which amounts to $14,000,000.

The Montreal Cottons, Limited, with capital of $10,000,000, divided into 100,000 shares of $100 each is the reorganized Montreal Cotton Company. The former capital was $3,000,000, but only a portion of the authorized $10,000,000 will be issued in the early future. The present shareholders will, it is understood, be given one share of 6 per cent. preferred stock and one share of common stock for every share now held. The present dividend is eight per cent. The company could pay 4 or 5 per cent. on the new common stock. The charter now obtained by the company is a Federal one, the previous one being a Provincial charter.

The Jno. H. R. Molson and Bros., have reorganized under provincial charter under the name of Molson's Brewery, Limited, with a total capital stock of $600,000, divided into 6,000 shares of $100 each. During the company's first fiscal year the price of the company's capital stock for the purposes of clause D shall be par and during the second, third, fourth and fifth years, the directors shall, at the end of each financial year, fix the price for the company's stock for the ensuing year by capitalizing at the rate of ten per centum (10 p.c.) per annum, the average annual dividend for the preceding years, and thereafter by capitalizing in like manner the average annual dividend for the preceding five years.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Prince Rupert, B.C.—Beaver Wholesale Liquor Co., of Prince Rupert, $50,000.

Innerkip, Ont.—Innerkip Rural Telephone Co., $25,000; J. G. Hossack, A. N. Hotson, E. M. Johnston.

Bracebridge, Ont.—Marshall Ecclestone, $40,000; G. W. Ecclestone, J. W. Ecclestone, W. W. Kinsey.

Sherbrooke, Que.—Dominion Adjustment Co., $50,000; W. P. Smith, W. P. Sawyer, Miss M. S. Smith.

Guelph, Ont.—Flexible Conduit Co., $50,000; J. S. Wheeler, Penn Yan, N.Y.; J. E. Carter, J. M. Taylor, Guelph.

Victoria, B.C.—Ladysmith Press-Brick Co., $150,000. Standard Builders & Supply Co., $250,000. British-Canadian Home Builders, $500,000.

Vancouver, B.C.—Vancouver Lumber Co., $4,000,000. Vancouver Island Clay Products, $500,000. Burrard Publishing Co., $350,000. Basque Fruit Land & Development Co., $250,000. Danish Society of British Columbia, $2,000. De Northall Engineering & Construction Co., $100,000. United Securities, $200,000.

Montreal, Que.—Mount Royal Land Co., $500,000; C. A. Pope, G. Barclay, J. G. Cartwright. Montreal Cottons, $10,000,000; R. C. Smith, S. A. Lebourveau, R. C. Grant. Canadian Patent Co., $50,000; H. N. Chauvin, G. H. Baker, W. B. Converse. Molson's Brewery, $600,000; H. Molson, F. W. Molson, A. Skaife.

Toronto, Ont.—Elliott Sherring & Co., $40,000; C. W. Thompson, I. S. Fairty, G. Cooper. Pemco, $100,000; R. McKay, A. Dods, M. MacDonald. Manvers Shooting & Finish Club, $40,000; J. A. Gormally, J. A. Cummings, W. F. Musgrave. Schact Motor Car Co., of Canada, $350,000; G. Tyrell, J. S. Innes, A. H. Patterson. British and Colonial Press, $50,000; A. C. Batten, H. R. Moses, W. C. McKay. Becker & Co., of America, $100,000; W. P. Ryrie, F. C. Lalonde, A. J. Thomson.

SCOTCH COMPANY STILL HAS CANADIAN LIFE POLICIES.

It is many years since the Edinburgh Life Assurance Company transacted any life assurance business in Canada, the Canadian branch being closed in 1873. In March this year, there were 39 policies on their books remaining out of their Canadian business.

Mr. R. S. Morris has been elected a member of the Toronto Stock Exchange.

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 1st day of August, 1911, incorporating Gerard Brakenridge Strathy and Molyneux Lockhart Gordon, solicitors; John Fraser MacGregor, accountant; Joseph Edward Riley, law clerk; James Boyd Moon and John Richard Corkery, students-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To buy, sell and deal in iron, steel, bronze, brass and other metals, the ores thereof, and wood and other materials; to carry on, operate and run foundries and works for the manufacture of iron, steel, bronze, brass and other metals; to manufacture, erect, buy and sell iron, steel, bronze, brass and other metal work and materials for buildings, bridges and structures of all kinds; to manufacture, erect, buy and sell machines, implements, tools, safes, vaults, vault fittings, shelving, locks, and articles or products made wholly or partly of said metals; to manufacture and erect, build, construct, and repair, under contract or otherwise, buildings, bridges and structures of all kinds, and for such purposes to carry on a general engineering and contracting business; (b) To purchase, lease, or otherwise acquire, hold, own, sell or otherwise dispose of any and all real estate and personal property; (c) To apply for and maintain, register, lease, acquire, and hold or to sell, lease or otherwise dispose of, and grant licenses in respect of or otherwise turn to account any patents, brevets d'invention, improvements or processes, trade marks, trade names, and the like, grants, licenses, leases, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to inventions and any formulæ and secret processes which may seem calculated to benefit the company; (d) To acquire by purchase, lease, hire, exchange or otherwise any rights or privileges which may be necessary or useful for the carrying on of the business of the company; (e) To lease, sell, improve, manufacture, develop, exchange, turn to account or otherwise dispose of any or all of the property and assets of the company for such consideration as the company deems fit, including shares, debentures or securities of any other company; (f) To acquire, purchase or assume all or any part, including the good-will of the business or undertaking, or the property or assets, privileges, contracts, rights, obligations, and liabilities of any company, person or persons carrying on any business which this company is authorized to carry on, or any business similar thereto or possessing any property suitable for the purposes thereof and to pay for the same, wholly or in part in bonds, debentures or fully paid and non-assessable stock of the company, and to sell, lease or otherwise dispose of the same or any part thereof; (g) To enter into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on any business or transaction which this company is authorized to engage in or carry on, or to amalgamate with any such company; (h) To acquire, purchase and hold the stock or shares of stock in, or debentures or other securities of, and any other corporation carrying on business similar to that which this company is authorized to carry on; (i) To issue paid-up shares, debentures stock, debentures, bonds or other securities of the company in payment or part payment for any property, rights, or easements which may be acquired by, or for any services rendered or agreed to be rendered, or work done or agreed to be done for the company, or in or towards the payment and satisfaction of debts or liabilities owing by the company, or for raising money for any other purpose of the company; (j) To invest the moneys of the company not immediately required in such manner as may from time to time be determined; (k) To distribute among the shareholders of the company in kind any property of the company, and in particular any shares, debentures, or securities in any other companies belonging to the company or which the company may have power to dispose of; (l) To carry on any other business, whether manufacturing or otherwise which may seem to the company capable of being conveniently carried on in connection with its business, or calculated, directly or indirectly, to enhance the value of or render profitable any of the company's property or rights; (m) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (n) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, warehouse receipts, bills of lading, warrants and other negotiable or transferable instruments; (o) To adopt such means of making known the products of the company as may be expedient; (p) To do all or any of the above things as principals, agents, bailees, contractors, trustees, or otherwise, and either alone or in conjunction with others; (q) To do all such other things as are incidental or conducive to the attainment of the above objects; (r) The powers in each paragraph are to be in nowise limited or restricted by reference to or inference from the terms of any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Snead and Company Iron Works, Limited," with a capital stock of forty thousand dollars divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 3rd day of August, 1911.

THOMAS MULVAY,
Under Secretary of State.

3-2

BOND NOTES.

Commenting upon the "Investment Market," the Continental and Commercial National Bank says, in its booklet, just issued: "A feature of the situation is a continued steady absorption of high grade bonds by investors. While this movement is not as active as it was a year ago, possibly because of the heavy offerings during the first part of last year yet there is a steady demand for good bonds showing an attractive yield. According to the best compilation available there have been sales of new municipal bonds during the first six months of 1911 aggregating $220,886,636, or more than $13,500,000 greater than for the first half of any other year, the highest previous total sales for that period being in 1909. These figures represent only permanent bond issues.

To Warehousemen, Wholesalers and Investors.

A Rare Chance in Winnipeg Realty.

The undersigned, as Trustees, offer for sale for two weeks only, a valuable and substantially-built stone and brick five-storey warehouse, together with large frame warehouses adjoining, and situated on a most eligibly-situated lot, 132 x 264, fronting east and west on two streets with a lane on the south and the tracks of the C.P.R. on the north, from which all shipping is done.

Price, including land, only $125,000, payable on easy terms.

If Investor does not desire possession for his individual requirements, so satisfied are we of the possibilities of the property, that arrangements could be made to contine in occupation as at present, and net Investor on said purchase price six per cent. on the investment for a term of five years.

For further particulars apply to

The Standard Trusts Company
WINNIPEG.

NELSON REDEEMS ITS BONDS.

The City of Nelson, B.C., has purchased an additional $40,000 worth of its own debentures, making the total redeemed for the present year $70,000. This block was offered at a premium of one-half of 1 per cent. and an offer made in a telegram sent by the mayor and the chairman of the finance committee. These debentures were part of an issue of $60,000 for sewers, electric light and waterworks, and were, under ordinary circumstances, not redeemable until 1918.

By the transaction the city effected a saving by buying back these bonds of approximately $20,000. The block purchased a few months ago were obtained for 2½ per cent. premium, saving the city about $16,000. The money for the redemption of debentures is obtained from the sinking fund provided for that purpose.

◆

DEBENTURES AWARDED.

Guelph, Ont.—$22,000 4½ per cent. 10-year bonds to Wood, Gundy & Company, Toronto.

McLeod, Alta.—$104,000 5 per cent. 20 and 40-year bonds to Dominion Securities Corporation, Toronto.

Dereham Township, Ont.—$18,600 5 per cent. 5 and 10-year debentures to Dominion Securities, Toronto.

Chinguacousy Township, Ont.—$30,000 5 per cent. 10-year telephone bonds, to Dominion Securities, Toronto.

North Battleford, Sask.—$25,000 5 per cent. 20 and 25-year sinking fund bonds to Dominion Securities, Toronto.

Hillcrest Mines S.D., Alta.—$3,500 5½ per cent. 10-year debentures to the Ontario Securities Company, Toronto.

Whitewood, Sask.—$6,000 6 per cent. 30-year debentures to Nay & James, Regina.

Colgate, Sask.—$2,500 10-year 5½ per cent. debentures to Nay & James, Regina.

Mortlach S.D. No. 13,681, Sask.—$8,000 20-year 5¾ per cent. debentures to Nay & James, Regina.

◆

Mr. L. Brutinel, of Paris, who is interested in coast enterprises, states that millions of French capital have been invested in British Columbia during the past few years. These investments have been profitable, and a good impression has been created in Paris which will have the effect of bringing more money out this way

FORT WILLIAM'S DEBENTURE SITUATION.

City Has Large Amount of Sinking Fund Balance in Savings Account—Report of City Auditor.

A report has been made by City Auditor Dawson of Fort William, Ont., in which he makes recommendations as to the best method of handling city debentures.

"After having purchased the city's debentures during the present year," he says, "to the extent of $141,666.49, and paying out of this fund the sum of $33,000 to retire matured debentures, there still remains a cash balance uninvested amounting to $133,685.87, bearing 3 per cent. interest. At the close of the present year the instalment for 1911 of over $150,000 will be deposited.

Invest the Balance.

"Under the statutes we have authority to invest all this balance in certain designed securities, particularly the city's own local improvement issues, thereby saving to the city the sum of one and one half per cent. annually in addition to the discount on the original sale of such debentures.

"This statutory provision is taken advantage of by municipal corporations throughout the province. I would recommend that your committee consider the immediate purchase of further local improvement debentures of the city out of those now being prepared for sale to the extent of say $100,000, leaving a cash balance of over $33,000, which considering the large instalment for this year, which will be deposited at the close of the year will be ample for safeguarding requirements in meeting maturing debentures.

No Debentures Have Been Issued.

"I desire to again remind your committee that no actual debentures have been issued and executed for the debentures already purchased out of sinking fund, and that the statute requires this to be done. The only evidence of the large amount invested is the entries in the treasurer's books. The debentures should be properly executed and deposited in the custody of the Bank of Montreal and the coupons detached and paid in regular manner the same as though held by outside parties.

"In this connection I beg to suggest that your committee consider the advisability of the formation of a trust board for the handling of sinking funds—the investment of same and retirement of maturing debentures, this committee being independent of the council and empowered to receive from the city treasurer, sinking fund instalments from time to time, and make such investments, within limits of the statute, as they may consider most profitable.

Handling of Sinking Funds.

This method of handling sinking funds through a trust board has been followed by the City of Winnipeg for several years past and has been found highly advantageous, the three objects sought after and obtained in their case being:—

1st. Maximum security of invesment.

2nd. Maintaining the credit of the city during times of depression and low markets, by supporting the market by the purchase of their own debentures, as offered.

3rd. Maximum earning power on funds in their care, resulting in a large surplus at the close of their last financial year.

"I believe the amount of the city's invested funds," concludes Mr. Dawson, "warrants more attention than the subject has been given in the past and respectfully request that consideration be accorded to the above recommendations."

◆

ADDITIONAL RECENT FIRES.

Port Clyde, N.S.—August 14th.—The following buildings have been destroyed by forest fires:—William Crowell's house and barn; Mrs. H. MacDonald's house and barn; Mrs. Tooke's house and barn; Fletcher Nichol's house and barn; Wetwood McKay's house and barn; Hugh Sutherland's sawmill, barn and house; Albert McKay's house and barn · Nathaniel Sears' house and barn; Mr. Watkins' house and barn.

Ottawa, Ont.—August 11th.—Building at 223-235 Queen Street, occupied by Sparks Brothers, Limited, clothing manufacturers, and Edmund H. Code, wholesale smallwares and fancy goods, and owned by Alex. Robertson, 222 Sparks Street. Damage to building, $2,000; Mr. Code's goods, $9,000; Sparks Brothers, $4,000. Well insured. Supposed cause, defective electric wiring. August 15th.—Warehouse of Provost and Alard, wholesale grocers, and Chevrier's Hotel, Murray Street. Loss, $100,000. Cause, boys smoking cigarettes in Provost and Alard's warehouse.

STRAIGHT CITY DEBENTURES

To be Issued by Regina for Street Railway Construction—Previous Bond Award Hung Fire—Report of City Commissioners.

On May 23rd a recommendation was adopted by the Regina City Council accepting the tender of the Royal Securities Corporation of Toronto of $400,000 for 5 per cent. bonds at 104.57. This offer was made subject to their solicitor's favorable opinion. The tender was in response to an advertisement inviting propositions that would result in furnishing the necessary funds for the street railway up to $400,000 under the provisions of the Special Act obtained from the last Legislature. Their solicitor, Mr. J. B. Clarke, held that "the Special Act gives power to borrow upon securities of mortgages of property and revenue, but does not confer power to issue bonds." He, in a letter dated June 8th, 1911, states that he cannot advise his clients to purchase the debentures or bonds proposed to be issued under a by-law passed without the assent of the burgesses.

Regina Negotiable Paper.

The city solicitor took the matter up with Mr. Clarke personally when in the east recently, and found that the company wants some form of Regina negotiable paper for sale in small amounts to their customers, but cannot loan money on securities of mortgages and revenues at the above rate. The company up to the present has not stated that it would or would not complete the purchase.

The city commissioners report that a "telegram was received July 19th, from which we must infer that they consider their offer withdrawn.

What the Commissioners Think.

"The commissioners have reviewed various suggestions made by bond buyers who are negotiating for the purchase of street railway securities when the tender of the Royal Securities Corporation was received, some of which in general terms are as follows:

"First: Mr. J. B. Clarke suggests 'that the city authorities confer with the government and, if possible, arrange for the passing of an amending act giving power to secure the bonds by mortgages under the special act. Provision might also be made for setting aside the mortgaged property to buy these debentures, and therefore provide that the debentures so secured should not be taken into account in computing the amount of the city's debt for borrowing purposes, in short follow in the lines of the Municipal Public Works Act, and of the proviso to Section 184 of the Town Act, Chapter 22, Section 10'

Formation of Street Railway Company.

"Second: The formation of an independent street railway company was suggested, which could issue street railway bonds guaranteed by the city.

"Third: Straight city debentures under the provisions of the City Act could be issued.

"Fourth: Straight city debentures could be issued and the interest and sinking fund for which would be met by the revenue of the street railway and proceeds of city property.

"After careful consideration the commissioners are of the opinion that the best interests of the city would be met if straight city debentures were issued for the construction of the street railway, a by-law to be submitted to the people as soon as possible covering the amount of funds necessary for street railway construction, and to include a provision whereby the interest and sinking fund for the debentures would be met primarily by the revenues from the street railway and the proceeds of the property sales, and thereafter by taxation.

City's Borrowing Powers.

"The commissioners had an interview with the members of the Government last winter regarding these matters and are of the opinion that the special bill could be amended on application to the legislature, to include the provision to add to the city's borrowing powers the amount of any such debentures that would be covered by the revenues of the street railway and the proceeds of city property, and would advise that an application be made to the legislature regarding revenue bearing public utilities along these lines.

◆

Sir Arthur Doughty, M.P., for Grimsby, England, who was on the coast some months ago is interested in the purchase of the interests of a Victoria company which has an oilery on Skidegate Inlet as well as valuable fishing privileges in Queen Charlotte Island waters. It is proposed to float a company in London, and extend the operations of the company.

NATIONAL TRANSCONTINENTAL RAILWAY.

The total expenditure on the National Transcontinental Railway during the fiscal year ended March 31st, 1911, was $23,487,853, making the total expenditure since the organization of the commission in September, 1904, to March 31, 1911, $95,406,697. The total grading done to March 31st, 1911, was 1,388 miles. Total miles of track-laying was 1,064 miles of main line, and 199 miles of sidings, making a total of 1,264 miles of track laid. Total contracts for steel superstructures, bridges and viaducts awarded to March 31, 1911, amount to 49,084 tons, of which completed bridges—16,598 tons, and to be completed 32,486 tons. That portion of the line between Winnipeg and Lake Superior Junction—the junction point of the G.T.P. Railway Company's branch line to Fort William and the main line of the National Transcontinental Railway—was, commencing October 1, 1910, operated by the Grand Trunk Pacific Railway Company for the transportation of freight, and the season's wheat crops of the west tributary to the Western division were transported over this section of the Eastern division and the Grand Trunk Pacific branch line to Fort William, Ont.

Mr. J. Stephen, of Hamilton, will succeed Mr. F. T. Salisbury as manager of the North Vancouver branch of the Bank of British North America. Mr. Salsbury has gone into the hardware business.

Official announcement is made of the discovery of platinum in the ores of the Granite-Poorman property in the Kootenay district, near Nelson. This has been followed by a rush of prospectors to stake claims, for platinum is double the value of gold. The Kootenay minerals themselves are of average value, but with the addition of platinum there will be a much greater incentive to mining. The announcement comes at a time when more attention is being given the mining industry, and every find of this kind will tend to increase the activity. In the same district, strikes have been made on some of the properties in the Sheep Creek camp. The usual warning is issued in regard to the platinum find, that intending buyers of properties should investigate before purchasing. Not every piece of ground staked will give values, and because it is in the district does not indicate that the ore values will be high, although of a grade sufficient to guarantee profitable working.

According to the New York Sun, representatives of Canadian bond houses have descended upon New York and Chicago with some attractive lists of securities. This is stated to be a preparation for the harvest expected to follow the consummation of the proposed reciprocity agreement. "For the most part," says the Sun, "the securities in which they are trying to interest the American capitalists are bonds and stocks of companies developing the Western part of Canada, particularly of companies interested in public utilities, such as light and power for the rapidly growing towns and cities. So far the Canadians have been met by local bankers with a statement that they are too early in the field, though, in some cases, plans have been made for a publicity campaign to begin when the results of reciprocity begin to be plain. It is expected that Canadian securities will have a good market in New York when the public interest comes back to the stock market, if for no other reason than that in Canada the government is not engaged in making political capital out of attacks on corporations—mainly because there is no necessity in the corporations themselves for such action."

Canadian bond houses do not know of any such invasion as chronicled by our American contemporary.

CANADIAN PACIFIC STOCK.

In New York reasons have been advanced in favor of the decline in Canadian Pacific. These are not shared in Canada. It has been said that some holdings of the stock are in a precarious position and will be dropped. The Toronto representative of a European syndicate cabled advices to buy Canadian Pacific last week. As a result Berlin was a heavy purchaser, and saw the stock rise two days after. A Wall Street contemporary states there has been no heavy speculation in Wall Street on the bull side of that stock; and if Canadian Pacific has gone up more than any other stock in the past year it is largely because there has been a good deal of buying by speculative investors far away from New York. Canada itself has been very bullish on stock, and has bought a good deal of it. But it is the absorption by out-of-the-way places that furnished the most interesting feature, and the importance of which Wall Street traders probably overlook. Dublin, for instance, is growing rich on its venture into the stock. Belfast has bought some, but not as much as Dublin. In Belfast, it may be generally said, they have been working and not speculating; while in Dublin they have been speculating and not working. The Irish holdings could hardly be shaken out. Political complications here do not affect them at all; and they are but little affected by international politics. Great Britain might go to war with all the world, and Dublin's holdings of Canadian Pacific would not be disturbed. Next to Canadian Pacific, Erie is the favorite speculation there; and both these stocks have, on the whole, given a good account of themselves recently.

INVESTMENT BONDS
To yield from 5 to 6 per cent.

To investors seeking a larger return on their savings, we recommend a few standard Canadian Industrial Bonds that can be purchased to yield from 5 to 6 per cent. They are well secured both as to assets and earning power.

We would be pleased to mail special circular giving particulars of the different issues on application.

NEW BANK MAY START BUSINESS.

Next Month—Mr. Godfrey Bird is the General Manager and Mr. F. G. Ramsden, the Inspector.

Monetary Times Office,
Montreal, August 16th.

Mr. Godfrey Bird, manager of the Montreal Board of Trade branch of the Bank of Toronto, will be the general manager of the new Banque Internationale du Canada, while Mr. F. G. Ramsden, travelling inspector of the Bank of Toronto, is to be the inspector of the new institution. This, The Monetary Times is informed by a director of the new bank, was decided at an informal gathering of the interested parties last night. The matter is definitely settled, and it is expected that Mr. Bird will take charge as quickly as he can be relieved from his present duties in the Bank of Toronto.

As to when the Banque Internationale du Canada will begin business, several weeks must yet elapse, the license not yet having been granted. This may be granted on Sept. 1st and the bank will then open its doors for business.

The completion of the arrangements by which Mr. Bird will become general manager of the new bank will be welcomed by the bankers of Montreal. For some reason, there was apprehension as to the character of the business to which the new bank would cater, it being the general opinion that much of it would be of a speculative character—or rather that it would cater largely to the stock market end of business and that call loans would be a prominent feature in its activities. This view the directors are particularly anxious to remove, it being their intention to carry on a safe, conservative banking business, and as a first step thereto they considered the appointment of a safe, conservative banking man an essential. Hence the appointment of Mr. Bird.

Mr. Godfrey Bird has been in the service of the Bank of Toronto for thirty years and at one time was able to say that he had been employed in all its branches. The greater portion of his time of service has been spent in Montreal where he was manager of the Point St. Charles Branch for many years and afterwards became manager of the Board of Trade branch. The latter branch has under its charge the Point St. Charles branch and the branch at St. Lambert, which is on the other side of the Victoria Bridge from Point St. Charles. In addition, is the branch which was first opened in the G.T.R. building but was afterwards transferred across the street to the Canadian Express Building. Mr. Bird was the first manager of the Board of Trade branch.

Mr. Bird has made a wide circle of acquaintances in commercial and financial circles and it was no doubt largely this which led the directors of the new bank to make him their executive head. He is about fifty years of age.

In the appointment of Mr. F. G. Ramsden to the position of Inspector, the management of the new bank has, it is considered, taken effective steps to ensure the conduct of the bank along the safest lines. Mr. Ramsden received his training in Scotch banks, where it is generally considered the procedure is of the most approved character. He has worked in the Imperial Bank. in Toronto, and was formerly on Mr. Bird's staff in the Point St. Charles branch. He has been with the Bank of Toronto for about twenty years and for a long time has been the travelling inspector of that institution.

CANADA BREAD COMPANY.

Only another day for subscription to the bond issue of the Canada Bread Company remains after to-day, as the list will close on Monday. The corporation which is a merger of several bakeries in Toronto, Montreal and Winnipeg are issuing $1,250,000 6 per cent. first mortgage sinking fund 30-year gold bonds, with a bonus of 25 per cent. of common stock.

The assets of the company already taken over stand in excess of all liabilities and without any allowance for goodwill, trade marks, etc., at $841,428.70. There has also been placed in the treasury $1,006,221.08 of cash, which, besides furnishing funds for the purchasing or construction of additional plants, will provide ample working capital.

The earnings of the present plants, as per certificate of Messrs. Price, Waterhouse & Company, after allowing for depreciation, amounted from April 30th, 1910, to April 30th, 1911, to $107,016.14, to which may be added $35,000, being interest at the rate of 3½ per cent. on $1,000,000 cash in the treasury pending its employment on extensions. It is estimated that, with the economies to be effected, the earnings on these plants will shortly amount to $180,000 a year, or nearly two and one half times the bond interest.

With the extensions that it is proposed to effect forthwith, the company, by the end of its first fiscal year, should be in a position to show earnings of $260,000 a year, equal to three and one-half times the interest requirements on the bond issue, and with all the additional plants that will be provided with the cash now in the treasury, the earnings should steadily gain to over $530,000 a year, or more than seven times the bond interest requirements.

"Capital Investments in Canada."

By FRED. W. FIELD.

(A new volume to be published next month.)

$2.50 PER COPY.

Three hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion.

A series of articles respecting the investment of British, American and foreign capital in Canada is appearing weekly in The Monetary Times of Canada. In response to many requests, the articles, which are from the pen of Mr. Fred. W. Field, Managing Editor of The Monetary Times, and Imperial Trade Correspondent at Toronto, will be reprinted in book form, at a popular price, together with other articles, early in the autumn.

In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new volume, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

Orders for the publication are now being received at the arious offices of The Monetary Times as follows :—

TORONTO, ONT. : 62 Church Street.
MONTREAL, QUE. : B. 33 Board of Trade Building.
WINNIPEG, MAN. : Room 404 Builders Exchange Building.
LONDON, ENG. : Grand Trunk Building, Cockspur Street.

When in London call on The Monetary Times, Grand Trunk Building, Cockspur Street.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

UNITED STATES STEEL COMPANY IN TORONTO.

An office has been opened in Toronto by the United States Steel Products Company, which is the Steel Corporation's export subsidiary, to install the Steel Corporation in close touch with Canadian consumers.

The United States Steel Corporation thinks it can produce and deliver steel in Canada as cheap, if not cheaper than Canadian manufacturers. Exception may be taken to fabricated material as the duty on that class of steel is much higher. This fact was brought out in the matter of the Quebec bridge. The finished steel contract for the construction of this bridge was secured by the Steel Corporation, but the fabricating work was turned over to a Canadian firm.

◆

The contract for the construction of the first section of the Hudson Bay Railway from The Pas to Thicket Portage, a distance of 185 miles, was awarded to J. D. McArthur, Winnipeg, whose tender amounted to about $3,000,000, and was well within the estimate of the probable cost, according to the government's survey. Mr. McArthur is prepared to start active construction work at once. The balance of the road will be placed under contract next year.

The Montreal Harbor Commissioners have obtained permission from the government to make a large addition to the new elevator No. 2 now in course of construction. As orginally planned the elevator was to have a capacity of one million seven hundred and seventy-two thousand bushels, but feeling that this would hardly meet the requirements of the port, the Commissioners have asked for powers to add thereto a storage elevator with a capacity of eight hundred and forty-eight thousand bushels. This permission has been granted, and Mr. L. E. Geoffrion stated that it was hoped that when the whole building was completed, which would be in time for the handling of the crop of 1912, there would be no further need for the complaints which grain dealers were making at the present time as to the lack of storage facilities in the port.

FINANCIAL ADVERTISING

Some interesting notes on financial advertising in magazines have been contributed by Hr. H. D. Robbins, advertising manager of Messrs. N. W. Halsey & Co., New York.

At the present time he says the magazine reading public has developed a healthy and growing appetite for investment securities. This is in part due to the consecutive advertising of the bankers, in part to their educational copy, and in no small degree to the editorial work of the magazines themselves.

The entire investment banking field has been benefited because a new class of buyers has been created.

When a man withdraws his hard-earned savings from the bank and remits to Getit, Keepit & Co. for shares in some dream which he sees advertised in a reputable magazine, and which he soon discovers represents a total loss, then it is his capital that is affected, and it is this sort of thing that sometimes drives men to suicide. Can the publisher of such a magazine seriously deny that he is in some measure responsible.

Postmaster-General Hitchcock has estimated that the American public loses annually $100,000,000 through purchasing fake or near fake securities.

The bond houses have shown the greatest progress in financial advertising. With the advent of this class of advertising into the magazine, informative, educational investment advertising was placed on a definite basis.

Is a publisher warranted in exercising a censorship over the character of advertisements which he accepts? Mr. Robbins claims he is:

1. Because of his moral obligation to his readers.
2. Because it is good business building policy to keep harmful products and deceptive statements out of his advertising pages.

Mr. Page, editor of World's Work, has said a magazine is no stronger than the weakest advertisement it carries.

◆

Sir Reginald MacLeod, director of the Gresham Life Insurance Company, one of the most powerful of the English concerns, who has been in Canada for the past two weeks, states that the firm will enter the Canadian field during the next few months, and will establish a head office for the Dominion at Montreal. He is accompanied by Mr. Charles Hanson, chairman of the board of directors, and Mr. Jas. Scott, chief superintendent of the business in England.

WESTERN TRUST COMPANY.

As is the case with so many Western institutions this year, the Western Trust Company shows a substantial increase in net profits for the year ended June 30th. After providing for management costs, salaries, etc., the profits amounted to $54,026, compared with $33,496 in 1910 and $4,076 in 1907. From the current year's earnnings, the directors have provided two half yearly dividends of 3 per cen., (being at the rate of 6 per cent. per annum) and have placed the sum of $19,550 in reserve, carrying forward a balance of $5,586 to next account. The paid-up capital of the company has been increased during the year by $195,550, making in all $580,600 of paid-up capital, as on this date, and the reserve fund now stands at $58,000.

The Trust Guaranteed and Agency Funds and the total assets of the company have increased proportionately during the past year, the total assets now standing at $3,479,558.35.

A branch office of the company was opened at Regina early in the year and the company's operations there are reported to be meeting with success. A five storey office building is being erected in that city for the corporation. The company's securities have been examined by the auditors Messrs. Clarkson, Clark and Menzies, and certified. The loans on mortgages showed an increase of 36 per cent. over the previous year and the collections of interest have been good. A strong directorate was elected. The company's financial statement is a creditable one.

◆

TIMBER LIMITS WANTED.

The Monetary Times would be glad to hear, on behalf of a correspondent, of any large timber limits for sale, the price not to exceed $2,000,000. Communications will be treated confidentially.

Branches: Vancouver, Victoria, Calgary, Edmonton, Regina, Fort William

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520.000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum,** so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

CROP REPORTS ARE SATISFACTORY.

(Continued from Page 821).

still mainly the weather, the chief concern being the progress of the rust blight throughout the spring wheat territory of the United States and Canada, and the risk of a frost visitation in the Canadian provinces. There is reliable evidence that black rust is widespread over the country, although opinions differ as to whether the infection is of the same character as that which damaged the crop of 1904. But with more reassuring advices at the week's close telling of improved weather conditions, and a modification of reports of probability of frost damage, the danger of any general disaster to the crop is considered to be past, and, granted a continuance of warm weather, Western Canada has every prospect of a yield largely in excess of any previous season.

The conditions on both sides of the Atlantic are tending to harden European markets, and prices in these markets have advanced materially within the past two weeks. Persistent reports from Russia warrant the belief that serious damage has occurred to the crop in that country, and heavy reductions are being made in Russia's exportable surplus. Weather conditions for the new crop season in India are also unfavorable, and are leading to the curtailing of exports from the last crop. The Argentine and Australian crops, however, continue to make seasonable progress. Nearer home, the United States government estimate of condition of spring wheat, as at August 1st, was a bullish document, indicating an estimated probable yield of 210,000,000 bushels against 231,000,000, the final estimated yield of 1910. The condition is given as 59.8, as compared with a five-year average of 79.9. With the foregoing facts in view many traders believe in an ultimate higher level of prices.

There was a good demand for cash wheat on our local exchange, and considerable trading in futures. Prices, however, were too high for any export work in wheat. Our stocks of old wheat are getting small, but there is still a considerable amount coming along. With the rust and frost scares out of the way in a few weeks we should have a more stable market.

WESTERN STEEL CO. BOND ISSUE

Advices from Irondale, Wash., say that the stock holders of the Western Steel Corporation on August 2, ratified an issue of $5,000,000 bonds to provide new operating capital. It is stated that the company's president, James A. Moore, has already arranged for placing this issue in the East. Work was resumed at the company's plant at Irondale early in August and the officials say that the rolling mill will be run as steadily as possible.

The Western Steel Corporation was incorporated in Washington on Aug. 2, 1909, acquiring $2,768,800 out of the $3,000,000 capital stock of the Western Coal & Iron Corporation, Ltd., a Canadian corporation. The properties consist of mineral claims in British Columbia, Nevada and Washington. The company's plant is located at Irondale, about 38 miles north of Seattle, and comprises blast furnaces, open-hearth furnaces, rolling mills, etc. The company has a contract with a Chinese company at Hankow, for the importation of Chinese iron ore and pig iron into this country. The authorized capital is $15,000,000 common and $5,000,000 6 per cent. non-accumulative preferred stock, and $2,000,000 first mortgage gold 6 per cent. bonds were issued on Oct. 1, 1910, to mature 20 years afterwards. The directors are largely residents of Seattle and Tacoma, Wash., Vancouver, B.C., San Francisco and Boston and Worcester, Mass.

THE
WATEROUS
ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

PERSONAL NOTES.

Lord Charles Beresford and Lord Desborough will attend the opening of the National Exhibition at Toronto.

Mr. J. Ferguson, of the National Bank of Scotland, will make an extended business trip in Canada next month.

Mr. T. H. Hogg, B.Sc., has assumed his duties as editor of The Canadian Engineer, Canada's leading engineering weekly.

Mr. E. J. Long, a bond salesman of the Royal Securities Company, sustained a fatal accident on a switchback at Montreal.

Mr. A. E. Hepburn has gone to London in connection with the sale of his Tumbo and Saturna coal holding, British Columbia, to British capitalists.

Sir Edmund Walker has written a prefatory note to "Capital Investments in Canada," a new volume to be published by The Monetary Times next month.

Mr. George A. Somerville, general manager of the Manufacturers' Life Insurance Co., has returned from a trip to the west and he reports favorable conditions.

Messrs. W. L. McKinnon & Co. are conducting a bond business in the McKinnon Building, Toronto. Mr. D. H. Pettes of the Toronto office of the Great West Life Insurance Co., is severing his connection with that company and will become a partner of Mr. W. L. McKinnon.

Mr. W. K. McNaught has issued a writ against the International Assets, and the Sovereign Bank of Canada, claiming 25 shares of preferred stock and 214 shares of common stock in the Penman Manufacturing Company.

M. J. E. Waller, and Mr. Wynne Roberts, both of London, Eng.; Mr. Sheward, of York, Eng., and Mr. R. Grigg, British Trade Commissioner, were visitors to the Monetary Times head office this week.

Mr. A. W. Blake, district secretary of the London and Lancashire Fire Insurance Company, at Winnipeg, recently returned from a trip to England and has left for a two months' tour of Western Canada.

Mr. P. C. Larkin of Toronto may be Canada's representative on the Royal Commission to be appointed by the British Government to investigate and report on the conditions and resources of the Empire in matters of industry and trade, as recommended by the recent Imperial Conference.

Mr. J. W. Brooke, president of the Brooke Motor Manufacturing Company, of Lowestoft, England, is in Canada with a view to establishing a branch distributing house for the automobiles and marine engines which his firm manufactures.

INTERNATIONAL NICKEL COMPANY.

As a result of the meeting of the directors of the International Nickel Company, stockholders of the company will be asked to form a voting trust to perpetuate the present management of the company for five years. By so doing the best interests of the stockholders may be conserved, as the present management has been in control practically since the inception of the company. The trustees will include members of the executive committee. They are Ambrose Bonnell, president of the company; E. F. Wood, first vice-president; Captain J. R. Delamar, Col. Robert N. Thompson and E. C. Converse. The above named have agreed to deposit their stocks.

The Bankers' Trust Company, of which E. C. Converse is president, will probably act as depository, while the Guaranty Trust Company will act as registrar. The formation of a voting trust is said to have been under discussion for several months past, and is not the result of any recent changes in the ownership of the stocks of the company.

As is well known, the International Nickel Company has large deposits of nickel at Sudbury, Ont., estimated to contain approximately 20,000,000 tons of ore; large smelting plants at Copper Cliff, Ont., and extensive waterpower plant at High Falls, near Nairn, Ont.

AGENTS WANTED

NEW WHEAT OFFERED.

The first car of new wheat was received in Winnipeg market last Saturday. It is from southern Manitoba, grades No. 1 hard and averaged thirty-seven bushels to the acre. The berry is firm and large with no evidence of rust. A farmer near Carman, who shipped the car, has three hundred acres in wheat and the whole of it is declared to be equally good. It weighs above the average, and is considered a fair indication of the Manitoba crop.

VANCOUVER'S FIRE DEPARTMENT RECORD FOR JULY.

The total fire loss in Vancouver for July was $15,567; insurance paid $10,427, leaving the loss above insurance paid $5,140. The department responded to 68 alarms during the month, no less than 26 of which were for bush fires, three were false alarms and one was for a chimney fire. There were 17 fires where damage occurred and 21 fires where no damage resulted. A number of the latter were small roof fires and rubbish piles caused by flying sparks. The following is a complete list of fires where damage occurred:—

July 1st. Telephone alarm at 12.10 p.m. Small fire on roof 2,052 Beach Avenue, caused by a defective chimney. Building owned by Judge Cassidy and occupied by R. Elliott. Damage $5.

6th. Alarm from Box 5 at 7.30 a.m. Small fire under the floor in the machine shop at the north-west corner of Pacific and Granville Streets, caused by sparks from the forge. Building owned by Mr. Trorey and occupied by the A. G. DeNorthall Engineering Company. Damage $5.

11th: Alarm from Box 35 at 1.30 p.m. Fire at 936-938 and 942 Main Street. The blaze started from a gas explosion in a restaurant at 938 and quickly spread to the adjoining buildings, having made great headway on arrival of the fire apparatus. 936 and 938 was a two-storey brick building, owned by R. Stafford and occupied by a restaurant, rooms and store, while 940 was a two-storey frame building owned by R. Macpherson and occupied by a restaurant and rooming house. Damage $3,244, partly covered by insurance.

12th. Alarm from Box 16 at 3.50 a.m Fire under counter of grocery store at 830 Pender Street West, cause unknown. Building owned by R. V. Winch and occupied by S. Price. Damage $450, covered by insurance.

Verbal alarm at 1 p.m.; small fire on roof of 716 Seymour Street, caused by flying sparks. Building owned by Mr. Tredwell and occupied by Mr. Leach. Damage $2.

15th. Alarm from Box 46 at 2.45 p.m. Fire in stable in rear of 1,108 Richard Street, caused by flying sparks. Building occupied by Charles Honey. Damage $175.

16th. Alarm from Box 43 at 8.15 p.m. Fire in rear of 330 Harris Street, owned and occupied by Sam Fat Yet and used as a laundry and dwelling. The blaze was caused by a defective chimney and was confined to the dwelling part in rear. Damage about $300, partly covered by insurance.

19th. Alarm from Box 6 at 1.20 p.m. Awning on fire at 619 Robson Street, caused by a cigar being dropped from an upstair window. Damage $5.

21st. Alarm from Box 13 at 12.20 p.m. Fire in attic at 579 Richards Street, caused by man smoking in bed. Building occupied by Mrs. McNeil. Damage $375, covered by insurance.

22nd. Telephone alarm at 11.10 a.m. Fire on roof of the Barnard Castle Hotel, Powell Street and Campbell Avenue, caused by sparks from chimney. Fire confined to the south-east wing roof.. Building owned by Williams and Doering and occupied by Hall and Andrews. Damage $480, covered by insurance.

22nd. Telephone alarm at 4.37 p.m. Fire in lumber piles at the Alberta Lumber Company's plant on False Creek, between Willow and Heather Streets, caused by sparks from the burner. Considerable lumber which was stacked in the yard was destroyed but the mill plant was not damaged. Alarm was received over the Western Union Line, also Box 213 was turned in shortly after getting the alarm over the telephone for this fire. Damage $5,906, partly covered by insurance.

Alarm from Box 16 at 9.20 p.m. Automobile No. 1,641 on fire at the corner of Hastings and Granville Street, the top part of machine being damaged. Fire caused when filling tank with gasoline. Damage $650, covered by insurance.

23rd. Telephone alarm at 10.30 a.m. Fire in out-house in rear of 330 Dunsmuir Street, caused by sparks from the chimney. The rear wall of 330 was scorched and the fence was damaged. Building owned by Mrs. Shaw and occupied by Mrs. McKenzie. Damage $40, partly covered by insurance.

25th. Telephone alarm at 7.45 p.m. Fire in cottage in the 3,300 block, Napier Street, also in house in the 3,300 block William Street, Hastings Townsite, caused by a bush fire. Both buildings were destroyed. House owned by Mr. Johnston and the cottage by Mr. Peterson. Damage $2,750, partly covered by insurance.

26th. Telephone alarm at 4.25 a.m. Fire in restaurant kitchen at 525 Pender Street West, occupied by R. C. Purdy. Cause of fire unknown. Damage $1,205, covered by insurance.

Telephone alarm at 10.48 a.m. Window awning on fire in the Fairfield building, Granville and Pender, caused by cigar being dropped from an upstair window. Damage $25.

31st. Telephone alarm at 11.17 p.m. Fire in waste paper chute at the Manhatten Apartments, Thurlow and Robson Streets, caused by a lighted cigar being thrown into it. Building owned by W. L. Tait. Damage $50, covered by insurance.

The following is a summary:—Total number of alarms 68; bush fires 26; chimney fires 1; false alarms 3; property involved $325,390; loss $15,567; insurance paid $10,427; loss above insurance $5,140; hose laid at fires 28,750 feet; chemical used at fires 1,428 gallons.

◆

The Central Prison and asylum properties, on Queen Street West, Toronto, have been sold to the Grand Trunk Railway and the Massey-Harris Company for $1,025,000. The railway company assumes the whole parcel, but has entered into an arrangement with the Massey-Harris Company by which the latter secures a portion of the asylum grounds for their works.

The National Provincial Insurance Corporation, Limited, of London, England, has gone into the hands of a receiver in bankruptcy. It wrote £207,000 in premiums last year on fire, burglary and general accident business. For about a year it has been transacting a reckless business and its failure is not a great surprise. The paid-up capital was £49,303 and the general funds as of January 1, 1911, were £111,316. F. England was its managing director and secretary. The National Provincial wrote United States surplus business through Shipman & Wayne, of Chicago.

TO INVESTORS

Brandon, Manitoba

and surrounding territory presents to Intending Investors, large and small, the best possible opportunity at the present time (now) to realize large returns quickly.

Brandon Real Estate has never been boomed as other Western cities have, consequently prices are low comparatively.

With hundreds of thousands of dollars being spent in paving and other civic improvements.

With a million dollars' worth of contracts already let for private enterprises this year, Brandon is sure to forge ahead and increase greatly.

Brandon is the place for the conservative investor.

Correspondence solicited.

NEW EDITOR FOR THE CANADIAN ENGINEER.

Mr. T. H. Hogg, B.A.Sc., a well-known civil engineer, will shortly resign his position with the Ontario Power Company of Niagara Falls to become managing editor of The Canadian Engineer of Toronto. Shortly after graduating from the Faculty of Applied Science of the University of Toronto, Mr. Hogg entered the service of the Temiskaming & Northern Ontario Railway on location and construction work. When this was completed he was appointed to the engineering staff of the Niagara, Lockport & Ontario Railway. During the following year the Hydro-Electric Commission placed him in charge of important work on the power line, which was then building. Recently Mr. Hogg was associated with Mr. J. H. Jackson in the design and construction of a sewerage and water supply scheme for the town of Niagara Falls, and subsequently on the construction of a huge conduit for the Ontario Power Company.

While at the University in 1907, Mr. Hogg was elected President of the Engineering Society. He was a prize winner in civil engineering at the school.

The Canadian Engineer is the leading engineering journal of Canada and has retained that position since the inception of the paper many years ago.

◆

TORONTO RAILWAY STOCK INCREASE.

An increase in the stock of the Toronto Railway Company from $8,000,000 to $12,000,000 has been ratified by the shareholders. Of the $4,000,000 increase $1,000,000 went to the shareholders in the form of a bonus. The company will issue $2,000,000 of the stock to the present shareholders at par and the other million will remain in the treasury of the company, to be called upon when needed.

The president of the company, Sir William Mackenzie, is in Winnipeg, and the chair was occupied by Mr. F. Nicholls. Others at the meeting were Sir Henry M. Pellatt, E. R. Wood, Senator Cox, and R. J. Fleming.

One share of the new stock will go to each holder of four shares, and the one share bonus will go to each owner of eight shares who was on record on August 25.

◆

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, in pounds, for the week ended August 11th:—La Rose, 127,800; Coniagas, 120,390; Hudson Bay, 65,710; Crown Reserve, 47,750; Buffalo, 65,120; Colonial, 47,410; Chambers Ferland, 64,000; Cobalt Townsite, 76,760; McKinley-Darragh, 53,290; Nipissing, 63,960; Cobalt Lake, 62,000; Beaver, 61,020; Kerr Lake, 61,020; Drummond, 60,000; total, 975,210 pounds or 487 tons. The total shipments since January 1st are now 30,092,974 pounds, or 15,046 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

The Canadian steamer Yorkton, fresh from the shipyards at Sunderland, England, has been loaded with a cargo of one hundred tons of steel billets at the Steel Company's docks at Gary, Ind., for delivery at Montreal. The ship is owned by the Matthews Steamship Company, of Toronto.

In explaining $10,000,000 loan recently contracted for by Mexican Government exchange and currency commission with Messrs. Speyer & Co., Jaime Gurza, sub-minister of finance, said in part: "It is not in reality a loan but simply a contract by which the government asks an advance of $10,000,000 gold by James Speyer & Co., and which the Mexican Government can return easily. Contract was made to meet the needs of a gold fund abroad. One thing leading to this necessity is the fact at this season exports diminish because the harvests are not yet gathered, and also there is a paralyzation of business along certain lines, due, without doubt, to the existing political conditions. It is known that there are a number of foreign countries waiting to place their capital here after the elections."

NINETEEN YEARS OF SUCCESS . . .

On August 18th The Great-West Life Assurance Company completes its Nineteenth Business year.

During all that period the public have, in most convincing fashion, shown that they appreciate the opportunity of obtaining Life Insurance at the lowest possible cost—and with the highest possible profits—consistent with sound business principles.

That is why—at nineteen years—The Great-West Life has a business in force of over $62,000,000.

The London Stock Exchange has listed Canadian Cottons £339,000 5s; Canadian Northern Railway £700,000 4s; Montreal Water & Power £20,000 4½s, and South Vancouver £310,239 4s.

At the annual meeting of shareholders of the Kingston & Pembroke Railway Company it was reported that the past year was the best in the company's history. Extensive improvements were made to the line during the past twelve months, and further work is to be done this year. The officers of the company were re-elected as follows:—President, W. D. Matthews, Toronto; vice-president and general manager, W. R. Baker, Montreal; directors—A. R. Creelman, Montreal; James Oborne, Toronto; N. P. Timmerman, Montreal; William Harty, J. B. Walkem, Robert Crawford, and W. F. Nickle, Kingston.

Edmonton is experiencing a period of marked activity along industrial lines. The Great Western Garment factory have found it necessary to order additional equipment practically doubling their capacity. The Edmonton Cigar Factory are arranging for additional space to permit of considerably increased output. The Edmonton Tent and Mattress Company find it necessary to provide additional space for the installation of a big addition to their equipment. Cushing Brothers have just completed a big new brick factory, and practically all industries report capacity business. The International Harvester Company have arranged for immediate erection of a large six storey brick warehouse; work is progressing rapidly on the big brick and concrete distributing warehouse of the Massey-Harris Company. P. Burns & Company have recently announced their intention to commence early construction on the big meat packing plant which they have had under consideration for some time past. The coal strikes have not affected the mines in the Edmonton district except to create a prospect of considerable advance in prices. There have been no labor troubles in Edmonton mines.

THE CANADA LIFE

Offers exceptional advantages to its Policy-holders and to its Agents by reason of its

Impregnable Financial Strength
Large Surplus Earnings each Year
Simple, Safe, and Liberal Policies
Fair and Prompt Settlement of all Claims
Economical but Progressive Management

Buying Investment Securities by Mail

We wish to impress upon you the fact that you can do business with us—and with the utmost satisfaction—no matter where you live and no matter how small or large the amount of funds available for investment. Wherever the mails go we can do business.

The requirements of individual investors differ so widely that it is out of the question preparing a number of cut and dried suggestions that will meet the requirements of all who make inquiries regarding investments. For this reason we ask intending investors to give us an idea of the amount of funds they have available for investment, whether they desire Government bonds or municipal debentures, high grade bonds or stocks. In many cases investors leave this point entirely to our decision. In such cases we are guided by the circumstances of those making the investment. Each inquiry receives careful, personal attention. We take pleasure in answering all inquiries regarding investments.

INVESTMENT AND LOAN COMPANIES

SAFETY OF PRINCIPAL; CERTAINTY OF INTEREST.

A writer in one of our financial journals recently said that real estate mortgages combine the two great essentials of a conservative investment—safety of principal and certainty of interest.

To those who have funds for investment only in small sums, this most desirable class of security is not directly available. They may, however, secure all these advantages by investing in the Bonds of this Corporation, which are based on upwards of twenty-seven million dollars of carefully selected first mortgages on improved real estate. These Bonds may be had in denominations of one hundred dollars. They are a security in which Executors and Trustees are expressly authorized by law to invest Trust Funds.

Send for specimen Bond, copy of Annual Report and full particulars.

LOANS ON LIFE INSURANCE POLICIES.

The question of loans on life insurance policies has received the attention of Canadian companies. It has been stated that considerable borrowing has occurred often for the purchase of luxuries. An investigation of The Monetary Times shows that, while policyholders in Canada have made good use of the borrowing privilege, the facility has not been abused. Having regard to the greater volume of business which is in force, the amount loaned has not increased largely. The experience of an English company, both in Canada and in England, has been that a policyholder only borrows on his policy in times of great stress. There seems to be reluctance to impair the security for their dependants. On the other hand, the secretary of a Canadian company, while admitting that the power to borrow on the policy is a great convenience to many policyholders, thinks that the facility with which money can be raised in this way leads in some cases to policyholders borrowing on the policies when not absolutely necessary. This reduces the amount of their insurance or protection to their families.

There are two classes of loans to policyholders:—(1) Direct loans made, having no connection with assistance in the way of premiums, and (2) loans paid directly for the purpose of assisting policyholders to keep the policy in force. The latter loans are made under what is known as the automatic, non-forfeiture privilege of the policy. The companies which offer such a provision, make it a rule to advance automatically premiums after the policy has been in force, say, three years, if the renewal premium is not paid when due.

Another English company which does business in Canada thinks it evident that loans on life policies are becoming more in demand. "While such loans," they say, "diminish the insurance values of policies, at the same time the loan benefit is one which, in the present generation, induces many people to take policies, who would not otherwise. The companies will have to hold larger sums in liquid assets than heretofore, so that they may meet emergency demand for loans."

Inquiries made by The Monetary Times prove that the majority of companies, while willing to make such loans and providing for them in their policies, at the same time regret that so many policyholders should borrow in this way. They believe that the insurance will be more satisfactory to policyholders in the long run and more sure to carry out the protective feature of life insurance if they will manage to get along without borrowing. Some interesting notes on this question are given elsewhere in this issue. It is plain that the policyholder should only go to the life insurance company for a loan as a last resort.

UNLICENSED INSURANCE.

On another page is printed a letter from Mr. E. M. Carroll, president of the Insurance Brokerage & Contracting Co., Toronto. Mr. Carroll endeavored to settle on behalf of clients, insurance placed in unlicensed companies. He resents what he terms the sarcastic comments of The Monetary Times, last week, adding that "he should be crowned with a halo for the success met in busting," certain unlicensed companies. If Mr. Carroll can be credited with eliminating undesirable fire underwriters, he is entitled to compliments Our fear was that he might have been dragged too far into the mire. Mr. Carroll makes it clear that he was endeavoring to obtain insurance from a hopeless quarter.

One, Frank Anthony of Brooklyn, N.Y., is responsible for considerable literature in Canada regarding unlicensed companies. We believe that Anthony had a Toronto agent. It would be interesting to know what the agent thinks about the Pennsylvania State Insurance Department's descent upon Anthony's unlicensed bee-hive. Anthony sponsored the companies from which Mr. Carroll was trying to get insurance settlements.

A point which deserves a serious consideration is made in Mr. Carroll's letter. He calls attention to the fact that many fire insurance companies with risks in Northern Ontario are not exercising undue haste to settle their claims. It is said a number of technical excuses are being made. If this is the case with licensed companies, it will be interesting to learn the details. As for unlicensed companies, The Monetary Times has always opposed them. They are transacting business in Canada without contributing to the upkeep of the Insurance Department at Ottawa. They pay no license fees and have every opportunity to transact tricky business. They have the same underwriting field as possessed by the licensed companies, but enjoy advantages not given to those companies which conform strictly to Canadian insurance law.

A COAL COMPANY'S ANXIETY.

The British Pacific Coal Company, Limited, is using some arguments in its advertisements, the mere perusal of which makes one feel wealthy. Speculators are advised that an investment in this company would bring "in the early future a handsome and perpetual profit in annual dividends." Dollar shares are being sold at fifty cents each, but, as is usual with stock offerings of this nature, the public are solemnly warned that the price will be pushed higher. In this case, "On the morning of the 17th August, at the hour of 9 o'clock, the next issue of shares in the British Pacific Coal Company, Limited, will be offered to the public at seventy-five cents a share or possibly at one dollar, par value, but not less than seventy-five cents a share." This is, we believe, the first occasion on which the actual and fateful hour for advance has been announced. What it denotes is best described by the writer of the company's advertisements, who says: "This means that those who buy in to-day at 50 cents a share actually make a profit of 25 cents a share for each share held by them on August 17th, which 25 cents a share represents a profit of 50 per cent. upon their investment. To buy 100 shares at 50 cents your cash payment is but $10.

"The remainder of $40 is spread over a period of three months. Don't you see that long before you make your second payment, one month after you purchase the shares, the price of them will have advanced to at least 75 cents and probably to $1 or $1.25 a share, and that you will find yourself in possession of a holding which has made you—through the advance to par—100 per cent. on the total purchase price?

"In other words, if you buy 200 shares at 50 cents, your purchase price is $100, and when the price of the shares is at par, your holding is worth $200."

The trouble with all automatically, periodically advanced shares is that, no matter whether the promoters raise the value of a 50-cent share to even $500, while it is easy enough to buy at the vendor's price, it is an extremely ticklish operation to sell. If the British Pacific Coal Company has a property of any value there is no need to exhibit such extraordinary anxiety to sell dollar shares for fifty cents.

SMALL CHANGE.

A Toronto daily has called upon Sir William to blow his Van Horne against reciprocity.

* * * *

One million barrels of apples from Nova Scotia this year will be pie for a good many.

* * * *

The Western crops have had sufficient moisture, a touch of black rust, and now want the sunshine to reign.

* * * *

A Calgary paper tells us that a disaster to the 1191 crop is not anticipated. This prophecy makes one almost dizzy.

* * * *

M. Jagerschmidt, a Frenchman, is making a trip around the world in forty days. It takes some office boys that time to get around a week's work.

* * * *

If the British newspaper men touring Canada chance to meet the American newspaper men doing ditto, some interesting reciprocity arguments should be heard.

* * * *

Sometimes the foreman of The Monetary Times composing room wants a streak of editorial in a mighty hurry, and his linotype machines cannot wait for editorial thought. Thus it happened in this particular corner, and the above explanation therefore satisfies us all.

* * * *

Mr. Thomas W. Lawson, of Boston, looks for rapid development in Western Canada. As a stock salesman and manipulator he has strangely neglected the Dominion. His trip to the Pacific Coast and through the West may have been made with a view to sounding the depth of our investment knowledge. Lawson says that capital will be almost at the mercy of individual energy, especially in the North-West. It would not be surprising to see Lawson's full-page advertisement appearing in those papers which support such men and their schemes. On another page we print some of his quips. They make good midsummer reading.

* * * *

The Ontario Government has decided to buy the bonds of the town of Cochrane, to enable the corporation to pay the interest and sinking fund of the debenture debt, towards erecting new public buildings. This is a commendable action. It is encouragement to stricken pioneers and a tribute to the sympathy of the Ontario ministers and the Toronto Board of Trade. We can well afford now and then to mix a little kindness with finance. Cochrane is a town hewn out of Northern Ontario bush. Soon after the first civic council was formed, the necessity for selling debentures arose. None of the members possessed municipal experience. They soon acquired knowledge and issued their first bonds successfully, obtaining par. The action of the Ontario Government will help where assistance is needed and will not be abused.

THE LONDON MARKET.

Business in "Americans" and "Canadians" is Increasing —Some Notes for the Man Seeking Its Favor.

The London market is recognized as the greatest international market in the world. The business in "Americans" and "Canadians" has become very large within the last ten years and the trading in both is now a popular feature in that market. Mr. L. A. Dessar gives some interesting details in the New York Bankers' Magazine respecting the London market for American securities. Every partner of a London stock exchange firm, he says, must be a member of the Exchange. This assures the closest attention of the execution of orders.

Difference in Time.

The London market affords four hours for the execution of orders before the opening of the New York Stock Exchange, thus; the London Stock Exchange opens at 11 a.m. and closes at 4 p.m., London time, (6 a.m. to 11 a.m., New York time), then continues in "Shorter's Court" (The Curb) until 8 p.m., London time, (3 p. m., New York time). Announcement of important news is frequently made after the close of the New York Stock Exchange. This may be taken advantage of in the London market early the following morning.

An account in American stocks may be opened or commitments in the New York market may be protected by orders given for execution in London, while the New York Stock Exchange is closed. Unless limited as to time, orders given before the New York opening are held subject to execution until 9.45 a. m., New York time. Orders given during the business session are open for the balance of the day, unless otherwise stated.

As To The Settlement.

Settlements are made fortnightly instead of daily as in New York. Each adjustment lasts three days, but does not interfere with the continuation of business. On the first day, so-called "Contango Day," all positions, long or short, are carried over for the next account, unless the broker is notified in proper time that the client desires to take up securities bought, or deliver those sold.

The actual delivery of securities takes place on the last day, so-called "Pay, or Account Day."

On the second day, called "Ticket Day," clearing-house tickets are exchanged.

Adjustments to Market Price.

On "Contango Day" all commitments carried over are adjusted to the market price then ruling, termed "making up price." These are fixed by the London Exchange. The interest rate (called "Contango") is agreed upon between brokers. Accounts are made up, and the client is required to remit in cash any differences that may be against him, or he may withdraw any credit balance.

On stocks bought and sold between settlements no interest is charged, but on stocks carried over, interest commences on "Account Day," and is charged for the full settlement on stocks long and allowed on stocks short. This does not prevent evening up of commitments at any time.

Notes of Commissions Charged.

Commissions are charged at the rate of 6d. (12c.) per share or about $12.50 per 100 shares; but no commission is charged for carrying over, or for the delivery or receiving of stocks.

A contract tax is charged on purchases and sales on the amount of money involved as follows:—

Where the value of the stock or marketable security is £5 and does not exceed £100 6d.

Exceeds £	Does not exceed £	
100	500	1 sh
500	1,000	2 sh
1,000	1,500	3 sh
1,500	2,500	4 sh
2,500	5,000	6 sh
5,000	7,500	8 sh
7,500	10,000	10 sh
10,000	12,500	12 sh
12,500	15,000	14 sh
15,000	17,500	16 sh
17,500	20,000	18 sh
20,000		1 £

Generally no margin is required but, as stated before, on Contango Day, stocks are adjusted to the market price and differences are settled. If in favor of the client the amount placed to his credit and subject to his disposal, if against the client, he is required to remit. In an active market, with wide fluctuations, he is supposed to keep all commitments to the market price between settlements.

To those unfamiliar with the reason for the differences in prices between the two markets the following explanation may be of service. While London quotations for American securities are quoted at dollars per share these are based on the fixed value of five dollars for one pound sterling, whereas the actual value of the pound is governed by the fluctuating rate of exchange.

For an approximate example, take a London price, say eighty-five, divide it by five to reduce it to the amount in pounds sterling which will be seventeen pounds, multiply it by the current rate of exchange, say $4.86. This will give $82.62 as the New York equivalent.

To change New York price into London parity, multiply New York price by five then divide by current rate of exchange.

Stocks dealt in London at pound sterling per share, multiply by the rate of exchange only.

The code system and cable service have been so perfected that orders from New York can usually be executed in London and report received within ten minutes.

Options and Their Uses.

One of the greatest advantages the London market affords is in purchasing privileges or options as they offer means for speculation, as well as protection and a limit to liability. They are issued under the rules and regulations of the London Stock Exchange and mature at stated settlements only.

But trading against privileges may be done in the interim either in London or New York.

The simplest forms of these options are the puts and calls. The cost is regulated according to the stock selected and the time of maturity.

The buyer of a call for a certain cash payment, called premium, has the right to call the stock on option day at the price fixed at the time of making the call. This price is always the market price plus interest. For example, take a stock selling at fifty at the time of purchasing the call, and the call is wanted for the settlement at the end of three months. The call price will be fifty and one-half (which is figuring the interest at four per cent. for the three months on fifty).

Has the Reverse Privilege.

The purchaser of a put has the reverse privilege. By paying a certain premium in cash for the option he may put (deliver) the stock at maturing settlement, at the price fixed when the put was made which was the market price plus interest.

For example: Stock selling at par (100) plus three months' interest at three per cent. (three-quarter per cent.) gives a put price of 100¾.

A "straddle" is a combination of put and call, and the cost is double that of a single option. It is issued at the market price plus interest for a stated settlement. This form of option gives to the holder a broader opportunity for trading. Dividends and rights go with the stock and are allowed on the call and deducted from the put price.

Dividends are subject to the English income tax, which is now fourteen pence (28 cents) on each one pound sterling ($5) dividend and is charged to the client long of the stock and credited to the one short.

Fancy Options.

A fancy put or call is a contract where the price is made away from the market and costs less in premium money. If, for instance, a regular call would be quoted three per cent. at market plus interest, a fancy call could be bought for two per cent. premium and about two per cent. above the market, plus interest. A put about two per cent. under the market price would cost about two per cent. cash.

Options expire the day preceding the first settlement day, called Option Day, and the broker will exercise the privilege if advantageous to the owner without previous instruction, unless notified to the contrary.

Privileges, Options, etc.

The flexibility of privileges can readily be seen by the fact that they not only offer opportunity to enter speculation either as "bull" or "bear" and to protect a position in the market, but they can easily be converted from one side of the market to another, so a quick change of position may be accomplished. A call may be converted into by selling the stock or into a straddle by selling half the stock, etc.

◆

The Temiskaming & Northern Ontario Railway Commission has settled upon its plans for the extension of the Porcupine branch through the Pearl Lake district to the Campbell Veteran claim west of the Hollinger. This terminal will mean the creation of an entirely new town, which will be named Timmins. The lots will be offered by public auction.

VREELAND CRITICISES CANADIAN BANKING

System—Says Our New York Funds Might Be Difficult to Get in Time of Need—Mr. Eckardt's Reply.

In advocating before the New Jersey Bankers' Association the adoption of the Aldrich plan for the establishment of of a reserve association the Hon. Mr. Vreeland referred to the Canadian system of banking as follows: "Gentlemen, it is a provincial system. I mean by that that Canada is not a self-supporting country. It relies upon New York. Canada, during the panic of 1907, was more dependent upon New York than Pittsburg was. I think that shows you the system more than anything else Canada had eighty or ninety millions under deposit in one form or another in the city of New York. Suppose the need had come for Canada to call on New York for their use at home; they would not have got it any more than the rest of us when we called. I lost interest somewhat in the Canadian system when I visited it with the committee on deposits, and I found that the total deposits in all the banks of Canada were almost exactly equal to the deposits in the savings banks of Massachusetts alone."

New York Situation.

"This reference," says Mr. H. M. P. Eckardt in The Canadian Bankers' Association Journal, "tends to put the Canadian system before the public in a more unfavorable light than the facts warrant. It is said that the Canadian banks were more dependent on New York than Pittsburg was. But Pittsburg was in great distress in 1907 and was obliged to close its Stock Exchange. Nothing like that occurred in Montreal or Toronto. Then it is said that the Canadian banks could not have realized on their New York call loans and deposits had the need for doing so arisen. Mr. R. Y. Hebden, the New York agent of the Bank of Montreal, flatly contradicted this same statement when it was made in 1907. Mr. Hebden said there was not one day in the panic in which the Bank of Montreal or the other Canadian banks could not have got sterling exchange for any New York loans they had wished to call. And as he pointed out, the banks could have utilized the sterling exchange as a means of shipping gold to Canada from London had it been at all necessary to ship gold.

"Indeed the figures of the Canadian bank statement prove that these New York loans and balances were actually realized during the panic month. Here is the statement covering those items as at September 30 and October 31, 1907:

	Sept. 30. 1907	Oct. 31. 1907.
Call loans outside Canada..	$63,158,601	$47,946,737
Bank balances in the U. S. ..	14,851,311	15,101,421
Total	$78,009,912	$63,048,158

"So the banks realized a matter of $15,000,000 during October, the month in which the Knickerbocker Trust Company failed.

Could Pay Cash on Demand.

"There is another point which Mr. Vreeland has overlooked. Suppose it has happened that there was need in Canada during the panic of a considerable amount of funds and that New York could not pay a dollar of the loans and balances belonging to the Canadian chartered banks. That implies not a partial but a complete suspension of payments by the New York banks. Even in that case the Canadian banks would not have been reduced to straits. It would doubtless have been very inconvenient for them, but there is no doubt that they could have continued to pay cash on demand and to look after the necessary requirements of their borrowing customers All the important Canadian banks have accounts and close connections with the great banks in Europe. Among these banks are the Bank of England, Lloyd's Bank, Bank of Scotland and the Royal Bank of Scotland and ten or twelve other Great British joint stock banks, also the Credit Lyonnais and other Continental institutions. With their London correspondents the Canadian banks habitually carry large amounts in bonds and debentures, having an international market, and they are privileged to draw bills upon these banks against that cover.

Lockup of New York Funds

"Even if there had been an absolute lockup of their funds in New York, the Bank of Montreal, the Canadian Bank of Commerce, the Royal Bank of Canada, the Merchants' Bank of Canada and the other important banks could have arranged in London for such supplies of cash as they required for a possible emergency in Canada. It is to be remembered that the Canadian banks are in high credit in Europe. If it had been absolutely necessary for them to do so the Canadian banks could have forced the great financial houses in New York who borrow from them at call to liquidate these loans by means of borrowing in Europe. The collateral held against the $63,000,000 call loans would be available for negotiation in Europe at a price.

"Possibly these remarks will serve to show that the Canadian banking system is not provincial in any sense. It seems strange that any banker should think of banks which have branches in every part of the Dominion, in the United States, Mexico, the West Indies, Newfoundland and in London, England, as provincial banks. Whatever it may be, the Canadian banking system is certainly not a provincial system. Mr. Vreeland says he lost interest in Canadian banking when he discovered that the deposits of all the banks in Canada were no more than the deposits in the savings banks of Massachusetts. I might mention, in passing, that the deposits in the savings banks of Massachusetts comprise nearly one-fifth of the deposits in the savings banks of the whole United States. And I have no hesitation in saying that in ten years' time the deposits of the Canadian banks will not be so small as to merit Mr. Vreeland's scorn.

Some Interesting Figures.

"In order to show what has been the development in regard to deposits in the past four years I have taken the following figures from official Government reports:—

(Thousands omitted).

*National banks—	Nov. 12, 1906.	Mar. 7, 1911.	Increase.	Per cent.
New England	$ 394,019	$ 463,723	$ 69,704	18
Eastern	1,701,237	2,011,414	310,177	18
Southern	469,113	622,201	153,088	33
Mid-Western	1,135,288	1,438,550	303,262	27
Western	324,873	395,779	70,906	22
Pacific	263,998	371,564	107566	41

	Oct. 31, 1906.	Feb. 28, 1911.	Increase.	Per cent.
Canadian banks	$640,178	$920,894	$280,716	44

In the Matter of Deposits.

"This statement shows clearly how rapidly Canada is drawing up on the great geographical divisions of the United States in the matter of deposits. Four and a half years ago the deposits of the Canadian banks were 37 per cent. of the deposits of the national banks in the Eastern States, including New York city; now they are 46 per cent. In 1906 the Canadian deposits were 56 per cent. of the deposits of national banks in the Middle West, including Chicago; now they are 64 per cent. Every indication points to a more rapid ratio of increase for Canada in the next ten years. It is one of the best points of the Canadian banking system that it is constituted in such manner as to adjust itself easily and naturally to a continued rapid expansion of Canada's trade and population. For the banks to cope with that is simply a matter of enlarging their staffs and their capital and of increasing the number of branch offices."

Mr. Eckardt, who thus replies to Mr. Vreeland, is a frequent contributor to The Monetary Times and the author of "Manual of Canadian Banking Practice," published by The Monetary Times.

---

* For the national banks the individual deposits are taken. The deposits of other banks consist, to a large extent, of duplications of funds.

◆

FOREIGN COMPANIES IN SASKATCHEWAN.

The following companies have been registered in Saskatchewan:—The Kenshen Company, Limited, the Northwestern National Insurance Company, the Western Canada Trust, Limited, the Investment Corporation of Canada, Limited, the Peace Waldron Company, Limited.

◆

The Ottawa Assurance Company ceased to transact business in Canada on December 31st, 1910. The company's insurance liability was assumed on that date by the Factories Insurance Company. Application has been made for the release of the company's deposit on September 30th, and any Canadian policyholders opposing such release are requested to file their opposition with the Minister of Finance before that date.

The Canada North-West Land Company, Limited, will distribute on realization of assets, No. 5, of $5 per share, payable on September 25th, to shareholders of record on the books of the company at the close of business on September 9th, (fractional shares not included). Shareholders are reminded that as these distributions on realization of assets can only be made as and when sufficient funds are on hand from time to time, payments are bound to be at irregular intervals, and cannot be counted upon to be made at any fixed periods.

NEW BRUNSWICK

Lumber Entering American Market Must Now Pay Duty—Grand Trunk Pacific Will Build at Moncton —Crop Conditions in Province Good.

(Staff Correspondence.)

St. John, N.B., Aug. 14th.

Crop conditions throughout the Province of New Brunswick are most satisfactory, and the farmers have about finished haying. In the greater portion of the province hay was only a fair crop, but was housed in excellent condition, while in the northern counties the crop was considerably heavier than usual. Barley and oats are ripening earlier than usual. Early apples are also ripe, and there will be a large yield. Potatoes will be an average crop of good quality.

With the lumber industry the conditions are not so satisfactory. The American market is in bad shape, and some recent failures in Great Britain, combined with the shipping strike, have affected this business, making ocean tonnage extremely scarce. There is only one tramp steamer loading deals at St. John at the present time, and cargoes for other steamers are waiting. Recent rains have brought down some millions of feet of logs that were stranded in the St. John River below Woodstock, but some of the drive is still hung up.

Duty Now Paid on Lumber.

The fishermen of the province have been getting good prices, but the catch has been small. In St. John harbor there was an average catch of salmon, which gave the fishermen a price of about $1.50 for a twelve-pound fish.

Deputy Minister O'Hara, of the Trade and Commerce Department, had a conference last week with West India exporters at St. John, and will report to the Department. It is hoped that arrangements will be made by which St. John will get as many sailings of the West India steamers as the port of Halifax, which, under the arrangement now in force, it would not get.

Millions of feet of lumber are manufactured from Maine logs in American mills at St. John. Heretofore this lumber has entered the American market free of duty. On August 5th that privilege was withdrawn. During 1910 the exports of this class of lumber from St. John were valued at $650,500. One manufacturer says that the duty of $1.25 per thousand, which this lumber must now pay, would mean $50,000 a year to him. An effort is being made to get the United States Government to remit the duty, at least until the vote has been taken in Canada on the question of reciprocity.

Grand Trunk Pacific Will Build at Moncton.

The Mann Axe Company, which took over the property of the Maritime Edge Tool Company, of St. Stephen, has spent $40,000 in improving the plant, which, it is claimed, will now rank in equipment with the best factory of its kind on the continent. Crude petroleum is to be used as fuel. The capacity of the factory has been increased tenfold.

The property at St. John on which it was expected a sugar refinery would be established is now sought after by two other companies, who would like to secure the site for factory purposes. The Partington Pulp and Paper Company are seeking to purchase from the city some land at the place, where they will erect a large paper mill.

The Grand Trunk Pacific Railway will erect division yards, machine shops and other terminals at Moncton, beginning with an expenditure of half a million dollars. Mayor Reilly informed the city council that the company would bring into Moncton forty or fifty families of work people, besides train men. He added that the company would use natural gas in their machine shops.

Tenders closed on August 10th for the construction of the dry dock, ship repair plant, breakwater, and several wharves, with the necessary dredging, in St. John harbor east. The beginning of active development work is expected at a very early date. Three British contracting firms submitted tenders for the work.

Government Will Erect Bridge at St. John.

As soon as the style of bridge to be adopted has been decided on, the provincial government will erect a new bridge for ordinary and street car traffic across the Reversing Falls at St. John. The present suspension bridge is old and weak, and street cars cannot cross. With the continuous street car service from East St. John to Fairville and West St. John there would be an immediate advance in real estate on the west side. The new bridge would cost about $300,000. The consulting engineer of the Quebec Bridge has inspected the site and will submit a report.—W. E. A.

JULY BANK STATEMENT.

Position of the Chartered Institutions Prior to the Crop Movement.

The preparation by the banks for the crop movement is always strongly defined in the July bank statement. This year's figures are still more interesting in view of the possibility of a shortage in note circulation. The banks are apparently anxious as to the size of the Western crop in relation to their circulation limit, despite their power to issue emergency circulation after September 1st.

The statement of the chartered banks published this week does not indicate a serious position yet. Although the demand for bonds, stocks and real estate has been good, the deposits in our banks increased last month by $13,000,000, and during the year by $97,000,000 The total deposit amounted in July to $887,000,000. In addition to this favorable feature, our leading institutions enlarged their current loans in the Dominion during July by nearly $6,000,000. Call loans increased also, the figures changing by about $4,000,000. Call loans abroad were extended by $6,000,000. The only decrease in the loan account was in current loans out of Canada, which showed a decline of about a half a million dollars.

As To Note Circulation.

At the end of July, note circulation was $8,000,000 in excess of the figures of 1910. On the other hand, there is a larger paid-up capital than last year and consequently increased circulation powers. Comparing the figures of June and July, it is found that the total power of circulation, including emergency, is about the same, a maximum circulation of approximately $130,000,000. Will this be sufficient to handle the crop movement? Some other phases of this subject were discussed in detail in last week's Monetary Times.

Deposits continue to show gratifying expansion as noted in the following table:—

Deposits Figures.

	On demand.	After notice.
1910—July	$251,638,522	$538,384,371
August	256,013,172	545,357,452
September	273,529,461	545,630,667
October	280,838,612	549,016,725
November	289,759,025	551,113,835
December	280,910,695	544,220,710
1911—January	270,178,480	549,774,479
February	268,360,503	551,424,375
March	278,171,792	553,032,466
April	281,964,369	555,822,930
May	298,784,206	562,209,148
June	309,804,854	564,867,554
July	316,973,780	570,789,435

Deposits on demand have increased from $251,000,000 to $317,000,000, and deposits after notice from $538,000,000 to $570,000,000. The deposits account during the last few years has made large and consistent gains.

Course of Loans.

The following table shows the course of the loan accounts in Canada during the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1910—July	$653,008,336	$60,081,256
August	657,813,770	60,427,996
September	668,976,522	62,428,576
October	679,820,039	64,561,641
November	677,617,478	62,866,513
December	677,064,829	63,983,912
1911—January	682,506,695	60,200,781
February	689,234,781	59,132,692
March	710,604,072	58,369,712
April	712,032,758	57,832,690
May	708,093,677	57,709,853
June	717,869,386	61,507,268
July	723,765,358	65,339,288

Call loans in Canada during the past thirteen months have been as low as $57,000,000 and as high, last month, as $65,000,000. Current loans in the Dominion are considerably higher than they were a year ago.

◆

"No better service can be performed for Canada than to make truthful statements from time to time regarding her industrial position and the industrial possibilities arising out of her natural resources. I am, therefore, sure that the publication of the book will be most useful." So writes Sir Edmund Walker in his prefatory note to "Capital Investments in Canada," a new volume to be published by The Monetary Times next month.

T. C. BOVILLE,

Deputy Minister of Finance.

BRITISH COLUMBIA.

Canadian Northern Railway May Enter Vancouver Sooner Than Anticipated—Whaling Profits on the Pacific.

(Staff correspondence.)

Vancouver, August 19th, 1911.

Sir William Mackenzie is the first railway president to visit the coast for some months, and is making his first trip here this week since he received his knighthood. He is accompanied by Sir Edward Ward, one of his Majesty's permanent members of the war office; Baron von Plesson, a young German; Mr. C. C. Chipman, lately retired from the Hudson's Bay Company, Winnipeg, and Col. A. A. Davidson, land commissioner of the Canadian Northern Railway. What was of importance to people on the coast was his statement that Canadian Northern trains might be running into Vancouver sooner than anticipated. This means direct connection with Edmonton and the prairie country lying north of the Canadian Pacific Railway and a decided new link of commerce. Sir William referred to the large amount of British capital that was coming this way, and said that between $30,000,000 and $40,000,000 had been invested in enterprises with which he was connected. He drew a line of difference between the investment of American and British capital. The former, he said, when put into enterprises in this country was handled by the Americans themselves and the profits went across the line.

Regarding the entrance of the line into Vancouver he said he had not yet considered the matter of terminals, but thought the city wanted the railway to some extent at least and that it would do its part. That has been taken as an inference that the Canadian Northern will locate its terminals at the head of False Creek, where, under agreement with the city, the Great Northern has an extensive area. The city otherwise owns no waterfront that would be of any value to a railway.

Canadian Northern Has Hard Section to Construct.

The Canadian Northern is having a hard section to construct between Hope and Kamloops. The rock cuts are heavy and many, and this portion of the line will cost much. It has been suggested that arrangements should have been made with the Canadian Pacific Railway for running rights over this section of 160 miles. A very large expenditure would have been saved, and as there is no business to speak of along that portion of the line, nothing would be lost by using another company's lines.

The Ocean Falls Company, constructing a large pulp mill at Ocean Falls, on the mainland coast, bought a shipment of 51 tons of electric motors, generators etc., from the Canadian Westinghouse Company, of Hamilton, Ontario, as well as ten tons of band and circular saws. The goods were shipped via Montreal to Mexico, across the Tehuantepec railway, and thence north to Vancouver. The cost laid down here was much less than what the freight charges would have been overland through Canada.

A new disposition of Canadian wheat was suggested this week by the visit of Mr. William E. Keller, of Los Angeles, president of the Globe Grain and Milling Company, and Mr. J. Eisenmayer, second vice-president. This company owns five flour mills in California and one at El Paso, Texas, They conferred with Mr. Marpole as to the possibility of getting a favorable rate on grain shipped from the northwest to this port. If this is secured, and reciprocity obtains, they will doubtless get large quantities of grain from this country for use in their mills. This move has opened a discussion as to whether it would be advisable to allow grain to be shipped out of this country in an unmanufactured state. Prior to 1901, logs could be sent out of the province, but in that year their export was prohibited with the result that Americans came to this country and built their sawmills. The same thing has occurred in Ontario, and recently Quebec prohibited the export of pulpwood. With grain available in Canada, the suggestion is that those who want to grind it should bring their mills to Canada instead of taking the grain to give an industry to another and foreign part of the continent.

Profits of Whaling in Pacific Waters.

The profits of whaling in Pacific waters may be noted by advices received by The Monetary Times from the north. The company at Naden Harbor, Queen Charlotte Islands, has to date secured 218 whales. The amount that will be realized from these will be more than sufficient to pay the cost of the plant laid down. The whaling interest off the British Columbia coast, although established only in recent years, has proved very profitable.

WORLD'S WHEAT CROP.

Latest Figures—Good Averages for Field Crops in All the Canadian Provinces.

The following data concerning the world's wheat crop, gathered by the International Agricultural Institute at Rome, are available through the courtesy of T. K. Doherty, of Ottawa, the chief officer in Canada:—

	Bushels. 000's omitted.	
	1911.	1910.
Belgium	14,054	12,449
Denmark	4,393	4,550
Spain	156,650	137,449
Great Britain	61,351	54,877
Hungary	173,886	181,398
Italy	203,376	153,170
Luxemburg	640	624
Roumania	95,534	110,828
Switzerland	3,535	2,756
*United States	457,958	464,044
British India	369,630	358,048
Japan	20,572	23,728
Tunis	7,716	4,042
Total	1,569,295	1,507,963

*Winter wheat only.

Rye, Barley and Oats.

Preliminary estimates of rye, barley and oats crops for 1911:—

	Bushels. 000's omitted.		
	Rye.	Barley.	Oats.
Belgium	23,089	4,437	39,716
Denmark	18,991	23,042	43,924
Spain	31,537	89,801	31,997
Great Britain	.....	58,800	131,967
Hungary	51,811	.....	......
Italy	5,472	11,482	35,663
Luxemburg	660	61	3,462
Switzerland	1,803	468	4,656
Japan	.....	94,523	4,364
Totals	133,363	282,614	295,749

The above tables show that in the countries reported the 1911 wheat crop is expected to be 104 per cent. of that of last year, rye 103.1 per cent., barley 107.7 per cent., and oats 101.9 per cent.

Field Crops in Canada.

The condition of field crops in Canada is presented in a bulletin of the census and statistics officers for July 31st, and shows good averages for all provinces, as well as for all crops. Fall wheat was hurt by the hard winter in Ontario, but fared better in Alberta. The estimated yield is 23.24 bushels for the former province and 27.89 bushels for the latter. The total estimated yield is 17,706,000 bushels. The condition of spring wheat at the end of July was 90 for the whole of Canada, being 85 to 95 in the Maritime Provinces, 80 to 89 in Ontario and Quebec, 90 to 96 in the Northwest Provinces, and 85 in British Columbia. Oats and barley have an average condition of 88 for Canada, 85 to 95 in the Maritime Provinces, 80 to 90 in Ontario and Quebec, 88 to 100 in the Northwest Provinces, and 87 to 89 in British Columbia. Rye, peas and beans range from 78 to 84 in Canada, and buckwheat 81.85.

Mixed Grains, Hay and Clover.

Mixed grains have a condition of 86, which is 14 per cent. less than last year, and flax is 91, which is nearly 20 better. The average of corn for husking is 86 and of potatoes 85.64—being in each case a little higher than last year.

Potatoes, turnips and mangels range from 81 to 85, or about the same as a year ago.

Hay and clover and alfalfa are 80 to 83, which is a little lower in each case than last year. Corn for fodder has an average condition of 87, sugar beets of 79, and pasture of 79. The Eastern provinces are lower than the figures quoted for the whole of Canada, and the Western provinces are higher. The highest averages are given for Manitoba, Saskatchewan and Alberta. Sugar beets have a condition of 81 in Ontario and Alberta, where they are grown to supply the sugar factories.

Mr. J. Pitblado has been elected a member of the Montreal Stock Exchange in place of Mr. Rodolphe Forget, who resigned some weeks ago.

ONTARIO CROP REPORT.

Spring Wheat Suffered from Drouth—Light Yield of Small Potatoes is Noted—Beans May Show Improvement.

The following statement regarding the condition of crops in the province, based upon returns of correspondents under date of August 5th, has been issued by the Ontario Department of Agriculture:—

Fall Wheat.—According to the May bulletin this crop suffered more or less from winter-killing in many counties, and a considerable area of fall wheat land had to be plowed up, or was resown with spring grains. Returns just to hand show a wide variation both in yield and quality reported, ranging from poor to good; but the average yield per acre will be decidedly less than usual. The excessive heat and drouth that prevailed at times in May and June caused the crop to be shorter in stand than usual, and some of the grain is described as having been shrunken by premature ripening. On the other hand, some correspondents speak of the kernel as being plump and a good sample, and claim that fall wheat is the best grain crop of the year. The straw, while short, is generally clean and bright. Smut was reported by only a few correspondents, but occasional mention was made of the presence of Hessian fly in every county west of York and Simcoe (inclusive), except Grey, Bruce, Huron and Essex. Harvesting was earlier than usual, ranging from the 3rd to the 22nd of July, and weather conditions then were, on the whole, very favorable.

Spring Wheat Suffered from Drouth.

Spring Wheat.—This crop, like all the grains, suffered from the drouth and unusual heat of the season. Although short in straw, heads have filled in well, and the grain is said to be of good quality generally. While some spring wheat was harvested in the last week of July, much of the crop remained to be cut when correspondents reported. There is less spring wheat grown in Ontario than formerly.

Barley.—This crop will also be below the average in yield. The straw is described as being short but clean. While the grain will be rather lighter in weight than usual, owing to the great heat and drouth, no complaints of discoloration have been received. Cutting ranged from the 10th to the 28th of July.

Oats.—Oats have fared the worst of the grain crops, although some good yields are reported. Owing to the drouth and excessive heat during growth the straw is very short, although standing up nicely, but the heads are not well filled, nor is the bulk of the grain as plump as usual. In several sections of the province a heavy wind storm threshed out some of the ripening oats. Complaints of rust have come from different districts. While some are through harvesting oats, others have not yet begun cutting.

Rye.—Where grown for grain this crop has been of fair yield and quality, although short in straw.

Peas.—The unusually high temperature prevailing at different periods of the growing season told severely upon peas, reports of the blossoms drying up owing to the heat and drouth. Some correspondents say a portion of the crop had to be cut for green feed, owing to poor podding, although some good yields have also been reported. Only odd mention was made of the presence of the weevil. While some of the crop is yet green and growing, a considerable portion has been harvested.

Beans May Show Improvement.

Beans.—There has been too much heat and too little rain for beans in the first stage of growth, but some correspondents are of the opinion that there is ample opportunity for the crop to pick up before it is ready for harvesting in the early part of September.

Hay and Clover.—Clover did not winter well, and in many quarters the excessive heat and drouth of May and June added to that drawback. However, while in the western half of the province the hay crop will average low, good yields are reported in many of the counties in the eastern portion. The crop was well saved, generally speaking, and where not delayed too long in cutting is of first-class quality. Red clover did not do so well as timothy. The crop has been remarkably free from insect pests this season. Cutting extended from the 20th of June to the end of July.

Corn.—Late planting, owing to drouth of May, was the greatest drawback to the corn crop. Once the young plants got a start, the heat, that was so trying to the cereal crops by unduly hastening ripening, rather suited growth, except in a few instances, where the drouth was almost too much even for corn. Recent rains were bringing the crop forward with a leap, and a good yield is anticipated. Corn is steadily growing in favor as a fodder crop.

Tobacco.—The ground was exceedingly dry at planting, and the crop did not get a good start, while the ensuing hot and dry weather was trying to growth. In some fields grubs also attacked the young plants, necessitating considerable resowing. Notwithstanding these drawbacks the present condition of the crop is described as being from fair to good, while the expected yield ranges from half a crop to a ton of dry leaf per acre.

Light Yield of Small Potatoes is Shown.

Potatoes.—A light yield of small potatoes will be the general rule, as the season has been too hot and dry for best results. Early planted suffered most, and some correspondents claim that timely rains may yet redeem those later grown. The Colorado beetle has been more complained of than for years. Blight was reported in two or three places in some of the eastern counties, but no mention has been made of rot.

Roots.—All classes of roots experienced a poor start on account of the drouth delaying or preventing the seed from germinating. Early sown turnips look better than those put in later, but the crop generally is reported to be doing poorly. Mangels are more promising, and with favorable growing weather may yet make a good show. Sugar beets are described as looking thrifty.

Fruit.—Some correspondents claim that the unusually hot weather at time of blossoming affected the setting of fruit. Apples will be light in total yield, as, in addition to poor setting, a considerable portion of this and other fruits was blown off the trees by high winds late in July. Winter apples will be scarce in nearly every locality, but in most quarters there is a fair supply of Duchess and other varieties. All classes of apples are much freer from spot or scab than usual. Pears, while greatly thinned by the wind storms are yielding better relatively than apples. Plums range all the way from poor to heavy in yield, and have done best where sprayed. There will be medium yield of peaches; the later varieties give the best promise. Cherries as a rule did well, although some complain of poor returns. Grapes so far have every prospect of success. Small fruits promised well early in the season, but failed to fulfil expectations owing to the intense heat prevailing just before ripening period.

PERSONAL.

Mr. Alexander Boyd Dixon is dead, says a London, England, report. The late Mr. Dixon was well known in fire insurance circles, not only in Toronto, but throughout the Dominion, having been general manager for Canada of the Norwich Union Fire Insurance Company, retiring in 1904. Before entering the insurance field, he was for many years advertising manager of the Toronto Mail and Empire.

Mr. Henry L. Riseley, who last year headed the Bristol Chamber of Commerce and Shipping delegation, is on his way to Winnipeg and the West. On his return to Bristol after his visit last year, Mr. Riseley was so impressed with the possibilities of trade and commerce between Canada and Great Britain, that, in conjunction with his colleagues, he made a report to the Bristol Chamber of Commerce which has led to results beyond all anticipation.

Mr. E. Manning Lewis, who is in Canada with the object of promoting trade relations between British Columbia and the port of Bristol, England, especially in view of the opening of the Panama Canal, makes the announcement that the Maple Leaf line of steamers, will make regular calls at British Columbia ports, instead of calling whenever there is a cargo offering. Three steamers every eight weeks will call at Victoria and Vancouver on their way up and down the coast. Mr. Lewis returns to Bristol via Toronto, Montreal, and New York.

Mr. John Barrett, director-general of the Pan-American Union, was a guest of the Vancouver Canadian Club this week, and extended an invitation to Canada to belong to the union. The object of this union is to promote the development of closer relations, commerce and otherwise, with the countries south of the United States, and to build up trade in view of the opening of the Panama Canal. Last year the Pan-American Union was directly responsible for over $50,000,000 of new business among the American countries.

Mr. J. P. Morgan now is a director in sixty-five companies, double the number of ten years ago. Unlike Messrs. W. H. Newman, W. K. Vanderbilt, Chauncey M. Depew, George J. Gould, James Stillman, James J. Hill, and Thomas F. Ryan, he is not relinquishing any of his positions to the younger generation, notwithstanding that two members of his banking firm, Messrs. E. T. Stotesbury and Charles Steele, represent him at eighty-seven boards. Mr. W. C. Brown, president of the New York Central, heads the list of busy directors according to the recent census. He is a member of ninety-six boards. Mr. John D. Rockefeller is a director of only one company, the Standard Oil Corporation.

WESTERN FARM MORTGAGES

As Investments—Life Insurance Companies Patronize Them—Must be Careful Selection and Constant Inspection.

When the Western farm mortgage came on the market as a legitimate investment it found no eager public waiting. No one was behind it but the simple Western banker who knew the man who needed the money and knew the land on which such loan should be made. So writes Mr. G. M. J. Badow, discussing the Western farm mortgage and the investor in the Rand-McNally Bankers' Monthly. A few life insurance companies, he continues, were the first to grasp the opportunity to secure real securities for their funds and to reap the benefit of their foresight by the favor with which they came to be regarded by the borrower, who eventually became also a purchaser of their insurance. Then the Eastern promoter woke up, and seeing that there was a promising field for him, he engaged in the loan business. To hurry matters he began to guarantee his mortgages and unscrupulous financial publications lent their aid in proclaiming the fact broadcast. He was not mistaken. The investors who could not be reached by the simple but honest Western banker, flocked around the oil-tongued promoter, put up their good money, and never saw it again. The noise that went up after this fiasco had been disclosed, was great enough to force some of the promoters to leave the country, for which we ought to be thankful, but it also had the more serious consequence of partly destroying the confidence in farm mortgages.

Classed all Investments Alike.

The unthinking public charged these failures up to the farm mortgage in general, instead of holding themselves and the slicktongued promoters responsible for their losses. Conservative Life Insurance Companies however continued to invest in farm mortgages, their method of loaning becoming more and more perfected. Men that had been intrusted with the loaning of their funds found that the confidence of these companies carried a sufficient weight with it, to find a few individual clients, and to interest anew the New England Savings Banks, some of whom had been badly hit during the period of wildcat and guaranteed mortgages. The farm mortgage loan business of to-day has reached proportions which were not dreamed of a decade ago, and naturally had to undergo a great number of changes, in order to eliminate the chances of fraud and deception.

Lack of Systematic Valuations.

The greatest disadvantage, under which the individual investor labors is the lack of facilities for ascertaining the value of securities offered to him. He remembers the reasons for the great wave of distrust in corporate interests, that went over this country, and who can vouch for the truth of the conditions surrounding a bond or a corporation stock, the latter oftentimes subject to the manipulations of a small set of men, whom he never has met and never will meet?

When Financial Responsibility Enters.

Here comes the farm mortgage banker, and offers to pay the investor 5½ and 6 per cent. for his money, exchanging for the actual money not a mere promise, or a beautifully engraved certificate, but a first lien on a real income-producing piece of property, which may be inspected by the investor at the banker's expense. A whole year is given him for such inspection, and if he or his representative finds actual conditions in variance with the statements made to him, the mortgage is redeemed at one hundred cents to the dollar, and accrued interest. Here of course comes in one of the most important points, in the selection of the loan banker, and that is his financial responsibility.

To expect a mortgage banker to buy up every mortgage he has written during five or ten years at a moment's notice, would be absurd, but he should have sufficient funds on hand, to take care of mortgages sold, but not yet reinspected by the investor. Such funds are provided for by some loan bankers of to-day, but the fact that they have never been used for the purpose designated proves the presence of another most important requirement in a loan man, and that is his conservatism coupled with exact knowledge of conditions.

Experience as Well as Integrity Needed.

It is not sufficient any more to produce proofs of integrity only, although without them no man deserves the confidence of his fellow-men in any transaction. Experience more than any other qualification has an all important bearing on the conduct of the loan business, but it would be wise, not to accept the age of a concern as a proof of its experience only, other factors enter under that head, namely its records as to foreclosures,, its ability to collect interest so that it will reach the investor on the day it is due, and last but not least the confidence the concern commands, as proven by the type of people whose money it loans.

This latter point is really of greater importance, than a first moment's reflection might indicate. Foreclosures on Western farm lands can easily be avoided with a little caution, since almost any security will enhance in value, during the life of the loan, but the more experienced the investor becomes, the more careful he is, as to the selection of the type of borrower, and the banker that serves him must have a greater power of discrimination than the one that deals only with beginners in the field. It is generally conceded, that the most experienced investors to-day are the life insurance companies, but even among them a difference is observable as to their relative experience by the methods they employ, the valuation they accept, and the type of men they employ as their correspondents.

Requirements of Life Companies Strict.

To be able to satisfy a life insurance company, whose name stands for all that is conservative in the country, is perhaps one of the strongest proofs of all those qualities that make for a reliable loan banker, but nevertheless it would do no harm to the investor to inquire of the insurance company in question.

The road to safety when investing in farm mortgages, has never been more clearly indicated, than in a recent letter of the president of one of the most conservative life insurance companies, who expresses himself as follows:

"We have found this class of investment exceedingly satisfactory, under our system of work, which includes, careful selection of territory, constant inspection by our own men, financially responsible and experienced investment correspondents, and insistence on selection rules as to soil, borrower, market availability and margins."

To be able to meet the requirements thus laid down, many changes had to be made. To-day the report of the examiner o a reliable loan concern hides nothing, and is complete to such a degree, that the investor perusing the same, is able to judge the desirability of the security offered, before ever having laid his eyes on the same, and can and does make his decision then and there.

Obligation of Loan Banker in Negotiations.

Again, remittance does not constitute a sale of the loan with a loan banker of standing, since the loan remains subject to sight draft if a subsequent inspection is not satisfactory. To be able to say that no sight draft of this kind has ever been drawn against a concern in the loan business is a strong recommendation indeed.

The facilities for the safe placing of the investors' money are therefore as great, when considering a farm mortgage as in a bond issue, and scarcely can be compared at all with what one is generally able to find out regarding a corporation stock.

Expects a Broader Investment Field.

It is only a matter of time, when the Farm Mortgage will occupy the position in the investment field, that it can rightfully and logically claim. The only obstacle in the event of that day, it is curious to note, seems to be the apathy of the average banker, towards this class of security. With a little leniency for the frailty of human nature, however, one can understand why he still prefers to recommend a bond or a stock and harps on their convertibility and flexibility and what not.

As To Convertibility of Mortgages.

This argument as to the vitality and lack of convertibility of the Farm Mortgage, is not always fair for whenever a national stringency in the money market has occurred, this has frequently been disproved. The aforementioned authority in the Life Insurance field said: "During the panic in the latter part of 1907 the only elastic or vital form of asset was the Farm Mortgage, the experience of that year being, that the farmers everywhere availed themselves very generally of their prepayment option to cut down the principal of their loan."

The day is not far distant when the investor, instead of listening to oil-tongued promoters of almost any possible and impossible enterprise will keep a good-sized emergency fund in a conservative savings bank, and quietly ascertaining the facts for himself, will buy a good Farm Mortgage as a part of his investments.

The London stock exchange, according to a cable from London, has just listed £696,000 Grand Trunk Pacific fours. This is evidently a comparatively recent issue and was probably sold privately.

CONSERVATION COMMISSION

Issues an Exhaustive Report on Lands, Fisheries, Game and Minerals.

One of the most valuable publications of the year is the volume just issued on Lands, Fisheries, Game and Minerals, by the Dominion Commission of Conservation. The book, representing as it does a great deal of exacting research work, makes available to the average man a mass of instructive and entertaining information otherwise unobtainable by him. As a reference work for the journalist, the student of public questions and the well-informed man on the street, it will be found of no small value. It is a large volume of some 525 pages, substantially bound in cloth and fully illustrated throughout with maps, diagrams and two-color photo engravings.

Notes of Agriculture.

The section devoted to Lands describes the agricultural survey of one hundred representative farms in each province, made by the Commission of Conservation in order to ascertain just what the condition of agriculture is in Canada. Some of the subjects on which information was obtained are: rotation of crops, use of manures, prevalence of weeds and insect pests, water and fuel supply and the use of selected seed. One of the striking facts revealed is that not more than 9 per cent. of the farmers of Canada follow any intelligent and effective rotation of crops. By the adoption of more scientific methods which could readily be put into effect, it is estimated that the field crops of the country could be doubled in twenty years. The report is replete with agricultural information, valuable because it is not hearsay, but a statement of actual facts scientifically obtained by men in the field. An article on Agricultural Production in Canada indicates just what each province has produced of field crops, fruit and live stock since 1891, and also gives crop areas and comparative crop yields.

Fisheries and Game.

The section on Fisheries and Game is a valuable compendium of facts and conclusions by various experts. On account of the frequent disputes over jurisdiction in the case of fisheries between the Provinces and the Dominion an analysis is given of the clauses of the British North America Act referring to fisheries, showing what powers each authority has. Following this is a digest of the Federal and Provincial fisheries laws and regulations.

Mr. James White, secretary of the commission, has an important article in the North Atlantic Fisheries Dispute in which he traces the historical development of the case leading up to the late Hague arbitration, gives the terms of settlement and recounts the advantages accruing therefrom to Canadian fishing interests.

The Oyster Industry.

The Canadian Oyster Industry is dealt with by M. J. Patton, assistant secretary of the commission. The statement is made that Canada pays out annually over $350,000 for oysters imported from the United States, when the natural conditions in this country are excellent for producing all that is required for home consumption. The Canadian output has decreased from 64,646 bbls. in 1882 to 38,535 bbls. in 1909, in spite of the fact that prices have risen 240 per cent. in the past 20 years. This degeneration of the industry is due very largely to the long-standing dispute over jurisdiction between the Provincial and Dominion authorities, which has left the oyster fishermen in such a state of uncertainty as to his holdings that he will not undertake the artificial cultivation of oysters. The article relates the experiments of other oyster-producing countries and shows that the only means of rehabilitating the industry is by definitely settling the jurisdictional dispute so that oyster culture may be confidently engaged in by private individuals.

Fish In the Great Lakes.

Mr. C. W. Gauthier, a practical fisherman, in an article on "Whitefish in the Great Lakes," strongly advocates the establishment of more hatcheries for the artificial propagation of that species of fish. Maps are reproduced showing the area frequented by whitefish in each of the Great Lakes. Following these, is a statistical article on Fish Culture in Canada, which points out that last year only 56 per cent. of the appropriation voted for this purpose by the Dominion Parliament was expended. In other articles the fisheries of Manitoba, Prince Edward Island and British Columbia are described and measures necessary for their conservation suggested.

In the section on Game there is a full description of the game and game fisheries in Nova Scotia, Prince Edward Island, Quebec, Saskatchewan and British Columbia. This portion of the report will be found of especial value to the sportsman in search of good hunting and fishing territory. At the end of the section a statistical article gives the amount of revenue derived from the fishery and game resources of each province.

Section on Minerals.

The Minerals section of the report opens with a summary of the Provincial and Dominion laws and regulations respecting mining. An exhaustive article on the conservation of mineral resources, by W. J. Dick, mining engineer for the commission, takes up each mineral of economic importance in Canada, showing the extent of the deposits, the consumption, and the methods of mining; and recommends measures for conservation. Mining accidents in Canada and in foreign countries are fully dealt with in another article and suggestions are advanced pointing out how the heavy death rate in Canada from this cause may be reduced.

The volume is perhaps the most thorough and complete record of investigation and research that has ever been issued by any government in Canada.

BITTEN BY UNLICENSED INSURANCE,

Mr. E. M. Carroll Claims to be a "Buster" of Unlicensed Companies—As to Settlement of Northern Ontario Losses.

Editor, Monetary Times:

Sir,—My attention has just been called to an article in your issue of August 12th entitled "Bitten by Unlicensed Companies," wherein you attract particular attention to the writer in a rather uncomplimentary fashion and suggest that I am not entitled to any sympathy.

Permit me to call your attention to the fact that I have done more than any one individual in this Dominion to break up "**wild cat**" companies, and it was I who started the action resulting in the arrest and imprisonment of those who were responsible for the situation you refer to. Furthermore, that I do not consider The Monetary Times or any other publication or individual in the Dominion of Canada has a keener sense of wild cat companies than yours truly. There is a vast difference between wild cat and unlicensed and the particular companies referred to in your article were both wild cat and unlicensed. Therefore, when our clients asked us to collect a claim or bust them we had no hesitancy in going the limit. This corporation or its president were in no way responsible for the placing of this insurance, and at no time have we ever placed a policy with a client that has failed to be realized on. It is, therefore, decidedly unfair and unjust for you to make the sarcastic comments that you have. We think we should be crowned with a halo for the success with which we met in busting them all.

Cannot Be Realized.

We might further call your attention to the fact that we have a large number of claims filed with us at the present time as a result of the fires in North Ontario, which as soon as presented to us by the banks interested, we were able to give an opinion that they would not be realized on, and some of these companies are licensed by one or more of the provinces. It might be wise for good and reputable journals in this Dominion to pay more attention to wild cat companies than unlicensed companies. We have quite a number of wild cats here at home without going abroad to expose them, and if you were to see some of the technical excuses and the decidedly uncharitable attitude that many home companies have assumed in the settlement of these North Ontario losses, you would at once realize the fact that wild catting in fire insurance is not confined to the State of Pennsylvania, nor are the operations directed solely by one Frank Anthony, of Brooklyn, N.Y.

To Settle at Twenty-Five Per Cent.

We have right before us at the present time a communication directed to us by one of the very oldest and supposedly responsible institutions of this Dominion, asking us to use our influence with our clients to discount total losses in the North Country at 25 and 30 per cent. Needless to say we are not even referring the proposition to our clients. We consider that owing to the high rates of premium that are demanded in this North Country, averaging 10 per cent. per annum and the delays that the policyholders have been subject to in getting settlements that the attitude of the majority of the companies, and especially licensed companies, has not alone been uncharitable but decidedly crooked, and it would be wise for your good and reputable journal to proceed and expose some of these licensed crooks rather than casting sarcastic reflections upon an institution or an individual who has done as much good as we have as far as fire insurance is concerned.

DOMINION STEEL CORPORATION.

Mr. Fielding and the Wire Rod Bounties—Canadian Jewellers, Limited.

Monetary Times Office,
Montreal, August 23rd.

A strange attitude is adopted in certain iron and steel and financial circles concerning the situation in the Dominion Steel Corporation. A well-known iron and steel man recently remarked to The Monetary Times that, whether the government was defeated or sustained, the corporation would be benefited by fiscal arrangements. He hinted that an announcement had been expected some time since, but that for certain reasons it had been delayed. That it would be made shortly he had every confidence.

A reference of a similar nature is contained in Thornton Davidson & Company's circular to clients this week as follows:—

"Some guess work has been indulged in as to the reason for the support which was given Steel Corporation at around 50, some holding the view that this was a fairly high price unless the bounties were to be renewed.

"We are of the opinion that an announcement will shortly be made which will explain the situation. It is a certainty that a renewal of the bounties would mean an advance in the price of the stock, and a declaration promises to be made in this connection shortly which will be appreciated by shareholders.

"As to the present earnings of the company aside from the bounty, no announcement has recently been made from which it would be possible to form a definite conclusion. A favorable indication, however, is furnished by the last financial statement. The coal department alone was then showing net profits of 2.22 per cent. on the entire common stock of the corporation, and it is stated that these earnings have since been considerably increased. It was announced also that the steel department was doing better, so that, everything considered, Steel Corporation looks to be in a pretty good position."

Mr. Fielding and the Wire Rod Bounties.

What may be behind this and other references which have been made is hard to say, but to say the least, they are interesting in view of the mystery which has surrounded the wire rod bounty for twelve months past, and more particularly since the Reciprocity issue arose at Ottawa. Unquestionably, Mr. Fielding did not go far out of his way to refute or deny the many statements which had been made in the different newspapers, and even by officials of the corporation itself, contenting himself with a statement to the effect that they would be allowed to expire. It is certain that telephone messages were exchanged between some large iron and steel offices in Montreal the day before the final announcement at Ottawa—probably at the time the Budget was brought down—in which renewed aid for the corporation was spoken of as assured. On the strength of this assurance it is known that there was heavy inside buying, and certain it is that there was consternation over what happened at Ottawa.

It is surmised here now that something important took place at the final moment to alter the plans, political exigencies, no doubt, dictating another policy. Mr. Fielding may be reserving the announcement as a weapon when and where it may most advantageously be used. That the aid will be given the industry is accepted here in good quarters.

The whole question would seem to have developed into politics between the iron and steel interests on the one hand and the government on the other, because it should not be forgotten that these interests are, generally speaking, adherents of the other political party. They would as soon have it believed that the defeat of the government is essential to the interests of the Steel Corporation, and consequently would not be eager to forestall Mr. Fielding in any announcement he might have to make which would be of advantage to him.

Meantime, there is good buying of Steel Corporation stock on every decline, and the purchasing moment appears at the moment anyone has anything to offer in the vicinity of 50¼ to 51. This indicates a definite plan rather than accidental buying. The situation in respect to this stock is more than usually interesting, both from a stock market and political standpoint. As to the progress of the industry itself, the market seems badly informed, other than at all reports are of a favorable nature—so far as output is concerned—and labor troubles seem to be disposed of for the time being.

Canadian Jewellers, Limited.

Messrs. J. A. Mackay & Company, of Montreal, are interested in the new Canadian Jewellers, Limited, the incorporation of which, with a capital of $5,000,000, was recently announced. Mr. Henry Timmis, of the Missisquoi Marble Company, Montreal, the original promoter, will carry out the work of organization, while Mr. Mackay will give his attention more particularly to the financial end of the promotion. It is understood that a large number of firms will be taken into the organization. The headquarters will be in Montreal, where it is known that some of the oldest manufacturing firms are being taken in. The stock has been underwritten, but it is not thought that any will be offered to the public at present.

PATENT MEDICINE EXPORTS.

United States Sent Out Seven Million Dollars' Worth of Health Fixers—All the World Takes American Medicines.

Nearly seven million dollars' worth of "patent medicines" were exported from the United States in the past year, and for the past decade the aggregate amounts to more than fifty million dollars. These figures, as compiled from the official records of the Bureau of Statistics, Department of Commerce and Labor, include only that class of exports designated as "medicines, patent and proprietary," of which the exports in 1911 were $6,783,020 to foreign countries, and more than a quarter of a million dollars' worth to the noncontiguous territories of the United States, and do not include the numerous articles exported for use in the preparation of medicines, such as ginseng, which amounts to more than a million dollars annually, roots, barks, and herbs, and other articles of this character.

The popularity of American medicines seems to have grown with their use. Fifteen years ago the value of the exports of "patent or proprietary medicines" amounted to less than two million dollars per annum; in 1900 the total was but three million; in 1905, five million; and in 1911, practically seven million, the total for that year being larger than that of any other year.

Sent to Eighty Countries.

All the world, it seems, takes American medicines, for the countries and colonies to which the seven million dollars' worth of "medicines, patent or proprietary," were sent last year numbered eighty, scattered over every grand division and throughout the islands of the sea. One would, perhaps, scarcely expect to see a large demand in Europe for this class of merchandise, yet the exports to England alone averaged two million dollars per annum during the past three years, while smaller values went to other European countries, many of them being communities in which the chemical industry has attained a high degree of development, such as, Germany, France, and Austria. The larger exports of American medicines of the class under discussion in the fiscal year 1910, included England, over 1¾ million dollars; Germany, 64 thousand; Spain, 55 thousand; France, 36 thousand; and Belgium, 32 thousand dollars. To North America the exports of American made patent and proprietary medicines average about 1½ million dollars per annum, Cuba, Canada, Mexico, Panama, and the British West Indies being the best customers. To Cuba the exports last year amounted to 422 thousand dollars; to Canada, 335 thousand; to Mexico, 190 thousand; to Panama, 115 thousand, and to the British West Indies, 102 thousand dollars.

South America, where the chemical manufacturing industry has not yet assumed importance, offers a steady market for American medicines, the exports thereto exceeding one million, and frequently approximately 1½ million dollars per annum. To Argentina last year's exports of American medicines amounted to 434 thousand dollars; those to Brazil, 377 thousand; Venezuela, 140 thousand, and those to Chile and Columbia, each about 131 thousand dollars.

Of the Asiatic countries, the British East Indies are the only communities where patent medicines of American manufacture seem to have gained a foothold. To India the exports in the fiscal year 1910 amounted to 159 thousand dollars; to the Straits Settlements, over ten thousand dollars, and to other British East Indies, five thousand dollars; while to the Chinese Empire the total was but 30 thousand dollars; to Japan, less than 30 thousand, and to such large communities as Persia, Asiatic Turkey, and Siam, the shipments are relatively small.

Every Section of Africa.

Nearly every section of Africa is represented in the list of countries to which American patent and proprietary medicines are exported, the values ranging from $85,351 in the case of British South Africa to $8,067 in that of Egypt, $4,468 to the Canary Islands, and $100 to Spanish Africa, the figures being in each case those of the fiscal year 1910.

Of the countries classed under "Oceania," Australia and Tasmania is the largest market for American medicines, being credited in 1910 with 302 thousand dollars' worth, compared with 107 thousand to the Philippines, 56 thousand to New Zealand, and less than $1,000 worth to French Oceania.

WESTERN CANADA.

Crop Conditions are Excellent—Good Demand for Money—In the Wheat Markets.

The Monetary Times Office,
Winnipeg, August 22nd.

After a season which brought much rain in some parts, the crop is being finished off with ideal weather, and fields that were green this time last week are now almost ripe, and harvest in most localities is in full swing.

Market gardeners have done especially well round about Winnipeg this year. The season has been a most favorable one for the potato crop. The fields were planted early and most of them have done well. Prices for all fresh vegetables rule high in Winnipeg and there is a good demand.

Mr. A. J. Earling, president of the Chicago, Milwaukee and St. Paul road, and Mr. William Rockefeller, a leading director, passed across the prairie provinces a few weeks ago and declared that the sight of the wheat fields and general prosperity of the country was a revelation to them. These railroad officials were so strongly impressed with the possibilities for business in Western Canada that the road in which they are interested will secure an entrance into Winnipeg at the first opportunity. The Minneapolis and St. Louis road is another system that has been attracted by the great growth of the Canadian West and will build to the boundary, at least, to connect with the Great Northern and Grand Trunk Pacific on this side.

Crop Conditions are Excellent.

Winnipeg business indicates that conditions throughout the West are satisfactory. Wholesalers are receiving large orders for immediate shipment, and there is a better feeling in all branches of trade.

Recent prevalent warm weather has again brought general confidence that the western wheat crop will average about 20 bushels per acre and total around 200,000,000—as against 117,260,000 last year. An estimate based upon reports from 220 districts, places the oat crop at 167,794,800 bushels, barley 27,638,784 bushels, and flax 8,201,700, making a total of over 400,000,000 bushels of grain in the three prairie provinces. The crop may be worth $60,000,000 to $75,000,000 more this year than last.

There is promise of a large lumber business this fall. Building operations have been brisk all season in most parts of the West, and stocks of lumber at country points are rather depleted. The manufacturers are confident that there will be a demand for building material after the harvest.

Good Demand for Money.

In discussing the money situation with the manager of a local loan company last week, The Monetary Times was informed that the demand was very brisk, and that loan companies were placing considerable money through their country agencies, and that first mortgages on city property was also using up a good deal of money. He stated that with the excellent crop outlook now assured, he looked for an easy money market this fall, with plenty available.

Some of the local bankers are of the opinion that money will be fairly tight this fall. The demand for money has not experienced the usual summer lull and customers of the banks have been asking for larger accommodation for purposes of expanding business, and this makes an additional drain on the country's financial institutions.

Probable Fuel Shortage.

Considerable anxiety is felt in the West in regard to the fuel situation, as the trouble with the miners of British Columbia is still on. The authorities have taken steps to give relief by removal of tariff, and the Canadian Pacific Railway have also made a reduction of the freight rate from Port Arthur to points west of Winnipeg.

It is feared that unless the western mines resume operations it will be practically impossible to ship adequate supplies for all purposes from the East. An advice from Fernie, B.C., announces that the unions in that district have voted against the proposition to go to work upon the findings of the chairman of the conciliation board. Other unions have voted, with a similar result, and the deadlock is still on. For lack of coke the Granby Company's mines and smelter are being closed down.

In the Wheat Markets.

The opening days of the past week witnessed a steady reaction in wheat values, following the sharp advance of the previous week. Optimistic crop news was chiefly responsible for carrying prices down, the main consideration being the almost unvarying cheerful reports regarding the Canadian crop, which is admitted to be the most potent factor of the day. Some recovery in prices was made towards the close of the week, due to bullish reports of threshing returns from Minnesota and the Dakotas, and prospects of light world's shipments. In general the trade is showing steadiness to follow news of leadership either way, with a disposition to respond readily to bullish advices, but good buying is needed to sustain values.

General Outlook for Sustained Prices.

The present situation in wheat is pronounced on some hands to be a puzzle and a mystery, as there have been developments which at other times would have resulted in large advances. When the heavy movement of wheat sets in it may easily be that prices will for a time decline, without taking into account the real standing of the world's wheat situation. It is now certain that the world's production will fall short of that of either the two previous seasons, while the requirements will be larger; and, owing to the shortage in other cereals and in potatoes, both in America and Europe, there will be an increased demand for wheat. In the meantime much depends on the maturing and harvesting of the Canadian spring wheat crop, as any serious impairment in that direction would sound a note of alarm.

On our local markets there was a good demand for all grades of cash wheat, and exporters were busy buyers, a brisk business being done. Trading in futures was not so active, owing to uncertainties on the crop situation. There is still a moderate movement of wheat from country points. This movement has been on a much larger scale than expected, and shows that last year's estimates of the crop were largely under the actual yield.

PERSONAL.

Mr. J. H. Plummer is back from England.

Mr. F. B. McCurdy, the well-known stock broker, is to be the conservative candidate at Halifax.

Mr. D. Lorne McGibbon has resigned his position as a director of the Nipissing Mining Company.

Mr. Archibald McPherson, of the Canadian Bank of Commerce, Radville, Sask., died recently at Weyburn hospital.

Mr. H. J. Coleman, of Portage la Prairie, has been engaged as commissioner of the Moose Jaw Board of Trade, his duties to commence next month.

Mr. A. Stanley Henry, who has been connected with the firm of Messrs. Gordon & Shorey, is opening a brokerage office at 112 St. Francois Xavier Street, Montreal.

Mr. Evelyn de Rothschild, a son of Mr. Leopold de Rothschild, of the English house of that famous family, was in Montreal recently, the guest of Mr. C. R. Hosmer.

Sir Donald Mann has left Toronto for the West on a tour of inspection of the Canadian Northern Railway lines, which are already in existence, and which are in process of construction.

Mr. E. C. Lindsay, until recently assistant inspector of Sterling Bank of Canada, is now actively connected with Messrs. Elliott, Sherring & Company, Limited, millinery importers, 37 Wellington Street West, Toronto.

Mr. John R. McLeod, of the McLeod Lumber Company, has become a member of the firm of Messrs. F. B. McCurdy & Company, and the partnership now includes Mr. McCurdy, Mr. Metzler, Mr. Seeley, and Mr. McLeod.

Mr. H. W. Scarff, manager of the Fonthill branch of the Imperial Bank of Canada, has been appointed manager of the east end branch, St. Thomas. He is succeeded by Mr. A. F. B. Murray, manager of the Merritton branch.

Mr. Charles H. Bigelow died last week at St. Paul. Mr. Bigelow was secretary of the St. Paul Fire and Marine Insurance Company from 1871 to 1876, when he was appointed president, which position he held at the time of his death.

Mr. G. T. Allen, secretary to the Australian Treasury, is about to visit England, and will in his journey across Canada, take the opportunity of studying banking legislation with a view to advising his government as to the creation of a Commonwealth Bank.

Mr. John Knight, secretary of the Canadian Bankers Association, is said to be responsible for this:—A man who bought stock in a company, inquired if its value would jump any; he was told it could, and it probably would, provided the price didn't slump any.

Mr. John Adair, manager of the Home Bank in Fernie, B.C., has been appointed assistant manager at Winnipeg, and supervisor of its western branches. He has been connected with the Home Bank for five years, having previously been twelve years with the Canadian Bank of Commerce.

OPENINGS FOR CANADIAN TRADE

In Cuba—Dominion's Apples Are in Favor—Canada's Plums, Peaches and Apricots Unknown.

According to the Canadian Trade Commissioner at Havana, Cuba, Mr. J. E. Ray, there are openings for Canadian fruit and other products at that point. Mr. Ray has interviewed the leading fruit importers of Havana to ascertain the varieties most saleable for various kinds of foreign fruits in the island of Cuba. The following table summarizes some of his points:—

Apples—	Amount.	Duty.
United States	$77,754	From Canada and other countries $0.78 per kilogram.
Canada	5,755	From the United States (Reciprocity Treaty) $0.624.
Plums—		
United States	10,300	Same as above.
Grapes—		
Spain	47,454	"
United States	13,402	"
Other fresh fruits—		
United States	34,552	"
Canada	3,093	"
Prunes—		
United Kingdom ...	6,093	From Canada and other countries $1.95 per 100 kgs.
United States	3,674	From United States $1.56 per 100 kgs.
Dried Apples—		
Austria	553	Same as above.
United States	765	"
Raisins—		
Spain	36,651	"
United States	1,128	"
Other dried fruits—		
Spain	79,360	"
United States	25,635	"
Canada	13	"

Several firms interviewed indicated a desire to purchase Canadian apples, but their experience with shippers in the past forced them to emphasize the indispensability of uniformity in size and color. Too frequently they have found an excellent layer of apples on the top of barrels from eastern Canada, only to find those underneath small and rotting. The Oregon pippin seems to be the standard of excellence, these being retailed at from 10 to 15 cents each. One firm assured the commissioner that they could offer excellent prices if a guarantee could be given that only the very best fruit would be shipped.

The principal source of Cuba's grape supply is Spain. The large, juicy and fleshy Malaga grapes are in great demand here, and are preferred even to the Californian. Apparently Canadians have not attempted to enter the Cuban market, and it is for Ontario shippers to compare their quality with that of the Spanish product. Assurance is given that quotations will be considered c.i.f. Havana. The fruit should be packed in barrels and shipped via New York for the purpose of speedy delivery.

Prunes are purchased from the United Kingdom and the United States. They are usually packed in boxes of 25 lbs. Good prices are commanded.

Plums to the value of $10,000 are imported annually from the United States, but Canadian firms have not given the market any attention up to the present. As such excellent prices are obtainable for plums, peaches and apricots, an attempt to obtain a footing in Cuba should meet with ample reward. It would be necessary to rush them to Havana, so that the only route feasible would be via New York. York.

One firm inquires for the exclusive agency of a first-class exporter of canned peaches. They are continually handling European and United States fruits, but would like to test the Canadian products. Several firms also express a willingness to consider the handling of canned pears, apricots, &c.

There is also a capital market in Cuba for pickles of various kinds in barrels of from 100 to 500 pickles. Quotations should be c.i.f. Interested parties can be introduced to probable buyers by communication with the Canadian Trade Commissioner's office at Havana. The following figures are the latest obtainable:—

Pickles—	Amount.	Duty.
United States	$60,234	From Canada 32′ 5% ad valorem.
Spain	24,929	From United States 22′ 75%.

SEVEN HUNDRED MILLIONS INCOME.

This Was the Amount Received by the New York Life Insurance Companies Last Year—Some Large Figures.

Some big figures are shown in the annual report of the New York Insurance Department, covering the business of life insurance for 1910. The statistics show that the assets of the New York and other States' companies were $3,693,248,328 in 1910, an increase over the previous year of $225,773,507, of this increase $112,334,583 being in New York State companies. The liabilities of the various companies, excluding gross surplus and special funds, were $3,494,714,255, of which $2,062,871,391 was in New York companies. The gross surplus and special funds amounted to $198,534,073, of which $81,342,070 was in New York companies.

Large Total Income.

The total income was $716,652,736, of which $388,708,565 was in New York companies, an increase over 1909 of $7,840,439, the total gross increase for all companies being $25,517,610. The disbursements for the year are shown to have been $495,365,049, of which $365,790,650 was paid to policyholders, while the cost of management, including dividends to stockholders, was $129,574,399.

New York companies issued 382,041 "ordinary" policies in 1910, insuring $678,006,384, as against 342,707 policies issued in 1909, insuring $576,108,902. Companies of other States in 1910 issued 364,987 policies, insuring $757,834,872, while in 1909 they issued 352,415 policies, insuring $708,133,145. Compared with 1909, it appears that there were 51,906 more policies issued last year, and the amount of insurance written increased $151,599,209. There were 882 more policies terminated in 1910 than in 1909, while $7,635,005 less insurance was terminated.

Ordinary Policies in Force.

The total number of "ordinary" policies in force on December 31, 1910, was 6,050,617, insuring $11,669,700,062, an increase in policies over 1909 of 321,740 and in insurance $622,451,317.

The business in force in the State of New York and transacted therein during the past year by all life insurance companies of this and other States, including "industrial" business, was as follows: Policies in force, 5,803,784, insuring $2,563,052,465; policies issued, 925,963, insuring $363,263,781; an increase in insurance in force of $135,198,259 over 1909, and a decrease in insurance written and paid for of $8,756,689.

The total receipts of the department for the fiscal year ended September 30, 1910, were $506,389; the total expenditures were $276,019, an excess of receipts over expenditures of $230,370, which was covered into the State treasury.

The par values of securities held on deposit by the department on December 31, 1910, belonging to the various insurance companies required by law to make such deposits, was $28,254,410.

Does Not Show Large Increase.

While the amount of insurance issued during the year does not show any extraordinary increase, the large increase in insurance in force indicates a most gratifying and healthy business condition.

The material increase in the amount actually paid to policyholders in dividends and also in the amount of the funds apportioned to dividends payable during the current year, the lowering of expenses and decrease in forfeited policies are among the more important factors that go to prove that the business of life insurance, taken as a whole, is at the present time being conducted on a higher plane and is on a more sound and satisfactory basis from all viewpoints than ever before.

◆

COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore in pounds, for the week ended August 18th:—La Rose, 403,560; McKinley-Darragh-Savage, 119,590; Beaver, 123,300; Drummond, 120,000; Trethewey, 48,900; Right of Way, 60,550; O'Brien, 64,040; Cobalt Lake, 61,600; Nipissing, 64,000; Hudson Bay, 65,290; Buffalo, 66,150; Coniagas, 62,760; Kerr Lake, 60,740; total, 1,320,480 pounds, or 660 tons. The total shipments since January 1st are now 31,413,454 pounds, or 15,706 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

LOANS ON LIFE POLICIES.

Discussing the question of loans on life insurance policies with The Monetary Times recently, Mr. William Wallace, general manager of the Crown Life Insurance Company, said that the tendency in recent years has been to afford the policyholder every facility for borrowing, cheaply and expeditiously, on his life insurance investments.

"When the money is required for a practical purpose—to pay further premiums or to purchase a home—every facility should certainly be afforded the insured to realize temporarily, or even permanently, on his policy," continued Mr. Wallace. "From the point of view of the life insurance companies, loans to policyholders are regarded as a good investment, although the loan is usually made to the policyholder at a lower rate of interest than could be obtained on other equally good, if not better, security, such as first mortgages on real estate.

Best Interests of Policyholders.

"It is not always in the best interests of the policyholder that he should be encouraged—by a large loan inducement at a low rate of interest—to pledge or hypothecate his policy, which is or ought to be sacred protection for those dependent upon him. Experience goes to show that the majority of such policy loans are never repaid, with the result that the insurance protection is frequently forfeited when it is most needed. The surrender of the policy in this way is, of course, a source of profit to the company, but it is one of corresponding loss to the policyholder.

"Life insurance companies would really do their policyholders a kindness by restricting, rather than encouraging, the present practice of pledging policies for loans, the proceeds of which are frequently lost in foolish speculation.

Lapsing of Policies.

"The lapsing of life insurance policies through this and other causes constitutes one of the most grievous economic wastes of modern times. The virtue of persistency should be encouraged in every policyholder. It should not be made too easy for him to discount insurance investments originally intended to endure until death."

That there is undoubtedly a tendency to an increase in the borrowing upon life policies is the opinion of Mr. D. Wegenast, managing director of the Mutual Life Assurance Company of Canada. "Until the present insurance Act came into force in May, 1910," he says, "the companies were not required by law to make such loans, but the majority, if not all of them, gave that privilege. In most cases the actual amount that could be borrowed was set out in figures in the contract for each policy year, and this practice is now made compulsory by law. Undoubtedly the recent investigation of the life companies, gave publicity to this privilege, through the discussion in the press, as well as in the House of Commons, when the new bill was under consideration. Many policyholders then for the first time discovered the fact that life policies are good collateral for a loan, and advantage is being taken of it to a constantly increasing extent.

"Run" for Loans During Panic.

"Loans on policies are resorted to more particularly in times of financial stringency. In the long-to-be-remembered panic of 1907, the life companies had such an enormous demand made upon them for loans, that the experience will not soon be forgotten. The American companies, as well as Canadian and foreign companies, doing business in the United States, increased the amount of their loans enormously during the period mentioned. While in Canada the stringency was less severe, and the demand for loans not so great as in the United States, it impressed upon the managers a precaution, not theretofore thought necessary, but now incorporated in the new Insurance Act (sec. 95 (g)), namely, that at the option of the company, a loan may be deferred for a period not exceeding three months, thus preventing embarrassment of the companies by a 'run' for loans during a panic."

Agents Should Discourage.

This company has more than once called attention to the inadvisability of borrowing upon policies. At its last annual meeting, the president said: "It will be observed that the proportion of our assets invested in loans on policies remains the same as last year, though it is to be feared that in many cases, this easy method of raising temporary loans, leads to the policies being surrendered, and the protection taken away from those who need it, especially at a time of distress and want. Policyholders should be slow in taking this means of borrowing, and our agents will do well to discourage it as much as possible."

Loans are Seldom Repaid.

One important feature noted by several companies is that once a loan is made to a policyholder it is seldom, if ever, repaid. According to the latest statistics, nearly 12½ per cent. of the assets of Canadian life insurance business consisted of money which had been borrowed from the companies by the policyholders. The total amount of such loans was $26,000,000. The percentage the year before was about 12 and four years prior to that, 9⅔ per cent. While these figures are fairly large, the New York companies last year paid big amounts. The loan privilege was generally exercised during the panic of 1907, one company lending $14,000,000 and another putting out more than $10,000,000. Since the close of that year, moreover, aggregate loans to policyholders on the books of the three largest New York companies—the New York Life, the Mutual Life, and the Equitable Life—have increased $69,780,763, or 41 per cent.

Increase in Loans.

Comparison with the total of policyholders' loans in 1904 shows an increase of no less than $157,824,000, or 190 per cent. Last year these companies increased loans to policyholders 11¾ per cent., as against a gain of 6⅛ per cent. for 1909, 18¾ per cent. in 1908, and 36 per cent. in 1907. The heavy increase of 1907 reflected the "panic borrowings" by people who were hard pressed by the financial disturbance and the vicissitudes which followed it. Total outstanding loans to policyholders, with the increase for each year, reported by the New York Life, Mutual Life, and Equitable, at the end of the last six years, have been as follows:

	Outstanding Loans.	Increase.
1910	$240,512,000	$25,330,000
1909	215,182,000	12,449,000
1908	202,733,000	32,002,000
1907	170,731,000	45,769,000
1906	124,962,000	22,018,000
1905	102,944,000	20,256,000

Reasons for Borrowing.

What has been the reason for this steady increase in the volume of such outstanding loans? The companies answer unhesitatingly, Extravagance, and the desire of many people to live beyond their means. Officials of one of the companies cited estimate that nine-tenths of the loans are never repaid, but become a charge against the policies at death, if the liens are not foreclosed.

Previous articles on this subject were printed in The Monetary Times of December 3rd, 1910, and February 11th, 1911.

CANADIAN PACIFIC RAILWAY EARNINGS.

The following is a comparison between the Canadian Pacific Railway earnings for 1911 and those for the previous year:—

	1910	1911
Gross earnings	$94,989,490	$104,167,808
Working expenses	61,149,534	67,467,978
Net earnings	$33,839,956	$36,699,830
Net earnings of steamships in excess of amount included in monthly reports	$909,235	$1,118,350
	$34,749,191	$37,818,180
Fixed charges	9,916,940	10,011,071
	$24,832,251	$27,807,109
Deduct Steamship replacement	$900,000	$1,000,000
Pension fund	80,000	80,000
	$980,000	$1,080,000
Net revenue from earnings available for dividends	$23,852,251	$26,727,109
Dividends, etc.	12,382,113	14,853,867
Carried forward from earnings	$11,470,138	$11,873,242
Receipts from lands, investments, etc.	2,426,477	6,602,205
Total surplus	$13,896,615	$18,475,447
Increase for year ending June 30th, 1911		$4,578,832

The annual report of the Vancouver Board of Trade contains much general information of value to those desiring to have figures and reliable data concerning Canada's western port. It contains 128 pages and is well illustrated.

"Capital Investments in Canada"

By FRED. W. FIELD

A New Volume to be Published Next Month by

THE MONETARY TIMES

Price - - $2.50

THREE hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion. Complete details of these borrowings will appear in the above volume, which is about to go to press. In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new book, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

The Book Discusses The

Protection of Capital.
Savings of a Young Country.
Municipal bonusing of industries.
Montreal stock quotations in France.
Payment of Canada's interest charges.
Canadian Banks at home and abroad.
Effect of Immigration on National Finances.
Merits of registered stock *versus* bearer securities.
Investments in Canadian farm, town and city property.
Attention paid to the intrinsic value of Provincial Government securities.
Likes and dislikes of the British, American and foreign investor in Canada.
Capital Liability of Railroads.
Possible dangers to Canadian credit.
Shipbuilding and dry-dock investments.
Dutch interest in Canadian mortgages.
Possibility of a German-Canadian bank.
Relations of purchasers of plant and borrowers.
Practice of selling municipal bonds privately.
Scotch capital in Canada's loan and mortgage companies.
Trade Balances in Canada, Great Britain and the United States.
And a Thousand other Topics of Great Value to all interested in Canadian Investments and Development.

The following are the chapters of the proposed volume—

1. British investments in Canada.
2. American investments in Canada.
3. Foreign investments in Canada.
4. French investments in Canada.
5. German investments in Canada.
6. Other Countries' investments in Canada.
7. Canadian Government borrowings in London.
8. Municipal borrowings in London.
9. The financing of Canadian railroads.
10. Industrial investments in Canada.
11. Investments in Canadian land and lumber.
12. Investments in Canadian mines.
13. Canadian banks, British and foreign capital.
14. Registered stock or bearer securities?
15. Canada's credit abroad.
16. Canadian securities & the British Trustee List.
17. New capital from immigration.
18. The relation of trade to borrowed money.

APPENDICES

1. Canada's share of British capital.
2. Is Canada over-borrowing?
3. Canada and International finance.
4. Editorial comment respecting British, American and foreign capital investments in Canada.
5. List of Canadian flotations in London, January 1905 to April 1911.

THREE INDEXES

The volume is very completely indexed, one index being devoted to personal names, another to companies and institutions, and a third to subjects.

Nearly three hundred companies, Canadian, British and foreign, are referred to, while numerous authorities on the subject of investment are quoted.

Sir Edmund Walker has contributed a prefatory note.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

LaHave, N.B.—August 11th.—Residence of G. A. Siteman burned.

Regina, Sask.—August 19th.—Stable rear of Clayton hotel damaged. Loss and origin unknown.

Wolseley, Sask.—August 20th.—Presbyterian Church damaged. Loss unknown. Origin, lightning.

Gravenhurst, Ont.—August 18th.—Minniwask Sanitarium damaged. Loss unknown. Origin, lightning.

Thurso, Que.—August 22nd.—Convent destroyed. Loss about $20,000, insurance $5,000. Origin unknown.

Coulter, Man.—August 18th.—House of Mr. John McKague destroyed. Loss unknown. Origin, lightning.

Inverary, Ont.—Barns of Mr. Andrew McFadden, Perth Road, destroyed. Loss about $4,000. Origin unknown.

Fernbank, Ont.—August 19th.—Cottage of Mr. F. B. Carling badly damaged. Loss unknown. Origin, supposed hot ashes.

St. Catharines, Ont.—Barn and automobile at corner of Niagara and North Streets destroyed. Loss and origin unknown.

Lindsay, Ont.—August 18th.—Factory of Rider & Kitchener destroyed. Loss unknown. Insurance, $6,600. Origin, unknown.

Three Rivers, Que.—August 19th.—Steam laundry of La Cie de Buanderie a Vapeur des Trois Rivieres destroyed. Loss and origin unknown.

Gilbert Plains, Man.—Stable of Mr. James Strong, seven working horses, two new pumps, harness, etc., destroyed. Loss and origin unknown.

Sarnia, Ont.—August 21st.—Tug "Winslow" of the Reid Dredging Company, destroyed. Loss, about $25,000. Insurance $20,000. Origin unknown.

Grimsby Beach, Ont.—August 17th.—Cottage occupied by Dr. Williams, of Toronto, destroyed. Loss about $2,000; origin, supposed defective wiring.

Bridgetown, N.S.—August 15th.—Barn and house owned by Mr. Charles Rogers, Nictaux, destroyed. Loss about $3,000. Origin, spark from mill.

Kingston, Ont.—August 21st.—Loyst's hotel and two residences at Mountain Grove, destroyed. Loss about $8,000. Origin, cigar stub carelessly thrown.

Fenelon Falls, Ont.—August 21st.—Saw mill belonging to Mr. Thos. Connell. One and a half million shingles were consumed. Loss and origin unknown.

Porcupine, Ont.—August 16th.—Motor launch "Rebo," owned by Mr. G. G. Bullard, destroyed. Loss about $400, no insurance. Origin, gasoline explosion.

Dorchester, Ont.—August 18th.—Barn owned by Mr. W. H. Smith, with season's crop and implements, also one horse destroyed. Loss unknown, origin, lightning.

Chapleau, Que.—August 20th.—Storehouse of Messrs. Panpore & McDonald, and residence of Miss D. Kelly, destroyed. Loss about $15,500. Origin unknown.

Montreal, Que.—August 20th.—Stable rear of 981 St. Denis Street, destroyed, also two horses. Loss and origin unknown. August 22nd.—Basement of 14 St. Sacrament Street, occupied by Mr. G. Lewis, badly damaged. Loss and origin unknown.

Florenceville, N.B.—August 10th.—J. V. Carney's dry-good store; H. P. Gillespie's grocery store; Miller building occupied by Mrs. Gallop and Mrs. Perry; residences of Rev. Father Bradley and E. B. Gallupes; Dr. Hageman's drug store, and several stables. Loss, $25,000. Fire started in J. V. Carney's store.

Sussex, N.B.—August 14th.—Forest fires between Sussex and Penobsquis. Over 1,000 acres of lumber lands destroyed. The principal losers are McIntyre Brothers, Walter McMonagle, Chittick Brothers, Elkanah Hall, Philip Walsh, Harry Morton, Al Freeze, Lisson Brothers, Ed. Wallace and Byron McLeod. At present the fire is on the properties of Harry Morton, Byron McLeod and Al Freeze. Crown lands are also threatened with destruction.

Toronto, Ont.—August 18th.—House of Mrs. Lucy Barry, 63 Triller Avenue, badly damaged. Loss about $700, fully insured. Origin, coal oil stove exploding. Interurban Electric Company Humber Bay, slightly damaged. Loss unknown. Origin, overload of current. August 21st.—Frame factory of Messrs. Clark & Berrewitz, 79 Hook Avenue, destroyed. Loss, about $2,000. Origin unknown. Gunns' Limited, West Toronto, badly damaged, also five refrigerator cars. Loss about $35,000. Origin unknown.

Ottawa, Ont.—August 17th.—The following losses were sustained through fire spreading from stable at rear of 31 Clarence Street. Messrs. Provost and Allard, storehouse and stock; loss $20,000, insurance $15,000. Victoria Hotel, 34-40 Murray Street; owner, Nelson Chevrier; loss $20,000, insurance $10,000. Stables and sheds to rear of 33, 35, 37 and 39 Clarence Street, Mrs. Fox, owner; loss $1,500, insurance $700. Stables to rear of 31 Clarence Street, owner, J. Juteau, George Street; loss $1,000, insurance $500. Stables to the rear of 28 Murray Street, owner, V. Landreville; loss $1,500, insurance $1,000. Stables to the rear of 30-32 Murray Street, and damage to double frame dwelling house occupied by J. Houle and Chas. Theriault, at above address; loss $1,500, insurance $500. Dwelling house at 42 and 48 Murray Street, occupied by Mrs. Delia Paquette and Leon Ferland, and store at 44 Murray Street, occupied by H. Theriault. Damage by fire and water $4,000, insurance $2,500.. Loss totals about $60,000; origin, boys smoking cigarettes.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Florenceville, N.B.—Mr. J. R. Hopeman's loss was $1,600 on buildings. Insured with Norwich Union for $1,000.

Liverpool, N.S.—Tannery of Mr. Edward A. Cowie sustained loss of $3,000, no insurance. Origin, incendiarism.

Toronto.—Toronto Hat Manufacturing Company. Estimated damage on stock, $7,600; on building, $1,400; insured in following companies:—British and Canadian Underwriters, $1,500; Rochester-German, $3,000; Sovereign Fire, $1,000; Aetna, $1,000; Caledonian, $3,000; Fidelity Phoenix, $2,500; Employers Liability, $1,000; Hartford, $2,500; Norwich Union, $1,500; Home Insurance, N.Y., $1,000; Queen, $3,000; London and Lancashire, $8,000; total, $19,000 on stock, and $10,000 on building.

Ottawa, Ont.—The Building Stone & Brick Manufacturing Company, Limited, loss was $500 on stock and $1,500 on buildings. Insured with York Fire for $1,000. Loss allowed and paid, $728. The loss sustained by Messrs. Provost & Allan was $7,318 on stock and $2,645 on buildings. Insured in the following companies:—British American, $7,500; British American, $5,000; Dominion, $2,000; Employers' Liability Association, $2,000; Rimouski, $1,000; Crown, $2,500; Royal, $7,500; Fidelity-Phoenix, $5,000; British & Canadian, $5,000; Royal Exchange, $5,000; total, $42,500. Messrs. Spark Brothers, Limited, loss was $14,000 on stock and $2,500 on buildings. Insured in the following companies:—Phoenix of London, Commercial Union, Caledonian, Phoenix of Hartford, British American, Rochester German, Mercantile.

MORE ABOUT THE CENTRAL RAILWAY.

Sir Richard Scott, one of the original directors of the Central Railway of Canada, which made a bond flotation abroad last month, said in an interview this week:—

"The grant of land, said to be claimed by the Central Canada Railway, referred to this week, evidently refers to the land grant voted by Parliament in 1854 in the building of a railway between Quebec and Lake Huron. In the session of 1861 an act was passed granting a charter to the Canada Central Railway for the construction of a line between Ottawa and Carleton Place to form a link in the contemplated line from Quebec to Lake Huron. It was found impossible to float either the larger project or even the short link before Confederation. The charter granted in 1854 was allowed to lapse, but the charter of the Canada Central was kept alive, and that railway was built in the early seventies.

"The Ontario Government maintained that the land grant had lapsed at Confederation. The question having been referred to the Court of Chancery, the late Sir Samuel Strong gave judgment in favor of the company. The Ontario Government decided to appeal from the Chancellor's decision, but further legal action was avoided by an agreement for a compromise, which was accepted by all parties interested. The basis of the settlement will be found in an act passed by the Federal Parliament in the session of 1874, which confirmed the settlement between the parties interested. The prospectus, said to have been issued in England claiming an asset of 1,300,000 acres of Ontario land, is not based in legal substance."

The Canadian National Exhibition at Toronto will open on Monday, bigger, better, brighter than ever. It is one of the finest annual exhibitions in the world, and one of the few which can show a large surplus on closing day.

WORKMEN'S COMPENSATION.

New Act Becomes Effective in Washington in October —Notes of Its Salient Features.

Adequate protection for employer and employee, increased safety of industrial operations, sure and certain relief for workers injured at extra hazardous occupations, and their families and dependents, elimination of litigation and consequent saving of retainer's fees and court expenses and regulation by State police powers of dangerous trades, are some of the advantages claimed for the Workmen's Compensation Act, which will become effective in Washington on October 1st, 1911.

The theory of the Act, which was adopted by the last legislature, is stated in these words:

"The welfare of the State depends on its industries and even more upon the welfare of its wage-earners."

The new law applies to all factories, mills and workshops where machinery is used and foundries, mines, smelters, powder works, breweries, elevators, docks, dredges, laundries, printing, engineering, logging, lumbering, shipbuilding, railroad and general building operations, street and interurban railroads, electrical, power and heating plants and steamboats.

One hundred and fifty thousand dollars has been appropriated by the State to bear the expense of administering the law, and Governor Marion B. Hay has appointed a commission to have full charge of the industrial insurance work, including the collection of premiums and the adjustment and settlement of claims. The commission, which is composed of George A. Lee, of Spokane, representing the legal profession, chairman; G. A. Pratt, of Tacoma, for the manufacturers and employers, and J. H. Wallace, of Seattle, for the workingmen, has power to create new classes and establish new rates.

Percentage to Pay Roll.

The law provides that each of the industries shall contribute a certain percentage of its pay-roll to an accident fund, from which various sums are paid out for total or part disability or on death to the family and dependents of the injured workman, the expense of handling the fund being borne by the State. Injured workmen, their families or dependents, cannot recover by law except where the injury is caused by the intent of the employer, in which case the workman or his family may recover not only the sums due under this act, but may sue for any excess of damage over these amounts.

Where a workman is injured because the employer has neglected to observe the safeguards by law or by the regulations of the department, the employer must pay 50 per cent. more than the fixed amounts. Where the workman intentionally injures himself he receives no benefit.

The industries of the State are classified and certain premiums fixed for each class. The employers are required to pay three months' premiums into the State treasury on or before October 1, 1911. After December 31, monthly payments are required, provided, however, that if any industry has a sufficient amount on deposit with the State to take care of its accidents no further payments shall be required.

Each industry is responsible only for the accidents occurring in that class. It is intended that the accident fund shall be neither more or less than self-supporting. The rates are subject to re-adjustment, depending on the number of accidents and the need for compensation of injured workmen.

Employers are required to report accidents promptly, and their books, records and pay-rolls must be open for inspection by the commission. Refusal to permit inspection is made a misdemeanor and the employer also is penalized $100 for each offense, to be collected by action in court and paid into the accident fund.

Misrepresentation Makes Employer Liable.

Misrepresentation in his pay-roll makes the employer liable to ten times the difference between the correct and the wrong figures. If the employer refuses or fails to pay his monthly assessments, a workman injured in his service may sue in the courts with the employer's defence of "fellow-servant," "assumption of risk," and "contributory negligence" abolished.

No part of the premium can be deducted from the wages of the workman, the violation by the employer of this section of the law being made a gross misdemeanor, punishable by one year in the county jail or by a fine of $1,000, or both.

The schedule of payments for various injuries is as follows:

In the event of death, expenses of burial, $75; payment to widow or invalid widower, $20 a month while unmarried, $240 in a lump sum on re-marriage of the widow; for each surviving child under 16, $5 a month, monthly amount limited to $35; if no widow or widower survives, $10 a month to each child under 16 years. The same rule applies to children who become orphans by death of surviving parent, with monthly limit of $35. Dependents will be paid 50 per cent. of the average monthly support formerly received from the deceased workman, limited to $20 a month. Parents of deceased unmarried workmen receive $20 a month up to time deceased would have been 21 years of age.

When totally disabled, loss of both arms or one leg and arm, sight, paralysis or other injury preventing the workman from doing any work, entitles him to $20 a month if unmarried; if supporting wife or invalid husband, $25 a month; if the husband is not an invalid, $15. For each child under 16 years, $5 a month additional up to a total of $35. In case of death of the totally disabled workman, the widow or widower receives $20 a month until death or re-marriage and $5 a month additional for each child until 16. Orphan children receive $10 a month.

When partly disabled by the loss of one foot, leg, hand or arm, eye or fingers, the workman will receive a certain cash lump sum up to $1,500. The loss of one arm at the elbow is made the maximum injury and the payment for other injuries is scaled down by the commission. If the injured workman resides or moves out of the State the commission may lump the monthly payments, not to exceed $4,000, based on the Amercian mortality table. Any decision of the commission is subject to appeal in the superior courts.

"It is thought the new system will create a better feeling between the employer and employee," said Howard L. Hindley, secretary of the commission, "and in the end establish the principle of State industrial insurance on a sound and practical economic basis."

ANNUAL MEETINGS.

The following is a list of annual meetings to be held in the near future:—

Company.	Meeting Place.	Sept.
Algoma Central & Hudson Bay Railway	Sault Ste. Marie.	20th
Quinze & Blanche River Railway Company	Ottawa.	5th
Klondike Mines Railway Company.	Ottawa.	4th
Central Railway Company of Canada	Montreal.	4th
Rutland and Noyan Railway Company	Noyan Junction.	6th
Trans-Niagara Bridge Company...	Toronto.	12th
St. Lawrence & Adirondack Railway	Montreal.	6th
Ontario, Hudson's Bay and Western Railways Company	Sault Ste. Marie.	20th
Algoma Eastern Railway Company.	" "	20th
Ottawa & New York Company....	Ottawa.	19th
Quebec Railway Light & Power Company	Quebec.	12th
Montreal & Province Line Railway Company	Montreal.	13th
Central Counties Railway Company.	"	6th

The Banque Internationale du Canada will hold a meeting at Montreal on Monday, to determine the day upon which the annual general meeting of the Bank is to be held; to elect such number of directors duly qualified under the Act not less than five as the subscribers may think necessary, and to transact such further business as may validly be placed before the meeting.

NEW INCORPORATIONS.

Many Large Concerns — Several Small Investment Companies Have Been Granted Charters.

The Montreal Cottons, Limited, with head office in Montreal and capital of $10,000,000, is the largest company to be incorporated during the past week. The provisional directors are Messrs. R. C. Smith, S. A. Lebourveau and R. C. Grant. Another large Montreal concern to be chartered is the Canadian Jewellers, Limited, with capital of $5,000,000. The company is authorized to carry on the business of gold and silversmiths and manufacturing jewellers.

The Tudhope-Anderson Company is a new Winnipeg corporation, with $3,000,000 capital. It will manufacture motor cars, carriage and agricultural implements, and will acquire the assets of the Perrin Plow and Stove Company and the Tudhope-Knox Company, of Orillia.

Other large incorporations are: Toronto City Estates, Limited, Toronto, $3,000,000; Joseph E. Seagram & Sons, Limited, Waterloo, $1,000,000; Elsey Bros. (Canada), Limited, Winnipeg, $1,000,000.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Waterloo, Ont.—Joseph E. Seagram & Sons, Limited $1,000,000. J. Stewart, A. E. Day, A. M. Garden.

Sherbrooke, Que. — Dominion Adjustment Company, Limited, $50,000. W. P. Smith, W. P. Sawyer, M. S. Smith.

Huntsville, Ont.—The Paget Grain Door Company, Limited, $250,000; James E. Fisher, Hart Proudfoot, John Cook.

Drummondville, Que. — Drummond Shirt Company, Limited, $50,000; J. C. Gouldthorpe, W. D. Gouldthorpe, M. Tetreau.

Stratford, Ont.—The Macdonald Thresher Company, Limited, $400,000; John Roger Macdonald, Eliza Macdonald, Hugh Jack.

Sault Ste. Marie, Ont.—Boyd & Tweedie, Limited, $40,000. John Frederick Boyd, Allan Graham Tweedie, George William Goodwin.

Grimsby, Ont.—Sanitary Appliances, Limited, $100,000. Andrew Henderson McDowell, William Lawrence Barnard, Thomas Campbell.

Fort Frances, Ont.—The Wells Hardware Company, Limited, $50,000. John Livingstone, W. Wells, Jas. Thompson Emerson, Stewart Livingstone Wells.

Winnipeg, Man.—Elsey Brothers (Canada), Limited, $1,000,000. S. F. Prest, K. L. C. Prescott, C. C. Eloy. Tudhope Anderson Company, Limited, $3,000,000; F. G. Waters, E. T. B. Pennefather, J. W. Price.

Montreal, Que.—Canadian Jewellers, Limited, $5,000,000; W. F. Chipman, F. G. Bush, M. J. O'Brien. The Raye Finance Company, Limited, $125,000; J. J. Meagher, L. D. K. Stephens, E. C. Le Cavalier. C. & E. Hawkins, Limited, $50,000; R. T. Heneker, W. S. Johnson, W. C. Macdonald. Franco-Canadian Investment and Realty Company, $50,000; G. Porteous, F. G. Bush, G. R. Drennan. Mount Royal Land Company, $500,000; Charles A. Pope, G. Barclay, J. G. Cartwright. The Montreal Cottons, Limited, $10,000,000; R. C. Smith, S. A. Lebourveau, R. C. Grant. Canadian Patent Company, Limited, $50,000; H. N. Chauvin, G. H. Baker, W. B. Converse. Gold Lion Brewing Company, Limited, $249,000; E. Hebert, E. A. Cassidy, J. E. Neveu.

Toronto, Ont.—Motor Sundries, Limited, $40,000; R. G. Codd, R. S. Van Vlack, T. Bancroft. G. A. Stitt Company, Limited, $40,000; G. A. Stitt, J. J. Stevenson, H. Stitt. The Potash Syndicate of Canada, $40,000; W. J. Boland, J. F. Boland, J. C. German. Spanish Securities Company, Limited, $40,000; J. S. Lovell, R. Gowans, E. A. Schmidt. South-Eastern Securities Company, Limited, $40,000; J. S. Lovell, R. Gowans, E. A. Schmidt. The Canadian Potash Company, Limited, $40,000; W. J. Boland, J. F. Boland, J. C. German. Thames Valley Garden Land Company, Limited, $900,000; P. Patterson, H. B. Macdonald, W. W. Barrett. Toronto City Estates, Limited, $3,000,000; C. Kappele, G. H. Hewson, B. Elliott. A. H. Martens & Company, Limited, $40,000; A. H. Martens, W. N. Ferguson, H. Ferguson. The International Potash Corporation, Limited, $40,000; W. J. Boland, J. F. Boland, J. C. German. The North Thompson Mines, Limited, $40,000; Robert Mackay, A. Dods and M. Macdonald. Kew Printing Company, Limited, $40,000; J. Kew, E. M. Kew, C. H. Routliffe. National Railway Association, Limited, $40,000; L. G. Weiss, T. Hueston, J. W. Barlow. Canadian Northern Montreal Tunnel and Terminal Company, Limited, $50,000; G. G. Ruel, S. P. Biggs, A. J. Mitchell. Canadian Sunbeam Company, Limited, $200,000; W. McKennedy, B. Y. Handy, R. S. Morgan. Becker & Company, of America, Limited, $100,000; W. P. Ryrie, F. C Lalonde, A. J. Thomson. British and Colonial Press, Limited, $50,000; Alexander Campbell Batten, M. D. Gray, H. R. Moses.

RAILROAD AND COMPANY EARNINGS.

Increases are Shown in Many Cases—Winnipeg Electric Railway Statement.

Railroad earnings for week ended 14th August:—

	1911.	1910.		Increase or decrease.
C. P. R.	$2,205,000	$1,999,000	+	$206,000
G. T. R.	1,048,062	877,152	+	170,910
C. N. R.	319,700	233,600	+	86,100
T. & N. O.	37,358	31,131	+	6,226
Halifax Electric	5,713	5,419	+	293

The Sao Paulo tramways statement of earnings and expenses for July is as follows:—

	1911.	1910.	Increase.
Tt. gr. earnings	$ 283,441	$ 243,615	$ 39,826
Operating expenses	530,142	487,810	42,332
Net earnings	173,056	153,158	19,898
Ag. gr. earnings from January 1	1,967,694	1,631,040	336,654
Ag. net earnings from January 1	1,233,522	1,038,429	195,093

The Montreal Street Railway's statement shows the July surplus as $9,541, or 7½ per cent. over last year, while for the ten months the surplus shows a gain of $104,946, or exactly 10 per cent. The ten months' figures are as follows:—

	1910.	1911.
Passenger earnings	$3,402,275	$3,785,503
Miscellaneous earnings	88,370	91,207
Total earnings	3,490,645	3,876,710
Operating expenses	2,021,516	2,246,207
Net earnings	1,469,129	1,630,503

The statement of combined earnings and expenses of the tramways, gas, electric lighting and power and telephone services operated by the Rio de Janeiro Company for the month of July, 1911:—

Total gross earnings	$ 980,339	$1,145,938	$ 165,599
Operating expenses	478,810	530,142	42,332
Net earnings	492,529	615,796	123,267
Ag. gr. earnings from January 1	6,023,076	7,253,711	1,230,635
Ag. net earnings from January 1	2,877,281	3,741,579	864,298

The net earnings of the Winnipeg Electric Company in June were $164,100, as compared with $125,292 for June 1910. The total net earnings for the first half year of the Winnipeg Electric amounted to $925,583, as compared with $764,875 in 1910 for the corresponding period. The increase during the six months is $160,708, equal to 21.01 per cent. of the total for the first six months of 1910. The net earnings of the Winnipeg Electric for the whole of 1910 amount to $1,629,508.

The Canadian General Electric Company has issued its report for the year ended December 31, 1910, which compares as follows:—

	1909.	1910.
Operating profit	$625,990	$911,208
Deductions:		
Interest	51,660	76,820
Depreciation	91,093	188,088
Total deduction	142,753	264,908
Balance for dividends	483,237	646,300
Preferred dividends	140,000	140,000
Common dividends	329,000	354,625
Surplus	14,237	151,675

The amount available for dividends on the common stock, $506,300, is equal to 9.39 per cent. earned on $5,392,737 common stock, compared with 7.30 per cent. earned on $4,700,000 common stock last year.

The report of the Canadian Northern Express Company, as filed with the Interstate Commerce Commission at Washington for June and twelve months ended June 30, compares as follows:—

	1910.	1911.		Changes.
Total rcts. from op.	$ 38,869	$ 46,867	+	$ 7,998
Express priv. deb.	15,076	18,246	+	3,169
Total oper. rev.	23,792	28,621	+	4,828
Net oper. rev.	11,451	14,130	+	2,678
Oper. income	11,083	14,148	+	2,292
July 1 to June 30:				
Tot. rects. from op.	386,825	466,087	+	79,262
Express priv. deb.	147,410	178,974	+	31,564
Total oper. rev.	239,415	287,113	+	47,697
Net. oper. rev.	105,374	132,189	+	26,814
Oper. income	103,573	130,648	+	27,075

Mileage: Steam roads 1911, 3,369; 1910, 3,280; other lines 1911, 22; 1910, 22.

TOWN OF COCHRANE'S BONDS.

The fact that the Government of the Province of Ontario has taken the bonds of the town of Cochrane for $21,000 by way of assisting them in their present financial position is perhaps not fully understood or appreciated. The situation in respect to the town of Cochrane is somewhat as follows:

The total outstanding bonds of the town, roughly speaking, would be about $75,000 bearing 6 per cent. and maturing in twenty annual payments. This amount includes $50,000 bonds issued for waterworks and sewers, the proceeds of which were in the bank unexpended at the time of the fire. The fire destroyed the sidewalks, school, town, jail, etc., and to obtain money to rebuild these would be impossible under the present conditions excepting through some action of the Government.

That the province generally is vitally interested in the development of the northern part of the province goes without saying, and the Toronto Board of Trade's action in assisting the town to present to the government their position and a request for financial aid will have general approval. In fact there is no more popular section of the present government's policy than the development of this northern portion of the province. It is acknowledged that every dollar that goes in the way of improvements and settlement in that part of the country will in the end return many hundreds of dollars to the benefit of the province as a whole and particularly to the older portion. It is estimated that the town would require about $15,000 for the immediate construction of sidewalks, etc. They would also require some $6,500 annually for twenty years to meet the interest and maturing payments of debentures outstanding.

As we understand it, the province has agreed to take the town's bonds bearing a low rate of interest and extended over a long term and provide them with their present requirements sufficient to meet this year's outlay and will make some provision for the next few years in connection with the payments due on present outstanding debentures.

It is expected that in the course of three or four years the town will have fully recovered itself, and the Grand Trunk Pacific will probably be about completed and the town and community as a whole will receive much advantage from the general development and by the better railway situation.

The selection of Cochrane as a townsite by the Ontario Government was a good one, and in addition to the advantages gained as the junction of the Grand Trunk Pacific and the Temiskaming & Northern, it is the centre of a large area of excellent land which is being rapidly settled.

The government's action in respect to the proposition might doubtless be summarized as follows: That the town was in no wise responsible for the origin, location or cause of the fire which destroyed the community; that a commercial centre for general business and distribution is greatly needed in that part of the province; that the town was a government townsite in which the government is still largely interested by being owners of a considerable amount of land; that the property of the two railways which amounts in value to about a million dollars does not pay any taxes; that the general feeling of confidence in our northern communities will be restored by the favorable treatment of the town under such peculiar and exceptional circumstances.

◆

The following companies have been registered in Alberta:—The Land and General Investment Company, Limited, with capital of $100,000, and head office at Calgary; the Alberta Farming Company, capitalized at $100,000, and the Consolidated Land and Machinery Company, with capital of $200,000, both of Minneapolis; and the Western Life Assurance Company, capital, $500,000, of Winnipeg.

Mr. John H. Meikle died in Morrisburg this week. He started in the mercantile business in 1855 with his brother, who survives him. Mr. Meikle, who was born in Scotland, was seventy-three years of age and was particularly well-posted in financial matters.

Ottawa, August 14, 1911.

Up to the first of August, our four months' advertising campaign brought to this office 1,113 keyed enquiries, among them being an even 100 industrial propositions and requesting information concerning the investment of funds in industries in amounts ranging all the way from $500 to $10,000.000.

Herbert W. Baker

APPRECIATION OF STOCK VALUES.

That Canadian stocks have experienced large gains during the present year is shown in a table compiled by Mr. T. Kelly Dickinson, the well-known Montreal financial writer. His figures show the advance in twenty-five active securities listed on the Montreal Exchange, from the low points of 1909 to the highest touched during the present year. The twenty-five stocks by no means cover the list of advances. Practically the whole list has made phenomenal advances, though a very few, for special reasons, have had the opposite tendency.

The table shows the great profits made during the past two years, and also indicates that such abnormal advances must have brought the market as a whole near the point where safety ends and danger begins. In a few cases the high prices for 1911 shown in the table have not been maintained to date.

The twenty-five shares in the table have had an aggregate advance of 1,264 points, being an average advance of 50½ points per share.

DEATH OF MR. NAY, REGINA.

Mr. J. W. Nay, the well-known western bond dealer of the Regina house of Nay & James, died this week. Mr. Nay was born at St. Catharines, Ont., thirty-eight years ago. He began his business career with the Bank of Commerce, holding positions at different points in Ontario, and was afterwards for some time at the New York branch of the same bank, where he gained considerable financial experience. Afterwards Mr. Nay moved to different branches in British Columbia, and for some time was in charge of the Fernie branch. He was later in the bank's branches at Yukon where he remained several years, being at White Horse and Dawson City during the gold rush. About eight years ago he returned East and secured a franchise for and installed a gas lighting plant at North Bay, which he operated for two years.

Again Mr. Nay went West, and in 1905, locating in Regina, he entered the municipal and school debentures business and quickly became a factor in financial affairs of that character. He also engaged in a real estate, loan and insurance business, and by hard and persistent work saw his business grow from a small beginning until to-day it is one of the largest in Western Canada.

In 1907, the firm of Nay and James was started, and since that time the business has grown rapidly. Mr. Nay was a strenuous worker, and it is largely due to his efforts that Regina has become known as the financial centre of the middle west. He was second vice-president of the Regina Board of Trade, of which he has been an active member many years. In fact, there was no phase of Regina's welfare with which he did not in his quiet way actively associate himself, and it was with deep regret that the citizens of Regina as well as his many friends both east and west, learned of his untimely death.

BOND TENDERS INVITED.

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials.

Didsbury, Alta.—Until September 1st for $20,000 debentures. J. M. Reed town clerk.

Hull, Que.—Until September 4th for $227,500 30-year 4½ and 5 per cent. debentures. J. F. Boult, city clerk.

BOND DEALERS
Guardian Building, St. James St.
MONTREAL

Mr. T. Williamson, son of J. A. Williamson, of Lindsay, died this week. He had filled responsible positions with the Dominion Bank at Stratford, Strathroy and Toronto, and just prior to his illness was given the management of the Hespeler branch.

Mr. F. H. Jackson, a director of the Bank of England, said in a lecture the other day that the chief criticism made nowadays against the Bank of England is that its gold reserve is too small. It would certainly be more satisfactorily if every note issued by the bank were backed by gold, but to keep such a reserve of gold lying idle would cost, at three per cent., £555,000 a year. The Bank of England already keeps a reserve in cash against all its liabilities of 40 to 50 per cent., and its duty to its shareholders prevents it from incurring this extra cost of a complete gold reserve. The chief circulation medium of this country is now, however, not banknotes, but cheques. Since 1868 the value of the cheques that pass daily through the London Clearing House has risen from £11,000,000 to £48,000,000. In the same period the average value of the bank notes in circulation has only increased from £24,000,000 to £29,000,000, despite the enormous increase in the wealth and business transactions of the country in the same period.

DIVIDEND NOTICES

UNION BANK OF CANADA

DIVIDEND NO. 98

Notice is hereby given that a Dividend at the rate of Eight per cent. per annum has been declared on the Paid-up Capital Stock of this institution for the current quarter, and that the same will be payable at the Bank and its Branches on and after Friday, the first day of September next, to Shareholders of record on August 15th, 1911.

By order of the Board.

G. H. BALFOUR, General Manager

Quebec, July 21st, 1911.

The Canadian Bank of Commerce.

Dividend No. 98.

Notice is hereby given that a dividend of two and one half per cent. on the Capital Stock of this institution has been declared for the three months ending the 31st August next, and that the same will be payable at the Bank and its Branches, on and after Friday, the 1st September next, to shareholders of record of Wednesday, 16th August, 1911.

By Order of the Board,

ALEXANDER LAIRD,
General Manager.

Toronto, 25th July, 1911.

THE CANADIAN PACIFIC RAILWAY COMPANY.

Dividend Notice.

At a meeting of the Board of Directors held this day the following dividends were declared:—

On the Preference Stock two per cent. for the half year ended 30th June last.

On the Common Stock two and one-half per cent. for the quarter ended 30th June last, being at the rate of seven per cent. per annum from revenue and three per cent. per annum from interest on the proceeds of land sales and from other extraneous **assets.**

Both dividends will be paid on September 30th to shareholders of record at the closing of the books in Montreal, New York and London at 3 p.m. on Friday, 1st September next.

All books will be re-opened on Thursday, October 5th next.

By order of the Board,

W. R. BAKER, Secretary.

Montreal, 14th **August, 1911.**

The Toronto Stock Exchange will build a new home on the west side of Bay Street.

CENTRAL RAILWAY BOND ISSUE.

As noted in The Monetary Times several weeks ago, the Central Railway of Canada has appealed to the British and French investor for £1,000,000, undertaking to exchange five per cent. bonds for the money. The London flotation was £600,000, and £400,000 was taken firm in Paris and Canada. The Monetary Times has already described the several attempts to market these bonds since 1906. No word has been received as to whether or not the English buyer has regarded these securities kindly.

In the meantime, it is noticed that the prospectus states that the company was granted 1,300,000 acres of Ontario land in the Ottawa valley by legislation in 1856 and 1860. This legislation was prior to Confederation, and, so far as can be gathered at present, has not been renewed. The Central Railway bond issue becomes more interesting.

◆

The British and American Governments have agreed in detail, and Germany in principle, to the assurances given to Russia and Japan, who complained of the clause in the Manchurian loan agreement providing that future loans should be awarded to the same parties. This Japan and Russia construed to mean a monopoly. It has now been decided by the three powers named, and France is expected also to comply, that either a clause shall be added to the agreement or that an endorsement will be made thereon, giving in detail the purposes for which the loan is to be used and assuring Japan and Russia that the clause complained of does not establish a monopoly in Chinese loans.

DEBENTURES FOR SALE

$589,000.00.

City of Ottawa, Ontario.

Debentures for Sale.

Tenders by registered letter only, addressed to "The Chairman Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa, until 3 p.m. on Thursday, 14th September, 1911, for the purchase of $85,000.00 forty-year debentures, $343,500.00 thirty-years and $160,500.00 twenty years.

They are all a liability of the City at large, and bear four per cent. interest, payable 1st January and 1st July.

Two separate tenders will be received, one for $73,500.00 thirty year debentures, and the other for the remainder of the debentures, $515,500.00.

All tenders must be on the official form.

The tender for the $73,500.00 must be accompanied with a marked cheque for $1,000.00, and the tender for the $515,500.00 with a marked cheque for $5,000.00.

Accrued interest from 1st July, 1911, must be paid in addition to the price tendered.

The $73,500.00 debentures are in $1,000.00 denominations, principal and interest payable in Ottawa.

The remainder of the debentures will be made in Ottawa, New York, or London, at the option of the purchaser, and in denominations to suit.

Delivery of the $73,500.00 can be made at once if required, and of the remainder of the debentures within one month if required.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions and official forms of tender, can be obtained on application to the City Treasurer, Ottawa.

CHAS. HOPEWELL,
Mayor.

Ottawa, 1st July, 1911.

INVESTMENT BONDS

To yield from 5 to 6 per cent.

To investors seeking a larger return on their savings, we recommend a few standard Canadian Industrial Bonds that can be purchased to yield from 5 to 6 per cent. They are well secured both as to assets and earning power.

We would be pleased to mail special circular giving particulars of the different issues on application.

Copy of our weekly circular mailed free on request.

STOCKS AND BONDS— TABLE NOTES

(u) Unlisted.

†Canadian Consolidated Rubber Bond Denominations, $100, $500 and $1,000. Steel Company of Canada, $100, $500, $1,000.

‡Quarterly.

Prices on Canadian Exchanges are compared for convenience with those of a year ago.

Quotations of Cobalt and Porcupine Mining Stocks are those of Standard Stock and Mining Exchanges.

Montreal Steel stocks are commonly termed "Switch" on the Exchange. They are quoted as Montreal Steel in our tables.

All companies named in the tables will favor The Monetary Times by sending copies of all circulars issued to their shareholders, and by notifying us of any errors in the tables.

Montreal prices (close Thursday) furnished by Burnett & Company, 12 St. Sacrament Street, Montreal.

"Capital Investments in Canada."

By FRED. W. FIELD.

(A new volume to be published next month.)

$2.50 PER COPY.

Three hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion.

A series of articles respecting the investment of British, American and foreign capital in Canada is appearing weekly in The Monetary Times of Canada. In response to many requests, the articles, which are from the pen of Mr. Fred. W. Field, Managing Editor of The Monetary Times, and Imperial Trade Correspondent at Toronto, will be reprinted in book form, at a popular price, together with other articles, early in the autumn.

In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new volume, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

Orders for the publication are now being received at the arious offices of The Monetary Times as follows :—

Toronto, Ont.: 62 Church Street.
Montreal, Que.: B. 33 Board of Trade Building.
Winnipeg, Man.: Room 404 Builders Exchange Building.
London, Eng.: Grand Trunk Building, Cockspur Street.

When in London call on The Monetary Times, Grand Trunk Building, Cockspur Street.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

"The Unexpected Always Happens."

Who is there but has had brought home to him the truth of the above statement ? It is always the accident that was least looked for that actually does occur. Nobody is immune from accident. Your experience and observation confirm that fact.

WISE men prepare for such emergencies by carrying an accident policy. The WISEST men see to it that that policy is an Employers' Liability Combination Policy, issued by

THE EMPLOYERS' LIABILITY ASSURANCE CORPORATION,
LIMITED
MONTREAL - - - TORONTO

An Order-in-Council has been passed by the Dominion Government, granting the Polson Iron Works, of Toronto,, a three per cent. bonus yearly for 20 years, on $900,000, which are to be spent in building a new steel drydock and repair shop on Toronto Harbor.

Hon. J. Allard, Minister of Crown Lands, when in Montreal recently, stated that the time for bush fires was over and that the province of Quebec had been through the drought with very slight damages. The only forest fires in the province this year, had been those of Megantic and of the St. Maurice, which had not been very important by themselves, especially when compared to those of past years, or to Ontario this year.

Limited.

DECREASE IN SOO EARNINGS.

As a comparison with the position of the Canadian Pacific Railway might be mentioned in the case of the Soo Railway, control of which is owned by the Canadian Pacific Railway. It may be recalled that the president of the Soo, after a trip through the Dakotas, a year ago, wired back a most depressing report concerning conditions of the country, through which he passed. That he spoke no more than the truth is fairly evident from a preliminary statement of the earnings of the company for the year ended June 30th. From this it is evident that the decrease in revenue for the year just closed was $2,271,272, the following table giving the details of comparison:

Revenue—	1910	1911
Freight	$10,691,434	$8,726,607
Passenger	3,540,577	3,190,563
U.S. mails	345,643	367,337
Express	229,615	266,399
Telegraph	78,401	75,259
Miscellaneous	174,564	193,020
Outside revenue	346,942	316,720
Total revenue	$15,407,179	$13,135,907
Oper. expenses—		
Maintenance way	$1,442,700	$1,427,663
Maintenance equip.	1,568,602	1,817,106
Traffic expenses	284,857	286,769
Trans. expenses	4,315,752	4,326,936
Gen. expenses	276,740	304,688
Total oper. expenses	$7,888,653	$8,163,164
Outside expenses	229,668	212,803
Total expenses	$8,118,322	$8,375,995
Taxes	908,278	839,306
Total expenses	9,026,601	215,301
Operating income	6,380,578	3,920,606

Wisconsin Central's net for the year was $1,807,558, against $2,665,728 in 1910.

Head Office - WINNIPEG, Man.

Branches: Vancouver, Victoria, Calgary, Edmonton, Regina, Fort William

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520,000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum,** so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

NEW SECURITIES FOR HALF-YEAR.

During the first six months of the current year the railroad, industrial, mining and other corporations in the United States have issued new securities to the grand total of $1,229,467,950, an increase of $181,036,000. The railroads were wholly responsible for this increase, their offerings having reached $186,150,550 more than in the first half of 1910. Of this increase fully 50 per cent. consisted of short-term notes.

The following table, compiled by The New York Journal of Commerce, summarizes the half-year's issues, and gives comparisons with 1910:—

	1911.	1910.
Railroads.		
Bonds	$525,435,900	$435,756,440
Notes	253,780,000	158,540,000
Stocks	76,202,000	74,970,910
Total	$855,417,900	$669,267,350
Industrial Corporations.		
Bonds	$189,206,000	$172,943,000
Notes	35,926,000	25,100,000
Stocks	148,918,050	181,121,600
Total	$374,050,030	$379,164,000
Grand total	$1,229,467,950	$1,048,431,950

It is improbable that the investment markets will absorb in the next six months as large a quantity of securities as was put out during the last six months, for there are even now signs of mild congestion at home.

European subscriptions for American securities have been very important, but of late the flotations in foreign centres have been so large that the markets there have become congested. It is scarcely likely, therefore, that for some time New York underwriters will be able to find an outlet for their offerings abroad. A goodly proportion of Europe's investable capital has come to Canada, especially for industrial purposes.

INVESTMENT AND LOAN COMPANIES

BRITISH COLUMBIA

The Land of Successful Investments.

No Province or State in the World is attracting more attention from the investing public than British Columbia, and no country is more worthy of their attention.

The development of British Columbia's immense natural resources has made and will continue to make millions for discriminating investors.

MINING COMPANIES TO CONSOLIDATE.

The stockholders of the Ontario Silver Mining Company and the Daly Mining Company, Park City properties, will shortly receive notice of special meeting to be held in Salt Lake, Utah, to pass on consolidation plans. The Daly meeting will be held on September 20 and the meeting of the Ontario company will be held on October 10.

It is proposed to form a new company capitalized at $1,500,000, divided into 300,000 shares at $5 each. The Daly company is to receive 75,000 shares for its property and 150,000 shares are to go to the Ontario. The remaining 75,000 will be placed in the treasury. A statement of the holdings and financial standing of the companies will also be issued at an early date.

◆

The Bank of Nova Scotia has increased its dividend from 13 to 14 per cent.

President Taft has sent to the House of Representatives, Washington, a special message vetoing the wool bill enacted through the Democratic-Insurgent combination. Mr. Taft, as has generally been predicted, vetoes the bill on the ground that he has no scientific information on which to act. The President indicated clearly that he will veto every tariff bill sent to him in advance of a report by the tariff board.

THE WATEROUS ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

The Waterous Engine Works Co. Ltd.

LIFE ASSURANCE COMPANIES

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 1st day of August, 1911, incorporating Gerard Brakenridge Strathy and Molyneux Lockhart Gordon, solicitors; John Fraser MacGregor, accountant; Joseph Edward Riley, law clerk; James Boyd Moon and John Richard Corkery, students-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To buy, sell and deal in iron, steel, bronze, brass and other metals, the ores thereof, and wood and other materials; to carry on, operate and run foundries and works for the manufacture of iron, steel, bronze, brass and other metals; to manufacture, erect, buy and sell iron, steel, bronze, brass and other metal work and materials for buildings, bridges and structures of all kinds; to manufacture, erect, buy and sell machines, implements, tools, safes, vaults, vault fittings, shelving, locks, and articles or products made wholly or partly of said metals; to manufacture and erect, build, construct, and repair, under contract or otherwise, buildings, bridges and structures of all kinds, and for such purposes to carry on a general engineering and contracting business; (b) To purchase, lease, or otherwise acquire, hold, own, sell or otherwise dispose of any and all real estate and personal property; (c) To apply for and maintain, register, lease, acquire, and hold or to sell, lease or otherwise dispose of, and grant licenses in respect of or otherwise turn to account any patents, brevets d'invention, improvements or processes, trade marks, trade names, and the like, grants, licenses, leases, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to inventions and any formulæ and secret processes which may seem calculated to benefit the company; (d) To acquire by purchase, lease, hire, exchange or otherwise any rights or privileges which may be necessary or useful for the carrying on of the business of the company; (e) To lease, sell, improve, manufacture, develop, exchange, turn to account or otherwise dispose of any or all of the property and assets of the company for such consideration as the company deems fit, including shares, debentures or securities of any other company; (f) To acquire, purchase or assume all or any part, including the good-will of the business or undertaking, or the property or assets, privileges, contracts, rights, obligations, and liabilities of any company, person or persons carrying on any business which this company is authorized to carry on, or any business similar thereto or possessing any property suitable for the purposes thereof and to pay for the same, wholly or in part in bonds, debentures or fully paid and non-assessable stock of the company, and to sell, lease or otherwise dispose of the same or any part thereof; (g) To enter into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on any business or transaction which this company is authorized to engage in or carry on, or to amalgamate with any such company; (h) To acquire, purchase and hold the stock or shares of stock in, or debentures or other securities of, and any other corporation carrying on business similar to that which this company is authorized to carry on; (i) To issue paid-up shares, debentures stock, debentures, bonds or other securities of the company in payment or part payment for any property, rights, or easements which may be acquired by, or for any services rendered or agreed to be rendered, or work done or agreed to be done for the company, or in or towards the payment and satisfaction of debts or liabilities owing by the company, or for raising money for any other purpose ot the company; (j) To invest the moneys of the company not immediately required in such manner as may from time to time be determined; (k) To distribute among the shareholders of the company in kind any property of the company, and in particular any shares, debentures, or securities in any other companies belonging to the company or which the company may have power to dispose of; (l) To carry on any other business, whether manufacturing or otherwise which may seem to the company capable of being conveniently carried on in connection with its business, or calculated, directly or indirectly, to enhance the value of or render profitable any of the company's property or rights; (m) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (n) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, warehouse receipts, bills of lading, warrants and other negotiable or transferable instruments; (o) To adopt such means of making known the products of the company as may be expedient; (p) To do all or any of the above things as principals, agents, bailees, contractors, trustees, or otherwise, and either alone or in conjunction with others; (q) To do all such other things as are incidental or conducive to the attainment of the above objects; (r) The powers in each paragraph are to be in nowise limited or restricted by reference to or inference from the terms of any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Snead and Company Iron Works, Limited," with a capital stock of forty thousand dollars divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 3rd day of August, 1911.

THOMAS MULVAY,
Under Secretary of State.

Lloyds Bank (France) Ltd., has been formed with a nominal capital of £250,000, in 5,000 shares of £50 each, under the auspices of Lloyds Bank, for the purpose of taking over the business of Messrs. Armstrong and Company, of 19 Rue Scribe, Paris, and Havre. The business was formerly carried on under the style of Kane and Company, and has been in existence for about fifty years altogether. There will be no public issue of shares. The directors of Lloyds Bank recently announced that they would pay greater banking attention to Canada.

The Laurentide Paper Company proposes to double the capital, giving the present shareholders two shares of new for one share of old stock. It is proposed to sell all the assets and goodwill of the company to a new company incorporated under the name of the Laurentide Company, Limited, and to accept in payment therefor the shares of the new company of the aggregate value of $7,200,000. The shareholders meet on August 30th to ratify the change. No mention is made of the dividend, but the price of the stock indicates that it will be six per cent. on the new shares, or equal to 12 per cent. on the old.

TO INVESTORS

Brandon, Manitoba

and surrounding territory presents to **Intending Investors**, large and small, the best possible opportunity at the present time (now) to realize large returns quickly.

Brandon Real Estate has never been boomed as other Western cities have, consequently prices are low comparatively.

With hundreds of thousands of dollars being spent in paving and other civic improvements.

With a million dollars' worth of contracts already let for private enterprises this year, Brandon is sure to forge ahead and increase greatly.

Brandon is the place for the conservative investor.

Correspondence solicited.

LAWSON WAXES ELOQUENT.

Mr. Thomas W. Lawson has returned to Boston after a trip to Canada. "Opportunities," he said in an interview, "lie unheeded along the railroad tracks, on the mountain sides, in the gutters, crying to be snatched. Opportunities are as plentiful as the leaves upon the trees, as the fish within the bounding brooks, as the grass upon the earth.

"Western Canada offers the greatest opportunities. Out there they have actually put into practice the things that I have been advocating for years in banking, in insurance, in taxation—in everything.

"Western Canada is being run for the people. The people will own Western Canada—all of the people, instead of one or two rich men.

"The wealth is in the land, and land is to be had for the asking. Let me give you an example of the opportunities. In nine days I was the recipient of 638 propositions, and every one of them A-1, gilt-edged, aged-in-the-wood propositions!

"To tell you the truth, my head is so full of the West that there isn't room for much of anything else. To my mind, the far western United States and Canada—and especially Canada—is the most wonderful section of the world. When Horace Greeley told young men to go West, he was right. He would be right in exactly the same degree if he were alive and said the same thing. I say again that any young man who doesn't go to a ticket office and buy a ticket to the far west, with its glorious opportunities for the people—the masses—ought to be locked up, for he is committing a crime against himself."

◆

RAILROADS AND FIRES.

New fire regulations in regard to railroad operation and construction have been passed by the provincial government of British Columbia. The first of the rules, to which the others are largely incidental, is as follows:

"During construction, the right-of-way of every railway shall be cleared of all trees, logs, brush and other perishable matter. Logs specially reserved to be made into ties, timber or cordwood must be removed within a reasonable time. All other inflammable material must be piled as near the centre of the right-of-way as possible without interfering with the construction of the roadbed, and burned under permit from the provincial fire warden. Before issuing any such permit the warden must be sure that ample precautions have been taken to render such burnings safe."

There are also provisions that every locomotive shall be equipped with an extension smoke box, fitted with netting mesh; that the ashpans on locomotives shall be covered with heavy sheet iron dampers, and that wire screens must be fixed in the windows of all smoking compartments from April to October, inclusive.

"CAPITAL INVESTMENTS IN CANADA" IS A NEW VOLUME TO BE PUBLISHED NEXT MONTH. SEE ANNOUNCEMENTS ELSEWHERE IN THIS ISSUE.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

Irish capitalists intend establishing a flax mill for the utilization of flax and flax straw for binder twine and other purposes in Calgary at an early date.

The city of Montreal is inviting tenders for $7,000,000 forty-year, four per cent. registered stock or coupon bonds. Bids will be received for the whole or part until September 18th. The loan is required for the following purposes:—For working capital, $1,000,000; for water filtration, $1,500,000; for public works, etc., $4,500,000. Tenders are also invited for a special loan of $350,000, four per cent. coupon bonds for construction of schools. The following are some civic statements: Assessed values in 1910, $320,000,000; exempt values in 1910, $110,000,000, of which city owns (at cost), $20,000,000; revenue in 1910, $7,000,000; rate of taxation, one per cent.; school tax 2-5 ms. to ½ per cent. Borrowing power is limited to 15 per cent. of the assessable values. Tenderers may be present, or represented, at the opening of the tenders, at the above mentioned place and hour. Further information, if required, can be obtained on application.

Mr. E. F. Hebden, general manager of the Merchants' Bank is touring the West.

Mr. T. F. How, general manager of the Bank of Toronto, is on a trip to the Pacific coast.

Mr. W. E. Rundle on October 1st will assume the duties of general manager of the National Trust Company. Mr. W. T. White will continue his active connection with the company as vice-president.

Surveys have been started in connection with the plans of the Prince Rupert Hydro-Electric Company, which proposes to supply electricity for light and power to the new town in the north. Canadian capital is behind this enterprise, the president being Mr. Charles H. Cahan, K.C., of Montreal, who is president of the Western Canada Power Company, developing a power on Stave River, near Vancouver. Mr. R. F. Hayward is general manager of both concerns. About two million and a half dollars will be spent within the next four or five years at Prince Rupert to develop power on the Kahtada River, 42 miles from the city. On Exaw River, 28 miles from Prince Rupert, is another power, but this may be developed later.

The first definite announcement of what the Great Northern Railway will do in Vancouver has been made by Mr M. J. Costello, general traffic manager of the road. He says the expenditure of between $7,000,000 and $10,000,000 is contemplated within the next two years. Large piers will be constructed on the waterfront property on Burrard Inlet, two of which will be leased, one already having been arranged for by Messrs. Balfour, Guthrie & Company, which does a large shipping business on the Pacific coast. The largest of the three will be used by the Great Northern itself, and Mr. Costello declares that the Minnesota will be docked at their own wharves in Vancouver before the Panama Canal is completed. The G.N.R depot will be the best of its kind in the West. This is saying a good deal, for the stations recently built at Seattle are gems of their kind. Mr. Costello pointed out that business had been better than looked for in this territory and that to take care of the expansion elaborate preparations have to be made.

POLICIES ISSUED ON ALL APPROVED PLANS

CONTINUAL AND INCREASING SUCCESS

When The Great-West Life closed the books midway through the year, JUNE was the best month on record.
July was more successful still.
August will undoubtedly be the best August on record.
The year promises to make another "record."
This success has but one explanation. People see the VALUE of the Great-West Policies—then buy.
Examine these Policies.
Information mailed on request.

Buying Investment Securities by Mail

We wish to impress upon you the fact that you can do business with us—and with the utmost satisfaction—no matter where you live and no matter how small or large the amount of funds available for investment. Wherever the mails go we can do business.

The requirements of individual investors differ so widely that it is out of the question preparing a number of cut and dried suggestions that will meet the requirements of all who make inquiries regarding investments. For this reason we ask intending investors to give us an idea of the amount of funds they have available for investment, whether they desire Government bonds or municipal debentures, high grade bonds or stocks. In many cases investors leave this point entirely to our decision. In such cases we are guided by the circumstances of those making the investment. Each inquiry receives careful, personal attention. We take pleasure in answering all inquiries regarding investments.

INVESTMENT AND LOAN COMPANIES

SAFETY OF PRINCIPAL; CERTAINTY OF INTEREST.

A writer in one of our financial journals recently said that real estate mortgages combine the two great essentials of a conservative investment—safety of principal and certainty of interest.

To those who have funds for investment only in small sums, this most desirable class of security is not directly available. They may, however, secure all these advantages by investing in the Bonds of this Corporation, which are based on upwards of twenty-seven million dollars of carefully selected first mortgages on improved real estate. These Bonds may be had in denominations of one hundred dollars. They are a security in which Executors and Trustees are expressly authorized by law to invest Trust Funds.

Send for specimen Bond, copy of Annual Report and full particulars.

Review of the Month 1024

SIR WILLIAM WHYTE.

At sixty-eight, the strenuous man requires a rest. Some think forty-five and fifty old enough to retire from the brunt of business battle. Sir William Whyte is within two years of three score and ten, and has decided that at the end of the month he will endeavor to think less about the technicalities of running the Western Canadian section of a big railway. Since 1897, as vice-president of the Canadian Pacific Railway he has managed their lines west of Fort William. It is difficult for a transportation genius such as Sir William to disentangle himself from the web of railroad steel which he has helped to spin. So it will not be an easy task to drop a railroading experience of nearly half a century to fritter away time and think of past achievements and in pacing the deck of semi-idleness. Even had Sir William a strong desire along that line, the Canadian Pacific Railway directors would still like the benefit of his counsel.

When the Western vice-president reached mile-post sixty-five on the railroad of life he was approached by Sir Shaughnessy, the president, and requested to remain in office a few years longer. This was a remarkable compliment to the vice-president, for those who preside over the destinies of big railroad corporations think that at sixty-five the usefulness of their officials should be rewarded by retirement. Here are the words of Sir Thomas himself in making the announcement at Winnipeg this week:—

"The period at which the connection of Sir William Whyte, of the company, might have been severed under the regulations was three years ago. At that time, at my urgent request and solicitation, he consented to remain in the service of the company a few years longer. Sir William has now advised me that he has decided to retire and to spend the balance of his life in rest. It has consequently been agreed by the board of directors that he should retire from the active control of the lines in Western Canada on September 30th next. The Canadian Pacific will not, however, lose the great benefit of the experience of Sir William. It has been decided that he be elected to the board, and he will continue his service to the company in that capacity."

Thus Sir William Whyte, whom King George made a Knight Bachelor in June, becomes a member of the Canadian Pacific directorate His great interest in the welfare of the line will thus be maintained as it would have done anyway.

Sir William's career in Canada has been yet another example of what can be accomplished by a plodding individual who chooses a particular avocation and sticks to it. Born in Scotland in 1843, he came to Canada as a young man of twenty years of age. After seven years' service with the Grand Trunk Railway he was made freight agent at Stratford, and later promoted to London. In 1881 he became assistant superintendent of the central division from Kingston to Stratford, but in 1883 he resigned and became general superintendent of the Credit Valley Railway. He then became connected with the Toronto, Grey and Bruce Railway, which later became part of the Canadian Pacific system. In 1886 he became general superintendent of the western division, and in 1897 he was manager of Canadian Pacific lines west of Fort William. He is also a director of the British Columbia Southern Railway.

Somehow Sir William has always been regarded as a Western man, although in close touch with the chords that vibrate the national commercial system. He likes the West. He knows its problems intimately. Only a few months ago he gave The Monetary Times his views on what he termed the "wheat madness" of the Western Canadian farmer? His advice is worth repeating:—

"There is one bad feature," he said, "in connection with farming in the three prairie provinces, and that is that the farmers are 'wheat mad'; that is, they are devoting the whole of their time and attention to the growing of wheat to the exclusion of dairy products. As an illustration: the Canadian Pacific imports nearly all chickens used in its dining cars and hotels from the United States. Eighty carloads of eggs came into Winnipeg from the United States last year. That represents twelve millions of eggs. We are now importing cream into Winnipeg from the United States. Celery and other vegetables are imported, and butter is not infrequently imported from Ontario.

"This condition of affairs is to be deplored, because the money that is sent from this country into the United States for articles that can as well be produced in our own country is a great loss to the country, but so long as the farmer can make the growing of wheat profitable he will not, I fear, turn his attention to mixed farming, because there is less labor attached to the growing of wheat than the mixed farming. The wheat-growing farmer, after he has disposed of his wheat, has no further responsibility on his farm, except the care of his horses, and this can be taken care of by a hired man, whereas if he was following mixed farming to any extent he would have to live on the farm all the year or hire a responsible man to look after the care of the pigs, cattle, poultry, etc."

It is good to know that Sir William Whyte will still be among his friends, both Eastern and Western, that he will still remain as a friend and counsellor of the Canadian Pacific Railway and of the people of Canada. There is every wish for the restful period of life which Sir William has so well earned.

But it may be that that period will be spent in the office of the High Commissioner for Canada in London.

INDIA AND THE SILVER MARKET.

The drought in India, which has affected half the country and made famine measures necessary on the part of the government, will have other effects than the probable postponement of the Durbar. The Cobalt camp has some interest in the situation in view of India's prominence as a factor in the silver market. Three months ago the Indian government, it was thought, would enter the market again as a buyer of silver, but the prevailing conditions may prevent their entrance. The monsoon rains have failed and the planting season is most unpromising.

As is known, the natives hoard silver, and at this time are likely to pay their taxes and other demands from their hoards, which will give the government most of the supply needed. The following table gives details of Londons exports of bars to the Far East, including India and China, together with corresponding influences affecting prices of silver in pence:—

Year.	Av. price in pence.	London exports.	Influencing events.
1902..	24 1-16	£7,565,305	Boxer war; silver falls
1903..	24¾	8,051,780	India buys heavily.
1904..	26⅜	10,038,319	U. S. buys for Philippine coinage.
1905..	27 13-16	8,643,405	Mexico stops free coinage; India buys more.
1906..	30⅞	15,565,334	U. S. & India buy silver.
1907..	30 3-16	12,752,230	India Govt. stops buying.
1908..	24⅜	10,243,968	General depression.
1909..	23 11-16	8,936,765	Big cotton crop.
1910..	24⅝	8,700,000	Big wheat crop.

It has been suggested that with the discouraging prospects in India, the prime hope of silver values may yet rest in the revival of trade and industry in China and elsewhere.

ON KEEPING UP-TO-DATE.

If the action of Mr. D. D. Reid, of North Toronto, goes forward as history, the cause of Canadian municipal credit will not be assisted. This gentleman has proposed that the local tax rate should be reduced from 20 to 18 mills by providing in this year's collection for only one half of the first year's principal and interest of the sewerage debentures. Mr. Gibson, the town's solicitor, declared this illegal, and, despite the protest also of Mayor Brown, the scheme was adopted by four votes to three. The sewerage work is being done this year, and the first principal and interest payment is due in February. The money should, therefore, be provided this year. Mr. Reid observed that one would never be out of trouble if solicitors' advice was taken. On the other hand, by refusing to accept the legal view in a matter which has a close bearing upon municipal credit, Mr. Reid may be leading North Toronto to future trouble. The whole thing looks like an attempt at tax reduction heroics and false economy. The enterprising town financier may be advised, "Reid, mark, learn, and inwardly digest."

AN INTERNATIONAL RENDEZVOUS.

Canada is becoming an international rendezvous. This week we have had Lord Charles Beresford, Lord Desborough and the Duke of Sutherland, who are combining the pleasures of yachting with business and investment. Professor Koebner, of the University of Berlin, has been studying our banking system on the spot. Mr. Henry L. Riseley, of Bristol, England, is making another trip to various points in the Dominion with a view to furthering trade relations between the West of England, the port of Bristol, and Canada. A party of Ohio newspaper men have been doing the West in typical Yankee style, and a troop of well-seasoned British editors are trying to take as big a mental dose of the whole Dominion as time and sleep demands will allow. In addition an army of engineers, architects, railroad directors, captains of industry, capitalists and investors from Europe and the United States are making cross-continent and overseas journeys to Canada a part of the month's business. These are good signs.

BRITISH INSURANCE MANAGER DISMISSES OFFICIALS

Of United States Branch and Places in Charge Pro Tem. Manager of Canadian Office—"General," of Perth, Scotland, is Having Strenuous Times—Dismissed Officials Commence Suits—Trouble Started by State Insurance Commissioners' Report.

All has not been well with the United States branch of the General Accident Fire & Life Assurance Corporation, Limited, of Perth, Scotland. The result is that the New York State Insurance Department has made an examination of that branch, and a report in which several uncomplimentary reflections are made. This report was submitted to the National Convention of Insurance Commissioners in New York on August 2nd, and adopted by them. General Manager F. Norie-Miller arrived in New York from Great Britain on August 19th, and immediately commenced a housecleaning along the lines suggested in the report. Indeed Mr. Miller's actions were all in keeping with the good reputation which the big British company has enjoyed. Many of the officers of the American branch have been dismissed, and Mr. Claude Norie-Miller, of Toronto, manager of the Canadian branch, has been appointed United States manager pro tem. Finally comes news of suits brought by the dismissed officials.

The New York State Insurance Superintendent's report says in part:—

"The General Accident Fire and Life Assurance Corporation was organized under the laws of Great Britain in 1891. Its United States Branch, through a deposit in 1899 of $250,000 is, so far as this country is concerned, in effect a New York corporation, though its principal place of business is in the city of Philadelphia. Though thus domiciled in New York for the past twelve years, this company has never been previously examined by this department.

"As a New York company, this foreign corporation has the right to do a general casualty business, the same including accident, health, liability, burglary and automobile insurance. Its important lines are accident and health, and liability. As an American corporation, however, the General Accident, unlike its competitors, is bifurcated in its organism and management. Its health and accident business is conducted in two departments—one called the commercial and the other the industrial; over one of these departments is the United States manager; over the other is the United States industrial department manager. In theory, the United States manager is the president of this company as an American corporation. In practice, in the health and accident field, it has two heads, one a little larger than the other, but each apparently independent of the other, save, as will be seen, when an insurance department becomes inquisitive as to methods.

Is Entirely Solvent.

"This examination shows that this company, as an American corporation, is entirely solvent, and, aside from its industrial department, managed in a way to entitle it to official commendation. The policy of its industrial department, particularly in the settlement of claims, and again particularly in the adjustment of death claims, calls for emphatic condemnation and requires immediate reformation if this company is to continue to do business in New York. Hence, both to inform the public as to such methods, and to give proper warning to other companies in the same field, the following review of this company's transactions as an industrial health and accident company is made.

"As already indicated, the industrial department of this company is so far separated from the company itself, as represented by the United States manager and the American advisory committee, as to be, in effect, a separate corporation. Even the mail addressed the corporation itself is, so far as possible, marked by the sender, to the end that the industrial department's mail shall be delivered to it without being opened in the general office; while industrial policies are not valid unless countersigned by the industrial department manager, nor, it is claimed, is notice of disability or death under such a policy good if it is given to the general offices of the company and not to the industrial department itself. We have, therefore, a condition whereby a corporation responsible to this and thirty-seven other supervising departments—it being admitted to do business in thirty-eight of our states and territories—apparently has within itself another corporation responsible to the home office of the company in Scotland, but, seemingly, save in extreme cases, under no control, so far as the United States manager of such corporation is concerned.

Operates From Philadelphia.

"The industrial department of this company operates from Philadelphia. Its home office force is large. Such office has the usual bureaux of divisions of executive, agency, claim, accounting, policy, legal and the like. A fact worthy of note as fixing the responsibility for existing conditions is that at the head of several of these bureaux, or at least occupying places of influence therein, are relatives of the industrial department manager. Thus, Charles H. Boyer is such manager. His wife is the superintendent of agencies. His brother, J. B. Boyer, is at the head of the legal bureau. His brother-in-law, J. C. Steinbach, is assistant to the chief of the claim department. Another brother-in-law, Geo. H. Summers, is at the head of the policy department; while J. Warren Isett, a cousin, is at the head of the accounting department. Another significant fact is that the industrial department manager, whose family is thus apparently in charge at the home office, is largely compensated through a profit-sharing contract, under the terms of which such manager receives 15 per cent. of the net profits derived from the industrial business, based upon the premium income, expenses, loss payments, etc. He thus shares financially in all gains which may be made through adjustments in the claim department. His profits under this contract in 1910 were $14,564.85, while his flat salary was $4,800."

Ignorant of Practices.

The report states that the company's agency force is very large. It quotes considerable correspondence to show that much delay occurred in settling claims. It continues:—

"It is asserted on behalf of the industrial department manager that, until this examination, he was ignorant of these practices; that he now condemns them and will do everything in his power to make amends for the wrongs which have been done. As to the future, the views of this department will be expressed a little later. As to the past, it is not prepared to grant absolution. There is enough in the quotations from letters and memoranda contained in what precedes to indicate that the industrial department manager was, to a considerable extent at least, cognizant of what was going on. His family and himself are practically in control of, or emphatically influential in, every function of the industrial department's work. That their chief is largely interested in savings—not only through adjustments, but in other ways—is clear, from the nature of his profit-sharing contract. Irrespective, therefore, of his technical responsibility as the head of this department, he is, in my opinion, chargeable with the conditions and results here enumerated."

Names Others Responsible.

Others responsible for the conditions noted in the report are named by State Insurance Superintendent as Mr. J. J. Krist, manager of the weekly premium branch of the industrial department; W. I. Mullen, chief adjuster; J. C. Steinbach, next in line to Mullen, and J. B. Boyer, head of the legal department of the branch. The report is very sarcastic in referring to these gentlemen. Of Mullen, it says: "More than any other man at the head office (United States) he has set the pace as to the settlements with industrial policyholders. In such settlements he seems to start from the premise that every claim is fraudulent and must be proven honest. He is fertile in suggesting ways to avoid liability or to cut down amounts due."

The report concludes with notes as to what must be done if the company is, after the expiration of its present license, to continue to do business in New York State. The industrial department must immediately investigate itself. Wrongs must be righted, and the examination must be made by persons in no way responsible for present conditions or connected with the industrial department or its management.

Mr. F. J. Moore, the United States manager, received an annual salary of $20,000 and commissions, and C. H. Boyer, industrial department manager, $4,800 and commissions.

Many Officers Now Dismissed.

After thoroughly considering the conditions that have existed in the United States department in Philadelphia. General Manager F. Norie-Miller, of the General Accident Assurance Corporation of Perth, Scotland, served notice of dismissal upon Manager Franklin J. Moore, Harry Vaux and Charles E. Ward, two of Mr. Moore's principal assistants.

Mr. Claude Norie-Miller, at present Canadian manager of the company, has been appointed United States manager pro tem., and all departments placed under his control, and Mr. John Ainsworth Kelly, at New York city, has been appointed general attorney of the company for the United States.

Telegraphed Insurance Superintendents.

Immediately on the arrival of General Manager F. Norie-Miller on August 19th, he telegraphed Superintendent of Insurance Hotchkiss and each individual commissioner responsible for the publication of the report of the examination of the General Accident as follows: "I have to-day arrived in the United States and have carefully considered the recommendations of your committee which you propose to submit for adoption by the convention of Insurance Commissioners on Tuesday next, and the report given to me of the position of matters by Dr. Dobie and Mr. Watson. I am not quite clear as to the function and authority of the convention to which the report of your committee will be presented. I assume, however, that whatever the delegation of that convention may be, it will be followed by specific and authoritative written directions by the various insurance departments represented by the convention, and I await such specific directions from you and the other commissioners, with which I will immediately comply; meantime I am proceeding to reorganize on the lines of the recommendations."

Letters of Dismissal.

On Thursday week, in the absence of any acknowledgment of the above telegram or further instructions or recommendations from the commissioners, General Manager F. Norie-Miller addressed the following letter to each of the gentlemen specifically mentioned in Superintendent Hotchkiss' report, viz., John Steinbach, W. I. Mullen and J. J. Krist:—

"Dear Sir,—Upon the demand of the Commissioner of Insurance for the State of New York and under the threat to cancel or refuse to renew the license of the corporation to do business in that State should we fail to comply with the demand, we dismiss you from your present position in this corporation, to take effect immediately. In accordance therewith we inclose the balance of your month's salary."

Mr. Moore Defends Himself.

That it is the intention of Mr. Franklin J. Moore, who has been dismissed as United States manager for the General Accident, Fire and Life Assurance Corporation, of Perth, Scotland, to fight for retention in the office seems to be evident in a statement by Mr. Moore at Philadelphia.

"The situation is a peculiar one," said Mr. Moore. "The insurance commissioners in session in Milwaukee make certain demands on the General Accident, one of which is that C. H. Boyer be removed as head of its industrial department. Instead of heeding these demands the officials of the company take a course which is entirely the reverse and let me out as general manager.

"Now, there never has been any criticism of my work in connection with the conduct of the company's affairs. I have been given a clean bill of health. In fact, the report of Superintendent Hotchkiss commends me personally. The investigating committee has found what it declares to be crooked work in the industrial department of the corporation. What does Manager Norie-Miller do when he comes here to investigate the charges? He does not go to the head of the department complained of and demand his resignation. Instead he comes into my department, which has been conducted absolutely on the level, and demands my immediate resignation.

"I am out of the company now, and I cannot make any conjectures as to what the next step will be on my part or on the part of the company. There has been absolutely no reason for my dismissal. I was told to go and I went. That was all there was to it. But to my mind the insurance commissioners have something to say in the matter."

Crist of Law Suits.

As a result of the discharge of the three employees of the industrial department, Mr. C. H. Steinbach who is a brother-in-law of Manager Boyer, has brought suit against Mr. Franklin J. Moore, the deposed United States manager of the corporation; William H. Hotchkiss, superintendent of the State Insurance Department in New York, and L. R Senior, New York, examiner, for damages, charging them with conspiracy. William M. Smithers, who, until recently, was general counsel of the company in the United States, but who resigned his position, represents Steinbach in his suit. Service has been made on Mr. Moore.

Annual meetings will be held as follows:—Montreal & Southern Counties Railway Company Montreal, September 28th; Canada Atlantic Railway Company, Ottawa, September 26th; Canada Atlantic Transit Company, Ottawa, September 26th; The Ottawa Terminals Railway Company, Ottawa, September 26th.

TORONTO DAIRY COMPANIES AMALGAMATE.

City Dairy Purchases Price & Sons—Issues Preference Stock in Payment.

The anticipated amalgamation of the City Dairy Company and S. Price & Sons, Limited, Toronto, has been completed. Holders of City Dairy have been informed that the directors have entered into an agreement for the purchase of the capital stock of S. Price & Sons, giving in payment $175,000 of preference stock. City Dairy shareholders are offered for subscription at par $75,000 of the 7 per cent. cumulative preference shares of the company. Preference and common shareholders of record on the evening of last Friday are entitled to subscribe. The effect of the announcement had been entirely discounted.

This will exhaust the unissued preference stock of the City Dairy Company. In a circular to shareholders the directors state that the net profits for the first seven months of the year showed a gratifying increase over the same period in 1910.

Stock and Dividend.

On December 31st, 1910, the authorized common stock of the City Dairy Company was $565,000, all of which was subscribed, and $700,000 preferred, $450,000 of which was subscribed. The paid-up figures were $565,000 and $449,840 respectively. The par value of shares is $100. Common stock, $57,800 at 20, was allotted on September 30th, 1907, and preferred stock, on September 30th, 1907, $57,800 at par, and on November 17th, 1909, $100,000 at par. The seven per cent. preferred stock is preferred as to dividends and assets.

The dividend record is as follows: Preferred, payable quarterly, 1st January, April, July and October, for quarters ending 31st December, March, and 30th June, September. Common, payable 1st January and July. First half-yearly dividend of two per cent. per annum was paid July 1st, 1909.

The head office of the company is in Toronto, and the directors are: A. E. Ames, president; S. J. Moore, vice-president; Charles Ed. Potter, J. N. Shenstone, J. L. Spink, Fred. H. Deacon, George Weston, Robert Kilgour, T. E. Robertson, all of Toronto.

As to Net Profit.

In his address at the annual meeting of the City Dairy Company last year, the general manager said:—"At the annual meeting of the shareholders last year I called your attention to the low net profits of the business. The figures quoted showed that our net profits on the total output for the past four years averaged only about 7¾ per cent. not allowing anything for depreciation. The percentage in 1910 is still smaller, being 6.98 per cent. before providing depreciation on plant and equipment, and 5.85 per cent. after. Considering the nature of the product we handle and the cost of keeping our equipment and facilities up-to-date, our net profit is too small.

"We deliver milk as far north as Lawrence Park and Mount Dennis, as far east as the easterly limits of East Toronto, and as far west as the westerly limits of Toronto Junction. We have expanded a little faster in this way than would be warranted having regard only to the company's profits, but we have been anxious to measure up to our responsibilities in providing the fullest practicable service to the whole body of citizens, besides, it has been our experience that this pioneering is good policy in the long run, as the outlying routes usually get on a self-supporting basis in about one season. However, we hope to keep up the precedent established and do a little better in 1911 than we did in 1910."

◆

COBALT ORE SHIPMENTS.

The following are the shipments of Cobalt ore in pounds, for the week ended August 26th:—Nipissing, 177,540; McKinley-Darragh, 189,700; Cobalt Lake, 127,570; La Rose, 159,550; Crown Reserve, 145,940; Beaver, 125,495; Drummond, 110,000; Temiskaming, 140,520; Coniagas, 64,250; Right of Way, 60,570; Hudson Bay, 60,000; Cobalt Townsite, 64,520; Kerr Lake, 60,795; total, 1,486,450 pounds, or 743 tons. The total shipments since January 1st are now 32,899,904 pounds, or 16,449 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144 tons, valued at $1,437,196; in 1906, 5,129 tons, valued at $3,900,000; in 1907, 14,040 tons; in 1908, 25,700 tons; in 1909, 29,751 tons; in 1910, 34,041 tons.

MINERAL PRODUCTION OF BRITISH COLUMBIA.

Official Figures Show Steady Expansion—Coal Mining Returns Are Large.

The aggregate value of all mining in British Columbia at the end of 1910 amounted to $374,197,650, which shows an increase in ten years of $222,042,442, or about 146 per cent. over that at the close of 1900 ($152,155,208). Comparing 1905 (248,663,176) with 1900, the increase in five years was $96,507,968, or about 63.5 per cent., while the five-year period, 1905-1910, gave an increase of $125,534,474, or nearly 51 per cent., the aggregates at the end of 1905 and 1910, respectively, having been as shown above.

The quantity of lode gold during 1910 was the largest produced in any year by 12,119 ozs., the largest previous production having been in 1908, 255,582 ozs., as against 267,701 ozs. for 1910.

The net production of coal, 2,777,495 tons, for 1910, shows also a comparatively large increase of 793,579 long tons. Other materials—that is, non-metallic minerals, practically all for building purposes, are credited with a 25 per cent. increase. It is most likely these have been underestimated in quite recent years until 1910, for there has been a steadily enlarging use of materials in building and road and footpath construction in the larger cities of the coast district during several years, and this is continuing in larger degree than in the past.

Comments of Provincial Mineralogist.

Mr. William Fleet Robertson, the provincial mineralogist in commenting on the subject, says: "The value of mineral products in British Columbia for the year 1910 amounts to $26,377,066, which is considerably greater than that of any previous year. The tonnage of ore mined in the lode mines during the year was 2,216,428 tons, an increase over that of the preceding year of 158,715 tons, or 7.7 per cent., and it might also be stated that this is the largest tonnage for any year since the commencement of lode mining in British Columbia.

"This year for the first time in many years, the Coast district has the honor of first place on the list, followed in order of importance by the Boundary and East Kootenay districts, while West Kootenay, for many years the greatest producer of mineral in the province, is relegated to fourth place. The Coast and East Kootenay districts owe considerable percentage of their output to the coal mines situated within their limits, whereas in the other districts the production is almost entirely from metal mining. The total tonnage of ore was produced by the several districts in the following proportions: Boundary, 76.75 per cent; Rossland (Trail Creek division), 11.35 per cent.; Fort Steele Division (East Kootenay), 5.22 per cent.; Coast, 1.90 per cent.; others, 4.7 per cent."

Copper Mining is Lucrative.

Mr. E. Jacobs, of Victoria, B.C., says: "An analysis of British Columbia's mining activity during 1910 shows that there were 713 tons of ore mined a year for each man employed about the mines. In this respect, however, the districts vary very materially, since, in the Slocan, the figures show 148 tons mined to the man in a year; in Nelson district 142 tons; in Trail Creek, 385 tons, and in the Boundary 1,472 tons mined to the man employed."

But copper mining is equally lucrative in this province, as will be seen from the following table, furnished by the British Columbia Copper Company, which in June alone produced 816,676 pounds of copper, against 407,040 pounds for the same month of the year previous. For the six months ended June 30, 1911, the company produced 5,144,365 pounds of copper, as compared with 2,978,227 pounds in the corresponding period of last year.

Production in detail for six months of 1911 and 1910 follows:

1911.

	Copper	Silver	Gold
January	827,272	9,545	2,376
February	767,470	8,384	2,014
March	804,542	9,690	2,711
April	952,284	13,630	3,127
May	976,121	12,703	2,880
June	816,676	11,742	2,428
Total	5,144,365	65,594	15,537

1910.

	Copper	Silver	Gold
January	656,473	7,530	2,513
February	683,234	7,627	2,560
March	891,419	9,191	2,623
April	340,061	3,611	126
May	......	....	....
June	407,040	5,221	1,550
Total	2,978,227	33,080	9,372

That the mining operations are going on unabated may be gleaned from the following returns of the output of the mines and smelters of the Boundary district alone for the week ending August 19:

Granby	....	585,672
Mother Lode	4,000	193,689
Jack Pot	312	19,290
Rawhide	3,990	136,153
Athelstan	127	4,081
Napoleon	767	7,080
Others	297	1,859
Total	9,493	947,804

◆

PRESIDENT TAFT AND RECIPROCITY.

This is from the speech of President Taft at the joint banquet of the Associated Press and the American Newspaper Publishers' Association, held in New York on April 27, 1911:

"I have said that this was a critical time in the solution of the question of reciprocity. It is critical because, unless it is now decided favorably to reciprocity, it is exceedingly probable that no such opportunity will ever again come to the United States. The forces which are at work in England and in Canada to separate her by a Chinese wall from the United States, and to make her part of an imperial commercial band reaching from England around the world to England again by a system of preferential tariffs, will derive an impetus from the rejection of this treaty, and if we would have reciprocity with all the advantages that I have described, and that I earnestly and sincerely believe will follow its adoption, we must take it now, or give it up forever. The bond uniting the Dominion with the Mother Country is light and almost imperceptible."

Here is an extract from President Taft's message to Congress with the Reciprocity Agreement, January 26th, 1911: "Ought we not then to arrange a commercial agreement with Canada, if we can, by which we shall have direct access to her great supply of natural products without an obstructing or prohibitory tariff? . . . . The Dominion has prospered. It has an active, aggressive and intelligent people. They are coming to the parting of the ways." . . . . "Should we not now, therefore, before their policy has become too crystallized and fixed for change, meet them in a spirit of real concession, facilitate commerce between the two countries, and thus greatly increase the natural resources available to our people?"

MUNICIPAL FINANCES.

Toronto City Treasurer's Statement—Ontario Government Has Purchased Cochrane's Bonds.

The Ontario Government has agreed to buy the bonds of the town of Cochrane, Ont., for the sum of $21,000 to enable the corporation to pay the interest and sinking fund of the debenture debt towards erecting a new gaol, public school and other buildings. This action has been taken as the result of a visit from the Mayor of the town, two of his Aldermen, the President of the Toronto Board of Trade and Mr. R. Home Smith, who asked the government to help the town with its financial arrangements. It was found that otherwise the replacing of the burned buildings would seriously tax the energies of the people.

Analysis of Toronto's Expenditures.

For the first seven months of this year Toronto City has spent $3,425,205, and there is still $2,781,245 in the treasury, according to the report of Mr. R. T. Coady, city treasurer, recently issued. Some of the expenditures exceeded the appropriations. That excess totals up to $16,326. The largest overexpenditure comes under the heading of engineering expenses.

This year has been an exceptionally heavy one for the city so far as construction work has been concerned. The appropriations in that branch amounted to $46,827, other credits bringing it up to $73,411, and there was $87,164 expended, exceeding the cash on hand by $13,753. The next largest overexpenditure is charged up to the plant account in the street cleaning and scavenging department. It amounts to $1,719.

Uncontrollable Expenditure.

In totals, $110,801 was brought forward from 1910; the appropriations for this year amounted to $5,984,206; other credits brought it up to $6,190,124. This gives the expenditure so far $3,425,205, and the balance left $2,787,245.

Under the heading of uncontrollable expenditure—upkeep of the various institutions—there is not one overexpenditure. The total cash available in that part of the book amounted to $2,833,722, and the expenditures so far have been $1,645,817, leaving a balance of $1,187,805.

Claims for damages seems to have been rather numerous, for already the lucky or unlucky citizens of this fair city have secured $7,479 out of the $11,000 provided for in the appropriation. That leaves only $3,521 for the persons who may believe the city to be to blame for their accidents within the next five months.

Want More Debentures Authorized.

City Treasurer Coady, Toronto, has furnished the Board of Control with a statement showing that the expenditure on the water intake repairs up to August 9, 1911, was $100,314, with outstanding accounts on the same work amounting to $29,468. As the expenditure of $100,000 was all that the Ontario Legislature authorized for the repairs, the city treasurer refused to comply with the order of the Board of Control for the payment of the extra accounts, and suggests that the city engineer should estimate the further amount that will be required for the work, and steps be taken at the next session of the Provincial Legislature for legislation authorizing the issue of further debentures to cover the entire cost.

Prince Albert's Assessments.

The finance committee of Prince Albert, Sask., have formulated the new tax rate for 1911. They compute that on a total assessment of $11,350,640 on which the net or taxable assessment is $10,397,372, they can raise the required revenue by levying a rate of 13.33 mills on the dollar, except separate school supporters. The subjoined statement shows the subdivisions, amount to be raised, taxable assessment, and the rate. General rate—to be raised, $49,564; assessment, $10,397,372; rate 4 and 77-100 mills. Debenture rate—to be raised, $46,934.17; assessments, $8,185,692; rate, 5 and 74-100 mills. High school rate—to be raised, $6,000; assessment, $10,397,392; rate, 66-100 mills. Public school, old school district, No. 3 central—to be raised, $15,500; assessment, $7,175,921; rate, 2 and 16-100 mills. Public school, school district, No. 10, Goschen—to be raised, $3,000; assessment, $2,618,742; rate, 1 and 16-100 mills.

School district No. 6, separate—to be raised, $4,000; assessment $725,674; rate, 5 and 56-100 mills. Last year the rates of taxation for these different sections of city taxation were as follows:—General rate, 5.60 mills; debenture rate, 5.96 mills; high school rate, 1 mill school district No. 3 school, 2.70 mills; school district, No. 6 separate school, 6.32 mills.

Several items have caused considerable increase in the expenditures this year; Central school increased from $12,000 to $15,000; Board of Trade appropriation, from $4,500 to nearly $9,000; over $10,000 more to be raised to provide for interest and sinking fund of the debenture debt's increase of $300,000 and a much larger expenditure for maintenance of Victoria Hospital since it became a municipal institution.

The tax rate this year for separate school supporters is 16.73 mills on the dollar. This applies to only those who hold property within the city's old area.

The assessment of the new property taken in this year is practically $2,000,000, and, as the owners do not pay taxes to meet the charges on the present debenture debt of the city, their rate is about 7.59 mills on the dollar. The supporters of the Goschen school who are property owners in the old area of the city, will pay 12.43 mills on the dollar.

Notes of Fernie's Finances.

The estimated expenditure of the City of Fernie, B.C., for the year 1911 are $56,928, and the estimated receipts are the same amount, including $12,000 as a net profit on the waterworks and electric light departments. These profits are estimated after a provision has been made from the earnings of the plants for interest on debentures and sinking fund. The rate on all lands and improvements will probably be assessed at 20 mills, divided as follows: Interest on debentures and sinking fund, 10 mills; school purposes, 5 mills; general purposes, 5 mills. There is a balance left from the sale of debentures issued last year which will enable local improvements to be carried out without issuing more debentures. A by-law will be submitted to the ratepayers for the issue of $5,000 debentures for the purpose of building an addition to the firehall.

◆

SIR WILLIAM WHYTE,

Vice-president of the Canadian Pacific Railway, whose Retirement is Announced This Week.

OPPORTUNITIES.

A correspondent has for sale 110 acres of level farm land, on Lake Shore at Bronte, Ont., with 2,000 feet lake shore frontage, 15 acres park, buildings, etc., making a good property for subdivision purposes.

A correspondent has a deposit of infusorial earth in Ontario which, in its natural state, makes an excellent polish for silver. The deposit is within one mile of a railroad siding with a level road therefrom. Address The Monetary Times.

A Western house wants a bond salesman for Ontario. See advertisement elsewhere in this issue.

A note under this heading, regarding timber limits, two weeks ago, brought eleven replies of value.

◆

The annual convention of the Canadian Manufacturers' Association will this year be held in the King Edward Hotel, Toronto, on Tuesday, Wednesday and Thursday, 10th, 11th and 12th of October next.

LOW PRICE OF BRITISH CONSOLS.

Revival of Credit in Countries Formerly More or Less in Discredit Has Been Chief Cause.

The continued decline in British Consols has been explained in many ways. That the main cause of the decline has been, firstly, the revival in the credit of the countries that in 1896 were in more or less discredit, such, for example, as the Central and South American countries, Japan and China, Cuba and the Philippines, Italy, Spain, Portugal and Greece, is the opinion of the London Statist. That revival has immensely increased the field of investment, and, therefore, has attracted many who otherwise would have bought consols. The depreciation is attributable to Mr. Goschen's vain ambition to signalize himself not only by effecting a conversion, but by adding on to the conversion an automatic reduction of interest fifteen years later. It has been due very largely to the ignorant presumption of Mr. Chamberlain in rushing the country into an unnecessary war, and to the criminal neglect of himself and his colleagues to prepare for a conflict, the seriousness of which he and they utterly misconceived. It has been traceable to the borrowing for naval and military works and the suspension of the sinking fund. It has resulted from the financial incompetence of those who carried out the plan for the buying out of the Irish landlords. It has been owing to the admission to the list of trustee stocks of a multitude of new securities It is a consequence of the waste of capital in the Spanish-American war, the South African war, and the Russo-Japanese war; of the excessive expenditure upon naval and military armaments, and the apprehensions excited by those preparations; and of the incessant fears of war which have never been absent for many months together since President Cleveland's Venezuelan message.

Country Growing Richer.

"But while it happily is true that the country is immensely richer than it ever has been before; that its savings annually are on a vast scale; and that if ever it is necessary it will be possible to borrow colossal sums for a very long time, yet we would impress upon our readers that credit is a tender plant, and that to do anything that would injure it is a criminal offence which ought not to be excused by either ignorance or folly. Since the time of the Reformation we have never been able to maintain in peace time a really great army. We have trusted to our navy to protect us from a sudden attack and give us time to prepare; and to the wealth which our trade and our manufactures assures to us to gradually get together such a force as would enable us to muddle through. So far this policy has availed.

Never Ready for War.

"We have never been ready when war broke out, but on most occasions we escaped without serious loss. We escaped, however, because our credit was so good. That credit, as we have just been showing, is as good as ever. But it should be treated as an unpardonable offence to do anything that would make the world think our credit has suffered. As in the past, so in the future, if a great war comes upon us we shall have to trust to the navy to keep these islands safe from invasion, and to insure us to the time to get together, painfully and wastefully, a great land force. To organize such a force, to find and train competent officers, to discover a Marlborough or a Wellington, will take a very long time. Therefore, if we are to win in the long run we shall have to borrow on an enormous scale. But there is this one countervailing advantage in a policy which, from every other point of view, stands self-condemned. It is this: that the nations which are likely to be our enemies in the future are nations in arms.

No Danger of War Now.

"It is in the hightest degree unlikely that a single power will pick a quarrel with us. If the war comes, it will be a war of coalition against coalition. Therefore, the belligerents, except ourselves, will have to call out millions of men. In other words, as soon as hostilities begin they will have to withdraw from the field, the factory, the counting-house, the shop and the law courts so many men that at any risk the war must be brought to a speedy termination. On our side it will be different. We shall have an immense navy, it is true. But if it is as efficient as we all believe it to be, we shall be safe in these islands, and we shall have time to wear out the enemy. There is no limit to the number of men we can raise. And there must be no limit to the money we can borrow. Just as we wore out France and Austria and Russia in the Seven Years' War, and the Great Napoleon himself with subject Europe at his feet, by means of the inexhaustible sums we were able to raise, so we shall wear out future foes if we subordinate party and faction to country and hold sacred the credit upon which we shall have to rely when the day of danger comes."

SMALL CHANGE.

Lord Desborough, who is now in Canada, thinks that tenant farms could be carried on as successfully in the Dominion as in England. That is so, but all the while the farmer can own instead of rent his land, the better for the farmer.

* * * *

The Canadian National Exhibition grows more useful with age. For thirty-three years it has been not only a Toronto, but a national institution, and its broad scope, educational spirit and business-getting qualities have made it a show of world-wide fame. The up-to-date Canadian, British and American house cannot afford to be non-exhibitors. Folks go to the National Fair of Canada for business as well as for pleasure. From all viewpoints almost, it is one of the finest exhibitions in the world.

* * * *

Mr. J. Obed Smith, Assistant Superintendent of Immigration in London, is trying to induce the entire British House of Commons to take a trip to Canada in the near future. There is every wish for his success. That is education of the best kind for Imperial legislators. The only danger in such jaunts is that a cursory glance over a Dominion of 3,744,695 square miles, land and water, is apt to lead to wrong impressions. However, the idea is good and the British House should have studied their Canada at close range long ago.

* * * *

Repeated guesses as to the location of Grand Trunk Pacific divisional points in British Columbia will cease as the result of an official announcement. The first divisional point out of Prince Rupert will be up the line about 120 miles, and the second one will be located east of Hazelton, near Aldermere, in the Bulkeley valley, and some distance west of Houston. The third divisional point is to be established west of Fraser Lake. The company's plans for the town site in the vicinity of Fort George have not been made public. If a site distant from the present town of Fort George is chosen, it is to be feared that much disappointment will be experienced by real estate buyers in that neighborhood. There will be at least one, and possibly two, divisional points on the line between Fort George and Edson, Alta. The company owns a town site at the west end of Fraser Lake, a large inland sea, and another at a point on the south shore between the east and west ends of the lake.

* * * *

The Honorable A. C. Rutherford, of Alberta, says that when a man becomes a public man, his affairs become the affairs of the public, and that he should be engaged in no transaction, public or private, that he is not willing to have examined, analysed and explained. That is an extraordinary view for any business man to take. There is, first, the minor difficulty of defining a public man. There is then the greater obstacle of getting men to take a part in public life, knowing that any Tom, Dick or Harry may at will place the spectroscope upon those things which concern only the private individual. The Rutherford doctrine seems to have been born of the momentary situation, for Mr. Rutherford would dearly love to quiz Mr. Frank Oliver's bank pass books. The average man, on being asked to expose his bank account to the public gaze, would give the reply which the Edmonton bank junior gave to an enterprising person who asked for a copy of Mr. Oliver's account. The answer was too warm to adorn these columns more than once.

BRITISH COLUMBIA.

How Reciprocity May Affect the Various Industries—European Interest in Everything Canadian—Close Season for Sockeye Salmon Suspended.

(Staff Correspondence.)

Vancouver, August 26.

The big industry in British Columbia is lumbering, and many of the large operators are favoring the adoption of the reciprocity agreement, some of them being Conservatives. It is noticeable that American visitors are decidedly in favor of the proposal. Prominent American business men have been on the coast, men like Mr. A. J. Earling, president of the Chicago, Milwaukee & St. Paul Railway, and though slow to talk on ordinary occasions have little hesitancy in expressing their opinion as to the great benefits of a measure of reciprocity. The new trade agreement will affect various industries differently. While the lumbermen are of the opinion they will benefit, the Taylor Milling and Elevator Company, with head offices in Lethbridge, may have to transfer their seat of operations. It was the company's intentions to erect a warehouse and elevator in Nelson, but state that if reciprocity goes into force they may have to move their headquarters to Spokane.

That British capital is wary of new conditions which would follow the adoption of the proposal is indicated by the remarks of Mr. E. T. Powell, editor of the Financial News, of London, who was here a few days ago. He thinks reciprocity would retard the investment of British capital in Canada, stating that the investor in the Old Country is something of a sentimentalist and likes to know that when he is investing his money he is developing some portion of the Empire. If British capital comes in less quantity, it would be only a temporary condition, as there is a vast amount of money in the Old Country for the profitable development of resources.

Interest Shown in Everything Canadian.

Mr. George E. Macdonald, a Vancouver business man, has returned from a trip to Europe, and states that deep interest was shown abroad in everything Canadian, British Columbia, with its wonderful climate and vast resources, being in especial favor. Of late there has been one or two French visitors on the coast looking into investment possibilities, and Mr. Macdonald says that while in Paris he learned that there was a remarkable movement of French money to the Dominion for investment purposes. Parisian capitalists were much alive concerning Canada.

That the speculative element has to be largely eliminated from investments is shown also in regard to mining. There arrived here this week Messrs. Louis Reyersbach and Hugh F. Marriott, of London, and G. G. S. Lindsey, of Toronto. These gentlemen have been travelling through Canada inspecting the mineral fields. As is known, Mr. Reyersbach is a director of the Central Mining and Investment Corporation, Limited, of London, the successor of Wernher, Beit & Co., and of Mr. H. Eckstein, of London and Johannesburg, and has large holdings and enormous capital. Mr. Reyersbach stated that it is not the policy of the company to buy prospects or undeveloped mining properties, but were prepared to buy producers that passed examination. In other words, the owners of properties had to show their faith by developing the deposit to the extent that it became a mine. Development of some of the mineral districts of British Columbia has been retarded because the owners of claims think that purchasers are possessed of as much optimism regarding their properties as the owners, and that the sale should take place with little or no work having been done. Generally a large initial cash payment is requested. Mr. Reyersbach's remark that his company is willing to pay the price shows that all money put in will be returned to the owner of the claim who produces a mine. The party will inspect the new silver-lead field at Hazelton and also the Portland Canal district.

Sockeye Salmon Close Season Suspended.

The question is naturally asked, with the suspension of the close season for sockeye salmon, if the end of the industry is in sight. Much Canadian capital is invested in the salmon fishing industry in British Columbia, but of late years the pack has been lessening very appreciably. One of the reasons declared by the canners to be the principal cause, is that indiscriminate fishing is indulged in by Americans. They have the fairway of the fish dotted with traps, and to make doubly sure use vast purse seines hauled by gasoline boats. No close season has been observed, the object evidently being to get as many fish as possible for momentary profit. As to the Fraser River, the hatching is all done in Canada, and this year the canners were successful in their petition that, owing to the smallness of the pack, the close season from August 25th to September 15th be declared off. This will doubtless mean few fish reaching the spawning grounds, but it is argued if the Americans are to deplete the fishery Canadians might as well get a share of the spoils while they last. The pack on the Fraser this season is 50,000 cases, compared with 175,000 cases on Puget Sound.

Game Warden May be Deposed.

The farce of observing the law on the American side is shown by the report in a Bellingham paper of the prosecution of the Pacific American Fisheries and the Carlisle Packing Company for the violation of the thirty-six hour close law. The procedure has been to keep traps open irrespective of the close season mutually agreed upon by canners on both sides of the line. It seems that a game warden, who is a deputy fish commissioner, undertook to issue warrants against these two companies as an example to the rest. Now it is proposed to depose him from office for usurping the offices of the regular fish commissioner. The trap owners evidently concluded that they would not be interfered with by the commissioner according to past experience, and the unwarranted and unjustifiable action of the deputy will mean his dismissal.

BLACK ANTIMONY

Found to be Grossly Adulterated—Inland Revenue Department Makes Interesting Report.

That the drug known as Black Antimony was grossly adulterated was the charge made some time ago to the Inland Revenue Department.

During March, April and May the department made a collection of seventy-seven samples and the following report gives the results of their examination; it will be seen that the charges of gross adulteration are fully sustained. The following synopsis gives these results in brief:—

	Samples.
Adulterated, as containing no antimony	21
Very impure sulphide of antimony	9
Impure sulphide of antimony	8
Sulphide of antimony	39
	77

Black Antimony not Defined.

Black Antimony is not defined by the British Pharmacopoeia; but the purified sulphide is defined as Antimonium Nigrum Purificatum. This is the crude sulphide separated from siliceous material and from arsenical compounds. Neither is Black Antimony found in the United States Pharmacopoeia, since 1890. In the seventh decennial revision of the U.S.P. it is thus described:—"Native Antimony Sulphide, purified by fusion, and as free from arsenic as possible."

Under the designated tests it is required to dissolve in hydrochloric acid, without leaving more than one per cent. of residue. The United States National Dispensatory, 5th Edition, p. 223, describes it as dissolving in 10 parts of hydrochloric acid, without leaving more than one per cent. of residue.

Samples Examined Were Adulterated.

Black antimony is not now employed in human medicine, but it is very largely used as an alterative and anthelmintic for horses and cattle; and is an ingredient of very many condition powders.

No exact standard of purity exists for this article. It is, however, quite certain that it should be essentially the sulphide of antimony, known as stibnite; and the samples examined were adulterated when they contain no antimony whatever. This is the case with 21 samples, or 27 per cent. of the entire collection. Where foreign matter to the extent of nearly 50 per cent. is present, the samples have been declared very impure; and where more than 5 per cent. of matters insoluble in hydrochloric acid is found, as impure.

Many of the adulterated samples, consisting as they do of mettalic iron, silica and carbon (graphite) have had an origin such as to preclude the possibility of any honestly mistaken intent; and are entirely and knowingly frauds, not necessarily known as such to the immediate vendor, but certainly known to the original producer.

◆

The Bank of Montreal, fiscal agent for Calgary, Alta., will advance $3,000,000 on the unsold debentures of the city, which aggregate about $4,500,000. This amount will be advanced in monthly instalments of $500,000 each, and the treasury orders for the amount will be issued to the bank monthly by the city.

WESTERN CROPS AND MARKETS

Harvesting is Proceeding—Some Damage Sustained, but Not Enough to Diminish Crop Results to any Great Extent

Monetary Times Office,
Winnipeg, August 29th.

This year's crop seems to be destined to success in spite of all offsetting occurrences. The black rust scare was premptorily checked by the advent of hot, clear weather, and during the past week frost has been reported from some points, but only at a few has there been serious damage. Harvesting is being pushed rapidly all over the country, and the most reliable reports that can be had—reports from harvesters and threshers—show that the forecast of an enormous crop was in nowise exaggerated.

Fourteen of the biggest districts show phenomenal yields, among them being 45 bushels of wheat and 80 bushels of oats to the acre from Swift Current, six districts which will give 40 bushels of wheat and ten that will have from 30 to 40 bushels. The 500 reports indicate fifty per cent. of yield averaging over 25 bushels to the acre, and the present estimate of the crop experts is a total of from 215,000,000 to 220,000,000 bushels of wheat from the three prairie provinces. Already, preparations are being made for next year's crops. In districts where harvesting is nearly, or quite, finished, immense tracts are being broken.

Sixty steam and gasoline plowing outfits were unloaded at Kindersley, Sask., this season, and these highly effective engines of agriculture have been busy all over the West. In all sections the plowing outfits will be kept at their work until winter. The increase of acreage under crop in 1911 over 1910 was about two million acres.

Col. A. D. Davidson, of the Canadian Northern Land Department, said, after a recent trip all over the West:

"This is, indeed, a prosperous era in the history of Canada. There is nothing spasmodic about it. It is the result of ten years' steady growth, with an increased acreage each year from which to draw revenue. And the half of Canada's possibilities have not yet been demonstrated. There is as much building going on in the little country towns all through the West as there is in the cities, and no more satisfactory sign than this is needed from an economic viewpoint."

Building and Real Estate Activity.

The building season in Winnipeg has been a very active one, and an examination of the building inspectors record shows that for the first seven months of this year building permits have been issued in Winnipeg for 50 apartment houses costing $2,200,000; for 23 warehouses costing $1,000,000; and for stores, office buildings, schools, banks, theatres, garages, hospitals, churches, fire halls, etc., costing $2,629,711. During the same period 1,500 dwellings were erected in Winnipeg at a cost between $1,500 and $3,000; a total of 189 houses at a cost of over $5,000, and 11 houses at a cost of over $15,000.

For the first seven months of the year the buildings total $11,368,650, as compared with $10,971,700 last year. For all Canada this city stands second only to Toronto for that period, the figures in the eastern city totalling over fourteen millions.

In discussing the real estate situation with a large local dealer, The Monetary Times was informed that, while the market was generally becoming active, the predominating feature was the demand for houses. There seems to be an overwhelming desire he said, on the part of citizens to own their own homes, and despite the great number of dwellings put up this year, builders are unable to cope with the demand for more. Even the hastily constructed and poorly built houses are being snapped up eagerly, which encourages unscrupulous builders to rush up these cheap structures and catch the gullible ones.

This, he said, was one of the unfortunate features of the situation and that there were more shells of houses put up in Winnipeg—many of them with sides of shingles—than any other city in Canada.

Business Men's Excursion.

The Winnipeg Development and Industrial Bureau announced last week that the 1912 Business Men's Excursion from this city, will go to Great Britain.

This annual event was started two years ago and two highly successful tours of the West have been made. Special trains were used and the result has been to draw the ties of trade and neighborly intercourse much closer, and to develop a stronger spirit of unity among Western communities. The trip to Great Britain was proposed when the Business Men's Excursion was at Banff this year, and the matter was clinched at a meeting of the expansion committee of the Winnipeg Development and Industrial Bureau, which has charge of all the arrangements for the trip each year. When the 1912 excursion is made up, it will include the best of Winnipeg business men, the leading financial and commercial representatives of this city and those of all other Western cities who choose to join the excursion. The tour will extend over six weeks of time and will include as much of the British Isles as it is possible to cover in the allotted time.

In the Wheat Markets.

The bulk of attention is at present concentrated on the Winnipeg market, which for the moment is the most important in North America, and is practically governed by the weather news. The electric storm of last week sent prices up with a bound, and the market has since maintained a comparatively high level. The apprehension of frost damage is the main influence supporting the market, as the storm and frost must have taken something off the prospective yield and quality of our crop. During the week there was an excellent demand for all grades of cash wheat, but the demand had to go unsatisfied owing to the limited supply. Export will not be busy until the new wheat begins to move in quantity, when prices will probably settle down to an export basis.

Preliminary estimates of the world's crop this year make it 16,000,000 bushels less than last year, and traders generally consider there is nothing in the world's wheat situation to build the expectation of lower prices on, except perhaps temporarily during the heavy movement of new wheat. There will be a serious shortage in Russia, the surplus available for export being estimated at 112,000,000 bushels against 224,000,000 last year. Crop prospects in India are inferior owing to drought, but the new crops in the Argentine and Australia are so far doing favorably, and the future of prices will depend much on how these crops progress. Meantime the immediate course of the market hinges on the action of the spring wheat markets and Canadian weather.

◆

PERSONAL.

Professor Riess, who holds the chair of. geology in Cornell University, Ithica, N.Y., is in Vancouver, B.C. He has been commissioned by the Dominion Government to make a report on the clays of British Columbia, especially in regard to their economic aspect.

Professor Koebner, of the University of Berlin, is in Canada and visited Toronto this week. He is studying Canadian economic conditions and is especially interested in the Dominion's banking system. He has met many prominent Canadians, including Sir Edward Clouston.

Mr. Henry L. Riseley, ex-Sheriff of Bristol and special trade delegate to the Toronto Exhibition, was introduced this week at the National Club, Toronto, by Mr. W. Robertson. An informal luncheon in his honor was attended by Mr. W. Robertson, Mr. Campbell, Mr. J. J. Salmond, of The Monetary Times, and Mr. George Wheeler.

President H. J. Powell, of the National Association of Life Underwriters, was the guest at a luncheon in the Canada Club, Montreal, given by Mr. G. H. Allen, general manager of the Travellers Life of Canada, recently. Brief addresses were made by Messrs. F. B. Macaulay, A. H. Vipond, Geo. E. Williams, H. H. Kay and Geo. H. Allen, and acknowledged by the guest. Mr. Allen's hospitality received due acknowledgment.

Earl Grey, in opening the Toronto Exhibition this week, noted with satisfaction the increasing desire of the British manufacturers to take advantage of the generosity of the management and exhibit their industries. British firms who formerly did no business with this country were sending over their agents as well as their exhibits, and some of them had already established permanent branches of their firms in the Dominion. His Excellency then referred to the services of Mr. Grigg, the British Trade Commissioner. "I have had ample opportunity of making myself acquainted with the character of his work," he said, "and as he is present here this afternoon, I am glad to be able to thank him before you all for what he has accomplished. Those who wish to increase the trade between Canada and the Mother Land cannot do better than seek his advice and co-operation. He is a zealous servant of the Empire."

CONDITION OF FIELD CROPS.

Good Averages for All the Provinces and for All Crops —Increase in Spring Wheat Area.

The condition of field crops in Canada shows good averages for all provinces, as well as for all crops. Fall wheat was hurt by the hard winter in Ontario, but fared better in Alberta. The estimated yield is 23.24 bushels for the former province and 27.89 bushels for the latter. The total estimated yield is 17,706,000 bushels. The condition of spring wheat at the end of July was 90 for the whole of Canada, being 85 to 95 in the Maritime provinces, 80 to 89 in Ontario and Quebec, 90 to 96 in the North-West provinces and 85 in British Columbia.

Oats and barley have an average condition of 88 for Canada, 85 to 95 in the Maritime provinces, 80 to 90 in Ontario and Quebec, 88 to 100 in the North-West provinces, and 87 to 89 in British Columbia. Rye, peas and beans range from 78 to 84 in Canada, and buckwheat is 81.85. Mixed grains have a condition of 86, which is 14 per cent. less than last year, and flax is 91, which is nearly 20 better. The average of corn for husking is 86 and of potatoes 85.64, being in each case a little higher than last year.

Potatoes and Turnips.

Potatoes, turnips and mangels range from 81 to 85, or about the same as a year ago. Hay and clover and alfalfa are 80 to 83, which is a little lower in each case than last year. Corn for fodder has an average condition of 87, sugar beets of 79, and pasture of 79. The eastern provinces are lower than the figures quoted for the whole of Canada, and the Western provinces are higher. The highest averages are given for Manitoba, Saskatchewan and Alberta. Sugar beets have a condition of 81 in Ontario and Alberta, where they are grown to supply the sugar factories.

Compared with last year's crops in the North-West provinces, the condition of spring wheat in Manitoba south of the Grand Trunk Pacific Railway is 88 to 39, of oats 88.72 to 38.85, and of barley 85.16 to 34.92; and north of the same railway the condition is 92.21 to 77.42 for wheat, 90.71 to 72.90 for oats, and 88.95 to 50.84 for barley. In Saskatchewan south of townships 25 the condition of wheat is 90.19 to 69.33, of oats 88.27 to 61.64, and of barley 89.03 to 65.89; and north of townships 24 the condition of wheat is 98.22 to 67.69, of oats it is 95.35 to 63.88, and of barley 94.58 to 71.30. In Alberta south of townships 31 the condition of wheat is 93.89 to 24.93, of oats 95.28 to 20.43, and of barley 93.70 to 26.36; and north of townships 30 the condition of wheat is 97.84 to 71.55, of oats 97.95 to 65.68, and of barley 105.95 to 73.60.

Area of Spring Wheat.

The area of spring wheat in the North-West provinces this year is 1,500,000 acres more than last year and of oats 341,000 acres, but no increase is shown for barley.

The yield of hay and clover is estimated at 12,189,000 tons for Canada, being 1.43 ton per acre, and the largest yields for provinces are 4,736,000 tons in Ontario, 5,028,000 tons in Quebec, 254,00 tons in Prince Edward Island, 941,000 tons in Nova Scotia and 885,000 tons in New Brunswick.

◆

HOW CANADIAN BONDS STAND IN LONDON.

The following is a list of Canadian municipal bonds or debentures issued in Great Britain from June 1st, 1907, to the end of July, 1911. The table, which has been arranged by our London contemporary, "Canada," to show the yield, price of issue, and current quotation, is useful for the purpose of comparison:

Date of Issue.	City.	Amount Issued.	Rate of Interest. p.c.	Issue Price.	Present Price.
October 12, 1907	Edmonton	£ 139,400	5	100	110.105
November 23, 1907	Vancouver	244,900	4	91	101.99
March 14, 1908	Regina	113,700	5	101	108.105
April 6, 1908	Edmonton	187,400	5	101	110.104
April 27, 1908	Montreal (Reg. Stock)	1,000,000	4	99	103.101
May 30, 1908	Winnipeg	1,500,000	4	96	102.101
June 17, 1908	Saskatoon	100,000	5	101	108.106
June 20, 1908	Quebec (Deb.)	71,900	4	97½	101.99
June 20, 1908	Quebec (Stock)	42,921	3½	91½	92.90
July 3, 1908	Calgary	136,000	4½	96	105.103
July 18, 1908	Vancouver	405,500	4	97	102.100
September 23, 1908	Victoria, B.C.	159,800	4	98½	101.99
November 12, 1908	Sherbrooke	102,700	4½	104	102.100
December 14, 1908	St. John	115,000	4	100	101.99
January 1, 1909	Montreal	400,000	4	103	102.100
March 6, 1909	Winnipeg	500,000	4	100	102.101
April 17, 1909	Calgary	124,800	4½	103½	105.103
May 18, 1909	Ottawa	156,900	4	103	101.100
June 9, 1909	Toronto	394,100	4	102½	101.99
July 6, 1909	Vancouver	286,400	4	101	102.100
July 12, 1909	Edmonton	187,300	4½	102½	105.102
September 1, 1909	Westmount	435,000	4	tender	———
December 11, 1909	Fort William	60,000	4½	102½	103.101
January 12, 1910	Calgary	325,400	4½	103½	105.103
February 16, 1910	Montreal	123,200	4½	109	107.105
March 17, 1910	Maisonneuve	143,800	4½	106	103.101

Mr. M. N. Stincud, of Halifax, Nova Scotia, who has been in Jacksonville, Florida, several days looking after docking privileges, announces that, beginning September 1 a new line of steamers will begin sailing dates between Halifax, Nova Scotia and Brunswick, Savannah and Charleston. As soon as the line is established to Jacksonville arrangements will be made to include the more Southern ports ofthe State, such as Miami, Key West and probably Havana. Ships will make monthly trips at first and if business will justify more boats will be put on in the future.

DOMINION ASSOCIATION OF CHARTERED ACCOUNTANTS

Have Arranged an Interesting Convention at Montreal —Some Association Notes.

The ninth annual convention of the Dominion Association of Chartered Accountants will be held in Montreal next Friday and Saturday, when it is expected there will be a large gathering of accountants from various parts of the country to help to further the aims and objects of the association. That an interesting programme has been prepared for the edification and entertainment of the members will be seen from the following:—

Friday, September 8th—9 to 10 a.m., Meeting of council: registration of members; 10 to 10.30, Reception of president—Address of welcome—Appointment of committees; 10.30 to 11.30, Paper: "Uniformity of Standards Among Provincial Societies." (1) "Reciprocal Relations re Interchange of Membership." (2) "By-laws re Admission and Standards of Examination." To be presented by the Montreal Association, and replied to by the Manitoba Association; 11.30 a.m. to 12.30 p.m., Paper: "Capitalization of Joint Stock Companies." To be presented by the Ontario Institute, and replied to by the Alberta Institute; 1 to 2, Lunch as guests of Montreal Association; 2 to 3, Visit to Medical Building, McGill University; 3 to 4, Paper: "Standards of Professional Conduct and Practice." To be presented by the British Columbia Institute, and replied to verbally by Ontario, Montreal, and Nova Scotia; five minutes each. (Entertainment of guests.) 4 to 5, Paper: "Reserves." To be presented by the Nova Scotia Institute, and replied to by the Saskatchewan Institute. 7.30, Banquet at Windsor Hotel.

Saturday, September 9th—9.30 a.m. to 12 p.m., Annual meeting: Reports of committees, etc.; 12 to 1, Council meeting. (Afternoon.) Entertainment of members and friends. 8, Council meeting.

Montreal Association Revises By-laws.

The Institute of Chartered Accountants' of Ontario annual examinations were held in May last, when 13 final, 12 intermediate and 58 primary candidates presented themselves for examination. The president of the association is Mr. George U. Stiff, Toronto, and Mr. T. Watson Sime, Toronto, registrar.

In April last Messrs. Geo. Edwards and W. T. Kernahan, representing the institute, had a conference in New York with Mr. Wm. Plender, president of the Institute of Chartered Accountants of England and Wales respecting matters under mutual consideration by their societies.

The Students' Association has just closed a successful session. The lecture course was well arranged, and was of an unusually practical and useful nature. The association now numbers sixty-five members, and Mr. Ralph Yeomans is president and Mr. R. S. Macpherson secretary.

The by-laws of the Montreal Association, which have done service for many years, have been amended to meet the requirements of modern conditions. The associations have been busy for some time effecting the changes, and the new by-laws are now in force, having been approved as required by the Lieutenant-Governor-in-Council on June 2nd. The officers of the association are as follows: President, Mr. J. McD. Hains; Messrs. James G. Ross and Arthur K. Fisk, first and second vice-presidents, respectively; Mr. Gordon B. Kingan, secretary. Council—Messrs. George Hyde, Austin C. Stead, Robert Miller and George C. McDonald. the accountants were fortunate in hearing them.

New Tariff of Fees Adopted.

Incorporated in May, 1886, the Manitoba Association now has a membership of thirty-one. During the past session a series of lectures was delivered on economic subjects by Mr. A. B. Clarke, professor of political economy in Manitoba University. The lecturer handled the subjects in an able manner, and they proved of great value and interest to the accountants who were fortunate in hearing them.

Recently the association adopted a new tariff of fees, which, upon submission to the Dominion association, was approved by its council. The by-laws respecting examinations have also been revised. The subject of registration of accountants has been discussed by the association.

The Students' Association now has a membership of thirty-four, and have had a successful season. The president of the association is Mr. H. M. Cherry, Brandon, Man., and secretary, Mr. F. C. S. Truner, Winnipeg.

Since the Saskatchewan association was incorporated in June, 1908, it has become affiliated with the University of Saskatchewan, and the examinations are conducted by a joint examining board presided over by one of the university professors. Interference with Canadian legislation by societies operating under a Royal charter in Great Britain is strongly condemned by the members of this institute, composed principally of Old Countrymen. The president is Mr. J. C. Pope, provincial auditor, Regina, Sask., and secretary, Mr. T. Grant, Regina, Sask.

Thirteen accountants comprise the membership of the Alberta Association, which was incorporated in June, 1910. Upon being organized the association promptly petitioned the Dominion association to be allowed to affiliate with that body. Mr. G. Percy Blythe, Edmonton, is president, and Mr. J. B. Watson, Calgary, secretary, while Messrs. A. H. Edwards and W. D. Wing are, respectively, first and second vice-presidents. Mr. A. H. Edwards has been named as the representative of the institute upon the Dominion council.

Officers of Dominion Association.

The officers of the farthest east and farthest west institutes are: Nova Scotia association—President, Mr. G. G. Dustan; secretary, Mr. Henry J. Stech, and Mr. Wm. J. Stein, president of the British Columbia association.

The Dominion association officers for 1910-11 are as follows: President, Mr. Alex. F. Riddell, Montreal, Que.; vice-president, Mr. George Edwards, Toronto, Ont.; secretary-treasurer, Mr. George C. McDonald, Montreal, Que. Council—Representatives: Messrs. Alex. F. Riddell, Montreal, Que.; John W. Ross, Montreal, Que.; George Edwards, Toronto, Ont.; Wm. T. Kernahan, Toronto, Ont.; Geo. U. Stiff, Toronto, Ont.; W. A. Henderson, Winnipeg, Man.; George G. Dustan, Halifax, N.S.; W. T. Stein, Vancouver, B.C.; O. J. Godfrey, Indian Head, Sask.; Arthur H. Edwards, Calgary, Alta.; James George, Toronto, Ont. Auditors—Messrs. H. D. L. Gordon, Toronto; J. F. Lawson, Toronto.

◆

CANADA'S SOFTWOODS.

Interesting statistical comparisons may be made from the 1910 lumber report prepared by the Dominion Forestry Department. Of the twenty-six native species of wood which together were cut in 1910 to the extent of four billion, nine hundred million board feet worth over seventy million dollars, the first nine were coniferous or softwoods. Spruce was the most important, alone forming over one-quarter of the total cut. Spruce and white pine together formed barely one-half of the 1910 cut, while in the year previous, these two species made up nearly three-fifths of the total. This decrease in proportion is due not to a smaller cut of the two species, but to a great increase in the amount of Douglas fir, hemlock, cedar and yellow pine produced in British Columbia. One-quarter of the 1909 cut was formed of these four species, while in 1910 the total cut of the four was increased by seventy per cent.

White pine lumber is undergoing a gradual evolution in its importance to the lumber industry. Up to three years ago, white pine stood at the top of the list when it was supplanted by spruce, although the actual cut of the former had not decreased. The prediction of last year that white pine had nearly reached its maximum cut has proven true this year, the 1909 cut being decreased by four per cent., or forty-two million feet. Yellow pine increased in its cut nearly six hundred per cent. in British Columbia during one year. This increase of over one hundred and fifty million feet was sufficient to raise it from fourteenth place in the species table to sixth place in importance, thus surpassing in one year, red pine, larch, balsam, and the four most important hardwoods.

◆

DISTRESS IN NOVA SCOTIA.

In connection with its weekly inquiries as to fire losses in Canada, The Monetary Times has received several letters, indicating distress in parts of Nova Scotia, resulting from the recent fires. Mr. J. W. Hamilton, Roseway, N.S., writes:—More than half the buildings here are destroyed. I am unable to work for some time. Wife has sat in her chair for ten years. Sciatica rheumatism the cause. Would ask help. If information is wanted write Superintendent Sieut. Yours, J. W. Hamilton.

Mr. Willie M. Watkins, Clyde River, Shelburne Co., N.S., writes:—We lost all we owned in this world; we are very poor and feel our loss greatly; we had no insurance. Our house was built just a year ago and cost us two hundred and fifty dollars. We had an out-building cost us fifty dollars. Our new sewing machine cost us $45.00 and we saved nothing only what we had on and all our things in the house cost us about one hundred dollars, that is, counting all besides other things we lost. We would be very grateful to those that would help us a little.

The Monetary Times knows nothing of the merits of these particular appeals, but the fire damage done by the sea appears to have been heavy and hit those who could least afford to bear the burden.

NEW INCORPORATIONS.

Only Four New Companies Have Capital of a Million Dollars and Over—Many Industrial Concerns.

The majority of the companies incorporated during the past week had small capitals, there being only four with capital of a million dollars and over, viz.: The Western Natural Gas, Light, Heat and Power Company, Calgary, $8,000,000; Flathead Coal and Coke Company, Limited, Montreal, $5,000,000; Roman Gold Mines of Porcupine, Limited, Ottawa, $2,000,000, and Hollinger Reserve Mines, Limited, Toronto, $2,000,000.

The Kinemacolor Company, which has been organized to purchase and operate the Canadian patents of a process of color photography, is capitalized at $1,000,000, of which $750,000 is common and $250,000 preferred. Of the preferred, $200,000 is to be issued and $50,000 retained in the treasury. The $200,000 preferred is issued at par and carries a bonus of two shares of common to each one of preferred, which carries 10 per cent. cumulative interest.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Cochrane.—Cochrane Park, Limited, $25,000.

Eyebrow.—H. E. Wright Company, Limited, $50,000.

Prince Albert, Sask.—Wakaw Lake Company, $50,000.

Red Deer.—Central Alberta Dairy Company, Limited, $50,000.

Hamilton.—Tuxedo Land Company, Limited, $40,000. W. Kerr, E. S. Kerr, J. Martin.

Hanley, Sask.—Saskatchewan and British Columbia Land Company, Limited, $20,000.

Valleyfield.—Gold Lion Brewing Company, Limited, $249,000; E. Hebert, E. A. Cassidy, J. E. Neveu.

Orillia.—Orillia Building and Realty Company, Limited, $40,000. H. McLean, M. A. McLean, H. Gilmore.

Sault Ste. Marie.—Sault Realty Company, Limited, $150,000. A. Gibson, W. H. Hearst, W. E. Brown.

London.—Maturity Bond and Surety Company, Limited, $20,000. F. Kitching, G. D. Kitching, L. U. Cornell.

Grand Valley.—East Luther Telephone Company, Limited, $3,000. W. McKinley, S. Nunn, R. A. Duffy.

Regina, Sask.—Young Women's Christian Association; Saskatchewan Transfer Company, Limited, $20,000.

Ottawa.—Roman Gold Mines of Porcupine, Limited, $2,000,000. T. S. Howard, P. J. O'Brien, G. J. Arthurs.

Deschambault.—DeLisle Advertising Specialty Company, Limited, $75,000; A. Galipeault, L. St. Laurent, H. Laferte.

Saskatoon.—Ware Binding and Cordage Company, Limited, $100,000. Western Canada Agricultural Unit Company, Limited, $62,500.

North Bay.—The Farmers' and Consumers' Co-operative Company of New Ontario, Limited, $75,000. F. Bachler, H. J. Ellis, P. R. Owens.

Moose Jaw.—International Investment Company, $75,000; Moose Jaw Financial Company, Limited, $15,000; Hamelin-Macleod Company, Limited, $100,000.

Saskatchewan.—The following telephone companies have been incorporated: The Wheat Belt Rural, Nos. 1, 2 and 3, Kisbey Rural, the Laura Rural, and the Duval and Long Lake Rural.

Calgary.—Scott Electrical Company, Limited, $10,000; Graham-Hamilton-Campbell, Limited, $30,000; Macleod Investment Company, Limited, $20,000; Brown Trading Company, Limited, $10,000; Canadian Western Natural Gas, Light, Heat and Power Company, Limited, $8,000,000; Co-Operative Lumber Company, Limited, $50,000.

Edmonton.—Alaska Oil Company, Limited, $10,000; Dunvegan Townsite Company, Limited, $10,000; Peter Rule Construction Company, Limited, $10,000; Edmonton and Peace River Company, Limited, $100,000; Western Canada Loan and Investment Company, $100,000; Dunvegan and Peace River Townsites Company, $15,000; Edmonton Meat Company, Limited, $10,000; Edmonton Land Company, Limited, $10,000; Dunvegan Land Company, Limited, $100,000; Edmonton Tennis and Bowling Company, Limited, $25,000; Capital Construction Company, Limited, $20,000.

Toronto.—Tisdale & Scott, Limited, $40,000; R. G. Agnew, A. J. Wise, A. P. Traill. British Canadian Realty, $500,000; T. H. Wilson, A. F. White, W. R. Gordon. Loockwick Sand and Gravel Company, Limited, $40,000; A. F. White, T. H. Wilson, R. W. Gordon. The Dominion Wood and Lumber Company, Limited, $250,000. J. A. McAndrew, W. H. Irving, H. H. Davis. The Dominion Diamond Drilling Company, Limited, $40,000; W. L. Henwood, J. E. Boyle, L. Rogers. Consolidated Securities Corporation, Limited, $40,000; E. C. Ironside, J. B. Moon, J. R. Corkery. Hollinger Reserve Mines, Limited, $2,000,000; G. H. Sedgewick, A. G. Ross, L. Davis. North Thompson Mines, Limited, $40,000; R. Mackay, A. Dods, M. MacDonald.

Montreal.—Campagne, Pauze, Limitee, $500,000; J. A. T. Richards, Anna Clement, Thibaudeau Rinfret. Western Investment Company, Limited, $100,000; J. E. Lalonde, E. Larochelle, U. Mailoux. S. Klein, Limited, $50,000; S. Klein, A. Klein, M. Klein. Sclater Asbestos Company, Limited, $50,000; W. Sclater, A. G. Macdonald, A. G. Sclater. F. Nicolas & Company, Limited, $20,000; F. Nicolas, J. J. Creelman, A. Jodoin. Mitchell Realty, Limited, $500,000; W. Mitchell, W. J. Carrique, W. G. Mitchell. Montreal Abattoirs, Limited, $500,000; W. J. White, J. H. Dillon, T. S. Owens. Lancashire Dynamo and Motor Company of Canada, Limited, $50,000; J. J. Creelman, A. Jodoin, A. P. Graves. Flathead Coal and Coke Company, Limted, $5,000,000; E. Rodier, E. Felly, L. Dansereau.

◆

PERSONAL.

Mr. Wm. Connolly, custom inspector at Winnipeg, Man., has been transferred to Regina, Sask.

Mr. A. J. C. Frigon, manager of the Banque d'Hochelaga at Winnipeg, Man., is dead.

Sir Robert W. Perks, the well-known British engineer, will visit Canada at an early date.

Mr. J. Godfrey Bird has taken over the general management of the Banque du Internationale.

Mr. James McCrea, president of the Pennsylvania Railroad, was a recent visitor to British Columbia.

Mr. R. H. Hogeland, of St. Paul, chief engineer of the Great Northern Railway, recently visited Vancouver, B.C.

Mr. W. L. W. Miller has been appointed manager of the San Francisco department of the Western Assurance Company.

Mr. J. Stephen has been appointed manager of the North Vancouver, B.C., branch of the Bank of British North America.

Mr. Oscar Jones has been appointed manager of the St. Catherine Street branch, Montreal, of the Bank of British North America.

Sir William Whyte has been elected a director of the Imperial Guarantee & Accident Insurance Company, and of the Canadian Pacific Railway.

Mr. A. W. Wheatley, who was recently appointed general manager of the Canadian Locomotive Company, Limited, at Kingston, Ontario, has taken charge of the plant.

Mr. N. T. Truell, of the Sun Life, Regina, read an interesting paper on life insurance at the recent annual meeting of the Life Underwriters' Association of Port Arthur.

Mr. J. Campbell Maben, jr., has been elected a director of the Sloss-Sheffield Steel & Iron Company, to fill the vacancy in the board caused by the death of Mr. H. C. Seixas.

Mr. A. R. Howell, the newly-appointed Canadian manager of the Gresham Life Assurance Society, has left for London in connection with the establishment of the Canadian branch.

Mr. William Molson Macpherson, president of the Molsons Bank, and Mr. A. D. Durnford, superintendent of branches, have been visiting the coast. They went as far as Prince Rupert.

Mr. Duncan C. Grant, assistant manager of the St. James-McGill branch, Montreal, of the Bank of Toronto, has been appointed acting manager of the Board of Trade branch, Montreal.

Mr. J. B. Tyrrell returned from Great Britain recently. He has located a temporary office at the Lucky Cross mines and will make an examination of the property as their consulting engineer.

Mr. H. F. Montgomery, who has been promoted from the management of the Royal Bank at Cumberland, Vancouver Island, was presented by his friends there with a gold watch, chain and Masonic locket.

Mr. Richard Grigg, British Trade Commissioner in Canada, was a visitor to Toronto this week, a guest of the Canadian Exhibition and of the dinner of the Toronto Board of Trade to Earl Grey on Monday evening.

Mr. R. A. Mannings of the Royal Insurance Company, Liverpool, has been appointed secretary of the Canadian life department, in succession to Mr. A. R. Howell, who has become Canadian manager of the Gresham Life.

Mr. William Plender, F.C.A., the president of the Institute of Chartered Accountants in England and Wales, has received a knighthood. Canadian Chartered Accountants will unite with their British brethren in extending congratulations.

Hon. Thomas Taylor, Minister of Works, has returned from a trip through the Nicola and Cariboo districts. He states that it will not be many years before there will be hundreds of thousands of acres of land under cultivation in Northern British Columbia.

INDUSTRIAL ACCIDENT INSURANCE.

Medical Attendance versus Disability—Payment in Advance—Lapses.

The following are extracts from the paper read at the recent meeting of Niagara Falls Accident Insurance Companies that operate industrial departments on monthly and weekly payment plans.

Mr. J. S. Wilson, claim adjuster of the Great Eastern Casualty Company of New York, in speaking of medical attendance versus disability said:—

All policies of accident and health insurance, so far as I have been able to learn, contain two conditions to be met and complied with before liability arises. It is not sufficient that one shall be disabled, but the further condition is made that one shall be visited or attended by a legally qualified physician or surgeon. These two conditions of the contract while necessary are a source of much disagreement between insurance companies and their policyholders, and in consequence much worry is caused the claim departments.

Wording of Contracts.

The wording of most of our contracts, if for an accident, is usually about as follows: "Indemnity is provided for the period that one is disabled and regularly attended by a legally qualified physician." If for an illness, "for the period that one is confined within the house and therein regularly visited by a legally qualified physician."

A claimant's disagreement with the company's interpretation of the contract is sometimes shared by the agent, often resulting in the loss of that agent's services.

The policy is somewhat ambiguous, and until some concerted action is taken by our conference towards making a change in the policy, no one of us can hope to make the policy more specific. I feel confident that when the conference realizes the necessity of overcoming this ambiguity they will take some action in that direction.

Period of Confinement.

The period of one's confinement in the house by an illness and the period that he is visited in the house by a physician rarely coincides. The period that one is wholly disabled by an accident and the period that he is attended by a surgeon rarely coincides. The question always arises "What constitutes the regular attendance of a physician or surgeon?" Where the period of medical attendance is far short of the period of disability, where does liability cease? To pay indemnity from the first date to the last date of medical attendance, might often be injustice to a claimant. To give a claimant indemnity for the period asked for disability, when the medical attendance was far short of his disability would often be injustice to the company.

It is so seldom that the period of medical attendance exactly coincides with the period of one's confinement or disability that such cases need not be considered. In almost 100 per cent. of the claims presented for loss of time there is a possibility of placing more than one interpretation to our present policy contracts and at least two different conclusions as to what is due. This situation causes the correspondence of a claim department to become burdensome, even though no more serious results follow. Unfortunately, however, correspondence cannot always convince the assured of the justice of the company's attitude and in consequence a great loss of business follows.

Provision for Indemnity.

The thought has occurred to me that if in the policy a provision was made for indemnity not to exceed a certain number of days after the last medical attendance, say 5, 7, 10 or as many as might be deemed reasonable, it would give the desired relief. I do not believe such wording would increase our liability under the policy or hurt the sale of the policy. It certainly would make it stronger and clearer and would materially reduce the percentage of dissatisfaction in adjustments.

In calling this matter to the attention of the conference, I do so with the hope that you will give it your immediate consideration and make alterations in the policy for giving the relief that is needed.

Mr. F. H. Goodman, president, Home Accident and Health Insurance Co., South Bend, Ind., discussing payment in advance said:—

"When our Auditor of State advised us that we must eliminate the beneficiary clause from our policy, we felt that we must add some provision that would be equally as helpful to the agent and as attractive to the prospect, so we added the following clause:—

"The company will make an advance payment on a claim when insured is entitled to three weeks' pay, if he requests; and will make payment every two weeks thereafter until claim terminates; provided insured has established his right to receive pay under this contract.

. . . "One would naturally think that out of 100 claimants whose disability had run three weeks, nearly all would ask for the advance pay, but they don't; probably not over three or four out of 100; that being so, as to the 96 or 97 that do not ask, the clause would seem to be absolutely valueless. Just why they do not ask, I do not know, possibly because they do not need money, possibly because they have forgotten that the clause is in the policy.

"But what are the results as to the few who do ask?

Claimant Needs the Money.

"If the claim has been definitely established, either by the first or subsequent reports, the company advances the money promptly and the effect is excellent. Usually the claimant needs the money or he would not have asked for it, and receiving it when he needs it, it is very helpful to him and he then appreciates the provision at its full value, and in every way the effect is beneficial.

"But suppose the claim has not been well established because of delayed or incomplete reports, and the company cannot respond promptly but does respond as soon as possible. The delay though unavoidable may destroy all the beneficial effects, and nothing is gained; in fact claimant may be so sore because of the delay that, even though his claim is paid promptly and in full as soon as established, he may quit the company, and become a knocker instead of a friend."

Discussing the important question of lapses, Mr. G. L. McNeill, president of the Massachusetts Accident Company, of Boston, said:—"Where the agent uses his personal magnetism to secure applications on the dotted line, exercising his mentality over those who have less will power, the business thus secured lapses as soon as the mental influence of the agent is withdrawn, and can only be renewed by repeating the same means used in securing the application.

"Other agents secure business by arousing the fear of their prospects; they enlarge upon the frequency of accidents and their disastrous results. They dwell upon the liability of sickness, exciting in the minds of those whom they would insure the belief that they will be certain to receive from the company many times the amount they pay in. Business secured in this manner is likely to last longer than business obtained through the use of will power, but after some time has passed, his fear diminishes and he decides that he does not need the insurance.

"A third class of agents present the subject of accident and health insurance as a business proposition. They call attention to the various lines of insurance and show the reasonableness and prudence of securing protection against loss from accidents or sickness. The applications they present to the company are applications of persons who have become satisfied of the wisdom of securing a policy; they have not been over-persuaded nor made to feel that they are going to draw upon the company, and consequently such business continues and is the business from which the companies are able to show an increase from year to year. That is the kind of business which we want to encourage.

"Until the methods used by the first two classes of agents are eliminated and our policies improved and properly explained to the applicants we shall continue to have an abnormal lapse rate."

◆

INDUSTRIAL ACCIDENTS DURING JULY.

Industrial accidents occurring to 287 individual work people in Canada during July, were reported to the Department of Labor. Of these, ninety-two were fatal and 195 resulted in serious injuries. In addition, ten fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before July, 1911.

In the preceding month there were eighty-two fatal and 110 non-fatal accidents reported, a total of 192, and in July, 1910, there were 116 fatal and 238 non-fatal accidents, a total of 354. The number of fatal accidents reported in July, 1911, was, therefore, ten more than in the preceding month, and twenty-four less than in July, 1910. The number of non-fatal accidents reported in July, 1911, was eighty-five more than in the preceding month, and forty-eight less than in July, 1910. Altogether there were ninety-five industrial accidents reported in July, 1911, more than in the preceding month, and sixty-seven less than in the same month of the preceding year.

Of 287 returns during the month giving the ages of the victims of industrial accidents, seven referred to persons under twenty-one years of age, sixty-one to persons between twenty-one and forty-five, and sixteen to persons over forty-five. Two hundred and seven persons were over twenty-one years of age, but their exact ages were not specified.

TORONTO'S FIRE LOSS LAST YEAR.

Some Interesting Statistics—Comprehensive and Valuable Report Has Just Been Issued.

Number of alarms	**1,267**
Total loss by fire	**$259,741**
Total loss on buildings and contents	**259,741**
Total insurance paid on buildings and contents	**241,473**
Loss on buildings and contents with no insurance	**13,622**

An interesting and comprehensive report has been issued by the Toronto fire department. The report, which consists of over 200 pages, gives in detail particulars regarding the fires which occurred in Toronto during 1910, and the compilation reflects credit on Fire Chief Thompson.

The fire alarms during the year numbered 1,267. This exceeds the number that has occurred in the city in any one year in the record of the department, being 164 more than that of last year.

Loss During 1910 Was Small.

The total loss by fire during the year amounted to $259,741.36, being $481,190.42 less than 1909, and the smallest loss in any one of the past nine years. Taking the area of the city, the amount of property protected and the number of actual fires which occurred, the average loss is less than that of any one year in the history of the department. The high pressure service was used only once during the year and then only for a very short time. It was not found necessary to send in a general alarm for any fire during the year.

The particulars of the losses and insurance are as follows:—Loss on buildings, $81,460; insurance on buildings, $1,411,010; loss on contents, $178,280; insurance on contents, $1,625,621; total loss on buildings and contents, $259,741; total insurance on buildings and contents, $3,036,631; insurance paid on buildings, $75,416; insurance paid on contents, $166,056; total insurance paid on buildings and contents, $241,473; loss cvtr insurance paid on buildings and contents, $3,646; loss on buildings with no insurance, $4,044; loss on contents with no insurance, $9,578.

Causes of Fires During 1910.

The causes of fires and alarms during 1910, were as follows: Bonfires, 6; boys and matches, 46; burning chimneys, 36; burning rubbish, waste paper, debris, etc., 89; carelessness with lighted matches, candles, etc., 41; careless workmen, 3; children and matches, 42; clothing, etc., hanging too close to stove, 2; defective automatic sprinkler system, 12; defective chimneys, 10; defective electric wiring, 10; defective furnaces, 9; defective furnace pipes, 6; defective gas fixtures, 7; defective grates, 14; defective insulation, 26; defective motors, 4; defective stoves and ranges, 5; defective stovepipes, 8; defective ventilators, 1; disinfecting room, 5; dry grass, leaves, etc, 50; drying plaster, 15; electric wires, 15; escaping steam or smoke taken for fire, 42; explosion of chemicals, 1; explosion of coal oil lamps, 12; explosion of coal oil stoves, 5; explosion of gas stoves, 2; explosion of gasoline in stoves, torches, tanks, etc, 6; false alarms given by persons unknown, 95; false alarms through Courtland Automatic Electric System, 1; false alarms through G. N. W. Automatic Electric System, 16; false alarms through Holmes Automatic Electric System, 8; false alarms through May-Otway Automatic Electric System, 1; fireworks, 5; gas jet, candle, lamp or torch in contact with curtains, etc., 45; hot ashes, 15; ignition of boiling fat, oil, sugar, wax, tar, etc., 18; ignition of benzine or gasoline, 31; ignition of dust in hot air pipes, 3; ignition of leak in gas pipes, 5; ignition of oily rags, waste, etc., 7; ignition of film in moving picture machine, 1; ignition of varnish, paint, etc., 5; ignition of wood in stove oven, 2; incendiary, supposed, 32; lighting stove with coal oil, 1; locomotive fell through trestle work, 1; mice and matches, 6; molten iron ignited woodwork, 3; overheated baker's oven, 2; overheated boiler, 3; overheated coffee roaster, 1; overheated drying kiln, 3; overheated stove pipes, 8; overheated smoke house, 2; heated gas stoves, 6; overheated incubator, 1; overheated journals, pulleys, etc., 2; overheated lime in bags, 1; overheated steam pipes, 2; overheated ranges and stoves, 26; oveerheated stove pipes, 8; overheated smoke house, 2; overheated sulphur pot, 1; outside city limits, 9; reflection from electric or other light, 1; re-kindling of previous fire, 5; short circuit in motor, 1; sparks from brick kiln, 2; sparks from burning rubbish, 2; sparks from burning chimney, 37; sparks from cupola, 6; sparks from forge, 4; sparks from furnace, 9; sparks from grate, 3; sparks from locomotive, 10; sparks from man's pipe, 10; sparks from motor, 6; sparks from picker, 11; spontaneous combustion, 14; stub of lighted cigar or cigarette, 18; struck by lightning, 10; thawing water or steam pipes, 9; unknown, 179; upsetting of coal oil lamp, 9; upsetting of stove, 2; water front in stove burst, 5.

Classification of Losses as to Amount.

281	Where no losses are reported.		
360	Where the losses were less than......$	100	
159	Where losses were from	100 to $	500
27	“ “	500 to	1,000
44	“ “	1,000 to	5,000
3	“ “	5,000 to	10,000
5	“ “	10,000 to	20,000
1	“ “	20,000 to	25,000

Classification of Buildings.

Classification of Buildings in Which Fires Occurred During Each Month, 1910.

	Brick or Stone.	Frame.	Other than Building Fires	False Alarms	Fires Confined to One Building	Fires Extending to Other Buildings.	Calls for Help. Outside City.

(Continued on Page 1035.)

Loans on Life Insurance Policies.

The opinion prevails among the most able insurance underwriters that the true function of a life insurance company is to protect families and to pay death claims. The assumption of any other duty by an insurance company is merely incidental to its primary purposes. So said Mr. J. A. O. Preus, commissioner of insurance in the State of Minnesota, at the National Convention of Insurance Commissioners, recently held in Milwaukee. This subject was discussed in last week's Monetary Times.

Mr. Preus added that the loan privilege was originally incorporated in a policy in order to enable the holder to borrow in case of temporary financial embarrassment. The loan feature of an insurance contract has had its greatest development during the past ten years. Previous to that time there is no record that this privilege was abused, or had assumed such proportions as to be viewed with any degree of alarm. It was customary with insurance companies to loan money upon request of the assured, but there was no contractual obligation on the part of the company to do so. Loans were usually granted after the policy had been in force for some years, upon a high rate of interest, and merely to the extent of a percentage of the cash surrender value of the policy.

The loan privilege has proven to be both advantageous and detrimental to the interests of the policyholder, as well as advantageous and detrimental to the interests of the company.

Advantages to the Policyholder.

During the months of October, November and December of 1907, the legal reserve companies of the United States furnished on demand, approximately, $60,000,000 to policyholders who were embarrassed by the financial stringency, or so-called panic. Under various captions, the daily press called the attention of the public to the alleviation given policyholders by insurance companies:—"Saved from ruin by millions of insurance companies. Policyholders aided. Insurance companies furnish millions at 5 per cent.," etc.

Never before had it been so fully realized that a life insurance policy was an asset upon which money could be raised quickly. Men who stood on the brink of financial ruin, found their insurance policies to be "sheet anchors to windward." During this period the insurance companies furnished ready money at 5 and 6 per cent., mostly at 5, whereas the borrower could not even, on gilt-edged security, have negotiated a loan in the open market at a far higher rate of interest, and the insurance companies could have secured better returns on their money. Loans were made in small amounts, but usually in large sums, and frequently they ranged from $60,000 to $90,000.

Loan Privilege Proves of Value to Policyholders.

The financial stringency of 1907 developed that the loan privilege is of great value to the policyholder during a financial crisis; first, because money can in this way be raised quickly; secondly, because it can be raised at a low rate of interest; thirdly, because it is an everpresent resource for obtaining cash.

The loan privilege frequently proves itself of value to a policyholder who is unable to meet his premiums. Occasions arise, especially among the poorer class of people, upon which a policyholder is unable to pay his premiums when due. He has had sickness in his family, or is temporarily out of work. He does not wish to carry any less insurance or in any manner to change his policy. The saving clause in his policy is the loan privilege, When so taken advantage of, the privilege is a most valuable asset to the policyholder, and in such instances serves its worthiest purpose.

Loan Privilege a Great Temptation.

The loan privilege is not an unmixed blessing to the policyholder. There are serious objections to the practice, even from his point of view.

Not satisfied with waiting "to die to win," many policyholders fall into the miserable habit of considering themselves first and their families second. Like the down grade of a cocaine fiend, who occasionally takes a dose and then gets the habit, so can be traced the demoralization of a policyholder who borrows first for a necessary purpose, then for convenience sake, and eventually, asks for the surrender value of his policy. The loan privilege becomes a great temptation to many. It affords the holder an easy method of procuring money at minimum expense, and he borrows on his policy, rather than upon other security. An opportunity presents itself to invest and get great returns on money, a desire to speculate seizes him, and he forgets that the insurance was taken out for the benefit of some one other than himself. He continues borrowing until he reaches the limit of his loan privilege, pays interest awhile, tires of paying both premium and interest, calls for what little surrender value the policy may have, and finds his family unprotected, and himself uninsurable.

The lapse ratio resulting directly from the practice of the policyholder to borrow on his policy is tremendous. It is frequently asserted that less than 10 per cent. of such loans is ever repaid. The ultimate result of loans, except the 10 per cent. so repaid, is lapsation of the policies.

This fact indicates that, in over ninety cases out of one hundred where called into operation, the loan privilege defeats the very purpose of life insurance, that of paying death claims.

A Talking Point for Agents.

If all companies were deprived of the right to make loans on policies, perhaps no advantage so far as the company is directly concerned would ever be mentioned. The loan privilege is a great talking point for agents. Usually an agent cannot sell a policy merely on account of the loan clause, but if he can point to the same as a feature contained in the policy which he is selling, and demonstrate to the client that his competitor cannot offer this advantage, he invariably prevails over the other agent. This was clearly proven in the case of a very prominent life insurance company which was adverse to giving a holder the right to loan on his policy. It was largely due to the insistence of its agents that the company was finally prevailed upon to incorporate such a clause in its policies.

One thing that may be called an advantage to the company is that as an asset the policy loan is absolutely secured. When a loan is made within the amount of the reserve on the policy, failure to pay on the part of the borrower simply leaves the company with a cancelled policy and, in dollars and cents, it has lost nothing. Furthermore, policy loans are easily and cheaply handled, and yield the company a higher rate of interest than almost any other security.

Disadvantages to the Company.

The most serious dangers of the policy loan practice are those which affect the insurance companies, and inasmuch as a life insurance company is nothing more or less than a trustee of the policyholder's money, that which is disadvantageous to the company is, in the last analysis, detrimental to the best interests of the insuring public.

Every insurance contract initially contemplates that it may cover the entire life remainder of the insured. It is therefore essential that the assets of the insurance company be such as no financial flurry or panic can in any way disturb. What effect have policy loans had upon the stability of the assets of the insurance companies in the past, and what can we look for in the future? The following table of total admitted assets and policy loans as of December 31st, of all legal reserve companies reporting to the New York Insurance Department, including the years from 1902 to 1909, is taken from the New York Insurance Reports, and on which has been worked out the ratio of policy loans to admitted assets:—

As of Dec. 31st	Total Admitted Assets	Policy Loans	Per Cent. of Policy Loans to Admitted Assets
1902	2,059,403,079	108,081,313	.0524
1903	2,223,289,799	135,506,080	.0609
1904	2,451,305,638	163,598,455	.0677
1905	2,647,732,579	196,626,813	.0742
1906	2,848,103,208	233,868,389	.0821
1907	2,917,908,918	306,576,652	.1050
1908	3,204,193,352	361,843,462	.1129
1909	3,467,474,821	396,778,265	.1144

Ratio Considerably More than Doubled.

The ratio has considerably more than doubled during a period of eight years. This vast increase of policy loans is ominous. During the year 1909 approximately 11½ per cent. of the total assets of the various companies reporting to the New York Department was represented by loans to policyholders. From the consolidated chart of the Fraternal Monitor, the admitted assets of the 149 legal reserve companies therein contained were, on December 31st, 1910, $3,047,379,668, and policy loans $476,817,320, the ratio of the latter to the former being 12.07 per cent.

(To Be Continued.)

MODERN FIRE WASTE

By James Hedley.

What are the causes of the great fire-waste on this continent?

Negligent and unscientific house-building is one. From the paper-covered shack to the brick-nobbed imitation of a solid building, all notion is left out of sight that such structures will burn, just as surely as the wood and paper materials with which they are built.

Reckless disregard of what is apt to cause fires in houses is another. We let rubbish gather in our attics and cellars. Floor-sweepings in our dwellings, saw dust in saloons, oiled rags in our factories. Any and all of these will light into dangerous flame at the touch of a match.

Village and town authorities, too, are lax in permitting rubbish to collect. Loose paper, straw, chips, hot ashes in streets and lanes are as sure a menace to the public safety from fire as rotting vegetables and festering pools of water in the streets of a village are to the health of the villagers.

Overheated stoves and furnaces in the winter cause many expensive fires; faulty stove-pipes and chimneys burn many a dwelling.

Average Man Never Thinks of Fire.

A curious circumstance is that the average man does not think that **his** house is ever going to burn down. His neighbor's factory or store may burn; his neighbor's dwelling may go some night—it is only a flimsy affair anyhow, and the neighbor is careless, but the average man seems to have a notion that a special providence watches over **his** property—and so he doesn't bother over matters of fire-prevention around home.

All these things must be changed, before a permanent lessening of the fire-waste is reached in this country. It is our duty to help in forming a public opinion that will result in public economy in the vital matter of fire-waste.

Nowhere else in the civilized world is the fire loss so great as in the United States and Canada. Comparison of the figures of these countries with European countries should make us ashamed of our improvidence. The average man, living on this western side of the Atlantic, looks upon the annual fire waste of $150,000,000 or $170,000,000 as ill-luck, or a sort of blind and pitiless necessity; whereas it is largely the result of our own carelessness.

Some Interesting Statistics.

The following is the record for European countries:—

Country.	Annual average fire loss.	Loss per capita.
Austria	$7,601,000	$0.29
Denmark	660,924	0.26
France	11,669,000	.30
Germany	27,655,000	.49
Italy	4,112,000	.12
Switzerland	999,364	.30
United States and Canada	151,026,000	1.76

Our fire waste in North America is thus from five to six times as great as the average of these countries.

How comes it that the inhabitant of Italy, Denmark, Germany, gets off with 12 to 40 cents a year for his fire-waste tax, while the dweller in the United States or Canada has to pay $1.75?

In the first place, they build houses more substantially across the Atlantic. In European cities great losses are prevented by their insisting on the erection only of stone and brick buildings. Great care as to destructive fire is enjoined, and certain regulations are enforced by law. For example, in Southampton, England, if a man permits the chimneys of his house to become foul with soot and take fire, he is fined. The storage of waste material is regulated. And so long have these laws been in force, that communities have been trained to habits of carefulness and order, the place is surprisingly free from fires, and the insurance rates among the lowest known.

European Fire Loss Compared with United States and Canada.

Comparing the fire-loss in Europe with that in the United States and Canada, The Monetary Times, some time ago said: "The appalling fire loss is partly due to the carelessness of the people and to the peculiarities of the climate. But the great underlying cause, and the key to the situation, is the defective building construction which is operative all over the country. A great responsibility rests with the architect. We need architects who are not afraid to sacrifice, in building construction, a little beauty for solidity, a little art for safety, and a little external or internal fussiness for fire-proof qualities. * * * Reinforced concrete has proved its value as a fire-proof and heat-resisting material."

(To be Concluded.)

REVIEW OF THE MONTH

NEW STOCK LISTINGS.

The Toronto Stock Exchange Listed $4,000,000, Coniagas Mines, August 3rd.

The Montreal Stock Exchange listed new issue of 10,000 shares Dominion Bank of Canada.

The following securities of the Sherwin Williams Company of Canada were called:—40,000 shares common; 30,000 shares preferred; $3,000,000 bonds 6 per cent. due 1st July, 1941, interest payable 1st January and 1st July.

◆

SPECULATIVE AND INVESTMENT OFFERINGS.

The following speculative and investment offerings were among those made in Canada during August:—

Canada National Fire Insurance Company.—$2,000,000 capital stock at $115 per share, being at a premium of 15 per cent.

National Coal and Coke Company, Limited.—Share, 20 cents each, par value $1.

Otard Bay Oil and Coal Company, Limited.—$25,000, share at 25 cents each.

Toronto Tropical Fruit & Development Company, Limited, Toronto.

Kootenay Jam Company, Limited, Vancouver, B.C.—30,000 shares at $1 each.

Canada Bread Company, Limited, Toronto.—$1,250,000, 6 per cent. mortgage, thirty-year sinking fund gold bonds, at 98½.

British Pacific Coal Company, Vancouver, B.C.—Shares offer at 50 cents each, par value $1.

Summit Creek Hydraulic Mining Company, Limited, Victoria, B.C.—$40,000 preference shares at $1 each. Capital $125,000.

Canadian Orienta Land Investment Company, Limited, Victoria, B.C.—10,000 shares of $10 each. Capital $100,000.

Coronet Coal, Mineral & Oil Lands Company, Limited, Victoria, B.C.—25,000 shares at 25 cents each, par value.

Ladysmith Pressed Brick Company, Limited, Victoria, B.C.—150,000 shares of $10 each. Capital $150,000.

British Canadian Home Builders, Limited, Victoria, B.C.—500,000 shares at $1 each. Capital $500,000.

Kinemacolor Company.—$200,000 to be issued at par, and carries a bonus of two shares of common to each one of preferred, which carries 10 per cent. cumulative interest. Capital $1,000,000.

Pacific Northwest Fisheries, Limited, Victoria, B.C.—25,000 shares non-assessable at $1.25 each. Capital $50,000.

Hardstone Brick Manufacturing Company, Limited.—Offering of $100 shares at par. Head office, Winnipeg.

◆

DIVIDEND CHANGES.

The directors of Sherwin-Williams have declared the first dividend of 1¾ per cent. on the preferred stock payable September 15th.

The Belding-Paul-Corticelli Limited, has declared its first quarterly dividend at the rate of seven per cent. per annum on the preferred stock, payable September 1.

McKinley-Darragh directors have declared the regular quarterly dividend of 3 per cent., with a bonus of 7 per cent., payable October 1, 10 per cent. in all.

The Bank of Nova Scotia increased its dividend from 13 to 14 per cent., which is the largest dividend paid by any Canadian bank.

Marconi's wireless Telegraph Company, Limited, has declared a dividend at the rate of 7 per cent. per annum on the capital paid up as on Dec. 31, 1910, on the cumulative participating preferred shares issued on or prior to such date. Also an interim dividend at the rate of 7 per cent. per annum on capital paid up as on June 30, 1911, on the cumulative participating preference shares issue on or prior to such date, and an interim dividend for the half year ending June 30, 1911, at the rate of £10 per cent. per annum on the capital paid up on the ordinary shares issued at July 20, 1911. All dividends payable September 1.

The Paton Manufacturing Company, passed its dividend. Only a few shareholders are affected, as the stock is closely held. The company, which is a woolen concern, with mills at Sherbrooke, has recently been paying 6 per cent.

Kerr Lake directors have declared the regular quarterly dividend at 25 cents per share, with 15 cents extra, payable September 15th, to holders of that date.

The dividend upon the stock of the British Columbia Copper Company, has been deferred.

CANADIAN FLOTATIONS IN LONDON (AUGUST).

The following flotations of interest to Canadians were made in London during August:—

British Columbia Electric Railway Company, Ltd.—£600,000 as follows: £200,000 5 per cent. cumulative perpetual preference shares of £1 each at one shilling premium; £200,000 preferred ordinary shares of £1 at two shillings premium, and £200,000 deferred ordinary shares of £1 each at four shillings premium.

New Westminster, B.C.—£120,600 4½ per cent. at 101½.

General Accident Fire and Life Assurance Corporation, Ltd.—250,000 5 per cent. cumulative preference shares of £1 each at par.

The following were omitted from the July list:—

British Columbia Electric Railway Company. — £600,000 divided into 200,000 5 per cent. cumulative preference shares of £1 each at 21s. per share; 200,000 preferred ordinary shares of £1 each at 22s. per share, and 200,000 deferred ordinary shares of £1 each at 24s. per share.

Canadian and American Mortgage and Trust Company, Ltd.—£100,000 shares to existing shareholders.

Central Railway Company of Canada.—£600,000 5 per cent. first mortgage bonds at 93.

BANK BRANCHES OPENED AND CLOSED DURING AUGUST.

Sixteen branches of Canadian chartered banks were opened during August, and five closed. During July, 18 were opened and 3 closed; during June, 25 were opened and 3 closed; during May, 29 were opened and 3 closed; during April, 17 were opened and 3 closed; during March, 18 were opened and 3 closed; during February, 17 were opened and 10 closed; during January, 37 were opened and 3 closed. Houston's Bank Directory gives the following particulars for July:—

Branches Opened.

Beaver Lodge, Alta....	Canadian Bank of Commerce.
Calgary, Alta., 2nd St.	Merchants Bank of Canada.
Craik, Sask.	Royal Bank of Canada.
Dundalk, Ont.	Union Bank of Canada.
Herbert, Sask.	Union Bank of Canada.
Medicine Hat, Alta. ..	Imperial Bank of Canada.
Montreal, Que., St. Lawrence Boulevard.	Imperial Bank of Canada.
New Waterford, N.S...	Royal Bank of Canada.
Ottawa, Ont.	La Banque Provinciale du
Ottawa, Ont., Bank St..	Union Bank of Canada.
Prince Albert, Sask. ..	Bank of Nova Scotia.
St. Cyrille de Wendover, Que	La Banque Nationale.
St. Fabien, Que.	Eastern Townships Bank.
St. Fabien, Que.	La Banque Nationale.
Toronto, Ont., Dundas and Bloor Streets ..	Imperial Bank of Canada.
Weyburn, Sask.	Home Bank of Canada.

Branches Closed.

Clive, Alta.	Merchants Bank of Canada.
Dominion, N.S.	Royal Bank of Canada.
Durban, Man.	Canadian Bank of Commerce.
Hawkesbury, Ont. ...	La Bank Provinciale du.
Latchford, Ont.	Canadian Bank of Commerce.

RECENT FIRES.

Monetary Times' Weekly Register of Fire Losses and Insurance.

The following particulars are gathered from first Press reports of conflagrations. Upon these are instituted further inquiries which appear under heading "Additional Information."

Percy Township, Ont.—August 24.—Barns of Mr. James Greenly destroyed. Loss and origin unknown.

Nelson, B.C.—August 23.—Chinese ranch at Fairview destroyed. Loss unknown. Origin, incendiarism.

Dalhousie Mills, Ont.—August 28.—Barns of Mr. Joseph Decosse destroyed. Origin, grass fires. Loss, unknown.

Sarnia, Ont.—August 27.—Ludham Ainslie Lumber Company's mill destroyed. Loss about $8,000. Origin, defective hot box.

Palmerston, Ont.—August 25.—Car shops of Grand Trunk Railway destroyed. Loss about $7,000. Origin unknown.

Port Arthur, Ont.—August 24.—Home of Mr. Schmidt destroyed. Three children burnt to death. Loss and origin unknown.

Colborne, Ont.—August 27.—Residence of Capt. Thomas Padginton destroyed. Loss unknown. Origin, supposed coal oil stove explosion.

Windsor, Ont.—August 28.—General store of Messrs. Parent Bros., Sandwich Street destroyed. Loss, about $2,500. Origin unknown .

Alvinston, Ont.—August 25.—Barn and touring car owned by Mr. H. H. Middleton destroyed. Loss about $2,000. Origin, unknown.

Wallaceburg, Ont.—August 23.—Dwelling of Mrs. J. Countrymen destroyed. Loss unknown. Origin, starting fire with kerosene.

Vankleek Hill, Ont.—August 27.—Store occupied by Mr. Fergus Jamieson, badly damaged. Loss unknown. Origin, supposed incendiarism.

Tamworth, Ont.—August 28.—Barns and residence of Mr. Leslie Kellar destroyed. Loss about $5,000. Insurance $1,500. Origin, lightning.

Vancouver, B.C.—August 24.—Premises in Shanghai Alley destroyed. One Chinaman dead, 14 injured.. Loss about $25,000. Origin unknown.

Summertown, Ont.—August 28.—Barns of Mr. D. W. Hope destroyed. Loss about $4,000. Insurance, $1,000. Origin, spontaneous combustion.

Guelph, Ont.—August 29.—Barn and contents owned by Mr. John Henderson, Brockville, destroyed. Loss about $3,500. Insurance, $1,800. Origin, lightning.

Wychwood, Ont.—August 27.—Presbyterian Church damaged. Loss, small. Origin, lightning. House of Mr. Abe Kapatz, 44 McKay Street, destroyed. Loss about $800. Origin unknown.

Ottawa, Ont.—August 26.—New York Chinese Cafe, 68 O'Connor Street, damaged. Loss about $500. Origin, grease boiling over. August 30.— Residence of Mr. Alex. McDougall destroyed. Loss about $25,000. Origin unknown.

Montreal, Que.—August 24.—Stable, rear of premises of Montreal Waterproof Clothing Company, 200 Papineau Avenue, destroyed. Loss and origin unknown. August 26.—Stables and barns of Mr. J. Lafond, Cote St. Michel Road, destroyed, also one cow and 40 hens. Loss about $5,000 Origin, unknown.

Toronto, Ont.—August 26.—Auto on Niagara Navigation Company's dock badly damaged. Loss unknown. Origin, cigarette carelessly thrown. August 24.—Lumber yards of Messrs. Fox & Company, 432 King Street West, damaged. Loss about $1,500. Origin, defective dry kiln. August 30.—Shed, rear of 284 College Street, destroyed. Loss about $500. Origin unknown. Library of Loretto Abbey, Richmond Street, damaged. Loss about $200. Origin unknown.

ADDITIONAL FIRE INFORMATION.

Stratford, Ont.—Stable of Mr. Barclay sustained loss of $300. Insured with Merchants for $200.

Montreal.—Loss on Mr. F. H. Morison's property was $650 on stock and $700 on buildings. Insured with Western for $875.

Owen Sound, Ont.—Mr. G. A. Johnson's loss was $40 on contents and $5 on buildings. Insurance carried, $800. Origin, lamp explosion.

Fruitland, Ont.—Messrs. Carpenter Brothers, loss was $3,000 on stock, and $5,000 on buildings. Insured with Saltfleet and Binbrook Mutual Fire Insurance Company, $3,100.

Port Clyde, N.S.—Mr. N. Sirles' loss on stock was $150 and buildings $400. No insurance. Mr. W. M. Watkins sustained loss of $300, with no insurance, while Mr. W. McKay's loss was $1,500, with no insurance. Origin, forest fire.

Roseway, N.S.—Mr. A. J. McKinney's loss on stock was $400 and buildings $1,000. No insurance. Mr. T. M. McKinney had loss of $2,500 on stock and $2,000 on buildings, with no insurance. Mr. J. W. Hamilton sustained loss of $500 on stock and $700 on buildings. No insurance. Origin, forest fire.

Clyde River, N.S.—The loss sustained by Mr. Albert McKay was $2,000 on stock and $2,000 on buildings. No insurance. Mr. S. Nicoll's loss was $1,000 with no insurance. Messrs. Crowell & McKay's loss was $1,100 on stock and $1,300 on buildings. Insured for $700 with British North America. Origin, forest fire.

AUGUST FIRE LOSSES.

Incendiarism on the Increase—Golden City Will Have Fire Protection.

The Monetary Times estimate of Canada's fire losses during August amounted to $920,000, compared with $5,384,300 for July and $1,667,270 for the corresponding period last year. The heavy July figures were due to the Porcupine fires.

The following is an estimate of the August losses:—

Fires exceeding $10,000	$706,000
Small fires	94,000
Fifteen per cent. for unreported fires	120,000
Total	$920,000

The following are the monthly totals compared with 1909 and 1910:—

	1909.	1910.	1911.
January	$1,500,000	$1,275,246	$2,250,550
February	1,263,005	750,625	941,045
March	851,690	1,076,253	852,380
April	720,650	1,717,237	1,317,900
May	3,358,276	2,735,536	2,564,500
June	1,300,275	1,500,000	1,151,150
July	1,075,600	6,386,674	5,384,300
August	2,582,915	1,667,270	920,000
September	1,615,405	894,125	....
October	2,208,718	2,195,781	....
November	935,191	1,943,708	....
December	1,433,813	1,444,860	....
Total	$18,905,538	$23,593,315	$15,381,825

There were twenty-four fires at which the damage was estimated at $10,000 and over, the largest being at Ottawa, Ont., when a warehouse and hotel were destroyed with a loss of about $100,000. The summer resort of Strathcona and Lakeside, near Montreal, was also destroyed with $70,000 damage. A noticeable feature of the fire loss is the increase in incendiarism, and eight known cases of incendiarism were reported last month.

Suspicious circumstances surround the burning of the barn of Mr. Colin Carpenter, at Fruitland, near Grimsby. The fire was evidently of incendiary origin, and was the culmination of several attempts to damage Mr. Carpenter and his property.

The burning of Peloquin's Hotel, Ahuntsic, which was probed some time ago by the Fire Commissioner, had its sequel in the criminal courts recently, when Mr. Ovila Lambert, who had taken over the hotel, was charged with inciting to arson. The warrant, taken out by the North British and Mercantile Insurance Company, alleged that Lambert had induced Henry Campbell, a clerk, to fire the building on July 26. The question of bail raised opposition from Mr. Chas. Gaudet, who represented the prosecution, and who made the statement that this was not the first charge of this character against the accused. Finally bail was fixed in two securities of $1,000 each, and a cash deposit of $1,000.

The fires at which damage to the extent of $10,000 and over occurred were as follows:—

Hamilton, Ont.	Asylum	$10,000
Strathcona and Lakeside, Que.	Summer resort	70,000
Ottawa, Ont.	Pulp and paper plant	30,000
South Vancouver, B.C.	Stable and warehouse	10,000
Hamilton, Ont.	Livery	10,000
Toronto, Ont.	Factory	15,000
Ottawa, Ont.	Two factories	30,000
Montreal, Que.	Building	14,000
" "	Planing mill	35,000
" "	Sash and door factory	15,000
Salmon River, N.S.	Church, etc.	30,000
Charlottetown, P.E.I.	Condensed milk factory	50,000
Tupperville, Ont	Hotel	30,000
New Toronto, Ont.	Five houses	12,000
Ottawa, Ont.	Warehouse and hotel	100,000
" "	Building, etc.	15,000
" "	Stores	60,000
Sarnia, Ont.	Tug	25,000
Chapleau, Que.	Storehouse	15,500
Florenceville, N.B.	Business section	25,000
West Toronto, Ont.	Factory	35,000
Thurso, Que.	Convent	20,000
Vancouver, B.C.	Chinese section	25,000
Ottawa, Ont.	Residence	25,000
		$706,000

The following structures were destroyed or damaged: 46 residences, 41 barns and stables, 12 stores, 12 factories, 4 churches, 3 buildings, 3 saw mills, 3 lumber yards, 2 motor boats, 2 planing mills, 2 hotels, and one each of the following:—Log cabin, grist mill, asylum, pulp and paper factory, garage, tannery, warehouse, toboggan factory, fire station, moving picture show, pool room, sanitarium, convent, laundry, tug, Chinese ranch, car shops, and library.

The presumed causes of the fires were:—Ten, lightning; eight, incendiarism; five, defective wiring; four, bush fires; three, spontaneous combustion; three, careless with cigars and cigarettes; two, forest fires; two, careless with matches; three, oil stoves upset, and one each of the following:—Defective gas plate, smoking in bed, defective drying room, spark from threshing machine, defective auto lamp, rats and matches, asphalt boiling over, sparks from engine, film coming in contact with electric wires, gasoline explosion, hot ashes, sparks from mill, overload of current, grass fires, kerosene explosion, grease boiling over, hot box.

Forty-one horses, one colt, pigs, cows, and forty hens were also destroyed, together with three automobiles, 1,500,000 shingles, five hearses, several carriages, 320 toboggans, and 1,000 acres of lumber land.

Coal Oil Explosions Cause Many Deaths.

Fourteen deaths from fire were reported during August. Five were the direct cause of trying to light fires by means of spirits of coal oil. It is unfortunate that the general public do not appreciate the danger of handling coal oil near fire. In many cases the damage is done by pouring the coal oil on a dying fire and the danger lies in the flames shooting up, which causes the can to explode and set fire to the clothing of the person handling the oil.

What might have proved a serious disaster was the recent fire in the Chinese quarter at Vancouver, B.C. One Chinaman was burned to death and fourteen injured. The fire originated in the lower floor of some of the buildings which are badly constructed.

The asylum fire at Hamilton, Ont., was responsible for eight deaths.

The following fatalities occurred during August:—

Hamilton	Asylum	8
Montreal, Que.	Spirit lamp explosion	2
Nelson, B.C.	Clothes caught fire	2
Lucan, Ont.	Stove explosion	1
Montreal, Que.	Stove explosion	1
Elmira, Ont.	Clothes caught fire	1
Vancouver, B.C.	Burning building	1
Todmorden, Ont.	Coal oil explosion	1
Port Arthur, Ont.	Burning building	3
Weyburn, Sask.	Coal oil explosion	1
Cornwall, Ont.	Coal oil explosion	1

October	26	16	..
November	34	19	..
December	33	19	..
Total	219	256	250

Golden City Will Have Fire Protection.

Much insurance has been cancelled in Golden City because of the lack of proper fire protection. The business men of the town intend raising money for the purchase of a fire fighting apparatus.

As a result of the newly installed waterworks department, the new insurance tariff went into effect recently at Clinton, Ont. The average reduction among the mercantile risks is from 20 to 25 per cent., while some are as low as 10 per cent., and others as high as 50c. per cent. Dwellings and other three-year risks are placed in class A, which is the best rate given by the Underwriters' Association.

Mr. Norman R. Wilson, of the Canadian Fire Underwriters' Association has reported that Kingston, Ont., has made no improvements in regard to the recommendations in the previous report that a better pressure system should be installed by the Waterworks Department. The Inspector urges the necessity for the installation of a high pressure fire system.

HOW "CANADIAN PACIFIC" FIGURES COMPARE.

Two Items Swell the Land Account—Mileage Figures—Rolling Stock Additions.

Monetary Times Office,
Montreal, August 30th.

The thirteenth annual report of the directors of the Canadian Pacific Railway, being for the year ended June 30th, 1911, has been issued. At the time the synopsis of the report appeared a few weeks ago, The Monetary Times, in making a comparison with the figures of the previous year, drew attention to an item which showed such a large increase as compared with the previous year, as to indicate that The Monetary Times had not succeeded in carrying the comparison out in an exact manner. The item was given in The Monetary Times as "Receipts from lands, investments, etc., $2,426,477 in 1910, and $6,602,205 in 1911, making an increase of $4,175,728 for the year.

In the annual statement appears the following paragraph: "You will have observed that in this annual report the earnings and expenses of your railway and steamship lines are shown together, and that the revenue from other sources is given in a separate statement. This is in accordance with the policy outlined by your directors in the circular letter of March 15th last."

The table which appears below, showing first the items making up the $6,602,205, referred to for this year, and the $2,426,477 for the previous year, will illustrate alterations made in the manner of presenting the accounts:—

	1911.	1910.
Interest on cash proceeds and on deferred payments for land sold	$1,688,170	
Interest on deposits and loans	1,030,377	$ 904,742
Interest on Canadian Pacific Railway First Mortgage Bonds acquired	61,003	
Interest from Minneapolis, St. Paul and Sault Ste. Marie Bonds	159,720	159,720
Interest from Mineral Range Railway Bonds	50,160	50,160
Interest from Toronto, Hamilton and Buffalo Railway Bonds	10,840	
Interest from Kingston and Pembroke Railway Bonds	9,345	
Interest from Dominion Government Bonds	182,500	
Interest from Ontario Government Bonds	48,000	
Interest from British Consols	116,544	
Interest from Montreal and Atlantic Railway Bonds and on other securities	139,922	71,214
Dividned on St. John Bridge and Railway Extension Company Stock	50,000	50,000
Dividends on Dominion Express Company Stock	160,000	
Dividends on Alberta Railway and Irrigation Company Stock	86,162	86,531
Dividends on Minneapolis, St. Paul and Sault Ste. Marie Railway Common Stock	736,071	736,071
Dividends on Minneapolis, St. Paul and Sault Ste. Marie Railway Preferred Stock	368,039	368,039
	$5,046,856	$2,426,477
Transfer of balance of interest from land surplus at June 30th, 1910....	$1,555,348	
	$6,602,205	

How the Difference Is Made Up.

It will be observed that the difference referred to is made up partly by the additional investments of the company, but mainly by the first and last mentioned items, being $1,688,170, interest on cash proceeds and on deferred payments for land sold, and $1,555,348, being transfer of balance of interest from land surplus at June 30th, 1910. The two items amount to $3,243,518.

During the year the company spent $5,449,078 on extensions, practically all, if not all of which were made in the North-West. The total sum spent on general improvements to main line and branches amounted to $12,103,470, as against $6,856,307, spent on total main line and branches the previous year. The amount spent on construction—acquired and branch lines—the previous year was $5,346,243, or about $100,000 less than in the year just ended, as shown above.

A considerable addition was made to rolling stock ,viz., 103 locomotives, 204 passenger cars and 3,808 freight cars at a cost of $9,000,000. There are outstanding orders now for cars and locomotives to the value of $7,000,000. These are expected to be ready for this year's trade.

The summary of the mileage owned and controlled by the road shows the following:—

	1910.	1911.
Mileage included in C.P.R. traffic returns	10,270.6	10,480.9
Mileage of other lines worked	261.7	291.9
Mileage under construction	471.4	983.3
	11,003.7	11,756.1
Mileage of Minneapolis, St. Paul and Sault Ste. Marie Railway	3,616.4	3,769.6
Mileage of Duluth, South Shore and Atlantic Railway	605.8	611.9
	4,222.2	4,381.5

◆

LATE NOTES.

Mr. S. O. Greening, president of the B. Greening Wire Company, of Hamilton, is dead.

The Ontario Municipal Union meeting at Toronto this week urged the appointment of a fire marshal for the province.

Mr. R. S. Gourlay at the Toronto Exhibition Manufacturers' luncheon urged the more rapid development of Northern Ontario's vast resources.

The Anglo-French Financial Company, of Canada, with capital of $2,500,000, was floated in London, England, yesterday. The company has a very influential British directorate.

At a meeting of the shareholders of the Agricultural Loan Company at London, Ontario, the terms of the proposed merger with the Ontario Loan Company were accepted.

If the proposed People's Railway does not carry out its agreement with Guelph in three months, that city will apply to the Ontario Railway and Municipal Board to annul the agreement.

Mr. J. W. Gilmour, for the past seven years secretary-treasurer of the Universal Knitting Company, and prior to that with the Bank of Toronto, has joined the bond department of Messrs. A. E. Ames & Company, Toronto.

Owing to the excessive moisture in the ground considerable breaking is taking place in all parts of Alberta. It is estimated that next year will see as much additional area under cultivation, compared with this year, as this year has been compared with last year.

The total customs revenue of Canada for August was $7,678,395, an increase of $1,198,600 over August of last year, and the largest August revenue on record, despite the shipping strike in Great Britain. For the five months of the fiscal year the customs revenue has been $33,596,145, an increase of $4,504,543, over the corresponding period of last year.

◆

During July there were 29,621 immigrant arrivals in Canada, 18,609 at ocean ports and 11,012 from the United States. As compared with July of last year the increase is 17 per cent. For July last year the figures are 16,019 at ocean ports and 9,199 Americans. For the four months of the current fiscal year, arrivals at ocean ports numbered 127,925 and from the United States 54,814, making a total immigration from April to July inclusive of 182,739. The corresponding months last year gave 100,872 at ocean ports and 54,699 Americans, making a total of 155,571.

ASK FOR TENDERS ONCE ONLY.

Periodically, certain municipalities invite tenders for their debentures, receive several offers, reject them all, and call for tenders again. This practice is not to be encouraged. Two examples have come to notice recently. The town of Welland called for bids for $130,598 4½ per cent. 30-year bonds on July 24, receiving five replies from representative bond houses. The offers were not considered satisfactory. Tenders were again solicited on August 25th. The town of Collingwood has for sale $96,900 4½ per cent. 20-year debentures and invited bids on August 15th. Ten days later, the tenderers were notified that none of the offers had been accepted and were asked to tender again.

It is difficult to see what the municipal authorities expect to gain by their action. The market likely would not change in the short time elapsing between the two invitations. If increased prices were sought the system adopted by Welland and Collingwood did not tend to obtain bigger figures. The keen competition existing among the bond brokers is the best possible guarantee that a town will get the highest price for its securities. The bond houses bid for the issue a price at which they can **sell** the issue. Playing with the market as do some municipalities reduces the number of bidders. One house at least will not trouble to send a second tender to Collingwood. The town of St. Mary's a few years ago invited bids for a debenture issue no less than three times. On each occasion the highest offer was lower than on the previous occasion and in each case the highest bid was from the same house.

◆

AUGUST MUNICIPAL BOND SALES.

Seven Provinces on the Market—Majority of Sales Were Small.

The municipal bond sales for August as compiled by The Monetary Times, amounted to $1,493,507, compared with $1,594,566 for July and $1,312,953 for the corresponding period last year.

The summary of the August sales is as follows:—

Alberta	$ 166,750
British Columbia	17,000
Manitoba	65,400
New Brunswick	135,500
Ontario	787,743
Quebec	80,000
Saskatchewan	241,114
Total	$1,493,507

The following are the monthly totals as compared with 1909 and 1910:—

	1909.	1910.	1911.
January	$2,540,862	$ 881,838	$ 420,337

◆

Owing to the political crisis and the labor troubles through which England has just gone there has been a sharp fall in home securities in the past month. The aggregate value of 387 representative securities shows a shrinkage since July 21st of more than £73,000,000 sterling ($365,000,000), the sum of £32,000,000 sterling ($160,000,000) represents the decline in American railroad stcoks and bonds.

The announcement of the establishment of an American securities bank in Brussels with a capital of 30,000,000 francs and the active co-operation of leading New York, Paris, German and Belgian banks, has given rise to comment. It is said to aim at centralizing American securities which may be thought proper for introduction in European markets. It is to deal particularly with bond issues (in Paris, at least the outlook for stock introductions since the discouraging spring campaign is dubious) and, more particularly, it will undertake the negotiations with governments for the payment of fiscal dues—something which has regularly stood in the way of listing United States securities at the Paris Bourse.

"Capital Investments in Canada"

By FRED. W. FIELD

A New Volume to be Published This Month by

THE MONETARY TIMES

Price - - $2.50

THREE hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion. Complete details of these borrowings will appear in the above volume, which is about to go to press. In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new book, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

The Book Discusses The

Protection of Capital.
Savings of a Young Country.
Municipal bonusing of industries.
Montreal stock quotations in France.
Payment of Canada's interest charges.
Canadian Banks at home and abroad.
Effect of Immigration on National Finances.
Merits of registered stock *versus* bearer securities.
Investments in Canadian farm, town and city property.
Attention paid to the intrinsic value of Provincial Government securities.
Likes and dislikes of the British, American and foreign investor in Canada.
Capital Liability of Railroads.
Possible dangers to Canadian credit.
Shipbuilding and dry-dock investments.
Dutch interest in Canadian mortgages.
Possibility of a German-Canadian bank.
Relations of purchasers of plant and borrowers.
Practice of selling municipal bonds privately.
Scotch capital in Canada's loan and mortgage companies.
Trade Balances in Canada, Great Britain and the United States.
And a Thousand other Topics of Great Value to all interested in Canadian Investments and Development.

The following are the chapters of the proposed volume—

1. British investments in Canada.
2. American investments in Canada.
3. Foreign investments in Canada.
4. French investments in Canada.
5. German investments in Canada.
6. Other Countries' investments in Canada.
7. Canadian Government borrowings in London.
8. Municipal borrowings in London.
9. The financing of Canadian railroads.
10. Industrial investments in Canada.
11. Investments in Canadian land and lumber.
12. Investments in Canadian mines.
13. Canadian banks, British and foreign capital.
14. Registered stock or bearer securities?
15. Canada's credit abroad.
16. Canadian securities & the British Trustee List.
17. New capital from immigration.
18. The relation of trade to borrowed money.

APPENDICES

1. Canada's share of British capital.
2. Is Canada over-borrowing?
3. Canada and International finance.
4. Editorial comment respecting British, American and foreign capital investments in Canada.
5. List of Canadian flotations in London, January 1905 to April 1911.

THREE INDEXES

The volume is very completely indexed, one index being devoted to personal names, another to companies and institutions, and a third to subjects.

Nearly three hundred companies, Canadian, British and foreign, are referred to, while numerous authorities on the subject of investment are quoted.

Sir Edmund Walker has contributed a prefatory note.

QUEBEC'S FINANCES.

Preliminary Statement Shows Revenue of Province Last Year Exceeded Outlay by Quarter of a Million.

The preliminary statement of the financial transactions of the province of Quebec during the year ended June 31st last has been issued. The figures show the regular ordinary revenue to have been $7,032,744, and the expenditure, including $349,255 on the Montreal jail and $6,126 on the Montcalm court house, to have been $6,780,282. There was thus a surplus of revenue over all administrative expenditure of $252,056. The figures are as follows:—

Receipts.

Dominion of Canada	$1,761,473
Lands and forests	1,229,928
Mines, fisheries and game	151,450
Administration of justice, etc.	372,355
Licenses—Hotels, shops, etc.	938,664
Taxes on commercial corporations, etc.	712,118
Duties on successions	1,072,027
Tax on transfers of shares, bonds, etc.	65,912
Maintenance of insane	149,521
Reformatory and industrial schools	30,833
Quebec Official Gazette	21,388
Legislation	19,827
Registration of stamps	172,597
Interest on sinking fund	29,387
Interest on loans and deposits	78,922
Railway subsidies tax	28,317
Minor revenues	198,018
	$7,032,744
Proceeds of sales of property	3,593
Re loan Beauport Lunatic Asylum	1,000
	$7,037,338
Trust funds and deposits	110,597
Total receipts	$7,147,936

Expenditure.

Public debt	$1,123,021
Legislation	349,457
Civil government	447,696
Administration of justice	793,933
Judges of Sessions of the Peace, etc.	30,328
Inspection of public offices	10,379
Public instruction	952,790
Literary and scientific institutions	600
Arts and manufactures	16,000
Health	25,500
Public Works—Ordinary	156,868
Public Works—Extraordinary	298,065
Labor	25,121
Agriculture	400,247

Messrs. McCuaig Brothers & Company are authorized to offer $150,000 Sherbrooke Railway and Power consolidated first mortgage five per cent. bonds at 95 and interest, carrying a bonus of 40 per cent of common stock.

DIVIDEND NOTICES

THE ROYAL BANK OF CANADA

DIVIDEND No. 96

Notice is hereby given that a dividend of Three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Monday, the 2nd day of October next, to shareholders of record of 15th September.

By order of the Board.

E. L. PEASE,

Montreal, P.Q., August 15, 1911. General Manager

TO THE STOCKHOLDERS OF THE TRI-CITY RAILWAY AND LIGHT COMPANY.

Notice is hereby given that the annual meeting of stockholders of the Tri-City Railway and Light Company will be held at the prinipal office of the Company at No. 11 Central Row, in the City of Hartford, State of Connecticut, on the 21st day of September, 1911, at the hour of one o'clock p.m., for the purpose of electing directors to take the place of the directors of the Company whose terms are about to expire, and to transact any and all other business which may lawfully come before said meeting.

The transfer books for the transfer of the stock of the Company will close with the close of business on Wednesday, the 13th day of September, 1911, and will reopen the day succeeding the day of the final adjournment of said annual meeting.

Dated August 31st, 1911.

By order of the Board of Directors.

The Tri-City Railway and Light Company,
By M. K. PARKER, Secretary,
49 Wall Street, New York.

The Boundary Mine & Exploration Company, which has a coal deposit at Midway, expect to be producing within three months.

Seven proprietors and managers of factories were summoned to the Recorder's Court, Montreal, recently by Mr. Alcide Chausse, the building inspector, on charges of violating the fire by-law by having no fire escapes on their buildings.

Traffic on Canadian canals to the end of July shows a marked decrease. The total tonnage was 17,143,606, as against 21,457,752, a decrease of 4,314,146 tons. A decrease of over four million tons was shown at the Soo Canal, where something over 4,500,000 tons less of ore was handled this year than last. A small movement of lumber through the Ottawa and Chambly Canal caused a decrease there. On the other canals there were slight increases partially compensating for the losses at the Soo.

DEBENTURES AWARDED.

Village of Margo, Sask.—$4,000 5¼ per cent. 10-years to Messrs. Nay & James, Regina.

Village of Kellicher, Sask.—$4,000 5¼ per cent. 15-years to Messrs. Nay & James, Regina.

Strathmore, S.D. 1587 Alta.—$7,000 5¾ per cent. 10-years to Messrs. Nay & James, Regina.

Scotstown, Que.—$40,000 5 per cent. 40-years, to Messrs. Canada Investment Ltd., Montreal.

Newcastle, N.B.—$30,000 5 per cent. debentures to Investment & Trust Company, Montreal.

Dresden, Ont.—$16,000 4½ per cent. due 1941 to Messrs. C. H. Burgess & Company, Toronto.

Small Saskatchewan and Alberta Schools.—$6,500 6 per cent. 10-years to Messrs. Nay & James, Regina.

Rural Municipality of Enfield, Sask.—$15,000 5½ per cent. 20-years to Messrs. Nay & James, Regina.

Wainwright, Alta.—$35,000 5½ per cent. 20 instalments to Messrs. Ontario Securities Corporation, Toronto.

Obtain Particulars of All Securities

In building up a strictly investment business over a period of more than 35 years, it has always been our endeavor to investigate as closely as possible all particulars regarding any bonds and securities we have purchased.

In afterwards offering these bonds and securities to our clients, we have always willingly placed at their disposal all the particulars we may have secured before ourselves deciding on their purchase.

This close relationship between client and the house has been one of the outstanding features of the growth of our business.

If you are not receiving a copy of our Weekly Circular, we would be pleased to place your name on our mailing list.

FAIRBANKS-MORSE MERGER.

Figures of the Amalgamating Companies—How the Stock Stands.

Monetary Times Office.
Montreal, August 30th.

It was reported some time ago that the Canadian Fairbanks Company of Montreal, the Fairbanks-Morse Canadian Manufacturing Company of Toronto, together with the E & T. Fairbanks & Company, Limited, of Sherbrooke, and the Dominion Safe and Vault Company, with factories at Farnham, were to be included in the amalgamation. This report was incorrect as to the E. & T. Fairbanks & Company, Limited, and the Dominion Safe and Vault Company.

The Canadian Fairbanks Company and Fairbanks-Morse Canadian Manufacturing Company have amalgamated under the title, the Canadian Fairbanks-Morse Company. Mr. H. J. Fuller, president of the Canadian Fairbanks Company, is president of the new concern, and Mr. Brooks, president of the Fairbanks-Morse Canadian Manufacturing Company, is vice-president.

The capitalizations of the two original companies and of the new concern are as follows:—

	Common.	Preferred 7%.
Canadian Fairbanks Company ..	$ 750,000	$150,000
Fairbanks-Morse Company	500,000	......
	$1,250,000	$150,000
Canadian Fairbanks-Morse Co.. .	$1,600,000	$1,000,000

As to Preferred and Common Stock.

The preferred stock of the Canadian Fairbanks Company was non-cumulative, and was preferred only as to dividends, whereas the preferred stock of the Canadian Fairbanks-Morse Company is cumulative, and is preferred both as to assets and dividends. It does not carry any voting power. The company, however, agrees that it will issue no bonds unless with the consent of 75 per cent. of the preferred shareholders, so that in this respect the preferred stock ranks as a first lien on the assets of the company, thus giving it much the standing of a bond. Further security is added by an agreement on the part of the company that it will not declare any dividends on its common stock until the surplus available for dividends on preferred stock is equal to the amount requisite to pay these dividends for three years.

Therefore the company would require to have $210,000 laid aside to meet the dividends on the preferred stock before the common shareholders will receive anything. Notwithstanding this, the holders of the common stock are well satisfied with their security, the dividend on the old common stock having been eight per cent. and the earnings having largely exceeded the amount necessary to meet the dividend.

Mr. H. J. Fuller, President.

The Fairbanks concerns have had success in Canada during the past dozen years or so since Mr. H. J. Fuller came over to Canada from the United States and decided that there was business to be done on behalf of the Fairbanks firm with which he had been associated in Worcester, Mass., and New York. The firm has enlarged until it has branches in practically every city in Canada. Following the opening of the Montreal branch came the establishment of the Vancouver, Winnipeg, Toronto, St. John, Quebec, Ottawa and Saskatoon branches, and it is now proposed to complete the work by opening branches at Prince Rupert, Fort William and Edmonton.

Five or six years ago Mr. Fuller concluded that the time had arrived for the company to manufacture its own lines in Canada. This led to the organization of the Canadian Fairbanks-Morse Company, which is now being amalgamated with the selling end of the business as represented in the Canadian Fairbanks Company, of Montreal.

What is Manufactured.

The company manufactures the scales with which the name of "Fairbanks" has become so well identified, as well as the gasoline engine which bears the name of "Fairbanks-Morse." The Toronto company also makes various types of hand and motor cars, pumps and machinery. The Canadian Fairbanks Company also takes the entire product of the John Bertram Sons Company and the Pratt & Whitney Company, both of Dundas. The Bertram Company manufactures machine tools and the Pratt & Whitney Company small tools, such as used by machinists, as well as drills and similar lines. All this has been accomplished within the past dozen years, and the president of the company is convinced that with the rapid growth which is now taking place in Canada the volume of business will in the future expand in an equally satisfactory manner.

◆

Mr. E. Manning Lewis, chief freight agent of the Port of Bristol, was a visitor to The Monetary Times office this week. He has just concluded a tour of Canada and the Pacific States in the interests of the enterprising West of England port.

In round numbers, $1,500,000,000 of American bonds are marketed every year and almost all of them pass through the hands of American bond houses. Of this, $1,500,000,000 of bonds one-third is absorbed by insurance companies, savings banks, trust companies and other banks (in approximately equal amounts) and the remaining two-thirds by corporations (for reserve, etc.), and by private investors in the United States and abroad.

Four bids were received for the $7,500 5 per cent. 20-year school debentures. Messrs. Nay & James, Regina, were the successful bidders.

Three Toronto bond dealers tendered for the $104,000 5 per cent. bonds, issued by McLeod, Alta. As previously noted, the award was made to Messrs. Dominion Securities Corporation, Toronto.

The National Finance Company of Toronto were awarded the $15,000 5½ per cent. 20-year, permanent road debentures, issued by rural municipality of Laurier, Sask.

◆

REAL ESTATE BONDS.

Ten years 6 per cent. bonds is denominations of $100, $500, and $1,000 or for any other part in multiples of $100 are being offered by the Canadian Real Estate Bond Corporation of Winnipeg. The bonds are a first lien upon all real estate and all other assets of the Corporation. The bonds and assets, of the corporation are secured by the absolute ownership in fee of approved real estate in Winnipeg and other Western Canada property or by first mortgages upon such real estate. The owner of the bond has the guarantee of the Corporation that its proceeds are invested in bona fide approved first mortgages or in the purchase of high class revenue bearing real estate. These securities should prove a good investment but as is obvious, their value depends entirely upon the judicious selection of property by the company's management.

"Capital Investments in Canada."

By FRED. W. FIELD.

(A new volume to be published next month.)

$2.50 PER COPY.

Three hundred and seventy-two million pounds sterling have been invested by Great Britain in Canada. American capital has helped the Dominion's industrial development to the extent of nearly $417,143,221, while foreign capital in excess of $139,589,650 has also been invested in the Dominion.

A series of articles respecting the investment of British, American and foreign capital in Canada is appearing weekly in The Monetary Times of Canada. In response to many requests, the articles, which are from the pen of Mr. Fred. W. Field, Managing Editor of The Monetary Times, and Imperial Trade Correspondent at Toronto, will be reprinted in book form, at a popular price, together with other articles, early in the autumn.

In view of the general interest in the subject of investment in Canada and of the Dominion's trade relations, this new volume, "Capital Investments in Canada," will prove of great value. It is the first contribution on the subject to the business man's library shelves.

Orders for the publication are now being received at the arious offices of The Monetary Times as follows:—

TORONTO, ONT.: 62 Church Street.
MONTREAL, QUE.: B. 33 Board of Trade Building.
WINNIPEG, MAN.: Room 404 Builders Exchange Building.
LONDON, ENG.: Grand Trunk Building, Cockspur Street.

When in London call on The Monetary Times, Grand Trunk Building, Cockspur Street.

FIDELITY GUARANTEE BONDS

Personal Accidents Policies, including 10 per cent. Bonus accumulations.

Sickness Policies—covering any and every sickness.

THE DOMINION OF CANADA GUARANTEE & ACCIDENT INSURANCE CO., TORONTO

THE MONTHLY INCOME POLICY.

The monthly income policy, which a number of life companies are now issuing, seems to be very attractive. The advantages of this policy are well explained in the organ of one of the companies as follows:

"Many women, thrown upon their own resources by the death of their husbands, are driven to tasks beyond their strength and reduced to the barest necessities of life; many children are obliged to leave school and go into factories and stores; and all for lack of a proper provision such as is afforded by the monthly income policy.

"The monthly income policy stands alone in the ability to provide in case of death of the insured a guaranteed and regular income which cannot be diverted from the purpose for which the policy was taken out. No other method of saving can guarantee an equal amount of income.

"It cannot be diminished or lost by the inexperience of the beneficiary, the advice of unwise friends, or the folly or misconduct of others.

"It cannot be diminished by taxes, administrators' charges, probate or attorneys' fees.

"A trust company charges five per cent. or the income of a trust fund for the expenses of administration, and is not responsible for any losses incurred in investments made in conformity to the law.

"The income is paid regularly on a specified date in a manner which experience has proved the most economical and helpful to the beneficiary.

"The cost to the insured spread out through a long term of years and the payments by the company in instalments results in a very large return in comparison with the cost. The results are of course only possible from the fact that interest is earned on the premiums and the policy is paid in instalments, factors which accentuate the value of the policy to the insured in convenience, benefit and protection."

ONTARIO CROP REPORTS.

The following statistics of the principal field crops of Ontario for 1911 show the acreage as compiled from individual returns made by farmers to the Ontario Bureau of Industries, and the yields, as estimated by a large and experienced staff of correspondents, who give probable yields according to conditions on August 5th, 1911:—

Fall wheat—837,492 acres will produce 17,034,052 bushels, or 20.3 per acre, as against 743,473 acres, 19,837,172 bushels, and 26.7 in 1910. The annual average for 29 years was 17,878,244 bushels and 21.0.

Spring wheat—133,711 acres, 2,375,843 bushels, or 17.8 per acre, as against 129,319 acres, 2,489,833 bushels and 19.3 in 1910; average, 15.9.

Barley—616,977 acres, 16,766,319 bushels, or 27.2 per acre, as against 626,144 acres, 19,103,107 bushels and 30.5 in 1910; average, 27.8.

Oats—2,699,230 acres, 88,261,352 bushels, or 32.7 per acre, as against 2,757,933 acres, 102,084,924 bushels and 37.0 in 1910; average, 35.7.

Rye—98,652 acres, 1,624,572 bushels, or 16.5 per acre, as against 95,397 acres, 1,620,333 bushels, and 17.0 in 1910; average, 16.4.

Peas—304,491 acres, 4,773,513 bushels, or 15.7 per acre, as against 403,414 acres, 6,016,003 bushels, and 14.9 in 1910; average, 19.3.

Beans—51,508 acres, 925,228 bushels, or 18.0 per acre, as against 49,778 acres, 892,927 bushels, and 17.9 in 1910; average, 17.2.

Hay and Clover—3,301,468 acres, 4,238,362 tons, or 1.28 per acre, as against 3,204,021 acres, 5,492,653 tons, and 1.71 in 1910; average, 1.46.

The acreages in other crops for which no estimate as to yield have been made at this date, are as follows:—Buckwheat, 189,039, against 194,913 in 1910; corn for husking, 308,350 and 320,519; corn for silo, 335,935 and 326,627; potatoes, 162,457 and 168,454; mangel-wurzels, 64,855 and 69,966; sugar beets, 24,634 and 26,879; carrots, 3,207 and 3,551; turnips, 100,593 and 108,360; mixed grains, 486,112 and 497,936.

There are 3,116,768 acres of cleared lands devoted to pasture, 279,220 in summer fallow; 303,188 in orchard; 25,360 in small fruits; 11,586 in vineyard; 58,748 in farm gardens, 40,330 in rape; 12,128 in flax; 14,744 in tobacco.

This volume will be off the press early next month.

Orders for copies are being filed now.

The Monetary Times Printing Co.

Montreal. Toronto. Winnipeg. London.

Since June 1 the United States railways have ordered 14,952 freight cars, 417 passenger cars, and 493 locomotives. The Grand Trunk ordered 65 locomotives and the Canadian Pacific ordered 1,400 freight cars in the United States.

A financial man recently returned from London tells The Monetary Times that timber being sold in London should be sold by the thousand feet on the stump and not by the acre.

Branches: Vancouver, Victoria, Calgary, Edmonton, Regina, Fort William

Paid-up Capital	$1,825,000
Assets	4,000,000
Reserve	520.000

MONEY TO LOAN ON IMPROVED CITY AND TOWN PROPERTY

4% allowed on deposits of $1 and upwards

5% allowed on debentures of $100 or over, issued for terms of from 3 to ten years

CAPITAL STOCK 7% INVESTMENT

The Company, having disposed of its Capital Stock some years ago, has, therefore, none for sale, but the stock may be purchased through the Toronto, Winnipeg and Vancouver Stock Exchanges, at prices ranging from $128 to $130 per share.

The last seven half-yearly dividends have been at the rate of **9 per cent. per annum,** so that, at the current prices, the **Investment** will **net 7 per cent.**

The Company will be pleased to furnish prospective purchasers with its Financial Statement or other information bearing on the Company, and, if so desired, the Company will purchase the Stock for the investor through the Stock Exchange, or privately, at the current prices.

Since its inception the Company has enjoyed uninterrupted prosperity, and has taken a very active part in the development of the West. With the rapid growth of Western Canada, the demand for money is so great that the present profitable rates of interest will be maintained for years to come; and with such a desirable field for loaning operations, combined with a progressive management, the price of the Company's Stock should continue to advance, and with the prevailing high dividends, the Stock of this Company will undoubtedly be in great demand by those who desire a safe and profitable investment.

BOARD OF DIRECTORS: W. T. Alexander, Esq., Managing Director The Canada National Fire Insurance Company, President and Manager; E. S. Popham, Esq., M.D., Director Standard Trusts Company, Vice-President; Nicholas Bawlf, Esq., President Bawlf Grain Company, Director Bank of Toronto, Director Standard Trusts Company, Second Vice-President; Sir Gilbert Parker, M.P., London, England; E. In a report just issued of a laboratory test of canned corn the Dominion analyst states that of 146 samples evidences of the use of sulphite for bleaching were found in 50 per cent. While he does not suggest legislative interference the question is of such importance as to demand careful investigation. The acid is a poison, but whether in the minute quantity used in corn it is harmful, remains to be demonstrated. Saccharin, as a sweetener, was found in 20 per cent. of the samples and the analyst says manufacturers should be compelled to announce its presence.

WHEN YOU INVEST YOUR MONEY

In our short term debentures bearing 5 per cent. you secure the benefits of first mortgage security and in addition a larger margin of security than you could hope to obtain in loaning your own funds, we depositing with a trustee mortgages on PRODUCTIVE REAL ESTATE WORTH THREE TIMES THE AMOUNT OF YOUR INVESTMENT; you can get your money back in a year or five years as you arrange, and you have no bother with collections.

UNDER A BOND TO THE UNITED STATES.

"I am in favor of preferential tariff because I think it will prevent entangling alliances with the United States. Our experience so far with the Americans has not been very satisfactory. I have not quite forgotten the reasons why the reciprocity treaty, negotiated by Lord Elgin in 1854, was so summarily repealed in 1866. Neither is my judgment closed to the hostile character of the Dingley tariff bill by which the American market was practically closed against the Canadian manufacturers and farmers.

"In my judgment the commerce of Canada should never be placed at the mercy of the United States Congress or of any other competing nation. We have adapted our transportation system now to British trade. To enter into a reciprocity treaty with the United States would be dependent upon the humor of our American neighbors, and would be to discount all this expenditure. Does it not appear the proper thing, partly because of our imperial relations, and partly because of the extent of the British market, that we should direct our energies towards meeting its requirements rather than towards framing a treaty with a nation who has treated us with undoubted harshness in commercial matters, and on whose commercial good-will we cannot depend? I prefer to establish channels of trade with Great Britain, which I believe will be permanent. Where your treasure is, there will your heart be also. All we have to do is to enter in and possess it with Britain's assistance. In the United States we would be under a bond, and I decline myself to assume or to accept any policy that will place the trade of Canada at the mercy of Congress or at the mercy of a rival nation."—Sir George Ross, ex-Liberal Premier of Ontario, before the Toronto Canadian Club, November 30, 1903.

◆

An agreement between the Quebec Central Railway directors and the Canadian Pacific Railway, by which the latter company secures an interest in the Quebec Central, has been completed by Sir Thomas Shaughnessy. The agreement is of a provisional nature and is subject to the ratification of the security holders and also to legislative approval.

INVESTMENT AND LOAN COMPANIES

BRITISH COLUMBIA

The Land of Successful Investments.

No Province or State in the World is attracting more attention from the investing public than British Columbia, and no country is more worthy of their attention.

The development of British Columbia's immense natural resources has made and will continue to make millions for discriminating investors.

If you have not already decided to join the many who are placing their money in British Columbia investments, let us send you information regarding Victoria or Vancouver City or Suburban Properties, Homes, Farms, Timber, Wild Lands, Stocks, etc., etc. We can solve your investing problem successfully. Write us to-day.

THE WATEROUS ROAD ROLLER

Is built essentially to suit Canadian road-building conditions. With over 100 Rollers in use in every part of the Dominion, the Waterous Roller is daily more firmly establishing its right to the title—

"The Canadian Good Roads Pioneer"

Built in three sizes—10, 12 and 15 ton. Carries a double cylinder, double crank engine, a quick-steaming locomotive type boiler of large capacity, has two speeds for fast and slow work, and all gearing cut from the solid steel. Supplied with all standard engine and boiler fittings.

If there is no Waterous Roller in your vicinity, write for our twenty-page catalogue, No. 301, or better still, visit the Brantford Works and see the Roller being built and tested—a practical demonstration that is its best selling argument.

WILL CANCEL THESE COMPANIES' RIGHTS.

The registrar of joint stock companies of British Columbia proposes to cancel the corporate privileges of several companies

In the case of the registered extra-provincial companies, it is understood that in consequence of the companies in question having failed to reply to registered requests for information as to their businesses or for failure to fulfil the lawful requirements of the statute or for failure to notify the registrar of its continuance in business in each instance, the registration will be cancelled on October 17th next of the Northwestern Commercial Company, the British-American Packing Company, the Douglas Mining Company, the British Columbia Smelting Company, Limited, the Vancouver City Land Company, Limited, the Vancouver Land & Securities Company, Limited, the United Trust Limited, the Canadian and American Mortgage & Trust Company, Limited, the Fraser River Gold Gravels Syndicate Limited, the Empire Consolidated Mining Company, the British Columbia Deposit & Loan Company, the Northwestern Gold & Silver Mining Company (foreign), the Middle Creek Gold Mining Company, the Columbia Mining Company, Limited, the Cottonwood Gold Mining Company, and the British Columbia Investment & Loan Society. Similar breaches are reported of the under-mentioned provincial joint stock companies, and these also will be struck from the registrar and cease to possess corporate rights of doing business in British Columbia as from October 17th: The Dominion Sawmill Company, Hastings Sawmill Company, Limited, Matsqui Land Company, Limited, Vancouver Waterworks Company, Standard Newspaper Company, Limited, and the British Columbia Drainage & Dyking Company, Limited.

◆

The Canadian Stock Exchanges will be closed to-day as well as on Monday—Labor Day.

That there has been a marked improvement in the fire protection conditions of the Montreal schools, is a statment made by Mr. Chausse, building inspector. In regard to moving picture halls, 38 had been found to be satisfactory, but seven had been refused licenses, as they had not complied with conditions regarding fire escapes and exits. Six houses had refused to pay the $500 tax, and actions had been taken out against them in the Recorder's Court.

LEGAL NOTICE

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 1st day of August, 1911, incorporating Gerard Brakenridge Strathy and Molyneux Lockhart Gordon, solicitors; John Fraser MacGregor, accountant; Joseph Edward Riley, law clerk; James Boyd Moon and John Richard Corkery, students-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To buy, sell and deal in iron, steel, bronze, brass and other metals, the ores thereof, and wood and other materials; to carry on, operate and run foundries and works for the manufacture of iron, steel, bronze, brass and other metals; to manufacture, erect, buy and sell iron, steel, bronze, brass and other metal work and materials for buildings, bridges and structures of all kinds; to manufacture, erect, buy and sell machines, implements, tools, safes, vaults, vault fittings, shelving, locks, and articles or products made wholly or partly of said metals; to manufacture and erect, build, construct, and repair, under contract or otherwise, buildings, bridges and structures of all kinds, and for such purposes to carry on a general engineering and contracting business; (b) To purchase, lease, or otherwise acquire, hold, own, sell or otherwise dispose of any and all real estate and personal property; (c) To apply for and maintain, register, lease, acquire, and hold or to sell, lease or otherwise dispose of, and grant licenses in respect of or otherwise turn to account any patents, brevets d'invention, improvements or processes, trade marks, trade names, and the like, grants, licenses, leases, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to inventions and any formulæ and secret processes which may seem calculated to benefit the company; (d) To acquire by purchase, lease, hire, exchange or otherwise any rights or privileges which may be necessary or useful for the carrying on of the business of the company; (e) To lease, sell, improve, manufacture, develop, exchange, turn to account or otherwise dispose of any or all of the property and assets of the company for such consideration as the company deems fit, including shares, debentures or securities of any other company; (f) To acquire, purchase or assume all or any part, including the good-will of the business or undertaking, or the property or assets, privileges, contracts, rights, obligations, and liabilities of any company, person or persons carrying on any business which this company is authorized to carry on, or any business similar thereto or possessing any property suitable for the purposes thereof and to pay for the same, wholly or in part in bonds, debentures or fully paid and non-assessable stock of the company, and to sell, lease or otherwise dispose of the same or any part thereof; (g) To enter into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise with any person or company carrying on or engaged in or about to carry on any business or transaction which this company is authorized to engage in or carry on, or to amalgamate with any such company; (h) To acquire, purchase and hold the stock or shares of stock in, or debentures or other securities of, and any other corporation carrying on business similar to that which this company is authorized to carry on; (i) To issue paid-up shares, debentures stock, debentures, bonds or other securities of the company in payment or part payment for any property, rights, or easements which may be acquired by, or for any services rendered or agreed to be rendered, or work done or agreed to be done for the company, or in or towards the payment and satisfaction of debts or liabilities owing by the company, or for raising money for any other purpose of the company; (j) To invest the moneys of the company not immediately required in such manner as may from time to time be determined; (k) To distribute among the shareholders of the company in kind any property of the company, and in particular any shares, debentures, or securities in any other companies belonging to the company or which the company may have power to dispose of; (l) To carry on any other business, whether manufacturing or otherwise which may seem to the company capable of being conveniently carried on in connection with its business, or calculated, directly or indirectly, to enhance the value of or render profitable any of the company's property or rights; (m) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (n) To draw, make, accept, endorse, discount, execute and issue promissory notes, bills of exchange, warehouse receipts, bills of lading, warrants and other negotiable or transferable instruments; (o) To adopt such means of making known the products of the company as may be expedient; (p) To do all or any of the above things as principals, agents, bailees, contractors, trustees, or otherwise, and either alone or in conjunction with others; (q) To do all such other things as are incidental or conducive to the attainment of the above objects; (r) The powers in each paragraph are to be in nowise limited or restricted by reference to or inference from the terms of any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Snead and Company Iron Works, Limited," with a capital stock of forty thousand dollars divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 3rd day of August, 1911.

THOMAS MULVAY,
Under Secretary of State.

CANADIAN PACIFIC RAILWAY RESULTS.

The report of the Canadian Pacific Railway just presented to the shareholders for the year ended June 30th, 1911, and referred to in the two past issues of The Monetary Times, shows that the company earned 17.26 per cent. on ordinary stock. Of the 17.26 per cent. earned, 13.6 per cent. was from railway and steamships and 3.66 from special income. The total profit by loss surplus was $55,374,493, an increase of $12,504,647 over 1910. At June 30th, 1911, the company had 11,488,995 acres of agricultural land, including 4,427,811 in British Columbia.

At the annual meeting the other week, Sir Thomas G. Shaughnessy, president and chairman of the board, spoke in part as follows:

"The Hudson's Bay Company had parcels of land scattered throughout the irrigation belt, and, in order that you might control the entire belt and thus receive the full advantage of your expenditures on irrigation, it was decided to acquire these lands belonging to the Hudson's Bay Company, about 102,174 acres, at the price of $13.50 per acre. All of these lands will be sold at a substantial profit.

"Believing that it would he in the interest of everybody concerned, your directors proposed to the Alberta Railway and Irrigation Company, in which you owned a controlling interest, an arrangement whereby, in consideration of a lease of their railway lines and a transfer to your company of their coal mines, lands and other assets, your company would guarantee the interest on their outstanding debenture stock ($3.250,000) and an annual dividend of six per cent. on the Albert company's share capital during the life of the lease; and coupled with this proposed arrangement was your company's offer to purchase all of the outstanding shares of the Alberta company's capital stock at the price of 150 and accrued dividend. The proposition was accepted, an agreement and lease were approved by the shareholders of the Alberta company, and will be submitted for your sanction. Since the agreement was made a large part of the outstanding stock has been acquired, and you now hold all the shares except about 2,000, out of a total of 32,500 shares. Worked in conjunction with your system, this line will not be profitable in itself but will be useful in connection with future extensions in southern Alberta.

"The work of enlarging your terminal yards and buildings, providing additional shops and machinery, laying many miles of new passing tracks, extending your telegraph lines, and of generally improving the standard of your property and of your operating facilities to meet the requirements of the traffic. continues to have the earnest attention of your directors, the amount expended for these purposes during the year aggregating $18,000,000.

"You will have observed that in this annual report the earnings and expenses of your railway and steamship lines are shown together, and that the revenue from other sources is given in a separate statement."

◆

MONTREAL COTTON COMPANY REORGANIZATION.

Shareholders of the Montreal Cotton Company, now known as Montreal Cottons, Limited, have received a circular, stating that the reorganization plans were complete and that every share now held would be exchanged for one share of seven per cent. cumulative and one share of ordinary stock. Shareholders by this reorganization get a substantial bonus, as the present stock pays a dividend of eight per cent. The capital of Montreal Cottons, Limited, is $10,000,000, equally divided into preferred and common stock. The amount outstanding will be $3,000,000 preferred and $3,000,000 common, leaving $2,000,000 preferred and $2,000,000 common in the treasury.

English financiers have been taken into consultation regarding the reorganization, indicating that a market will be made in future. The Montreal Cottons, Limited, will be a holding company.

SCIENTIFIC ASSESSMENT OF LAND VALUES.

Whenever a proposal is made that the tax system be changed and land values be made to bear a heavier share of the burden, the question is always raised, how can the value of a city lot, apart from the building, be fairly ascertained?

To answer this question the Toronto Tax Reform League are inviting business men and municipal officials to attend a demonstration of the Somers' System of land valuation at the convention of the League in Toronto on Tuesday afternoon, September 5th.

Before the National Association of Real Estate Exchanges a year ago, Mr. Doty, who will speak in Toronto, gave an address on the Unit System of land valuation, and explained the difficulties that faced assessors in part as follows:

The land value of city lots is simply a site value. The land of a city lot may be fertile or it may be barren. This has nothing to do with its value; this value arises entirely because of its location amid the people of the city through its frontage. The value of city lots varies as do the size and location of this frontage. The value is modified by the amount of land that is connected with the frontage; this is called the depth. Therefore, there are three things that affect the value of the city lot, and I name them in the order of their importance; location, size, shape.

In ascertaining the value of any particular lot these three elements must always be taken into consideration, and it is because of the existence of these three differing factors of value that we find it practically impossible to compare the value of one city lot with that of another. In comparing the value of two lots, it is necessary to compare three factors on the one hand with three on the other, and the human mind does not quickly, accurately and satisfactorily compare three things with three things. It is the attempt to make comparisons in this way that produces the uncertainty in arriving satisfactorily at the comparative value of city property.

It is largely the attempt to make comparisons of lot values in this impossible way that produces the very wide differences of judgment sometimes noted in so-called expert opinions of value in our courts and before our taxing boards. Each expert views the matter in question with many affecting factors in mind; and these affecting factors are as numerous and different as the experts. Heretofore, there has been no method devised by which each expert would be compelled, or even expected to employ factors for the basis of judgment the same as other experts attempting to solve the same problem. The use of the Somers Unit System eliminates the side issues or the subsidiary factors of site valuation and simplifies the problem to the end that different judgments of different men are weighing only the same factor of value. This makes it easy to use the judgment and knowledge that the appraiser or expert has. And when we make a task easy of performance, whether that task be mental, physical or mechanical, we make for efficiency and accuracy of result.

At the Tax Reform League's Convention a practical application of the Somers' plan will be made on a central block of city property, and leading real estate men will be invited to assist. The proposal is creating interest.

Intrinsic Value of Investments

When considering investments one should study closely the intrinsic value. When the intrinsic value is much greater than the price one can be sure of profit. When the intrinsic value is less than the price then speculation may increase the selling value, but there is no assurance.

British Columbia wild lands, which under cultivation will return from $50 to $500 per acre in crops, may now be bought from $10 to $15 per acre, depending on quality and amount of purchase. Some of our clients have coal and timber licenses which are worth considering on the above theory regarding intrinsic value

This company acts solely as agent—buys and sells for customers but has nothing of its own to dispose of.

RANK OF LUMBER PROVINCES LAST YEAR.

The total lumber cut of the Dominion of Canada for 1910 has just been compiled by the Forestry Branch. Reports were received from 2,763 firms operating sawmills, which is nearly 700 more than reported last year. Thus the 1910 report is a better estimate of the actual lumber production than ever before. Nearly five billion feet of lumber was cut during 1910 throughout the nine provinces of Canada, which represents a total value to the country of seventy-seven and a half million dollars. This is about fifteen million dollars more than the value of the 1909 lumber cut. Ontario, as in former years, holds the premier position as a lumber province. Its forests are made up of diversified species, which enabled it to produce one-third of the lumber for the Dominion. British Columbia, however, will soon take Ontario's place, from predictions made on the 1910 report. In 1909, the western province produced a trifle over half as much lumber as was cut in Ontario, while for last year the amounts returned from the two provinces were practically the same. Although one-quarter more lumber was cut in Quebec in 1910 than in the year previous, the increase was not sufficient to maintain it in second place of importance, which position was usurped by British Columbia. The remaining provinces, New Brunswick, Nova Scotia, Saskatchewan, Alberta, Manitoba and Prince Edward Island, cut lumber in the order of importance given, but together supply only one-sixth of the amount for Canada.

◆

The intention of the articles is to set forth fairly the opportunities afforded the investor by this country. So writes Sir Edmund Walker in a prefatory note to "Capital Investments in Canada," a new volume to be published by The Monetary Times this month.

POLICIES ISSUED ON ALL APPROVED PLANS

FOUNDED IN 1892

The Great-West Life Assurance Company was Nineteen years of age on August 18th.

The occasion found the company with
A Business in Force of over $63,000,000
Assets exceeding $8,500,000
Policyholders numbering over.... 30,000
Nine branch offices and over 800 Agents.

This—in half a dozen lines—is the chronicle of Nineteen years.

There is one reason for this unvarying success—the Results to Policyholders have always been excellent. Low premiums and high profits.

Ask for information.

Buying Investment Securities by Mail

We wish to impress upon you the fact that you can do business with us—and with the utmost satisfaction—no matter where you live and no matter how small or large the amount of funds available for investment. Wherever the mails go we can do business.

The requirements of individual investors differ so widely that it is out of the question preparing a number of cut and dried suggestions that will meet the requirements of all who make inquiries regarding investments. For this reason we ask intending investors to give us an idea of the amount of funds they have available for investment, whether they desire Government bonds or municipal debentures, high grade bonds or stocks. In many cases investors leave this point entirely to our decision. In such cases we are guided by the circumstances of those making the investment. Each inquiry receives careful, personal attention. We take pleasure in answering all inquiries regarding investments.

F. B. McCurdy & Co.

CANADIAN WHEAT THROUGH CANADIAN PORTS.

A member of a prominent Bristol, England, firm engaged in the grain trade has given some interesting opinions to Mr. Arnaud, the Canadian Trade Commissioner at that enterprising port. The grain man says that, as regards wheat, the quality of the Manitoba spring grades is much appreciated by consumers drawing their supplies from the port of Bristol. In the first place the character of the Manitoba spring wheat is the most suitable quality for mixing with English wheat, which is grown in considerable quantities in the counties contiguous to Bristol. Already a large quantity of oats is imported from Canada, and the quantities could be very much increased. It is mainly a question of competition with supplies offered by other countries, chiefly Russia and the Argentine.

More important is the statement of the Bristol grain distributor that "consumers are satisfied with the Canadian Government's system of grading, which they consider reliable so long as the wheat is shipped through Canadian ports. They have not the same confidence in Manitoba wheat that is shipped through United States ports, and will not pay within 9d. per quarter for Manitoba wheat with any United States certificate."

This opinion is strongly endorsed by Mr. Arnaud, the Canadian Trade Commissioner, who says: "The Canadian exporters of grain would do well to bear in mind the importance, if they desire to retain the excellent reputation their product now possesses in this market, of causing, as far as possible, their shipments to be made through Canadian ports only, and thus avoid any risk of mixing in foreign elevators."

This is further emphasis on this phase of the question of reciprocity. By the terms of the agreement, Canada will send its wheat to the United States free of duty. Considering that fact fairly from all viewpoints, will it be the best thing ultimately for the Western grain grower? He has a reputation in the British market which the United States grower will never get. As Sir George Ross has pointed out, the longer the American tariff of 25 cents a bushel on Canadian wheat is maintained, the better for Canada. Canadian wheat has now a distinct place in the British market. If the market of the United States were freely opened, it would be impossible to maintain its identity in passing through American elevators—the point made by the Bristol grain man and Mr. Arnaud—and Canada would be the loser to the extent of any reduction in price. The same applies to flour, for Manitoba flour, with rare exceptions, brings a higher price on Mark Lane than any American brand. If Canadian wheat moved freely across the border, scarcely anyone could vouch for the genuineness of that brand. The poorer qualities on the south side of the line would be strengthened by the products of Canadian mills and the better qualities on the north side would be deteriorated by mixture from the south. That interchange would throw away the advantages Canada possesses from the great wheat belt of Manitoba and the West. It may be argued that these fears are groundless. For reply, one has only to refer to the utterances of prominent American authorities, whose statements express the hope for achievements which Canada may well regard with suspicion. The Honorable P. C. Knox, one of the American fathers of the agreement, says, for instance: "The free admission of grain from Canada meets the present situation and provides against future contingencies when the Canadian surplus becomes greater by replacing the control in the hands of our own grain growers." Again, the Northwestern Miller, the chief American grain organ, says:—

"The disposition of Canada's surplus is a question upon the answer to which depends the future not only of the milling interests of the (American) North-West, but, indeed, of the United States. Should this surplus be shipped abroad, it must inevitably mean the destruction of the American export trade, the shifting of the American milling centre, the gradual decline of the American milling interest to a comparatively unimportant part in the list of large American industries.

"The miller who is able to grind this enormous (Canadian) crop will be the miller of the future, and where he is, there will be the great mills of the world.

"The future of the American milling with free Canadian wheat secured is a grand one. With this enormous crop flowing into the mills and elevators of the States, a splendid tide of prosperity would follow in its wake. The mills of America would go forward on their developing course, new mills would be built, and capacities enlarged. New markets abroad would be conquered."

"There would be an increase in grain firms, in elevators, and in every branch of the grain handling and flour-making interests. This would be felt in the added value of real estate and in the solid and substantial development of every undertaking and enterprise that makes a community prosperous."

Further ground for the opinions expressed by the Bristol people is found in an article in the Moline (Ill.) Daily Despatch, which says:—

"Not only is it certain that free wheat will not cost our farmers a cent, but it will directly benefit them. It is notorious that we are not raising so much high-grade spring wheat as formerly. Our millers are having a hard time to get enough hard wheat to take care of the domestic trade, and have, on account of its scarcity and the competition of the Canadian mills with their abundance of hard wheat, practically lost their once enormous export trade. If our mills had more hard wheat available, they could regain their lost export trade, increase their output greatly, and thus create a strong demand for the softer wheats on this side of the line, needed for blending with hard wheat, with result that our lower grades and inferior qualities would be in keener demand and bring better prices than they do to-day. Then, again, when the United States has wheat to export, it competes with Canadian wheat in the world's markets. Liverpool plays one against the other to the injury of both. The tariff wall keeps the wheat of the two countries apart, and, you might say, hostile. Remove the duty on Canadian wheat and the whole crop of the two countries will become one. Europe will get our wheat—Canadian and American—when we are ready to sell; not as now, when the Canadian, forced by the exigencies of an imperfect marketing, storage and transportation system, has to sell. That will mean a better hold by the American wheat grower on the markets of the world than he now has. It means better prices in Liverpool, and that, of course, means better prices in Minneapolis and Chicago and on the farms."

Have the grain growers of Western Canada considered the position with all these facts, leading to the same ultimate result, in view?

EXPORTERS AND COMMISSION HOUSES.

Some conclusions of interest are submitted in a special report of the American Manufacturers' Exporters' Association on the relations with the export commission houses. Their general conclusion is favorable to close relations between the manufacturer and the commission house, and in addition the manufacturer comes in for some criticism. The report claims that, as a rule, manufacturers will best serve their interest, avoid responsibility and risk, and most satisfactorily handle their export trade by working through the commission house. If the manufacturers, however, decide to handle a portion of their business direct and the balance through the export houses, the report considers under no circumstances are they justified in granting the foreign buyer any advantage in price or financial terms, and should demand cash in New York from the foreign buyer the same as they do from the commission house. If a manufacturer's line of goods is such as to be best handled on an agency basis, even then it is claimed desirable to allow the business to be financed by a commission house, so that financial risk will be avoided.

The manufacturers are criticized for quoting in their price lists and export catalogues their bottom figures and sending such information broadcast to foreign markets. It is believed that this tends to curtail the interest of the foreign buyer in their goods. It is also thought that the present system of the various combinations of manufacturers, resulting in only selling the export house on the basis of cash on receipt of goods, is detrimental to the proper expansion of export trade.

Some important principles are enunciated as to the regulation of prices of goods sold abroad, and these are set forth elsewhere in this issue.

DEVELOPMENT COMMISSION FOR NORTHERN ONTARIO.

The plea of Mr. R. S. Gourlay, president of the Toronto Board of Trade, for a strenuous business policy in the development of Northern Ontario, will receive endorsement. He urged the formation of an energetic, non-political and businesslike policy, whereby its resources might be fully developed and made a source of great financial profit to the province. There are in Ontario's Northland 100,000,000 acres of good agricultural land still unoccupied, and in the hands of the Crown. Mr. Gourlay prophesies that the proper development of that area will double the present available home market. He suggests the appointment of a Commission to deal with the problems of development, a suggestion which is heard upon occasion in the Northland itself. "Let us deal with this great northern heritage," he said in an address at the Canadian National Exhibition, "as the Canadian Pacific Railway has done with its Western territories: develop it as much as possible before settling population thereon. Why not hand our Hinterland over to a commission—a commission of capable, business men, chosen independently of their politics? They could handle these millions of acres in a way that would make them bring in five dollars per acre then more easily than they bring in fifty cents now. This is not a political criticism; it is a personal one. I stand here as a citizen of Ontario and make a plea for the development of a heritage that is mine and yours, in common with millions of other folk, all dwellers within the bounds of our great province.

"And let me further express the opinion that such a commission as I suggest should be empowered to remove settlers from starvation farms in sterile sections to the fertile belt that is being opened up.

"I submit that every second lot along the National Transcontinental line in Ontario, or along the Temiskaming and Northern Ontario, should be improved—put under cultivation and a home put on it. These improved farms would soon be taken up, and they would attract, and attract favorably, the attention of people who pass through this country. It would doubtless turn aside many settlers who elsewise would go on to the West."

As Mr. Gourlay knows, there is considerable difference of opinion as to the merits and success of ready-made farms, but that fact should not be allowed to shadow the value of the suggested Commission. The prospective settler's interests appear to be in the hands of too many departments, a failing which could be overcome by a Commission.

Northern Ontario was disappointed at not having the pleasure of showing the twelve British newspapermen, now in the country, the vast agricultural resources there. The Monetary Times would suggest that the Ontario provincial government, the Temiskaming and Northern Ontario Railway Commission and the Toronto Board of Trade should unite in arranging a trip for a party of British editors to the North. There is enough in that region to keep busy a score of intelligent newspapermen for many days.

SMALL CHANGE.

A Montreal paper says that "Hon. Mr. Sifton avoided fish in the St. John speech." Which is better than avoiding political eggs.

* * * *

The Canadian Pacific Railway has a system and equipment worth $343,595,000, 11,000,000 acres of land, and cash in hand amounting to $34,000,000. That should frighten the "bears" for all time.

* * * *

The Winnipeg business men's excursion will be to Great Britain next year. That is the way to create and maintain good business. These linger trips help to bring a large trading world to the finger tips.

* * * *

Dr. Beattie Nesbitt, who has been a fugitive from justice ever since the failure of the Farmers' Bank, is said to have stated to a friend in Detroit the other day: "If they want me in Toronto, why don't they come after me?" That is a bold challenge to the Attorney-General of Ontario.

* * * *

For the first time, a company outside of the United States has made a complaint to the Interstate Commerce Commission of that country. The Fullerton Lumber and Shingle Company, Limited, of Vancouver, B.C., has filed a complaint with the Commission against the rates on lumber from points in the State of Washington to points in Western Canada. The Canadian Pacific and other carriers were named as defendants to the complaint. Reparation of more than $1,400 was demanded on previous shipments.

* * * *

Mr. J. M. Spence, of the Canadian Guardian Life Insurance Company, the charter of which was recently cancelled by the Dominion Insurance Department, proposes to form the Northwestern Life Insurance Company, and to transfer the interests of his old shareholders to the new company. Mr. Spence must have extraordinary faith in the gullibility of mankind. No one thoroughly awake would subscribe to the stock of the proposed Northwestern Life Company after perusal of the special report on the Canadian Guardian Life by chartered accountants, a report made on behalf of the Government Insurance Department at Ottawa.

* * * *

The city of Guelph is the first municipality to become wearied by the talk and inaction of Mr. Bugg and his associates, promoters of the proposed People's Railway. The company has been given three months in which to carry out their agreement with the city. Otherwise, they will be considered to have forfeited any claim they had against the city. If no action is taken by the People's Railway, an application will be made to the Ontario Municipal and Railway Board to annul the agreement. The People's Railway is distinctly a paper road. It has been in the period of promotion sufficiently long to qualify for disappearance at the hands of the Railway Board of Ontario.

* * * *

The State Insurance Commissioners of the neighboring Republic are doing considerable work with a view to obtaining clean insurance. On the other hand, it is questionable whether their sensational methods of reform are the wisest course. At periodical intervals we are treated by one commissioner or the other to a spectacular exposure of an insurance evil. Allowing for the Commissioners' good motive and faith in publicity, circus tactics are too much in evidence. In the United States, they are going to one extreme in this matter, while in Canada we are going to the other. They check insurance evils with a strong hand while we practically allow them to flourish. And of the two, we are the bigger sinner.

* * * *

One, Von George Polenz, was a recent visitor to the Porcupine gold camp, when some attractive stories were circulated as to claims which he had purchased. Baron Polenz, as he was termed, is interested in the Porcupine Investors', Limited, which has its headquarters in London, England. Its capital is equal to five hundred dollars, and the company's objects are to deal in stocks, shares and other securities. "Germans of rank" were said to be associated with this enterprise. The Monetary Times has been unable to locate them yet. All of which shows that it might be as well now and again to take a pinch of salt with certain gold stories.

* * * *

The fight against unauthorized fire insurance in the United States continues. The Washington Insurance Department calls attention to the provisions of the new insurance code, under which it is claimed it will be impossible to force collection in any State court on any insurance policy written by companies outside of the State, and also other provisions under which agents, and even the people who pay for the insurance with such foreign companies subject themselves to punishment. The matter comes up at this time from a complaint of an insurance man of Washington State who has forwarded to the department a letter from a firm which writes that it is engaged in the fire insurance business, and that it is in a position to offer 20 per cent. commission, probably lower rates, and will accept risks rejected by other companies in Washington State. The letter says that similar letters have been sent to a number of other agents in Washington urging them to send their business to this Eastern firm. Deputy Commissioner Madge points out that under Section 44 and Section 75 such policies are illegal under the Washington laws, and anyone concerned in procuring such insurance is guilty of a crime. In Canada, we encourage this crime.

MANUFACTURERS AND COMMISSION HOUSES.

Regulation of Prices of Goods Sold Abroad—Are Any Changes in the System Desired?

A report of the American Manufacturers' Exporters Association, dealing with the question of the regulation of the prices of goods sold abroad, the committee says:—

"This is a most important question affecting all interests, but one which, admittedly rests with the manufacturer, and not with the export house. The statement as to the plan generally adopted up to the present is correct, and that the manufacturer fixes a standard price for the exporter, selling to all at this figure for cash or quantity, and the foreign buyers have been charged accordingly plus the export house's commission.

"The important points are: Does the manufacturer wish to change this position which has worked well in the past? Does he desire to try and differentiate between the large and small buyers in the foreign market? Does he think his interest will be served by trying to apply to foreign trade the system in vogue in this country where he has several standards of price based on the trade to which he sells, and again, has he given this important consideration careful thought to base any proposed new action on?

Position of Commission Houses.

"If the manufacturers have decided upon this change and the alteration of their trade methods in the export business, it is up to them to act and they will not be thwarted in any way by the commission houses, but it is a question whether there is judgment and wisdom in the contemplated change, if it is contemplated. Our own opinion is that few of the manufacturers interested in export trade contemplate such a movement, but even if they do it is no argument for the handling of the business abroad direct with the foreign customer as you appear to consider. Such a radical change, however, will not be easy. The manufacturer must decide on the market in which to try the experiment—he must determine which foreign buyers he will concede the lower terms to for quantity orders—this will necessitate his own traveller visiting said market, or he must arrange by the advice of the commission houses here who know the buyers.

Terms With Foreign Customer.

"The details being arranged he must then notify all commission houses doing business in that market the exact terms he has arranged with each foreign customer, and must then demand that orders be sent through the commission houses accordingly. The manufacturer will run the risk, if he desired to keep the market open to all the buyers, of having the larger firms force the smaller firms practically out of business on his goods, as the larger houses being able to sell cheaper will gradually secure the bulk of the business, and the tendency of the manufacturer's action will be practically to establish one or two agents. This has been tried by some manufacturers in the past and has not proved very successful excepting in the case of a manufacturer who has a special line and does not handle a diversified lot of goods.

Sell Carload Lots.

"A number of manufacturers to accomplish this purpose in part now sell carload lots at lower prices than small quantities, which, of course, is known to the buyer abroad as well as to the commission house here, and the larger merchants take advantage of the arrangement when possible.

"The contention that commission houses will not meet the manufacturers fairly and give the names of buyers abroad when approached with sufficient reason for the desired knowledge, or that they will not disclose the market to which goods are going, and in fact are not willing to co-operate fully with the manufacturer when the object is for mutual and joint protection, is not usually correct.

"Naturally, the commission house may have spent much money and time to establish themselves in a market, and who know that a manufacturer is seeking information for purposes which cannot appeal to the commission house, is loath in such case to place information they possess at the disposal of the manufacturer.

Depressed Prices.

"The manufacturers themselves, we find, have been the greatest factors in depressing the prices of their goods abroad and injuring the American trade by indiscriminate quotations to all who write them from abroad for prices, and in dong this they have injured the large buyers who handled their goods regularly, and this should be avoided. English, German and French houses act in a different way and never quote in their catalogues or on their discount sheet their bottom figures. They thus protect the house abroad in securing a profit and also the home buyer."

DOMINION OF CANADA TRUST CORPORATION'S

Directors Have Been Somewhat Bold in Their Operations, Says a Critic—The Company's Position.

That the appeal in London for capital made by the Dominion of Canada Trust Corporation, Limited, was only moderately successful, 145,411 shares being taken up out of 400,000 offered (£100,000 were underwritten), is the statement made by the London Investor's Guardian. "Consequently," says that journal, "the company's operations had to be curtailed, which was unfortunate, for the enterprises which it had for immediate handling were of considerable magnitude, requiring the use of large capital. The condition of the balance sheet as at the end of June last, showing the position after fifteen months' work, indicates that the directors have been somewhat bold in their operations. At the outset, however, they appear to have met with a remarkable check.

Government to Build the Road.

"The two particular enterprises which they had in view in forming the company were the building of a railway in Nova Scotia and the acquisition of control of large timber areas, through which much of the projected railway was to pass. The company duly took up the business, obtaining a charter for the railway, with agreements for substantial subsidies from both the Dominion and the Provincial Governments. When, however, overtures were made to the Provincial Government to amend the charter to enable the capital to be more easily raised in Europe, the Dominion Government interposed with a decision to build the line itself, for which purpose it secured the necessary financial appropriation from parliament. The corporation appears to be sadly nonplussed. It had incurred heavy expense in connection with surveys, reports, etc., a total outlay of £34,123 being scheduled in the balance sheet—which in due course would have been recouped, with a substantial profit, out of the flotation of the railway company; the action of the Dominion Government threatened to negative all this preliminary work. A claim for compensation has been made to the Dominion Government, and the directors anticipate an early and fair settlement.

As to the Lumber Proposition.

"The lumber proposition relates to (i) an area of 310,000 acres of 'timber-bearing' land, on which are six large sawmills, conveniently situate at the mouths of rivers; (ii) a half-share in another property of 50,000 acres, on which is a large up-to-date mill, capable of sawing seven million feet of lumber per annum, and (iii) rights over 500 square miles of territory in Labrador, where there is a waterfall capable of developing 1½-million horse-power. A lumber company has been registered to hold and operate these lands; the organization of this company, in which the Trust Company will hold nearly all the bonds ($2,980,000) and one-half ($1,500,000) of the stock, has not yet been completed, and meanwhile the enterprise is involving the Trust in some heavy financing. The cost of the property and expenses incurred have amounted to £205,348, and a further £14,283 has been advanced for working capital, the total commitment to the 30th June amounting to £219,631. The issued capital of the Trust is only £150,411, and to finance the lumber purchase it has had to incur a debit liability of £132,737, and a further liability of unascertained amount to provide working capital.

Heavy Strain on the Company.

"It is somewhat unfortunate that the Corporation's accounts have had to be brought out whilst this lumber business is in course of negotiation; it is evidently a very valuable property, but the organization of the operating company, ugh apparently in every respect following a normal course, is, for the time being, obviously throwing a heavy strain on the corporation. The affairs of the corporation have been conducted economically, the general expenditure for the fifteen months since incorporation amounting to £6,930. The board of directors has undergone considerable change since the prospectus was issued. Mr. E. M. Rodocanachi has retired in favor of his partner (Mr. P. J. Agelasto); Mr. G. H. Raw has resigned, also a Paris director and a member of the Canadian board. The Canadian board has been reconstituted and enlarged."

The North American Life Insurance Company of Minneapolis, Minn., is organizing and proposes to enter the Canadian field. It is practically certain that the Dominion Government will refuse to allow the company to carry on business here under a name so similar to that of the North American Life Assurance Company of Toronto.

One Hundred and Seventy-Eight Million, Six Hundred and Fifty Thousand Bushels of Wheat

Is the Estimate of the Harvest in the West—Frost and Hail did some Damage—Business Conditions Good

Monetary Times Office,
Winnipeg, Sept. 5th.

Harvesting at the present time is in full swing, but up to date the weather has been backward. The frost which struck some sections of the West last week, and the severe storm of a fortnight ago, did considerable damage.

The Manitoba Free Press has completed its seventh annual estimate of the crop of the Canadian West, and gives an estimate of 178,650,000 bushels of wheat. This is considerably less than the general estimate of 200,000,000, the figure spoken of all along. The other grains are: oats, 223,550,000; barley, 33,000,000; flax, 7,820,000. The estimate given by The Free Press is based on the reports of its twenty-four special crop inspectors. The inspection was made with even more than usual care; 6,584 miles of driving was done, and samples were cut from over 4,500 fields. The crop of 1911 in the Canadian West has passed through more vicissitudes than possibly any other crop that has ever been raised. The seed-bed was generally dry at the time the grain was planted. The rains came too early in May and caused surface germination, and the growth was luxuriant, but without the strong root which is so essential to a hardy crop. There was a very wet June, with light June frosts during the last week, which affected much of the wheat just coming out of the shot blade. July was wet and abnormally cool, with frost occurring in a number of places on the nights of the 16th and 17th, and in a few places on the night of the 21st July, when a very large percentage of the crop was in blossom There was a total absence of the hot weather so essential to maturing the crop. With the latter part of July and the beginning of August came the development of black rust, and this disease has affected a very large percentage of the crop in southern and central Manitoba and, to a considerable extent, in southern and central Saskatchewan.

Hail Lowers Quality and Quantity of Grain.

There have been a number of hailstorms, both in July and August, and, though the actual percentage of total loss from this source is comparatively light, there is a considerable amount of grain which is lowered in yield and also in quality by hail. The most severe hailstorms occurred on the 30th June and the 13th and 21st August. Heavy rain with these storms lodged much crop, preventing filling. There was a slight frost on the night of the 9th August at a number of points, particularly in Northern Alberta, and on the 25th, 26th and 27th August there were frosts fairly general over the entire west, ranging from one to nine degrees. The Free Press is still able, with very considerable confidence, to announce that there will be a wheat yield of 178,650,000 bushels. The grade, however, will not be so satisfactory. From the amount of wheat already inspected and in view of past experience, the indications are that there will be more of the crop graded No. 3 Northern and lower than there will be above that grade. Had it been possible to have reaped the crop without further depreciation as it stood when the inspection was finished, the total would have been 217,300,000 bushels.

General Business Conditions.

During the past week, when a number of adverse reports have been coming to hand in regard to the crop, the general business situation had in it the element of uncertainty arising from the variable reports of crop damage. The whole of Canada is at present fixing its eyes upon the harvesting of the grain crop of the West.

It is quite possible that a large area may have been affected, but to what extent that area is and to what extent standing crop has been damaged is a problem to which a definite answer will only be furnished by actual threshing returns. Business men will have to exercise their judgment in determining what lengths they will go in assuming obligations.

Edmonton is Progressive.

The expansion in Edmonton's distributing and industrial business continues, says the monthly bulletin issued by the Edmonton Board of Trade. It states that a number of large manufacturers have found it necessary to establish extensive warehouses in Edmonton in order to handle the increased volume of business. Messrs. Adam Bros. have commenced work on the erection of their big wholesale saddlery warehouse, and that of the Great West Saddlery Company is progressing rapidly. Messrs. Foley Bros. and Larson & Company have arranged for the immediate erection of big premises for their grocery business, which has entirely outgrown their present premises. Work is progressing rapidly on the great warehouse for Ames-Holden, McCreery Company, and the J. B. Mercer warehouse is nearing completion. The Great Northern Tannery Company are preparing for immediate commencement on the erection of an extensive plant.

The expansion in wholesale and industrial business naturally necessitates expansion in other lines, and the demand for office premises, stores and residences has been such as to promote activity in the building trades, and the demand for premises is still far in excess of the supply.

All railway freight departments report the Edmonton earnings of their respective roads as in excess of previous years.

Great development is taking place in the coal industry, and it is estimated that by the time the heavy demand comes in the fall mines in Edmonton, Strathcona and vicinity will be producing 2,500 tons daily.

A Banker's Opinion.

Mr. E. F. Hebden, general manager of the Merchants Bank of Canada, was a visitor in Winnipeg last week, having just returned from a month's tour visiting branches in the four Western provinces.

Mr. Hebden on his return to Winnipeg had this to say: "I do not like to be too optimistic. If there ever was a land flowing with milk and honey, Western Canada is that land. If I had at any time any doubt with reference to the future of the country, those doubts have been finally dispelled. The provinces of the West are bound to increase in importance in every regard.

"From Winnipeg," said Mr Hebden, "I went west to Vancouver and north to Prince Rupert and Stuart. Returning to Calgary, I went into southern Alberta, and then went through Edmonton to Saskatoon. I visited Manitoba points later, and have now reached Winnipeg. Everywhere the reports were much the same, and I found unfavorable conditions nowhere."

In the Wheat Markets.

The market is still governed by reports of the progress of the crops, and values have not fluctuated materially during the week. Notwithstanding the run of bullish news, which under ordinary circumstances might have caused a substantial advance, our market held on comparatively steady, although the tendency was in an upward direction. The fact that some damage has been done to our Canadian crop by frost has so far had little effect in sending up prices. The reports of experts are conflicting as to the amount of damage sustained, and the extent of it will not be known until threshing returns are available. There is quite a lack of speculative activity in all markets and an absence of leadership on the buying side, and to these is attributed the failure to stimulate the markets into activity.

Cash Wheat in Demand.

Cash wheat on our local market met with a strong demand, trade at times being brisk and exporters large buyers for early future contracts. Stocks of old crop are now so low that only a small business in that line was possible, but the new wheat has now begun to arrive and is grading satisfactorily. It is expected, however, that there will be a large proportion of low-grade wheat in this year's yield, but much still depends on the weather yet to come. The total inspection returns for the crop year of 1910-11 show that, despite the drought, the wheat passing Winnipeg totalled 87,973,000 bushels, or only 7,610,000 less than the bumper crop of 1909-10 The total cars of all grain inspected were 100,737, against 114,997 in the previous year.

STEAMSHIP SAILINGS FROM CANADA.

An excellent innovation has been made in the weekly report of the Department of Trade and Commerce in the shape of a list of steamship sailings from Canadian ports. This list will be published once each month, and appears first in the weekly report dated September 5th. It shows that during the current month vessels are sailing from Canadian ports to Australia, New Zealand, Belfast, Bermuda, Breman, Bristol, China, Japan, Cork, Dublin, Glasgow, Demerara, Havanna, Havre, Hamburg, Leith, Liverpool, London, Manchester, Mexico, Hassan, Newcastle, Rotterdam, San Francisco, Seattle, Skagway, South Africa, and the West Indies. There will be even a longer list in the next report, all the steamship companies not having yet reported. These particulars should prove of great value to exporters.

BRITISH COLUMBIA.

Several Large Sales of Timber Limits—Zinc Smelter for Medicine Hat Suggested—Railroads Active.

(Staff Correspondence.)

Vancouver, Sept. 2nd.

Sir Donald Mann was in the city this week, and a large party of Grand Trunk Pacific officials were here on their way north to Prince Rupert. Announcements are hardly looked for, as most of the news has been given out concerning the railway lines coming to the coast. The whole of the sections of the Grand Trunk Pacific and the Canadian Northern Railway in British Columbia are now under contract, and construction will be proceeded with as rapidly as possible during the next three years. Sir Donald Mann stated that building of branch lines would go on simultaneously with the construction of the main line, so that feeders would have been provided when the principal road is ready for operation. He inspected the sections on the lower mainland, having had a special car placed at his disposal by the British Columbia Electric Railway Company.

With Mr. Charles M. Hays were Mr. Frank Swanston, Mr. H. Deer, assistant secretary of the Grand Trunk Pacific, London; Mr. John Pullen, assistant freight traffic manager; Mr. W. E. Davis, passenger traffic manager; Mr. A. Butze, general purchasing agent; Mr. J. E. Dalrymple, assistant freight traffic manager; Mr. W. P. Hinton, general passenger agent; Mr. A. B. Smith, manager of telegraphs; Dr. J. M. Leney, assistant chief medical officer; Mr. A. W. Smithers, London, and Mr. E. G. Chamberlain, general manager. It is hardly necessary to remark that close observation will be made of every point affecting the company in the north. The party left here on Monday night, and after visiting Prince Rupert will make a trip to the end of the steel on the mainland to look over the ground.

Zinc Smelter for Medicine Hat Suggested.

The smelting of zinc ores has been a problem for consideration among mining men in the interior of British Columbia for many years. Slocan properties have zinc values, but the method of treatment has been such that it did not pay to work the mines except when the general values were encouraging. Costs were heavy, both for treatment at smelters in the United States and for duty and freight. It is now suggested that a zinc smelter be established at Medicine Hat, where natural gas could be used and the expense reduced to a minimum, or at least a reasonable figure. The matter has progressed so far that the question of freight rates has been discussed with the Canadian Pacific Railway. An enterprise of this kind is almost too good news to be true. With successful home treatment of zinc ores much activity would result in Slocan camps, and a resource now lying practically undeveloped would be turned to good account. One mine, the Lucky Jim, is perhaps better known than others, and prominent Spokane men who have money invested are working at the scheme proposed.

The retirement of Sir William Whyte as second vice-president of the Canadian Pacific Railway will come with regret to many people in British Columbia, where he was very well known. He was, perhaps, the most approachable of the older officials, and, perhaps, it was because of this that he became so intimate with all questions affecting the West. He was of special value to the railway company not because of what he knew of railway business, which was his special line, but of the many and all little and big enterprises between the Great Lakes and the coast. To-morrow, if he were making a trip west, he would be found on the platform, if the train stopped a moment, enquiring about the latest move in a town, and ten to one he had heard about it before he arrived. Town officials and business men throughout the West have looked upon him as a personal friend.

Big Purchase of Crown Granted Timber Limits.

The Vancouver Timber and Trading Company, of Vancouver, has purchased 30,000 acres of Crown granted timber from the Redcliff Lumber Company. These lands are located on the west coast in the vicinity of Alberni. The price of $2,000,000 is mentioned, but no figure is given out. The Redcliff Lumber Company is an American concern organized a few years ago. A timely point was brought out by Mr. Alvo von Alvensleben, of the Vancouver Timber and Trading Company, in discussing the sale. He suggested that owners of timber should have their land surveyed, since the present custom of selling unsurveyed lands would lead, sooner or later, to a tremendous amount of litigation, and in many cases would result in undermining the confidence of outside capital in the stability of British Columbia timber investments.

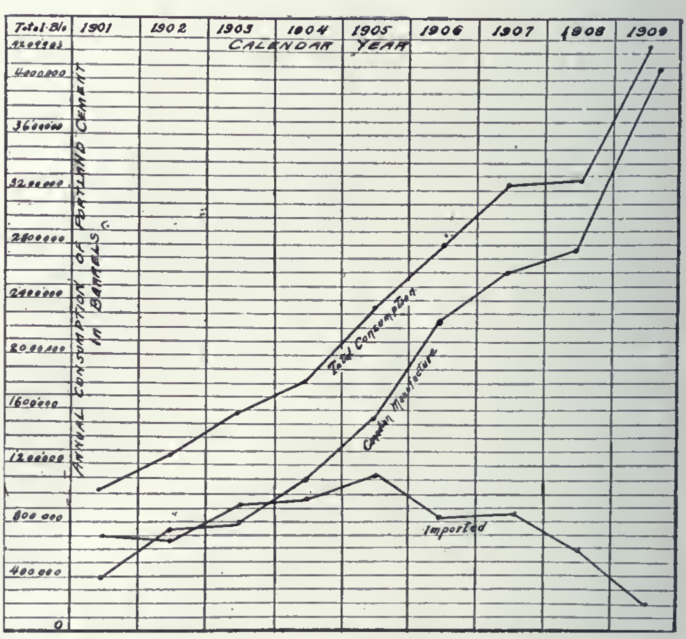
The interest being taken in timber investments is further shown by the purchase of twenty-seven square miles on Cowichan Lake, also on Vancouver Island, by six British capitalists, represented by Sir John Barker, Baronet. The opening of the Panama Canal is looked upon as giving a short cut to the eastern American cities and Europe, and it is expected that a great impetus will be given trade when that route is ready.

◆

ANNUAL CONSUMPTION OF PORTLAND CEMENT.

The accompanying curves with the annual consumption of Portland Cement plotted against the calendar year shows very clearly the growth of the cement industry in Canada and also the history of imports of cement.

The top curve shows the total consumption of cement in Canada. The next curve shows the consumption of cement of Canadian manufacture and the bottom curve shows the consumption of imported cement. In 1901 of all the cement used in Canada 64 per cent. was imported, in 1909 only 3 per cent. was imported; 97 per cent. or over 4,000,000 barrels being of Canadian manufacture.



Annual Consumption of Cement in Canada of (Canadian and Imported) Years 1901-1909.

The above curves were plotted from data given in the Annual Report of the Mineral Production of Canada-Department of mines.

◆

NORTHERN PACIFIC RUNS ITS OWN TRAINS TO WINNIPEG.

A special train occupied by Northern Pacific officials recently arrived in Winnipeg from St. Paul. The officials concluded arrangements for the Winnipeg terminals. In the party were Messrs. Thomas Cooper, assistant to the president; G. A. Goodell, general manager; J. G. Woodworth, traffic manager; A. M. Cleland, general passenger agent; G. A. Mitchell, assistant general freight agent; E. C. Blanchard, general superintendent; W. G. Johnson, assistant comptroller, and A. I. Soverign, superintendent.

Mr. Cooper said that all arrangements have been completed by the Northern Pacific for the operation of its own freight and passenger trains into Winnipeg, instead of transferring to the Canadian Northern at the boundary, as has been done heretofore.

The arrangement will go into effect on September 15th, after which date all Northern Pacific trains will use the union station and Canadian Northern freight houses. After the completion of the Midland terminals on December 13th all Northern Pacific freight trains will use the Midland or Great Northern terminals.

The Midland will have its own superintendent in Winnipeg, as well as a local freight agent and a staff of officers.

NEW BRUNSWICK.

General Crop Conditions Satisfactory — Forest Fires Cause Considerable Damage.

(Staff Correspondence.)

Saint John, New Brunswick,
29th August.

The general condition of the crops in New Brunswick is very satisfactory. Hay has been harvested in good condition and is of excellent quality, although the crop in some sections is lighter than that of last year. There will be a good average crop of grain, and potatoes are also turning out well.

The lumber markets are still dull. The mills continue in active operation, and shipments are going forward both to the British and United States markets, but there is less activity than is usual at this season and prices are low.

The fish catch has not been large around the coast, but the prices have been good.

Building operations in the province generally have been fairly active this summer, especially so in Campbellton and Moncton. Campbellton is being rebuilt at a rapid rate, and will be a much better town than that which was destroyed by fire last year. Moncton has been growing rapidly for several years, and the fact that the Grand Trunk Pacific Railway has secured land and will erect machine shops and other works there, means a further increase in population. Work has begun on the street railway, which will soon also be supplied with natural gas, as a source of heat, light and power.

Tenders are Asked for St. John Harbor Developments.

In St. John the work of harbor development will proceed on a large scale. Tenders are now being asked for the construction of a long stretch of wharf and sea wall which will enable the Canadian Pacific Railway to fill in the many acres of flats at West St. John which it has secured from the city, and upon which it will construct an extensive series of railway yards. The wharves will also be the beginning of an extensive series of steamship berths, to be constructed as the requirements of trade may demand. The Federal Government has practically secured a site on Prince William Street for a new Post Office, which, it is stated, will be similar in style to the fine building in Winnipeg. Work on the construction of the new armory is in progress. The contract will be awarded soon for the construction of the dry dock, breakwater and wharves at Courtenay Bay for which tenders were submitted by three British firms.

Contracts have been awarded for the erection of stations and other buildings at eighteen points on the Grand Trunk Pacific in New Brunswick, and a portion of the line will be operated this Fall.

Forest Fires Cause Considerable Damage.

Mr. J. C. Dalzell, who has been manufacturing mattresses in a small way at Moncton, has removed to St. John and will greatly enlarge his output.

During the first half of August forest fires did a great deal of damage in one section of New Brunswick. Many thousands of dollars' worth of standing timber were seriously injured or destroyed.

The Canadian Pacific Railway has filled in the wide space at the head of the harbor, formerly a timber pond, and has a pile-driving crew on the site to work night and day driving piles for the foundation of the great warehouse to be erected there, with a series of tracks making a large railway yard. The company is making a large expenditure at this point, which will greatly facilitate the handling of freight.—W.E.A.

BRITISH VIEW OF RECIPROCITY.

The London Morning Post, admitting the fact that Canada's railway investor and manufacturer is opposed to reciprocity, justifies the attitude, observing that they have invested capital in the splendid enterprise of turning a waste country into the home of an economically strong and independent nation. They are the captains of industry who led the Canadian people up the arduous path through years of adverse circumstances to a position of which the Dominion and Empire is justly proud. They now see this position threatened by the surrender of Canada's fiscal system, and naturally desire to avert the blow. Financial interests only become subversive when opposed to the general interests of the people, and the Canadian manufacturers, Canadian millers and Canadian railwaymen are identical; they want to conserve Canada's industries and employment to her citizens. It may be hoped the Canadians are shrewd enough to see which interests are to the national advantage and which are arrayed against their economic independence.

FOUR PER CENT. STOCK

Will be Issued by the Canadian Pacific Railway to Build More Lines—Results of Land Sales.

Further extracts from the Canadian Pacific Railway's annual report for the year ended June 30, 1911, are given below.

"Four per cent. consolidated debenture stock to the amount of £1,263,667 was created and sold, and of the proceeds the sum of £745,489 was applied to the construction of authorized branch lines; £194,178 was devoted to the acquisition of the bonds of the St. Maurice Valley Railway Company, the interest on which had, with your sanction, been guaranteed by your company; £134,000 was used to acquire a like amount of your company's first mortgage 5 per cent. bonds, and with the balance, £190,000, the outstanding Canada Central Second mortgage 6 per cent. bonds were purchased and retired.

"Four per cent. preference stock to the amount of £300,000 was created and sold, the proceeds being used to meet capital expenditures that had your previous sanction.

"Your guarantee of interest was endorsed on 4 per cent. consolidated bonds of the Minneapolis, St. Paul and Sault Ste. Marie Railway Company to the amount of £3,600,000, issued and sold to meet the cost of constructing 180 miles of railway added to that company's railway system.

Prices Received for land.

"The sales of agricultural land during the year aggregated 650,874 acres for $9,558,427.17, being an average of $14.69 per acre. Included in this area are 19,097 acres of irrigated land, which brought $33.63 per acre, so that the average price of the balance of the land was $14.11 per acre.

"By the construction of a railway 16.2 miles in length between Hamilton and Guelph Junction, in the province of Ontario, the distance from Hamilton to points on your lines in Western Ontario will be shortened very materially, and, therefore, subject to your approval, an agreement has been made with the South Ontario Pacific Railway Company for the construction of the line, and for a lease of it to your company on its completion for a period of 999 years at a rental equivalent to 4 per cent. per annum on the bonds of the South Ontario Pacific Railway Company, issued with the consent of your company.

To Issue Further Stock.

"In order to provide transportation facilities for incoming settlers it is very desirable that the following branch lines in Saskatchewan and Alberta should be constructed without unnecessary delay; Moose Jaw southwest, 35 miles, Kerrobert northeast, 25 miles, Weyburn branch extension, 21 miles, Estevan branch, 55 miles, Swift Current southeast, 45 miles, Swift Current northwest, 35 miles, Wilkie northwest, 32 miles, Wilkie southeast, 31 miles, Kininvie branch extension, 37 miles, Bassano to Kininvie Jct., 36 miles, Kipp branch extension, 27 miles, and you will be asked to authorize the sale of a sufficient amount of 4 per cent. consolidated debenture stock for the purpose.

"With your authority received some time ago, an order has been placed with the Fairfield Shipbuilding Company, of Glasgow, for two steamships, 570 feet long and 68 feet beam, with a speed of eighteen knots per hour, to supplement the fleet now engaged in the Pacific trade between Vancouver, Yokohama and Hong Kong. The approximate cost of these steamships will be £440,000 each, and they are to be delivered early in 1913.

Western Double Track.

"The work of enlarging your terminal yards and buildings providing additional shops and machinery, laying many miles of new passing tracks, extending your telegraph lines, and of generally improving the standard of your property and of your operating facilities to meet the requirements of the traffic, continues to have the earnest attention of your directors, the amount expended for these purposes during the year aggregating $18,000,000.

"The double track between Winnipeg and Brandon is nearing completion, and it is evident that a second track must be laid on some portions of the main line between Brandon and Calgary in the near future.

Mr. L. E. Geoffrin, of the Montreal Harbor Commission, who has returned from a trip through the New England States, says the port of Montreal offers better facilities and possesses superior opportunities than any of the harbors which he had seen while away, including Boston, where vast improvements are under way.

MAY HAVE TO FIGHT FOR LANDS.

Central Railway of Canada Positive of Their Claim, but Ontario and Quebec Governments May Oppose It.

Matters still appear to be indefinite in connection with the claim of 1,300,000 acres of land in Ontario and Quebec made by the Central Railway Company of Canada, which recently placed a bond issue of $5,000,000 in the London and Paris markets. The Hon. A. J. Matheson, provincial treasurer of Ontario, says that the terms under which the grants were made in the Acts of 1854 and 1861 to the Carillon and Grenville Railway Company, the original charter holders, were not fulfilled. He thinks the grants thereby lapsed.

In an interview, Senator Campbell, president of the company, said: "We made sure that our grants had not lapsed before we placed the bonds on the market. We took the charter over from the Carillon and Grenville Railway several years ago, and we have had that charter and all the papers dealing with the matter looked into by four eminent counsel in Montreal and Ottawa. More than that, before the underwriters took over the issue they employed counsel to examine the charter, and they were quite satisfied."

Difficult to Answer.

At a meeting of the company's directors, held on Monday at Montreal, Mr. W. D. Hogg, K.C., of Ottawa, was added to the board. Mr. Hogg, asked by an interviewer what lands were claimed, said it was difficult to answer the question precisely. They were to be selected along the line built by the Carillon and Grenville Company, and if enough Crown lands were not available there, additional property was to be selected from Crown lands in the watershed of the Ottawa River and its tributaries. As the larger portion of the proposed railway line will be in the Province of Ontario, that province will be called upon to contribute the larger share of land to make up the grant claimed.

May Oppose Claim.

Both Quebec and Ontario will likely be called upon by the Central Railway Company to contribute to the land grant and it is said that both provincial governments will oppose the claim.

The Carillon and Grenville Railway Company had been incorporated by the old parliament of Canada to build from Montreal to Ottawa and beyond, and were to receive proportional grants of land as each twenty mile section was completed. The Central Railway Company of Canada, incorporated a few years ago, has acquired the charter rights of the Carillon and Grenville and are prepared to build a railroad from Montreal to Georgian Bay on a route between the Canadian Pacific Railway and the Old Parry Sound.

The company claimed to have acquired the right of the Carillon and Grenville granted by the old parliament of Canada to a proportion of four million acres of Crown lands, the portion being 1,300,000 acres.

Preferred to Fight.

The company claims that its rights to the land grants were not terminated by the legislation of the old parliament of Canada, and is prepared to build and to establish in courts its right to lands in question.

◆

The Vancouver Timber and Trading company has purchased from the Red Cliff Lumber company of Duluth thirty thousand acres of Crown granted timber lands on Vancouver Island. The timber on this tract is estimated at close on two billion feet. Two million dollars was paid for the property.

The editors of leading agricultural papers in the United States paid a visit to Prince Albert recently. They stated there that at that point conditions generally were further advanced than in any other point of the West they had visited. They were interested with the large amount of mixed farming carried on in the district and the fine quality of stock raised there.

The Calgary Board of Trade have received a letter from Mr. Hutchings, suggesting that the board concur with the recent action of the Lethbridge board in recommending to the provincial government that insurance of farmers' crops against hail be raised from the four dollars an acre now in effect to twelve dollars an acre. Mr. Hutchings is of the opinion that this would be a means of safety not only to the farmers, but to merchants, banks, and the province in general, as loss of crops by hail is not hard on the farmer alone but on the whole community. A committee will report on the matter.

PERSONAL.

Mr. John T. Hall, publicity commissioner of the Lethbridge, Alta., Board of Trade, is seriously ill.

Messrs. D. Lorne McGibbon and Fred N. Beardmore have been elected directors of the Eastern Trust Company.

Mr. W. G. Sleeman of the London Illustrated News is at present on a visit to the West.

Mr. W. D. Scott, superintendent of immigration at Ottawa, has been appointed chief controller of Chinese immigration.

Mr. George H. Allen, general manager of the Travellers' Life Assurance Company of Canada, Montreal, was in Toronto this week.

Mr. Frank P. Jones, general manager of the Canadian Cement Company, was in Winnipeg recently regarding the erection of their new plant in that city.

Mr. Rodolphe Forget has resigned as a director of the Duluth-Superior Traction Company, and Mr. F. H. Deacon of Toronto has been appointed in his stead.

Mr. Andrew Miller, Calgary's energetic Industrial Commissioner, has had to answer many enquiries at the Toronto Exhibition regarding the rising Albertan city.

Mr. A. T. Kerr, of the department of railways and canals, Ottawa, has been appointed advisory engineer for Alberta and British Columbia. Mr. Kerr will locate in Calgary.

Mr. S. E. Bushe, inspector, with the London & Lancashire Fire Insurance Company, Winnipeg, has accepted a position with the Adanac Securities Corporation, Saskatoon.

Mr. A. P. B. Williams, of Messrs. Meredith & Company, has been appointed secretary-treasurer, succeeding Hon. L. G. Guest, who will take over the management of the company's London office.

Messrs. Fuller Brothers, contractors for the Chateau Laurier, Ottawa, builders of New York and Montreal, were recently awarded the contract to build the "Selkirk," the new G.T.P. hotel on Broadway, Winnipeg.

Mr. J. H. Grisdale, director of Dominion Experimental Farms, has just returned to Ottawa from a tour of Canada East and West, during which he visited all the experimental farms under his control.

Mr. E. Blake Robertson, assistant superintendent of immigration at Ottawa, is to be assistant chief controller of Chinese immigration, and Mr. J. H. MacGill, immigration agent, to be controller of Chinese immigration at Vancouver.

Mr. Guy Ridpath, of Messrs. Rhodes, Kitchen & Company, London; Mr. Stern, banker, of London; and Mr. Woodward, Dr. Crouch and Mr. Arkwright, prominent in London financial circles, are at present on a tour through Western Canada.

Mr. Lansing Lewis, for twenty-seven years with the Caledonian Insurance Company—during twenty of which he acted as manager—has decided to retire shortly. Mr. Lewis is one of the senior members of the Canadian Fire Underwriters Association.

Mr. R. R. Martin, formerly of the Canadian head office staff of the Norwich Union Fire, Toronto, has been appointed inspector for Ontario of the Atlas Assurance Company, in succession to Mr. C. E. Sanders, who has been appointed manager for the Atlas in the West.

Messrs. John Campbell, S.S.C., of Edinburgh, Scotland; A. B. Campbell, W.S.; H. H. Hudson and wife, of the Canada Permanent Mortgage Corporation, Toronto, and Melville Massey, son of the joint manager of the corporation at Winnipeg, are in the West investigating conditions with a view of investing considerable Scotch capital.

Mr. L. Lukes, asociated with Messrs. Mackenzie & Mann, has faith in Mexico as a good country for investors. Mr. Lukes, who has resided in Mexico for many years, says that the Mexican Government has exhibited an exceptionally friendly feeling for Canadians, and he thinks the trade between Mexico and the Dominion is sure to attain large proportions. A good start has already been made with subsidized steamships running north to Vancouver and to Montreal and Halifax. If foreigners in Mexico simply attend to their legitimate business and obey the laws, as any good citizen does in his own country, they will be protected, no matter what conditions prevail.

MINING AND INVESTMENT COMPANIES

Are the Feature of this Week's New Incorporations—Seventy-eight New Companies.

Seventy-eight companies with a total capitalization of $36,979,000 were incorporated during the past week. Ten of the new companies have capitals of a million dollars and over, the aggregate total of which amounts to $31,000,000 as follows:—Franco-Canadian Corporation, British Columbia, $6,000,000; Pretty's Timber Exchange, British Columbia, $5,000,000; Guarantee Realty Company, Montreal, $5,000,000; Eastern Canada Gold Fields Company, Montreal, $3,000,000; Roberval Paper Company, Roberval, $3,000,000; Porcupine Midas Mining Company, Toronto, $2,000,000; Porcupine Bristol Gold Mining Company, Toronto, $2,000,000; Uplands, British Columbia, $2,000,000; Lake of the Woods Gold Mining Company, Toronto, $1,500,000; Porcupine Gold Belt Mines, Toronto, $1,500,000. The majority of the companies to be granted charters are investment and mining concerns.

The Liverpool Canadian Lands, Limited, was registered in London recently, with a capital of £30,000 in 29,975 shares of £1 each, and 500 deferred shares of 1s. each, to acquire for investment or resale, and traffic in any lands or landed property, or rights over or interest in lands, and any concessions, grants, rights, decrees and privileges relating to land, and any timber limits in the Dominion of Canada or elsewhere. The first directors are Messrs. M. Field, J. A. Smith, W. R. Glazenbrook, and D. B. Rapport.

The following is a list of charters granted during the past week. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Wilmer, B.C.—Elko Irrigated Lands, $250,000.

Coalmont, B.C.—Coalmont Hotel Company, $20,000.

Summerland, B.C.—Okanagan Jam Company, $25,000.

Port Alberni, B.C.—Alberni Lime & Brick Company, $100,000.

Fraserville, Que.—Club Bellevue, $10,000. N. Dion, A. F. Lacombe, J. Hamel.

Gladstone, Man.—Gladstone Hospital. G. Barr, W. H. Squair, A. G. Williams.

London, Ont.—London Timetest Company, $10,000. J. McWilliam, J. C. Elliott, W. A. Piper.

Brookdale, Man.—Brookdale Rink Company, $5,000. C. Gowan, W. Kenney, D. McNaughton.

Quebec, Que.—Parisian Company, $10,000. W. G. Mitchell, R. Chenevert, F. Callaghan.

Sherbrooke, Que.—G. R. E. Kennedy, $20,000. G. R. E. Kennedy, K. E. Kennedy, E. E. McCone.

Chesley, Ont.—St. Clair Park Realty Company, $50,000. C. J. Mickle, R. J. Lillico, E. B. Caldwell.

Roberval, Que.—Roberval Paper Company, $3,000,000. A. Du Tremblay, J. B. Carbonneau, L. Lindsay.

Sydney, N.S.—Merchants' Transportation Company, $50,000. J. McConnell, A. W. Mann, F. G. Konig.

Porcupine, Ont.—Porcupine Athletic Club, $40,000. G. Mitchell, Miss E. Fields, W. Graham, Cobalt.

Brockville, Ont.—Brockville Atlas Auto Company, $200,000. W. H. Comstock, T. J. Storey, H. W. Going.

Brantford, Ont.—Gilbert Realty Company, $100,000. W. J. Carroll, T. Stevenson, Miss M. H. Carroll, Hamilton.

St. John, N.B.—Standard Construction Company, $10,000. W. S. Codner, Hartwell; R. L. Johnston, W. W. Allen, St. John.

Prince Rupert, B.C.—Ain River Development Company, $100,000. W. J. McMillan & Company, (Prince Rupert), $50,000.

Salaberrye, Valleyfield, Que.—Compagnie Provinciale d'Amusements, $10,000. M. Lalonde, J. G. Meloche, J. S. Thompson.

Niagara Falls, Ont.—Niagara Falls Manufacturing Company, $40,000. L. S. Lundy. Stamford Township; G. W. Clarke, H. F. Upper, Niagara Falls.

Victoria, B.C.—Victoria Shoe Manufacturing Company, $5,000. Vancouver Island Fruit Lands, $150,000. Queen Charlotte Islands General Development Company, $500,000. Tamerton Ranch Company, $50,000. Bloodsal, $9,000.

Montreal, Que.—G. C. Hanford Manufacturing Company, $10,000. G. C. Hanford, G. A. Hanford, Mrs. A. T. Hanford, Syracuse, N.Y. E. W. Jacobs & Company, $100,000. S. W. Jacobs, A. R. Hall, G. C. Papineau-Couture. Guarantee Realty Company, $5,000,000. O. Massicotte, W. A. Catton, Mrs. D. Trudeau. Eastern Canada Gold Fields Company, $3,000,000. F. Beauchamp, A. L. Laperle, J. O. Desy. Artistic Cement Products Company, $20,000. J. E. Carbonneau, R. Prieur. Homestead Realties, $20,000. S. Duncan, V. A. G. Day, W. H. Hooper. Jewish World Publishing Company, $20,000. M. M. Sperber, A. Komaroff, R. H. Beaulieu. Parc Dupas, $20,000. A Tourangeau, Montreal; L. J. Piette, M. Ferland, L'Annonciation.

Toronto.—Utor Gas Company, $40,000. B. M. Pugsley, T. A. Silverthorn, B. L. Bedford. Lake of the Woods Gold Mining Company, $1,500,000. R. C. Wigmore, R. H. Cuthbert, Miss J. H. Whitcomb. Porcupine Gold Belt Mines, $1,500,000. F. Riley, Miss M. B. MacLean, Miss L. G. Downey. Porcupine Veterans' Exploration Company, $80,000. G. Lovell, W. Jacobsen, W. E. Mace, all of Montreal. Provident Land Company, $40,000. D. Henderson, W. H. McGuire, E. Harris, Sr. Porcupine Bristol Gold Mining Company, $2,000,000. J. M. Ferguson, J. M. Adam, Miss G. Heagens. Porcupine Midas Mining Company, $2,000,000. D. W. O'Sullivan, J. A. Campbell, P. R. Morris. Ansley-Dineen Hat & Fur Company, $250,000. A. E. Knox, C. F. Ritchie, F. Morrow. Ontario Laundry Company, $50,000. H. H. Shaver, Mrs. P. M. Allen, Miss M. Calder. Rigg & Company, $40,000. J. T. Rigg, G. M. Hayton, J. W. Marlatt.

Vancouver, B.C.—Kloepfer, Speirs & Evans, $100,000. Canadian General Trusts Corporation, $250,000. Riggs-Higgins Company, $10,000. Pillsbury Milling Company, $250,000. National Mercantile Company, $10,000. Forty Acre Farms, $10,000. Orchard Home Development Company of British Columbia, $60,000. R. B. Johnson, $50,000. Green-Richardson Company, $10,000. British Columbia Engineering & Irrigation Company, $100,000. Pretty's Timber Exchange, $5,000,000. Western Securities, $100,000. George Clapp Company, $50,000. Naden Harbor Coal & Oil Development Company, $250,000. Nestos Timber Company, $50,000. Uplands, $2,000,000. Franco-Canadian Corporation, $6,000,000. Ardath Estate, $100,000. Bachelors' Chambers, $200,000. Durand Callander & Shore Importing Company, $25,000. Walter Hayes & Company, $100,000. Raeburn Clothing Company, $25,000.

Winnipeg, Man.—Hurst Engineering and Construction Company, $20,000. W. Hurst, Mrs. L. Hurst, R. B. Pratt. Caledonian Investment Company, $50,000. J. MacGregor, G. H. Davis, Miss K. L. Patton. Watson Investment Company, $20,000. D. S. Robb, L. Godbolt, A. E. Bowles. Le Soleil de l'Ouest Printing & Publishing Company, $10,000. A. Griveau, A. Boutal, H. J. Bergevin. Thistle Curling Rink Company, $50,000. A. MacDougal, W. A. Carson, J. W. Sutton. Forest Home Company, $75,000. J. H. Montgomery, W. E. Howry, S. W. Montgomery. Canadian Real Estate Bond Corporation, $100,000. G. C. Fargery, R. H. Ansley, A. C. Lipsett. Phoenix Investment Corporation, $60,000. J. Riley, S. Riley, H. E. Swift. Sun Investment Company, $200,000. A. G. Kemp, S. E. Richards, W. P. Fillmore. Financial Corporation, $20,000. M. Scott, E. Fotheringham, A. H. Warner. F. B. Mitchell Company, $25,000. F. B. Mitchell, G. S. Holmes, Miss E. M. Ninnes. General Securities Corporation, $300,000. D. McLean, J. Leslie, J. MacLean. Dunn Brothers, $400,000. J. R. Higgins, W. Manahan, J. Munro. West Rydal, $250,000. F. W. Louthowod, H. R. Drummond-Hay, R. M. Myers.

L'UNION FIRE INSURANCE COMPANY, LIMITED, OF PARIS.

In a recent issue, The Monetary Times noted that L'Union Fire Insurance Company, of Paris, were opening a branch in Canada. They have now established agencies at all important points throughout the Dominion, and a few particulars concerning the company, may, therefore, prove of interest. The Union of Paris was established in 1828, and their head office is at Paris, France. Although they have been engaged in foreign business for a number of years and derive a substantial premium income from insurances abroad, they only started operating in the United States last year, and have just recently made their entry into the Dominion of Canada. The net premium income of the company in 1910 is returned at $4,651,840. The fire fund, exclusive of the paid-up capital of $500,000, amounts to $4,211,540. There is, in addition, an available balance from profit and loss account of $243,156, which brings the total reserves to a figure closely approximating the premium income, quite a satisfactory condition of affairs. The financial standing of the company can be further gauged by the quotation for its shares which are selling at a premium of 1,700 per cent., the present quotation being frs. 4,250 for an amount of frs. 250 paid up, according to the latest French insurance papers.

The branch office of the company for Canada is under the management of Mr. Maurice Ferrand at No. 94 Notre Dame Street West, Montreal. A chief agency was recently opened in Toronto under the direction of Mr. J. H. Ewart, 18 Wellington Street East.

RECIPROCITY AND CANADA'S TRADE RELATIONS WITH OTHER COUNTRIES.

Tariff Policy With Entire World Must be Determined by this Step, Writes Mr. Biggar—Protectionists Make no Pretence.

Editor, Monetary Times.

Sir,—If the proposed reciprocity agreement is adopted we should know what changes are involved in our trade relations with Great Britain, with foreign countries and with the United States.

When the United States annexed the Hawaiian Islands and the Philippines and Porto Rico—which annexation, by the way, was the direct outcome of two reciprocity agreements—did it bring liberty of trade to those islands? It did not. On the contrary, when the United States established free trade between it and those islands it barred out all the rest of the world, including Great Britain and Canada, with a tariff higher than the tariff of either of these groups of islands before the annexation.

In the case of Cuba, the United States had so distinctly pledged itself before the civilized world to give Cuba her complete independence, that it felt obliged to concede local self-government, but the United States retained military domination over the island by reserving two naval stations and dictated its foreign trade policy by insisting on a trade "preference," in favor of the American Republic, of the very kind which President Taft is so fearful that Canada will maintain with the other colonies and Great Britain. Not only was Cuba induced, or compelled, to give a preference of from 20% to 40% in favor of the United States goods but to impose, in addition, a surtax of from 25% to 30% against the goods of every other country, making in some cases a discrimination of 60% against the trade of all nations except the United States.

President Taft's Own Statement.

Canadians who really believe in free trade with the world and advocate it as a principle, must now ask themselves whether the proposed agreement seeks to throw a tariff ring-fence around Canada, or whether it is designed to give Canada a lower tariff with the world at large? According to Mr. Taft's own statement, made on three public occasions, the United States government proposes that Canada shall align herself with the protectionist policy of the United States. This must necessarily be so, for neither the Democrats nor Republicans propose to concede free trade with any other country than Canada. The utmost that either party there advocates is tariff reduction, and that such reduction will be very cautious and gradual is made clear by the fact that President Taft has just vetoed all tariff changes except the reciprocity treaty.

This point being disposed of let us ask which way the present government is heading? At the recent Imperial Conference the Canadian premier asked, and was granted, power to denounce the favored nations treaties by which twelve or fourteen other nations would be entitled to the same trade advantage in the Canadian market as we propose to give to the United States. What is the "favored nation" principle? It is an agreement between two nations by which they mutually pledge themselves not to give any other nation better trade terms than they give to each other. Now the United States has never admitted, and does not now recognize, the favored nation principle at all, as interpreted by Great Britain, and such being the case what is the Government's object in denying to these dozen countries the present trade conditions unless it is to join the United States in excluding the commerce of these nations by tariff? Remember that the treaty with Germany was denounced, not on this ground, but because Germany denied to Canada the right to give the Mother Country a preference.

Protectionists Make No Pretence.

Now the protectionist party in Canada makes no pretence of any other purpose than to exclude other countries from the trade in such products and manufactures as Canada can furnish with advantage at home. But Sir Wilfred Laurier has professed ever since he entered public life to aim steadily at achieving free trade. If freer trade is the purpose of the agreement and if it is good to have an unrestricted exchange of farm products with the United States, why should we not have an equally untrammelled interchange of farm products, etc., with other countries? If one extra free market is good surely twelve extra free markets are better, and a German potato or an Argentinian sheep should be just as welcome as an American sheep or potato. On what just ground do we invite the one and repel the other?

But these are not the only points on which the country is entitled to a more definite statement of intention. Anyone who has studied present day international economics cannot deny that this wholesale denunciation of the favored nation treaties will knock a prop from under the poor old Mother Country, which has had such a struggle for generous trade treatment among the protectionist nations of the world. Who can doubt that when these dozen treaties expire, and the question of terms is raised, Britain's mouth would be stopped if the example of her own daughter nation in taking the selfish American view could be quoted against her. That this is not a mere supposition is proved by the fact that to this day Great Britain has not been able to come to an understanding with Germany since that treaty was abrogated at the instigation of Canada.

Reciprocity Must Determine Canada's Tariff Policy.

We thus see that Canada cannot halt at the point where this agreement begins. Our tariff policy with the entire world must be determined by this step. We cannot, if we would, allow the greater problem of world relationships to be evaporated into petty questions of the trade in beans and peanuts between Canada and the United States.
